# Municipal Accounting and Municipal Finance\*

Accounts Must be Conducted on Sound Basis—Application of Accounting Theory to Municipal Requirements — “Setting-Off” Income Against Outgo—Finances Can be Improved by Better Methods

By ROBERT J. RITCHIE PATERSON

Ritchie, Paterson and Co., Chartered Accountants, Lethbridge and Medicine Hat, Alta.

IN addressing myself to the general subject of Municipal Accounting I have concluded that something might perhaps be gained by an abstract treatment of it rather than by being specific in the sense of a review of its accounts. The subject matter of my remarks naturally divides itself into two parts viz: (1) Municipal Accounting Theory, and (2) Its practical application to Municipal Finance.

The first does not necessarily embrace the second and can stand alone. The second, however, “Municipal Finance” without the first is as a rudderless ship or, without it in any degree other than that of its highest available efficiency is as a ship having an impaired directing force or, yet again, without an equally high human ability to fully grasp and intelligently comprehend the utility and purpose of such directing force, then the rudderless condition becomes more or less existent.

In entering this field of accounting we come in contact with that of governmental bodies and the outstanding distinctions recognizable in contrast with that of the more generally known commercial field are first, the absence of capital and secondly, the absence of the principle of profit-making.

## Capital Requirements

The fact of the absence of capital having been mentioned we will proceed to investigate this phase, first in the sense of fixed capital.

It is immediately admitted that in every municipality there are expenditures which should obviously be capitalized for a more or less extended period in accordance with their specific nature. From what fund sources then are these expenditures made possible? The answer is to be found in one of the only two methods open to all municipalities by which their financial requirements can be supplied, viz, loans. These loans are of two classes “long-term” and “short-term.” The former, usually taking the form of debenture issues, may be looked upon as the substitute for fixed capital, while the latter may be looked upon as the substitute, or one of the substitutes for working capital. The second and remaining method is supplied by the levying of taxes.

Inasmuch as a municipality's prime function is to render certain well defined and recognized services to its citizens annually at cost, on the basis of a charge therefore, there is thereby involved the preparation of this annual cost in a form variously known as “the estimates” or “the budget.” Arising from the fact of the absence of working capital on the part of the municipality, wherewith to carry out its functions until such time as the actual annual cost has been specifically determined, resort is had to estimating what that annual cost may be and this is embodied in a document known as “the estimates.” Once this annual estimated cost has been determined it assumes a very practical form in that it is ratably distributed against the citizens and in the form of taxes continues to function for the purpose of providing the financial means of satisfying the indebtedness which the incurring of the annual actual cost entails. Mark the vital distinction between its functions as “estimates” and its function as “taxes.”

The municipality's undertaking to render certain services to its citizens involves, at the outset, and from time to time thereafter, the incurring of expenditures which, if viewed from the standpoint alone, of their full inclusion as a part of the annual cost of the year in which they are in-

curred, immediately designates them as of an extraordinary classification. Where these extraordinary expenditures are of a more or less enduring nature and continuing utility, and the cost is of a magnitude that fully justifies, in the light of the immediately preceding reservations, the easing of the burden of their acquisition over a period of years, thereby obligating taxpayers of ensuing periods largely on the ground of their participation of equal benefit, then in such cases, the issue of debentures appears to be not only justifiable but imperative.

The annual cost for municipal services would include the fixed charges under such extraordinary expenditures, consisting of interest thereon and provision for depreciation and not the amount of the extraordinary expenditures themselves.

We have now established the following facts:—

(1) That a municipality has two distinct types of expenditure: (a) Those incurred in one fiscal period for which final provision falls to be made in several succeeding fiscal periods; (b) those incurred and for which provision is made in the same fiscal period. Note: Provision being used in the sense of taxes.

(2) That a municipality's financial obligations are capable of immediate satisfaction out of funds provided in one of two ways: (a) Proceeds of loans (debenture issues); (b) taxes and ultimately solely by the latter.

It seems right and proper that in all respects and at all times this clear-cut distinction in municipal expenditures and the sources providing for the satisfaction of these, should, in their entirety, be preserved in its accounting and in the presentation of its accounting data.

If we so follow the distinction which these two facts bring out, we find a certain relationship existing between the facts themselves, viz: In the (a) and (b) of each, or to be specific, the extraordinary expenditures are usually directly related to the debenture issues and the ordinary expenditures are, more or less, directly related to the taxes. Let us therefore identify these two classifications by the distinctive funds with which they have to do, viz: “Debenture” and “taxation.”

In all municipalities we have to take account of the fact that while a certain amount of “cash” transactions take place, there is for various reasons, quite a preponderance of “credit” transactions. The levying of taxes alone establishes this condition. As a consequence, all accounting provisions must be drawn having regard to this very important factor.

## Debenture Issues

Under “debenture” funds there would fall for record the following information in balance sheet (asset and liability) accounts only.

(1) (a) Creation of the debenture debt. (b) Redemption of the debenture debt.

(2) (a) Proceeds from debenture debt. (b) Disposition of such proceeds.

It will readily be seen that an absolute accounting should at all times be possible by the off-setting of either (a) or (b) of 1, or a combination of these against (a) or (b) of 2, or a combination of these. This is a very desirable and essential feature of municipal accounting, in my opinion, especially in a public presentation of it. It should always portray strikingly and succinctly the following:—

The vested interests of the municipality, capable of historical narration.

The bonded debt incurred against this.

\*An address before the Union of Alberta Municipalities' Convention, Lethbridge.

Whether or not the proceeds of such bonded debt has been fully expended and if not, how held.

The redeemed equity of the municipality in such vested interests and where possible an approximated present value of that equity.

Under "taxation" funds there would fall for record effecting revenue and expenditure accounts (1) as well as balance sheet (asset and liability) accounts (2) the following:—

(1) (a) The various kinds of taxes levied. (b) The various kinds of specific expenditures for which these various taxes were levied. (By purposes of levy.)

(2) (a) (1) The various assets which the levy of taxes and their collection or non-collection create. (2) Those assets created out of more or less specific short-term loans. (3) Those assets created unconsciously, at least in a financing sense, without any specific provision by loan or otherwise being made for them.

This latter, strangely so, is unfortunately fairly common.

(2) (b) The various liabilities created by virtue of the existence of (1) (b) and (2) (a 2 and 3).

The foregoing remarks have been expressed from the viewpoint of the municipality proper. The question of the accounting treatment of public utilities within the jurisdiction of the municipality need only vary in degree and not in principle in the generalities given.

This concludes the first part of my remarks.

#### Application of Theory

In regard to municipal finance and the application of municipal accounting theory thereto, we enter an entirely different atmosphere from that which we have just left. Finance as applied to municipalities may be generally and broadly defined as "ways and means." "Ways and means" may be again transposed to mean "dollars and cents" or "cash."

We have acknowledged in the first part that many of the transactions must necessarily be of a "credit" nature. This is, under some circumstances not altogether unusual, diametrically opposed to the "cash" condition. When these circumstances are operative and even when not, and again because of the lack of working capital within itself, the dictum of the municipality conservatively and efficiently administered must necessarily be "Have the cash from your taxpayers, or equivalent assurance that you will have it in time to meet your financial obligations at maturity, before you incur any form of indebtedness at all."

So far as "debenture" fund operations are concerned it is particularly imperative that funds be actually in hand before this class of expenditure is launched upon at all, for the reason that its general admission to this classification precludes any other form of financing other than by specific loan.

As regards "taxation" funds, financing here resolves itself into the framing of "the estimates" upon a "cash" basis throughout, to the extent of levying a rate which will yield directly, within the fiscal period, sufficient cash to fulfill the obligations incurred on behalf of that fiscal period.

In bringing these remarks to a close I desire to record my personal pleasure at being present, as a guest, at your sessions and, to give expression to the realization that the deliberations of this convention are set towards grappling with the unquestioned serious financial situation in which every municipality, not only in this province but in all the western provinces, finds itself.

So far as the Alberta situation is concerned it is worth bearing in mind that the introduction of annual tax sales has not of itself developed this serious aspect, but has merely served to pointedly reveal one of a few years standing.

A solution must and will be found and at least so far as the larger towns and the cities are concerned it can only satisfactorily be reached, in my judgment, through a revision of the prevailing fixed charges upon the existing bonded debt. I would therefore commend to your serious

deliberations the evolving of some acceptable plan having this in view as the objective to be reached.

In conclusion permit me to remind you of the pre-requisites to sound, practical, municipal finance which I have endeavoured to trace for you in these remarks coupled with the assurance that they are as relative to the smallest as to the largest municipality in the land.

(1) The fundamental and structural basis—An efficient and comprehensive accounting.

(2) The human ability to interpret and literally read the message which such an accounting condition has to convey.

(3) The imperative necessity of living within your annual estimates as cash drawn.

(4) The incurring of no extraordinary expenditure which has not been previously provided for by specific loan and not without having first given a due regard to the ability, present and conservatively prospective, to redeem such loan, through taxes, at maturity.

### \$6,000,000 IN SOLDIERS' INSURANCE

#### Schedule of Rates Under Soldiers' Insurance Act—Business is Reported in Increasing Volume

UNDER the Soldiers' Insurance Act, passed at the 1920 session of Parliament, \$6,000,000 of business has been written since it went into effect on September 1. The total for the first three months was \$3,282,000, so that applications in December and January were more numerous. The first year of operation is necessarily experimental, and some changes have been urged. The system as a whole, however, appears to meet legitimate needs. The schedule of rates in the Act is as follows:—

Age.	PREMIUM RATES					Age 65.	Single Premium for \$1,000 Insurance payable at death.
	Monthly Rates for \$1,000 Insurance Payable at Death.						
	Life.	10 years.	15 years.	20 years.	Payable till		
18	\$1.04	\$2.48	\$1.82	\$1.54	\$1.08	\$237.72	
19	1.06	2.52	1.86	1.56	1.10	242.22	
20	1.08	2.56	1.90	1.58	1.12	246.92	
21	1.10	2.62	1.94	1.60	1.14	251.80	
22	1.14	2.68	1.98	1.64	1.18	256.86	
23	1.18	2.74	2.02	1.68	1.22	262.06	
24	1.22	2.80	2.06	1.72	1.26	267.52	
25	1.24	2.86	2.10	1.76	1.30	273.12	
26	1.28	2.92	2.14	1.80	1.34	278.98	
27	1.32	2.98	2.20	1.84	1.38	284.98	
28	1.36	3.06	2.26	1.88	1.42	291.20	
29	1.40	3.12	2.32	1.92	1.48	297.64	
30	1.44	3.18	2.38	1.96	1.54	304.30	
31	1.48	3.26	2.44	2.02	1.60	311.22	
32	1.52	3.34	2.50	2.08	1.66	318.28	
33	1.58	3.42	2.56	2.14	1.72	325.60	
34	1.64	3.50	2.62	2.20	1.78	333.18	
35	1.70	3.58	2.68	2.26	1.86	340.98	
36	1.76	3.66	2.74	2.32	1.94	348.98	
37	1.82	3.76	2.82	2.38	2.02	357.26	
38	1.88	3.86	2.90	2.44	2.12	365.76	
39	1.96	3.96	2.98	2.50	2.22	374.48	
40	2.04	4.06	3.06	2.56	2.32	383.46	
41	2.12	4.16	3.14	2.62	2.42	392.68	
42	2.20	4.28	3.22	2.74	2.56	402.08

## BUILDING PERMITS REGISTER FURTHER DECLINES

BUILDING permits issued in 56 cities showed a further decrease during January, 1921, as compared with the preceding month, the total value falling from \$4,654,479 in December to \$2,372,512, a decline of \$2,281,967, or 49 per cent. All the provinces except Manitoba participated in this decrease, the reduction of \$925,590 in Ontario being the largest. As compared with the figures for the corresponding month in 1920, there was a decrease of \$1,580,366 or practically 40 per cent., the value for January, 1920, having been \$3,952,878.

Of the larger cities, Montreal and Vancouver registered reductions in the value of the permits issued as compared with December, with increases over January of last year. Winnipeg and Edmonton showed increases in both comparisons, but, on the other hand, Toronto reported losses in both cases. The following are the details, as compiled by the Department of Labor:—

CITY	DEPARTMENT OF LABOUR FIGURES

## RESULTS IN WEATHER INSURANCE

At the annual meeting of the Western Ontario Weather Insurance Co., held in Woodstock on February 10, H. Hems-worth, of Listowel, was elected president. There was a large attendance of officers and policyholders from all parts of Western Ontario, and the reports read were most satisfactory. The loss claims paid by the company showed a total of over \$125,000. The company paid out for the storm of November 2, 1919, which came under the past year's business, over \$100,000.

## REMUNERATION FOR BANK SERVICES

"In spite of the cost of everything else having risen there is no increase in the charges made by banks to their customers, notwithstanding the very great additional expense which has been imposed on the banks by reason of the high cost of everything," said A. E. Phipps, of the Imperial Bank, at a gathering of their managers recently. "It is true that there has been some effort recently to raise rates one-half of one per cent. here and there owing to tightness of money, but it cannot be said there has been any real increase in interest rates, which are ruling far below those in the United States. Apart from increased turnover, the only source from which we can look for increased earnings is minor profits. This question is one that has always interested the executive officers of the banks, but in many instances has not been of much interest to branch managers, and a cursory examination of some of our branches during the early part of last year indicated that in many instances a great deal of work which should properly have been paid for was being done for nothing. The excuse is usually 'competition.' Head office officials know the managers who can be depended upon to obtain proper rates of exchange and satisfactory remuneration for services rendered, and, unfortunately, others who never seem to be able to do so but meet arguments with the excuse that 'the customers will not pay,' and that 'the bank across the street will do it for nothing.' The question of collecting minor profits depends in the majority of cases on the character of the manager."

## ACTION AGAINST BANKS FAILS

In the Superior Court, Montreal, on March 3, Justice Macleann held that no act of the Royal Bank of Canada or the Hochelaga Bank was the proximate cause of any loss to the estate of the late Isais Hurltubise, jr. The action was one in which Joseph Hurltubise and others in their quality of testamentary executors of the late Isais Hurltubise, jr., claimed from the Royal Bank of Canada the sum of \$32,061. This amount was the price of a property sold to the Sun Life Assurance Company by the estate (\$25,750) in March, 1914, plus \$6,361 interest.

The price was paid by a cheque of the Sun Life Assurance Company of Canada, dated Montreal, March 12, 1914, payable to the order of the estate Isais Hurltubise, jr., drawn on the Royal Bank of Canada, Montreal, and on the following day—plaintiffs said, without their knowledge—the cheque was deposited in the Hochelaga Bank, endorsed, "Estate Isais Hurltubise, jr., Maurice Loranger, Proc., Maurice Loranger, Adm." Plaintiffs in their action alleged that the endorsement was unauthorized, and sought, therefore, to hold the Royal Bank liable for the amount. The Royal Bank, in defence, proceeded by action-in-warranty against the Hochelaga Bank, pleading that the cheque was presented to it through the clearing house by the Hochelaga Bank, endorsed by the latter, and, relying on this endorsement, the cheque was paid through the clearing house in accordance with the usual banking custom. The Hochelaga Bank defended the principal action, and its pleadings were maintained as set out in the court's judgment, which declared that plaintiffs had not established the material allegations of their declaration.

## You Can Depend On Them

**T**HE best lubricants and the least expensive—quality for quality—bear the Imperial brand.

From the list at the right you can choose a particular grade of oil for every requirement of your mill or factory. All grades are of uniform high quality. Ample supplies are readily available at any time.

The regular use of Imperial Lubricants increases the production capacity of machinery, prolongs the life of machinery and saves money in lubricating costs. Hundreds of Dominion industries depend altogether upon Imperial Lubricants for profit-making plant operation.

### Lubrication Insurance

*We acknowledge your signed agreement covering our requirements to August, 1921. It brings with it the feeling of security that your contracts always give.*

—Chicoutimi Pulp Company.

### Money Saved—Requirements Met

*We saved a great deal of money last year by following your selection of lubricating oils for machines where the requirements were unusually severe. We appreciate this service—also your promptness in delivering emergency orders.—Port Arthur Shipbuilding Co., Ltd.*

Imperial Lubrication Engineers will gladly prescribe for your plant. Write to 56 Church St., Toronto.

ANOTHER SURPLUS FOR DOMINION IN FEBRUARY

Revenue was Lower, but Disbursements Showed Larger Contraction—Gross Debt Decreased, While Net Debt was Higher by Four Millions

**A** REDUCTION of more than \$4,000,000 is shown in ordinary revenue of the Dominion government for February, but, as ordinary expenditure was also lower by about \$8,500,000, a more substantial surplus is shown for the month. As compared with February a year ago, the figures also reveal more favorable conditions. Revenue in 1920 was somewhat higher than for the same period this year, but a large contraction in disbursements is shown.

With but one month more to go, the government stands to finish its fiscal year with a handsome surplus. For the eleven months revenue exceeded expenditure by about \$85,500,000, while in the previous period the margin was in favor of receipts by only \$18,000,000. The following table gives the details of receipts and expenditures, together with an account of the public debt:—

PUBLIC DEBT		1920		1921

POST-OFFICE SAVINGS BANKS

Withdrawals from the post-office savings banks in December last, while exceeding deposits by a substantial sum, were about \$64,500 below the figure for the previous month. Deposits were about \$84,000 lower than in November, but more than \$279,000 was transferred from the Dominion Government savings banks, so that the balance at the credit of depositors was only \$22,000 below the previous month. The following are the December details:—

Dr.	DECEMBER	Cr.
BALANCE in hands of the Minister of Finance on 30th Nov., 1920	\$ cts. 29,156,896.65	WITHDRAWALS during the month..... 789,540.90

ADVERTISING SAFETY DEPOSIT BOXES

Safety deposit boxes in small branches of banks are one of the newer developments in banking, which is partly due to the wide distribution of securities. How to bring these to the attention of the public is one of the manager's problems. B. E. Young, manager of the Yonge and Ann Streets branch, Toronto, of the Imperial Bank, said recently: "I find lettering on the windows the best form of advertising for the safety deposit department. The initial expense for this is the only expense and the advertisement is permanent. It speaks day and night to all passers-by." Mr. Young has in a short time established a large clientele in this department.

IMMIGRATION STILL INCREASES

Immigration to Canada, from April, 1920, to January, 1921, with the changes from the corresponding months of 1919-20, was as follows:—

	1920-21.		Totals.	% of inc.
	British.	U.S.A. countries.		
April	6,229	734	13,287	18
May	12,414	5,353	19,611	92

<b>Totals</b>	<b>68,020</b>	<b>41,831</b>	<b>22,289</b>	<b>132,140</b>

**WHOLESALE PRICES FELL IN FEBRUARY**

The index number of wholesale prices, constructed by Professor H. Michell, of McMaster University, Toronto, based on forty commodities, twenty foodstuffs and twenty manufacturers goods, stood at 197.8 for the month of February, showing a decline of 6.4 per cent. from the previous figure, of 212.6 for the month of January, and a decline of 34.3 per cent. from the peak of 298.3, reached in May, 1920.

Among the foodstuffs, declines were registered in flour, beef, lard, whitefish, rice, potatoes and eggs, while small advances were shown in cheese and granulated sugar. Among manufactured goods, declines were registered in wool, cotton, hides, leather, silver, lead, tin, zinc, prepared paints, coal oil, oak, maple and newsprint. There were no advances in this section.

It is to be noted that the great staples of iron, steel and oil are still very high, having declined very little, while lead, copper and tin have fallen considerably. Rubber and silver are now below the level of the average price of the decade, 1900-1909, while cotton is only one cent a pound above that price.

**CANADIAN GOODS AND THE WORLD MARKET**

The above is the title of a 57-page booklet just issued by the Canadian Bank of Commerce, giving a brief economic description of each province, and some statistics of production and trade. A preface says:—

"This booklet has been prepared as a statement of the industrial situation in Canada from the standpoint of production and trade, for the information of prospective importers of Canadian goods and of capitalists in other countries seeking a profitable field for investment.

"It is felt that Canada, as a whole, needs little further advertisement, and that the greater the extent of the country to which attention is directed, the less distinct is the impression conveyed. In order, therefore, to supply what it believes to be a real need, the Canadian Bank of Commerce offers to the public interested a brief summary of the situation in each of the Canadian provinces, showing the extent of the natural resources, the manufactured products and the relative importance of the native industries in each, and suggesting lines upon which the further development of resources and the location of new plants may be expected to follow.

"In this connection, the bank has endeavoured to avoid any unfair discrimination among the provinces or industries mentioned. It has also taken care to obtain the latest and most reliable information and statistics on the subject, although it cannot assume responsibility for the correctness of the information obtained. The inadequacy of any pamphlet, limited to a readable length, to cover the whole situation is of course admitted. The purpose of the present booklet is to throw light from a slightly different angle upon the resources and industrial activities of Canada."

# Recent Mineral Developments in Alberta

Province Lacks Those Deep-Seated Rocks so Productive of Minerals in Ontario—Some Mineral Prospects in North, However—Petroleum Discoveries of the Past Year—Bituminous Sands

By JOHN A. ALLAN

Professor of Geology, University of Alberta

ALBERTA is so situated geologically that metallic minerals can never be expected to play a foremost role in the industrial development of this province. Metallic minerals are as a rule associated with deep seated or igneous rocks, or with rocks which have been affected by igneous intrusions and extrusions, or in regions in which the rocks have been altered by mountain-building or other diastrophic movements.

The valuable deposits at Sudbury, Cobalt, Porcupine, Lake Superior, Flin Flon, or Coppermine River are formed in the rocks, which belong to the earliest eras in geological history, collectively known as Pre-Cambrian. These rocks traverse only the extreme north-eastern corner of Alberta north of Lake Athabaska, but underlie all of that largely unexplored territory east of the Mackenzie River valley. The mineral possibilities in that expansive territory tributary to Alberta are great but as yet unknown. Iron occurs north of Lake Athabaska; copper sulphides occur between Great Slave and Great Bear lakes; lead and zinc sulphides and gold in the Great Slave district and native copper on the Coppermine River on the Arctic slope. During the past two summers hematite (iron oxide) deposits have been examined in a general way on both sides of the lower Mackenzie River. A high grade of hydrated iron oxide is known to lie north of the upper stretches of the Peace River, while many optimistic reports are brought out of the north regarding mineral deposits along the upper stretches of the Liard River. None of these deposits are being developed, but all lie within the future mineral possibilities of the hinterland.

On the western side of Alberta within the Rocky mountains and in the inner foothills are several occurrences of minerals, the value of which has not yet been determined. In the Crows Nest region are magnetite shales, high in titanium dioxide which may be proven to be commercially valuable. Phosphatic rocks are widely distributed from the 49th parallel to the Liard River within the front ranges of the Rocky Mountains, but no beds have yet been found rich enough to be mined. A small copper sulphide deposit has been mined in the Bow valley west of Banff, and plans are anticipated for further development during next summer. A tale deposit is being prospected on the interprovincial boundary at Vermilion Pass west of Banff. The quality of this tale is excellent. Mica does not occur in Alberta but a high grade of muscovite has been investigated on the Finlay, the northwestern branch of the Peace River. Plans are now being made to develop this deposit next season.

## Coal

The mineral resources of first order importance in Alberta include coal, natural gas, petroleum, bituminous sands, salt, gypsum, and clays. The coal resources of Alberta have been studied in greatest detail, and are therefore fairly well defined. It is estimated that the province of Alberta contains about fifteen per cent. of the coal reserves of the world, and eighty-seven per cent. of the coal reserves of Canada. Approximately ninety-six per cent. of the coal reserves of Canada lie west of the Great Lakes. Only about sixty million tons of coal have yet been produced. Coal was first reported from the Drumheller district in 1789 and coal was used in Edmonton in 1841. Coal mining operations have been carried on continuously since 1881; in that year 1,500 tons were produced chiefly from the Lethbridge basin.

The output has increased annually and in the year 1920 exceeded seven million tons.

All grades of coal are found in Alberta, from moderate grades of lignite to high grades bordering on anthracite. This fact is too frequently overlooked when Alberta coal is discussed. The two most important factors in considering coal deposits are age and pressure. Both factors have to be considered when Alberta coals are referred to. The coal seams in Alberta occur in three geological ages, so that in general the older coals are of the higher grade on account of their age, but on the other hand, the mountain-building movements which uplifted the Rocky mountains on the western side of Alberta have exerted a greater pressure on the coal seams to the west, so that the grade of any coal seam increases towards the west. There are several coal basins in Alberta widely distributed, all of which are producing coal of different grades. There are basins of higher grade coals within the front ranges of the mountains which are not yet developed. These include those basins at the head of Highwood and Sheep rivers in southern Alberta, and the Smoky River district in northern Alberta.

The provincial government under the direction of the Hon. J. L. Cote has instituted at the University of Alberta in Edmonton, a research department in which the better preparation of coal for market, the storage and the utilization of the lower grades of coal are being investigated for the purpose of increasing the efficiency as well as the markets for the Alberta coal.

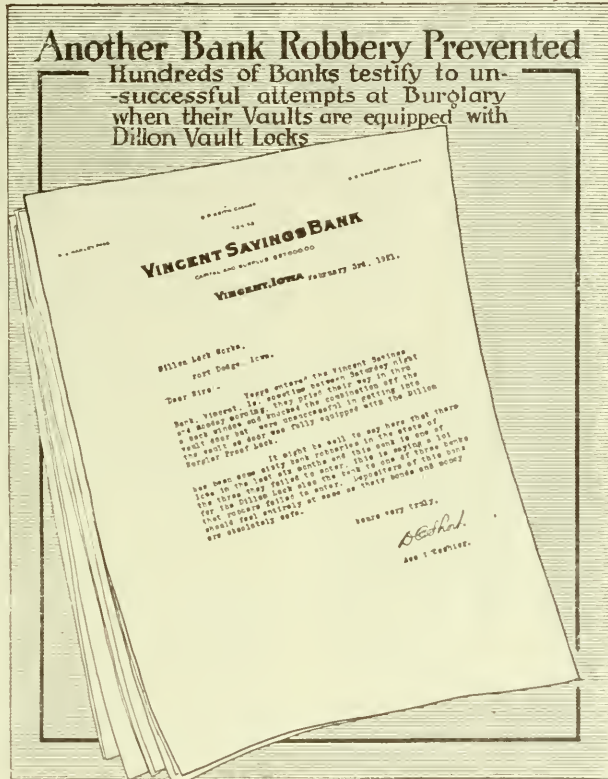

## Petroleum

The attention of the oil producing world has for the past few months especially been turned towards Alberta. Although oil and gas seepages were common, and a small quantity of oil was obtained in a well drilled in south-western Alberta, south of the Crows Nest about 1898, little interest was taken in the oil possibilities of this province until 1914. In May of that year a light oil of gasoline grade was struck in the Turner Valley west of Okotoks, 35 miles southwest of Calgary. This discovery precipitated a boom, in which about five hundred companies were formed. Less than two dozen of these companies ever began drilling operations before the boom "broke" in August when the war broke out. Most of the oil companies soon disappeared, and in 1919 less than a dozen were active. It was not until last year that a systematic field search was begun to find the most likely areas to contain petroleum. These field investigations were carried on by real geologists under the direction of large petroleum operators and corporations.

There is a tendency at such a time as this, when geological information is in great demand, for a type of man to appear who is ready to assume the role of a geologist no matter how disqualified he may be to give such information. He is present in Alberta to-day as he was during the oil excitement of 1914. A word of warning is necessary to the conscientious investor that he should be careful not to accept geological information that is given by any other than a qualified geologist.

The problem of working out the most suitable geological structure in Alberta and the Mackenzie Basin is extremely difficult on account of the scarcity of outcrops and the thick veneer of glacial debris and expensive muskegs. It therefore, requires the attention of the best trained geologist to work out the correct structure and to give the most reliable information on petroleum prospects. Development work

**Another Bank Robbery Prevented**

 EQUIPMENT FOR EVERY BANK NEED.

must of necessity proceed more slowly than it would if the structure could be readily determined. A word of appreciation is due to the Federal Geological Survey for the general information which that body has given to the public through early reports on the district that is now being more thoroughly investigated at the present time.

Systematic field work has been carried on during the past summer by about a dozen geological parties, but much of the information obtained can not be made public as the work was carried on for private companies. About twenty drilling outfits were at work a greater part of the year. These are distributed from the 49th parallel to Fort Norman which lies on latitude 65 degrees. Most of the drilling operations was carried on by the Imperial Oil Co.

#### Fort Norman Discovery

It was in the well drilled by this company forty miles below Fort Norman that oil was struck about August of this year. This is the first discovery of oil in quantity of commercial quality north of Calgary. The oil from this well is of a very good quality and has a gravity of about 37 degrees Beaumé which represents about 0.84 specific gravity. The color of the oil is a dark olive green and according to tests which have been made on it, there is no asphalt base present. The quantity of oil at the well was not measured, but the flow was reported to be intermittent with a pressure sufficient to carry it over the top of the derrick.

The locality of this well lies about 900 miles northwest of Edmonton and about 1,200 miles by the regular route travelled. This discovery of oil is important in that it proves there is a reservoir of undefined extent in that region, but for some years to come it can not be regarded as a commercial product on account of transportation difficulties. It is however, hoped that this discovery will encourage earnest, energetic and sane development of the many other districts more accessible to transportation which are considered favorable for the production of petroleum.

The geological structure of this region is such that upwards of 300,000 square miles are underlain by formations suitable for the accumulation of petroleum in Alberta, the Mackenzie Basin, and parts of Saskatchewan and Manitoba. So far as the geological studies have been carried in this area there seems to be several localities where conditions are more favorable than in others for the accumulation of petroleum, but these can be only proven up by drilling operations. At the present time wells are being drilled in several of these districts. The fact is generally overlooked that the Okotoks field, southwest of Calgary is the only producing field, and that during the past year about 13,000 barrels of oil were produced. There is situated here a refinery and an absorption plant which extracts gasoline from the natural gas.

The problem has not yet been solved and it is yet too early to be over-optimistic and to claim that great commercial fields of oil have been discovered in this part of Canada. However, indications are becoming more favorable as the months go by, and the probabilities are that development during 1920 will result in determining a definite oil reserve.

The problem of proving up any district in Alberta is a slow and expensive one, and one that can be carried on only by large corporations who are willing to spend money in any district where there is a reasonable chance of results. Much adverse criticism has appeared recently in the press against such a company as the Imperial Oil, but this criticism when traced to its source, has arisen from persons with biased opinions, or with narrow views who do not understand the unfavorable conditions under which development work must be carried on for petroleum in Alberta and the northland. We are anxious to know what possibilities there are in the oil resources of this part of the Dominion, but it would be a very, very long time before these resources would be determined if the development is left to the direction of the speculating oil companies or to the biased objectors. Encouragement must be given to the large companies who are willing to invest money in drilling, and dis-

couragement to the speculator. At the present time the chances are against the small companies with small holdings, but in favor of the large companies with large holdings, widely distributed over the whole territory.

Preparations are now being made by the Imperial Oil Co. to establish an aerial service next summer from Peace River down to Great Slave Lake and Fort Norman. This will enable the company to get their men and instruments into the field in a short time and will insure a long drilling season at both Fort Norman and at Windy Point on the north shore of Great Slave Lake where the second drilling outfit of the same company was erected late last summer.

#### Bituminous Sands

Interest in the bituminous sand deposits of Alberta, which are exposed along the banks of the Athabaska River below Fort McMurray, has increased rapidly during the past few months. Samples are being tested in many laboratories in the United States and Canada from coast to coast and also in England and even in the Hawaiian islands.

It is known that the bituminous sand formation underlies several thousand square miles, although only a small part is accessible, that the formation varies from fifty to two hundred feet in thickness, that the bitumen content varies from twelve to twenty-two per cent. and that tests on these sands have produced from twenty to thirty-five gallons of crude oil per ton. The real problem in the commercializing of this great resource of oil is to find a process which will extract the bitumen from the saturated sands on an economic scale. Laboratory processes are known, but to date none of these have been proven to be commercially economical. It is, however, hopeful that a satisfactory process will be found from some of the numerous tests which are being conducted. When such a process is found a very large reserve of crude oil will be available.

#### Rock Salt

Believing that rock salt should occur in northern Alberta, the provincial government sunk a well at Fort McMurray. The test was successful and a bed of rock salt was encountered. The development of this resource in the near future is assured. Beds of Gypsum rock are associated with the rock salt.

The development of the mineral resources of Alberta, excepting coal, is still in its infancy. Realizing the great future that is almost assured this province, the provincial government about a year ago, created a research department at the University of Alberta in which many problems related to coal, bituminous sand and other natural resources are being investigated.

#### INCOME TAX DECISION

The first Division Court in Ottawa, on an appeal by the income tax authorities, has reversed the judgment of a magistrate at Sault Ste. Marie and pronounced in opposition to the ruling of Judge Gunn, of Ottawa, who held that the Income War Tax Act gave no jurisdiction to magistrates. In the case in question the magistrate at Sault Ste. Marie dismissed a charge of falsifying income tax papers laid against a physician named Sinclair, although the physician made returns showing his net taxable income to be \$1,480, which would leave him tax free, when it was shown that his net taxable income really was \$16,685. The magistrate gave it as his opinion that the physician had not intended to deceive the department.

In reversing the judgment on appeal, Judge Hall says: "Can any reasonable man conclude that it was an accident that caused the respondent to make a return showing a gross income of \$6,392, which, after deductions, left him tax free, while in fact his taxable net income was \$16,685.14, upon which he actually paid a tax of \$1,525.41?" Judge Hall fined the respondent \$2,500.

## LIFE INSURANCE vs. BANKS

Many of the Latter Have Failed in Canada, but Public Has Not Lost Through Life Companies

"THE popular impression that banks are emblematic of everything that is safe and sound is a common but erroneous one," said W. J. Bell, of the Sun Life Insurance Co., Guelph, Ont., addressing the Life Underwriters' Association in that city a few days ago. "There are some banks which are far from being either safe or sound, while, as for the security which they afford depositors, the very best of them cannot justly be compared with well-managed life insurance companies."

The speaker outlined the size and strength of the large banks of the world. The strongest of all, he said, is the National City Bank of New York, with a surplus of over \$66,000,000. Yet right in New York there are three life companies with larger surplus. Referring to Canada, Mr. Bell said:—

## Ninety-Three Banks Chartered

"In comparing life insurance conditions with the laws governing Canadian banks, there are a few points to which I particularly wish to draw your attention: At various times, since the Bank of Montreal commenced operations a little over a century ago, no less than ninety-three banks have been chartered and have done business in Canada. There are now but eighteen banks in the entire country. What have become of the other seventy-five? Perhaps it would be more charitable not to ask. However, having brought up the question, an answer must be furnished. A large percentage of these seventy-five banks failed ignominiously—many of them through the criminal actions of their trusted officers, while a number of the others were only saved from insolvency by amalgamation with remaining banks. I do not mean by this to suggest that all the amalgamated banks were in an embarrassed financial position, although, undoubtedly, many of them were. At any rate, as one of our insurance journals once commented, 'Canada has, unfortunately, been distinguished for more bank failures than any other portion of the King's dominions.'

## Bank Act Amended

"In a letter published in the *Toronto Globe* some years ago the then general manager of the Bank of Nova Scotia, H. C. McLeod, in criticizing the deplorable showing at that time being made by our banks, drew attention to the fact that in the preceding twenty-six years no less than 25 per cent. of our banks had failed outright. And I am glad to say that that gentleman then joined in a campaign which I personally had previously started, having for its object the amending of our ultra-lenient banking laws. It would appear egotistical were I to dwell on this point. Suffice it to say that the most important amendment suggested—that pertaining to an improved method of bank inspection—was adopted by the government and became law, with markedly beneficial results and an immediate reduction in the number of bank failures. I am glad to say that since then the record of our banks has greatly improved, and is at present a creditable one.

"Now, while there were so many bank failures, with their attending losses, how much money did the public lose through the insolvency of our life insurance companies? Not one red cent. It is hardly necessary, particularly in a gathering such as this, for me to dwell upon the fact that never at any time has a policyholder lost a nickel through the bankruptcy of a Canadian life insurance company. That fact is common knowledge. I feel, therefore, that it may at once be assumed that for stability and safety, our life insurance companies distinctly outrank our banks. The institution of life insurance is not on the defensive, nor have our companies a reputation to build up—their record for solidity and fair dealing is already fully established, and they are able to point to it with pride."

## BRITISH COLUMBIA REPORTS REVENUE SURPLUS

Capital Account Shows Excess of Assets—Liability Under Guarantees is Sixty-Five Millions

BRITISH COLUMBIA'S public accounts for the year ended March 31, 1920, presented to the legislature on February 11, show a surplus of \$351,388. Total revenue amounts to \$13,861,602. Expenditures on current account were \$11,568,002, and on capital account charged to income \$1,942,268, making a total capital expenditure charged to income of \$13,510,351. Current revenue is \$3,876,212 more than the estimates for the year, while the total expenditure was \$195,388 more than the estimates. The total surplus of assets over liabilities has increased \$22,181,256 to \$23,407,291.

Capital assets total \$43,851,587, including payments from the Dominion capitalized at \$12,462,701, and buildings, roads, bridges and other property valued at \$21,347,503. Capital liabilities, chiefly bonds, are \$34,316,861, leaving an excess of \$9,534,726 of assets. There are also guarantees by the province, authorized to a total of \$73,227,703, of which \$65,407,227 are issued.

Current assets, comprising cash and advances, accounts receivable, etc., total \$13,158,521, and current liabilities in the form of temporary loans, accounts payable, etc., are \$9,376,506, leaving a current surplus of \$3,782,017.

These capital and current accounts do not include amounts due from the Pacific Great Eastern Railway and from the Bank of Vancouver, which are classed as "deferred assets," to a book value of \$10,090,547.

## NOVA SCOTIA'S FIRE LOSSES

Over one million dollars' worth of property was destroyed by 205 fires in Nova Scotia during the three months of October, November and December of 1920. This enormous loss is for the first three months of the provincial year, and is accounted for by J. A. Ruland, fire marshal of the province, in a statement recently issued by him. And the large percentage of these fires were due to preventable causes, or, in other words, due to carelessness. The exact loss in figures was \$1,031,605. They were insured for \$778,752, which is an insurance loss from the underwriters' viewpoint; and not covered by insurance, \$301,843. Three-fourths of the entire amount were accounted for by three fires covering a loss of \$750,342.

Among the causes, defective chimneys, flues and stovepipes are the most to blame, while fires of unknown origin come next.

The following tables were submitted by the fire marshal: In October there were 76 fires of a loss of \$155,316, insurance loss of \$45,095, and not covered by insurance, \$110,221. In November there were 56 fires of a loss of \$143,610, insurance loss of \$130,765, and not insured \$12,845. In December there were 71 fires of a loss of \$782,679, insurance loss of \$603,902, and not covered by insurance \$178,777.

The 205 fires occurred in the following descriptions of properties: Dwellings and apartments, 129; stables and sheds, 14; farm barns, 5; mercantile stores, 12; manufacturing hazards, 10; churches, 2; lumber in yards, etc., 3; garages, 2; automobiles, 4; halls, 3; office buildings, 4; colleges and schools, 3; hotels, 1; asylums, 1; miscellaneous, 11. Total, 205.

The most frequent causes of fire during the period were: Defective chimneys, flues and stovepipes, 38; carelessness with matches, 24; carelessness with hot ashes, 4; open lights and fires, 12; careless smoking, 9; sparks from combustion, 19; sparks on roof, 8; lightning, 8; unknown causes, 35.

The population of Greater Winnipeg is 282,818, according to figures in the 1921 city directory. This is the greatest gain recorded since 1914, and a jump of 10,350 over the 1920 figures.

# Nova Scotia Steel and Coal Company, Limited

## and Subsidiary Companies

### TWENTIETH ANNUAL REPORT

#### To the Stockholders:—

The Board of Directors submits its Twentieth Annual Report of Operations for the fiscal year ended December 31st, 1920, together with the financial statement, and a general report on the conditions of your property.

As anticipated at the beginning of the year, the volume of business for 1920 reached satisfactory proportions, amounting to \$19,558,479.64, as compared with \$6,869,941.90 in 1919.

#### COLLIERIES.

The improved demand for coal which commenced in the Autumn of 1919 continued during the greater part of the year, but perceptible slackening was noticeable in the early part of November, and since that time it has decreased rapidly.

The general shortage of coal in Europe and the threatened strike of coal miners in Great Britain increased the foreign demand very materially, and the Company was able to secure in the early part of the year some very attractive contracts for coal for export. Only a part of the deliveries under these contracts was overtaken, when an embargo placed on the export of coal by the Federal Government resulted in their cancellation and made it necessary to secure other employment for the steamers engaged for this business, the result of which entailed a serious loss to the Company.

It is regrettable that this overseas outlet for coal, which was only secured after a great deal of effort on the part of the Company, was thus interfered with and, we fear, lost permanently.

In the early part of the summer your Directors felt that the demands of the coal trade warranted the opening of an additional colliery at Sydney Mines. The work has progressed favorably, and this mine will by the opening of navigation be in position to produce 400 tons of coal daily.

While for the moment owing to the closing down of the Blast Furnace and Steel Plant the amount of coal being banked is larger than usual, your Directors hope that as soon as navigation opens the demand for coal will enable the Company to dispose of a reasonable amount of banked coal as well as the full output of its various collieries.

The output for the year was 633,845 tons, as compared with 550,965 tons in 1919.

#### IRON ORE MINES

The operations at Wabana were restricted almost entirely to development work and consequently the output of Ore was but slightly larger than last year, amounting to 265,755 tons, as against 213,410 tons in 1919. Of the ore mined, 124,014 tons were shipped to North Sydney. There was also shipped to Europe 12,375 tons, of which 6,752 tons was shipped on a pre-war contract and the balance sold f.o.b. Wabana. While ocean freight rates have fallen very materially, the depression in the Iron and Steel trade in both Europe and the United States has up to the present militated seriously against any considerable business in the export of iron ore.

#### IRON AND STEEL MANUFACTURE.

The demand for iron and steel products, which was satisfactory at the time of the last annual report, continued until Midsummer, when orders ceased almost entirely. The Company had accumulated a sufficient tonnage of unfilled orders to keep the rolling mills in operation until the end of the year. It was, however, considered advisable to shut down the steel plant at Sydney Mines about the middle of November, and up to date conditions have not warranted restarting this plant.

The Railways of Canada are still in need of rolling stock and track material, and it is anticipated that, in the near future, substantial orders will be given out, of which doubtless this Company will secure a reasonable proportion.

Below are the comparative figures of output for the past two years:—

	Tons—1919	Tons—1920
Coke made .....	45,462	90,440
Limestone quarried .....	33,410	64,645
Dolomite quarried .....	2,187	6,970
Pig iron made .....	35,676	73,829
Steel ingots made .....	58,238	114,869
Steel ingots cogged .....	54,645	117,958
Steel billets re-rolled .....	44,468	67,906
Total shipment of finished steel, forgings, etc. ....	44,051	95,087

#### SHIPBUILDING.

During the year the Company completed and delivered two steamers, the "Canadian Miner" and "Canadian Sapper," each of 2,800 tons D.W., under contract with the Canadian Department of Marine, and a similar steamer, the "Volunda," which has been retained for its own business. At present, operations at the shipyard are restricted to finishing the hull of the large cruising yacht contracted for in 1919.

#### COALING PLANT AT HALIFAX.

As a result of the acquisition of the Coaling Plant at Halifax, mentioned in our last annual report, the Company was enabled to dispose profitably of over 85,000 tons of coal for bunkering purposes during the year, only a small part of which business would have been available without these facilities. The operation of the plant has demonstrated that it can take care of the bunkering trade of Halifax, even if it should greatly exceed its present proportions.

#### THE EASTERN CAR COMPANY, LTD.

At this plant 1,462 standard-gauge freight cars, 10 standard-gauge snow plows, and 157 narrow-gauge mine cars were constructed and delivered during the year. On December 31st the Company had on order 200 forty-ton standard box-cars and 500 fifty-ton box-cars, specially equipped for the grain trade, as well as some repair work for the Sydney & Louisburg Railway.

#### ACADIA COAL COMPANY

Following the policy adopted last year when the purchase of the First Preferred Shares of this Company was made, the Scotia Company has been able to secure further substantial holdings in the Acadia Coal Company.

#### CAPITAL EXPENDITURE.

The expenditure during the year on new properties and on extensions properly chargeable to Capital account, amounted to \$889,676.78, the largest item in which was the construction of the Steamer "Volunda," already referred to, and other items were principally in connection with the extensions and development of the iron and coal mines.

#### GENERAL UPKEEP, ETC.

While the same extensive repairs as took place in 1919 were not necessary during the year just passed; the general physical condition of the Company's Works and Properties was well maintained, and were thought advisable, the equipment was improved so that the works would be in a better position to satisfactorily cope with the more difficult conditions confronting the Company in its mining and manufacturing operations.

#### DIRECTORS.

The Directors regret to announce the resignation of Mr. W. Hinckle Smith, of Philadelphia, and Col. D. C. Jackling, of San Francisco, both of whom found great difficulty in attending meetings of the Board in Canada. So far no appointments to these vacancies have been made.

Submitted on behalf of the Board of Directors.

Yours respectfully,

D. H. McDOUGALL,

President.

## AN ASPECT OF THE EXCHANGE PROBLEM

## Restriction of Imports of Non-Essentials Would be a Quick and Effective Remedy—Recovery Will Likely be Slow

BY HUGH E. ARNOLD  
Vancouver, B.C.

WITH the advent of more stringent trading conditions than those that have prevailed during the last few years, and the return to a more normal basis, the time seems to have come when serious consideration must be given to the question of the depreciated Canadian dollar. As long as money and employment were abundant in Canada the public could afford to look, as they did, with a certain complacency upon the adverse exchange that existed between this country and its neighbor to the south, though the situation might occasion concern to the government and the financial community. Clearly, in the wave of economy that is now passing over Canada, as it is over other countries, this factor in the high cost of commodities must be definitely grappled with and some alleviative applied, if one can be found. That this will become an increasingly urgent demand on the part of the public as the retrograde movement in business proceeds is fairly certain.

At the moment of writing the Canadian dollar stands at a discount of about 12 cents in New York. A rough idea of the heavy loss incurred in the course of a year by the people of Canada may be gathered from a brief calculation based upon the figures dealing with our import and export trade with the United States recently issued by Ottawa. These returns show that for the twelve months ended October 31 last our imports from that country totalled \$924,000,000, while our exports there were valued at \$530,000,000, leaving an unfavorable trade balance of \$394,000,000.

## Suggests Embargo on Imports

The problem of depreciated currencies is of course a much more acute one, and a greater obstacle to trade in Europe than in the American continent. The following contribution to the discussion of the European *impasse* in the exchanges made by an influential figure in the financial world of London, cannot fail to be of interest here too. Towards the end of August last, and shortly before the writer left London, *The Times* newspaper published a letter from Mr. Franklin, a partner in the old and very well-known foreign banking house of Messrs. Samuel Montagu and Co., of Old Broad St., London, of which firm Lord Swaythling is the head. This letter states that in the writer's opinion, the best and most effective method of re-establishing as speedily as possible the value of a country's currency against that of another, is for that country to prohibit for a time unnecessary imports from the other one.

Mr. Franklin in his letter cites with approval the example of Norway. That country's currency, though she had not been a belligerent in the late war, had begun to suffer depreciation, and the London papers of August 27-28, 1920, published telegraphic reports to the effect that the Norwegian government had "forbidden altogether the import of a large category of luxury goods, and had established an import council which would advise it on questions arising out of the prohibition. On the forbidden imports list, which may later be increased, are ready-made luxury clothing and textiles, carpets, hats with flowers, feathers, pearls, diamonds and other precious stones, jewellery of gold, silver and platinum, fine glass and pottery, chandeliers and lamps of fine qualities, paintings, furniture upholstered or of fine woods, art works of stone, alabaster, etc., pianos, gramophones, fine furs, luxury boots and shoes, carriages, personal motor-cars and motor-cycles, toys, clocks and fine watches. In connection with these prohibitions a decree was issued against raising the prices of goods of the kinds mentioned which are already in stock." (*Westminster Gazette*, August 27, 1920.)

## Affects Cost of Essentials

It is not enough merely to tax imports of a luxury description. The difficulty is that the rich in Canada—or those that think themselves rich—in purchasing freely these luxury goods almost regardless of cost and the tariff imposts, necessarily force up the price of essentials originating in the United States that are needed by poorer people. Hence a large importation by the wealthy of, say, American motor-cars means expensive domestic hardware for people of smaller means. It is no great consolation to those less fortunately situated people to know that the rich have had to pay a heavy import tax to the Canadian government, and so help to swell the national treasury, when they purchase these things. The receipts from that tax will not be directly applied to righting the adverse exchange, and the discount on Canadian funds will continue in the United States, making imported necessities also expensive.

This was the situation in Great Britain during the latter half of 1919 and the first half of this year. The reckless and inconsiderate buying of American luxury goods by the richer people there was in no small measure responsible for forcing up, or rather keeping up, the high price of a long list of essentials, food products, etc., and thus retarding a return to more normal conditions. A minister of finance in these days is no doubt disposed to view an increase of revenue arising out of luxury taxes and the tariff with a certain degree of equanimity, but he cannot afford to be blind to these other considerations.

## Recovery May be Slow

The course advocated by Mr. Franklin appears to be worthy of serious consideration by the Canadian government. It may be thought by some a drastic remedy, but the circumstances are such as to call for energetic action. It is to be noted that—unless the writer is misinformed—it was fourteen years before the United States dollar recovered its parity after the civil war; and it is perfectly conceivable that a varying but substantial discount on the Canadian dollar may continue for a considerable period unless measures are adopted to remove or mitigate it.

As Canada's chief foreign trade is done with the United States, it is of the first importance that the government seriously address itself to the problem as to how the Canadian dollar can be restored to its par value in relation to American money, and the heavy and protracted loss that is falling on the Canadian people, arrested.

## LOOKS FOR BUSINESS ADVANCE

"Go ahead with full steam, but watch carefully for the danger signals," was the advice given by A. J. Felton, Canadian manager for the Alexander Hamilton Institute, in an address on "Present business conditions and their improvement through the medium of better and higher salesmanship," to the members of the Toronto Kiwanis Club on March 9. "Canada and Toronto for 1921 has a business problem that cannot be ignored, the problem is here now, but it is not half as serious as some men think it is. We must have vision and perspective, and if you are going to wait on the development of industry and business until you see the money, there will be a lot of industries that will never be started. Go back to 1914 and consider what has happened since then. I defy any man to say that seven years ago he could foresee the amount of money raised in Victory Loans. Toronto needs large clubs, a large opera house and many other things to shove the city ahead, and once the projects are commenced the money will be forthcoming."

G. A. Stimson and Co., Toronto, have issued an "Investor's Reference," describing about 80 issues of sterling securities, i.e., Canadian government, municipal and railway bonds originally sold in Great Britain.

## ACTION BY CREDITOR AGAINST ESTATE

## Administrator Who Did Not Plead Insufficiency of Assets Held Liable For Note

THE Saskatchewan Court of Appeal recently held that an executor who in an action by a creditor of the estate does not plead that he has administered the estate in full in his defence, must be taken as admitting assets to satisfy the judgment.

The case was that of Langstaff vs. Langstaff, the facts being that the plaintiff, Helen May Langstaff, carrying on business as the Western Fruit and Provision Co., was the wife of W. F. Langstaff, and brought the present action against Harvey and Maud Langstaff as administrators of the estate of their deceased father, James Dudley Langstaff. At the time of action no letters of administration to the estate of James Dudley Langstaff had issued, but at a subsequent date, letters were granted to F. G. Squirell, who was thereupon joined as a defendant. The plaintiff claimed payment of two promissory notes of \$3,000 and \$2,000, respectively, alleged to have been made by James Dudley Langstaff. The first-named note was admitted at trial, but all the defendants denied the signature of James Dudley Langstaff to the second note. Squirell admitted that he was administrator appointed after the commencement of the action, but did not plead *plene administravit*, or want of assets.

## Doubt as to Signature

The action was tried before Justice Bigelow without a jury and the evidence as to the execution of the note by James Dudley Langstaff was contradictory. It appeared that the note in question was claimed to have been given by James Dudley Langstaff to W. F. Langstaff for an alleged loan. It was dated May 6, 1918, was payable on demand but no demand for payment had been made in the deceased's lifetime. The plaintiff claimed as holder in due course. In support of the plaintiff, W. F. Langstaff testified to the signature of James Dudley Langstaff, and one Meech testified that she saw the note signed. Three witnesses were called as experts in handwriting, who all gave opinions that the signature was not that of James Dudley Langstaff.

## Judgment for Plaintiff

The judgment appealed from is as follows:—

"Although the \$2,000 note is suspicious, and the circumstances justify the administrators in disputing it and insisting on strict proof, after looking at the evidence with great care and thoroughly sifting same, I have come to the conclusion that the note was made by the deceased. Against the opinion evidence of some bankers as to the signature we have the positive evidence of W. F. Langstaff, corroborated by Flora Meech and Ruby Cairns.

"There will be judgment for the plaintiff declaring that the defendants are liable to pay the amount claimed with interest and costs to be taxed in the course of administration of the estate, with liberty to the plaintiff to apply further if necessary.

"As I think the defendants were justified as to the \$2,000 note in seeking a judgment of the Court before recognizing liability, their costs, in so far as the issue on the \$2,000 note is concerned, will be paid out of the estate."

## Plaintiff Upheld on Appeal

On appeal, Haultain C.J.S., says in his judgment:—

"The trial judge, after seeing the witnesses and hearing their evidence, has found for the plaintiff, in spite of the fact that he considered the note in question 'suspicious.' There is ample evidence to support that finding, and I do not think we should be justified in reversing it. The trial judge has directed that the judgment against the administrator should be for payment of the amount due and costs in due course of administration. I think that, as the administrator did not plead *plene administravit* in his defence, he must be taken as admitting assets to satisfy the judgment."

## TRUST COMPANY CASE IN PRIVY COUNCIL

A recent London cable states that the Privy Council was considering the appeal of Miss Lottie Sheehan against the Mercantile Trust Co. The trust company is the administrator of the estate of the late Edman Brown. Miss Sheehan was his bookkeeper, and her claim is that he promised to marry her when his wife died, and gave her a note promising to leave her \$10,000 at his death. Justice Clute gave judgment in her favor. The Ontario Court of Appeal reversed his decision on the ground that Brown's promise to marry her while his wife was living was illegal, and the note for \$10,000 was revocable. In the Supreme Court the Chief Justice, Sir Louis Davies, held that the note was irrevocable, but the other judges, with the exception of one, held that the judgment of the Court of Appeal was correct.

## ACCOUNTANTS' FEES NOT TAXABLE

An Alberta judge, on appeal from the taxation of the supreme court at Lethbridge in the case of the municipal district of Bow Island, and A. F. Werts, has ruled that the plaintiff is not entitled to tax as disbursements a chartered accountant's fee where the investigation of the books of the municipality took place five months before action was commenced and was held owing to the fact that the municipality had become suspicious of the secretary-treasurer.

The item, according to the judgment could not be recovered under the English practice, but solicitor for the respondent contended that same could be taxed under the rules as to costs in force in Alberta. The Alberta rules of court provide that the court or a judge may direct that the costs shall include the reasonable charges of accountants for investigations, etc., made for the purpose of giving evidence or assisting in the conduct of the proceedings.

The judgment sets forth that the investigation was for the purpose of allaying the suspicions and was not therefore an investigation, the expenses of which could be taxed under the rule. The appeal was allowed with costs.

## ALBERTA'S 1920 FIRE LOSSES

Complete returns for the past year of fires and fire losses in Alberta have now been compiled by the government, showing that for the twelve months 870 fires were reported, with losses of \$1,054,191.

The figures so reported are not regarded as fully representing the province's losses through fire, and on the basis of the Dominion government reports it is believed that the actual total will figure up to about \$2,000,000. The reason for the difference in the two estimates is that the provincial department was only beginning its fire-reporting system last year, and the machinery did not get into full working order. For the present year, however, it is intended to collect information regarding fires in all parts of the province by means of periodic reports from fire chiefs in cities and towns and from municipal secretary-treasurers in other places, thus securing a complete record of the damage caused by fire all over Alberta.

## INSURANCE LICENSES IN ALBERTA

A new application for license form has recently been issued by the insurance department of the province of Alberta. This form is similar in many respects to the new form recently introduced and now in use by the insurance department of the province of Ontario. The following additional questions are, however, asked by the Alberta department: Have you within the past year rebated or offered to rebate any portion of your commission to any person or company? And do you object to this department notifying your present employer that you have applied for or been granted a certificate to solicit life insurance?

## NEWS OF INDUSTRIAL DEVELOPMENT

## Several Canadian Plants Have Reopened or Will Do So Shortly—Iron and Steel Trade Conditions Outlined at Scotia Meeting

WHILE the revival in business has not up to the present been very significant, there are some unmistakable signs. From time to time during the past two months, announcements have been made of plants reopening which had been forced to close down because of poor trade and other circumstances, and during the past week further evidence in this regard was forthcoming.

The Canadian-Connecticut Cotton Mills plant at Sherbrooke, Que., which shut down last December, throwing nine hundred employees out of work, has reopened with two-thirds of the former working staff, and in accordance with a policy which has now become fairly general, a reduction in wages has been made. At the same time, announcement is also made that the plant of the Julius Kayser Co., in the same city, is running at capacity, and many hands have been added to the staff. The company, which manufactures gloves and silk stockings, intends to reopen its old factory shortly so that it can fill all of its orders.

It is expected that the plant of the McLeod Pulp Co. at Milton, N.S., will open about April 1. This mill was closed down in February, and five hundred people in Queen's, Lunenburg and Shelburne counties were thrown out of employment. The company has about 2,500 cords of wood, which will be an entire loss if unused before July. It is also understood that the mill of the Fraser Companies, Ltd., at Chatham, N.B., will shortly resume operations.

The Canadian Ingersoll Rand Co. have received some big orders, which will necessitate an increase in the working staff in the near future, according to reliable information. Sawyer-Massey Co., Ltd., continues operations on a very favorable basis. The company's products, which include agricultural and other machinery, are always in demand, and more particularly so at this time of the year. In his report at the annual meeting, the president remarked that with the exception of a period of two weeks in November, when the inventory was being taken, the plant has been in continuous operation during the entire year. The demand for road-making machinery continues active, he stated, a large shipment of this class of goods having recently been made to Kingston, Jamaica. The connection established by the company in the United States in 1919 continues to expand, and contracts have been entered into with a reliable company covering the sale of threshers for three ensuing years.

The Walker Pant and Shirt Co. will start operations again in its factory at Chatham, N.B., after being closed down since last Christmas. The fact that the dealers throughout the country are running short of their stock is shown by the fact that, during the past few weeks, several orders have been received by the company. The opening up of this factory will mean an increased number of the employed of the city, the majority of the employees being girls.

## The Iron and Steel Trade

At the annual meeting of shareholders of the Nova Scotia Steel and Coal Co. last week, some information regarding the condition of the iron, steel and coal trade was given out by the president, D. H. McDougall. He stated that the railways of Canada are still in need of rolling stock and track material, and it is anticipated that, in the near future, substantial orders will be given out, of which, doubtless, this company will secure a reasonable proportion. The improved demand for coal which commenced in the autumn of 1919 continued during the greater part of the year, but perceptible slackening was noticeable in the early part of November and since that time it has decreased rapidly. The general shortage of coal in Europe and the threatened strike of coal miners in Great Britain increased the foreign demand very materially, and the company was able to secure in the early part of

the year some very attractive contracts for coal for export. Only a part of the deliveries under these contracts was overtaken, when an embargo placed on the export of coal by the Federal government resulted in their cancellation, and made it necessary to secure other employment for the steamers engaged for this business, the result of which entailed a serious loss to the company.

"It is regrettable," said Mr. McDougall, "that this overseas outlet for coal, which was only secured after a great deal of effort on the part of the company, was thus interfered with and we fear lost permanently. While for the moment, owing to the closing down of the blast furnace and steel plant, the amount of coal being banked is larger than usual, your directors hope that as soon as navigation opens, the demand for coal will enable the company to dispose of a reasonable amount of banked coal as well as the full output of its various collieries. The output for the year was 633,845 tons as compared with 550,965 tons in 1919."

Mr. McDougall said work at Wabana was restricted almost entirely to development work. Output of ore was 265,755 tons against 213,410 tons in 1919. Of the ore mined 124,014 tons were shipped to North Sydney. There was also shipped to Europe 12,375 tons, of which 6,752 tons were shipped on a pre-war contract and the balance sold f.o.b. Wabana. While ocean freight rates have fallen very materially, the depression in the iron and steel trades in both Europe and the United States has up to the present militated seriously against considerable business in the export of iron ore.

The demand for iron and steel products which was satisfactory at the time of the last annual report continued until midsummer, when orders ceased almost entirely. The company had accumulated a sufficient tonnage of unfilled orders to keep the rolling mills in operation until the end of the year. It was, however, considered advisable to shut down the steel plant at Sydney Mines about the middle of November, and, up to date, conditions have not warranted restarting this plant.

## Sash and Door Manufacturers

A new company under the name of Steel Sash, Ltd., has located in London, Ont., and has commenced the manufacture of steel sash and metal windows. The Canadian rights of the patents have been secured from the Bogert and Carrough Co., of Paterson, N.J., which organization is rated among the largest of the manufacturers of steel sash and metal windows in the United States. Though Steel Sash, Ltd., will be closely connected with the American company, it is a Canadian firm, the promoters and directors consisting entirely of local business men.

The Radford-Wright Co., Ltd., wholesale sash and door manufacturers, have purchased the entire plant of T. G. Brown, sash and door manufacturer, on South Hill, Moose Jaw, Sask. The new owners secure possession on April 1, and will commence alterations at once to equip a most modern sash, door and millwork factory. The deal was completed by W. Wright, president of the Radford-Wright Co., of Duluth, and J. A. Wilson, general manager of the company at Winnipeg.

## TREATY REINSURANCES, LIMITED

Treaty Reinsurances, Ltd., of London, Eng., in its statement for the year ended June 30, 1920, shows net premium income in the fire and general account of £102,864, and claims paid £27,592. After paying all outgoings and transferring £2,500 to investment reserve fund, there remains a balance of £42,757. In the marine account the net premium income was £28,530, and claims £6,131, a balance of £19,622 remaining in this account.

The scheduled assets of the company are £109,265. In addition, further security for the obligations of the company is provided by an agreement of indemnity, which has been entered into by each of the shareholding companies.

## NEW INCORPORATIONS

Total Capital for Week Ended March 15 is \$11,236,000,  
Compared with \$25,351,300 Previous Week

Authorized capital of \$11,236,000 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended March 15, compared with \$25,351,300 for the previous week. A comparative summary by provinces is as follows:—

	Week ended March 8.	Week ended March 15.
Dominion . . . . .	\$11,895,000	\$ 1,700,000
Alberta . . . . .		998,000
British Columbia . . . . .	760,000	1,570,000
Manitoba . . . . .	5,310,000	
New Brunswick . . . . .	107,400	130,000
Ontario . . . . .	6,141,000	3,670,000
Quebec . . . . .	1,077,900	3,258,000
Saskatchewan . . . . .	60,000	
Total . . . . .	\$25,351,300	\$11,236,000

The following is a list of companies recently incorporated under Dominion charter, with head office and authorized capital:—

Lacroix Insurance, Ltd., Montreal, \$500,000; Centre Amusement Co., Ltd., Ottawa, \$100,000; Normandy Sales Co., Ltd., Toronto, \$50,000; Charles Logue, Ltd., Maniwaki, Que., \$350,000; Universal Tires, Ltd., Montreal, \$50,000; Gunite Co. of Canada, Ltd., Hamilton, \$50,000; Consolidated Chemical Co., Ltd., Port Hope, \$100,000; Saunders-Alberta Collieries, Ltd., Toronto, \$500,000.

## Provincial Charters

The following is a list of companies recently incorporated under provincial charter, with head office and authorized capital:—

**Alberta.**—Aretic Boat Co., Ltd., Edmonton, \$20,000; Northern Machinery Co., Ltd., Calgary, \$50,000; Carbon Fuel, Light and Power, Ltd., Calgary, \$600,000; Clyde Building Co., Ltd., Clyde, \$3,000; Gas City Clay Products Co., Ltd., Medicine Hat, \$20,000; Fleming Drug Co., Ltd., Edmonton, \$75,000; Gilmour and Mooney Grocery Co., Ltd., Edmonton, \$20,000; Edmonton Lease-Holders, Ltd., Edmonton, \$100,000; Roper Pharmacy, Ltd., Morinville, \$20,000.

**British Columbia.**—Canadian Iron and Steel Smelters, Ltd., Vancouver, \$500,000; United Engineering Works, Ltd., Victoria, \$5,000; Alberta Wood Yards, Ltd., Vancouver, \$10,000; Penticon Fruit Storage Co., Ltd., Penticton, \$30,000; Albion Land Co., Ltd., Vancouver, \$90,000; Trubitt Toy Manufacturing Co., Ltd., Vancouver, \$500,000; National Club, Ltd., Vancouver, \$10,000; Fulton's Style Shop, Ltd., Vancouver, \$25,000; Darling, Hobson and Winckler, Ltd., Vancouver, \$25,000; Sperling Shingle Co., Ltd., Vancouver, \$10,000; Calcium Carbonate Co., Ltd., Victoria, \$0,000; Edmonton Club, Ltd., Vancouver, \$10,000; Marie Thompson Investments, Ltd., Vancouver, \$25,000; Sunset Seed Co., Ltd., Saanich, \$100,000; Ensenada Commercial Co., Ltd., Vancouver, \$50,000; New Brunswick Club, Ltd., Vancouver, \$10,000; Pacific Tractor and Plough Co., Ltd., Vancouver, \$50,000; Whittell Publishing Co., Ltd., Vancouver, \$25,000; British Columbia Italian Commercial Club, Ltd., Vancouver, \$10,000; Robert S. Day and Son, Ltd., Victoria, \$25,000; Matsqui Oil Syndicate, Ltd., Victoria, \$10,000.

**New Brunswick.**—Eastern Flax and Seed, Ltd., Lower Abouggoggin, \$40,000; Nagle and Wigmore, Ltd., St. John, \$90,000.

H. Spreiser, Ltd., Montreal, \$49,000; Acer Investment, Ltd., Montreal, \$2,000,000; Beaver Investment Co., Ltd., Montreal, \$1,000; La Compagnie d'Amiante du Lac a la Truite, Ltd., Thetford Mines, \$99,000; Canadian Automobile Corporation, Montreal, \$600,000; Auto Radiator and Body Co., Ltd., Montreal, \$10,000.

## INSURANCE LICENSES AND AGENCY NOTES

License has been issued to the Western Assurance Company, authorizing it to transact in Canada the business of hail insurance in addition to the classes for which it is already licensed.

The Mount Royal Assurance Co. has been licensed to transact in the Dominion the business of automobile insurance in addition to other classes for which authorization had already been received.

Certificate of registration has been granted to the Motor Union Insurance Co., Ltd., for the writing of fire, accident and automobile insurance in the province of Manitoba.

La Sauvegarde Life Insurance Co. has also been granted registration to transact life insurance in Manitoba.

The "Order of the Scottish Clans for the Province of Manitoba," has ceased to transact new business in Manitoba.

W. E. Baldwin, manager of the Continental Insurance Co., Fidelity-Phenix Fire Insurance Co., and Fidelity (Fire) Underwriters announces the opening of a Quebec department to handle the growing interests of these companies in the province. The new department will be in charge of R. deGranpré who has been appointed superintendent. It will include the brokerage department and the French Montreal department of the Continental, in charge of Harry Hall and J. W. Provost respectively, and the French business of the Fidelity-Phenix in Montreal, which will be looked after by J. A. Marion. The Quebec field outside of Montreal will continue under the care of special agent J. G. Courteau.

C. C. Paull has been appointed accident manager of the Norwich Union Insurance Society at Toronto, under the general direction of John B. Laidlaw as manager for Canada of all branches of the business. Mr. Paull has been in charge of the accident and automobile departments for some time.

A private bill has been introduced into the Alberta legislature to incorporate the Premier Insurance Co., which is authorized under the terms of the proposed act, to do a general insurance business, including hail. The classes of business to be written by the proposed new company include fire, wind, cyclone, tornado, inland marine, inland transportation, sprinkler leakage, hail, accident including vehicle and public liability, sickness, guarantee, plate glass, burglary, theft, steam boiler, and livestock. Capital stock of the company is to be \$500,000, which may be increased to \$1,000,000 and \$12,000 must be subscribed before the general meeting for the election of directors is called. The head office of the company is to be in Calgary and the following men are the incorporators: Arthur G. Ruby, Calgary; John L. Brown, Didsbury; Parker R. Reed, Didsbury; Richard Ontkes, Crossfield, and David F. Ferrell, Jenner.

A new bond firm, with offices in La Banque Nationale, Montreal, has been formed by P. A. Masson, previously with Nesbitt, Thompson and Co., and L. J. Forget, formerly with Versailles, Vidicaire, Boulais, Ltd., and H. B. Robinson and Co. The firm will be known as Masson, Forget and Co., Ltd.

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

# News of Municipal Finance

**Administrator for Affairs of Transcona is Requested—Athabasca's Condition May Necessitate Intervention of Provincial Government—Winnipeg and Niagara Falls Tax Rates are Higher—Brantford Expenditures Have Greatly Increased Since 1914—South Vancouver Tax Rate Remains Stationary**

**Kitchener, Ont.**—The tax rate for 1921 will remain at 30½ mills on the dollar, which is the same as last year.

**Niagara Falls, Ont.**—A tax rate for 1921 of 39 mills has been struck by the council. In 1919 the rate was 29 mills.

**Calgary, Alta.**—A tax of 4 per cent. on the gross revenues of its utilities will be imposed by the city. The utilities affected are the electric light plant, the street railway and the waterworks.

**Walkerville, Ont.**—Revenue derived last year from operation of the hydro-electric system, which is supplied with power from Niagara, totalled \$217,460, an increase over 1919 of more than 45 per cent. The surplus, according to the annual report, is \$37,028, or \$5,000 more than during the previous 12 months.

**Athabasca, Alta.**—As a result of the deadlock between the town council and bondholders, the council resigned in a body last week, and is notifying the provincial government accordingly. The difficulty between the Athabasca town council and the bondholders leading to the council's resignation is the outcome of the financial troubles which the town has been experiencing for some time past. The matter has been under consideration by the government's commission for the relief of municipalities in financial difficulties, and a report of that commission, in which the Athabasca situation is dealt with among others, has been submitted for consideration in the legislature. It is generally believed now that in view of the action taken by the town council some form of government intervention will be necessary, possibly to the extent of advancing funds with which to meet the town's obligations.

**South Vancouver, B.C.**—No increase in the tax rate on municipal property will be made this year, but 5 per cent. more of the assessed value of improvements will be subject to taxation. The rate of taxation for 1921 will be 41.40 mills on improved land and 50 mills on wild land. Fifty per cent. of the assessed value of improvements will be subject to taxation as opposed to 45 per cent. last year. The total tax levy will be \$798,906, and in spite of the increase in the improvement tax, the total income will be \$23,000 less than 1920. This is due to the fact that property formerly classed as residential land has in many cases been assessed this year as farm land, and consequently subject to a lower rate of taxation.

**Winnipeg, Man.**—The civic finance committee has decided that the tax levy for the year shall be at the rate of 30 mills on the dollar, on a rateable assessment for the year amounting to \$238,677,000, as compared with a rate of 22.5 mills last year. This will produce a revenue amounting to \$7,160,310. The total estimates passed for the year, however, call for \$8,582,669. The balance will be financed by these items: \$148,834, the balance from the preceding year's appropriation; \$841,610, derivable from miscellaneous revenue, and \$431,915, which will be levied as the business tax.

The monthly statement of the city's tax collection shows that there were outstanding taxes on March 1 amounting to \$3,829,975. This is \$497,941 less than was outstanding on January 1. The tax collector reports that this year to date 11.5 per cent. have been paid; last year the percentage was 15.62.

**Montreal, Que.**—A total revenue to the city of \$15,420,648 from realty taxes for the year 1920 is shown in a report issued by J. A. Soulieres, chief accountant of the city treasury office. Detailed figures contained in the report show that the total real estate valuation of the city in 1920 was \$896,414,307. Deducting tax exemptions amounting to \$229,-

454,863 from this sum, the sum of \$666,959,444 remains as the value of the taxable property.

The total revenue is derived from the following sources, the report states:—Realty tax of \$1.35, \$8,673,260; special tax of 5 per cent. on public service corporations, \$289,297; special tax of 1 per cent., \$18,506; special tax of 4.4 per cent., \$292,660, tax of 2 per cent. for Maisonneuve, \$468,635; Catholic school tax, \$1,976,139; Protestant school tax, \$1,074,008; secular school tax, \$2,332,081; snow removal tax, \$348,175; sidewalk vaults tax, \$25,140.

**Transcona, Man.**—The provincial government will be asked to name an administrator to take over the affairs of the town. After the financial standing of the municipality had been explained to a ratepayers' meeting, a recommendation of the town council to that effect was endorsed. Mayor Lyon explained that outstanding taxes totalled \$500,000. To carry the town through to the end of the year \$285,000 was required. Money had been borrowed to pay teachers' salaries, and town hall salaries and accounts were unpaid; \$78,159 was owing the sinking fund and \$31,521 to the trust account; the tax collections in January and February totalled \$4,485, and only \$16,000 was held to meet a \$40,000 debenture debt payment due this month.

Just a few weeks ago the town offered \$48,000 6 per cent. 20-year debentures for sale, but apparently was unable to receive any bids.

**Regina, Sask.**—In our issue of March 4, reference was made to the city's indebtedness to the bank as the result of overdrafts in four years past. The bank indebtedness represents advances made to finance current expenditures until the taxes levied for the years in question can be collected. The bank has asked that steps be taken to reduce the amount by \$226,500, or in other words, repay the advances which have been longest outstanding. It is proposed to issue treasury bills on the security of the taxes in arrears. The reference in the article to last year's deficit was incorrect. The amount of \$218,000 represented the bank's advances for 1920 at December 31st. The immediate repayment of this amount has not been requested, nor is it likely to be until the tax sale procedure next fall establishes how much of the 1920 arrears will be collected during this year.

In a letter to *The Monetary Times*, Commissioner Thornton states: "I do not understand that the situation in Regina differs materially from the policy of the banks with all municipalities. I am satisfied that as compared with other municipalities the liabilities and tax arrears of this city will not be found to be in an unfavorable light."

**Brantford, Ont.**—Estimated expenditure for 1921 is \$1,223,878, of which amount \$226,182 is for the purpose of meeting interest, sinking fund and instalments on public debt, \$316,967 for educational purposes and the balance for general service and miscellaneous purposes. The tax rate will be 39 mills on the dollar, and this has been struck after a reduction in the appropriations asked for by the various departments. The expense of the government of the city has increased very materially in the last few years as shown by the following figures, which are exclusive of local improvements, or debt charges in connection with public utilities:—

	1914.	1918.	1920.	1921.
Expenditures . . .	\$ 284,404	\$ 438,227	\$ 879,666	\$ 994,120
Population . . .	20,711	26,454	30,549	32,780
Per capita . . .	13.84%	16.59%	28.65%	30.32%
Taxable assessment . . .	\$1,620,000	\$1,751,000	\$2,000,000	\$25,068,000

Capital requirements for 1921, which have been authorized by the ratepayers, total \$826,993.

# Government and Municipal Bond Market

**Edmonton Agreement is at Last Concluded at a Net Increase in Price of 1.34 on the Original Deal—Manitoba Farm Loans Issue Increased to One Million Dollars—British Columbia is Calling for Tenders—Securities are Payable Either in Canada or United States at the Option of Purchaser—Sherbrooke Sells Large Block of Bonds**

THERE was very little change in the government and municipal bond market during the past week. Institutional buying is reported as being in good volume, while the general demand continues favorable. Ontario bonds are now selling above par on the street. The recent issue of St. John school bonds is being offered to yield 5½ per cent., which is the lowest rate for that sort of security since the turn in the market.

Victory bonds were not as active as they have been, and in some cases there were fractional reactions. The following figures illustrate the recent trend of prices:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	98¾	98¾	98¾	98¾
1927 .....	97	97¾	97	97½	97
1937 .....	98	99¾	99½	99¾	99¾
1923 .....	98	98½	96%	98	97½
1933 .....	96½	98%	98	98½	98
1924 .....	97	96¾	96	96½	95¾
1934 .....	93	95%	95¾	95¾	94%

## Ontario Losing Succession Dues

The province of Ontario, having lost \$400,000 in succession dues last year by reason of estates being loaded up with succession-free Ontario bonds, is trying to buy up outstanding bonds of that character. There are \$17,000,000 of these bonds outstanding, and the province can only secure small quantities at a time. To go after them hard would force the price up.

The bonds were issued at various times in the days of the Conservative regime. It is now realized that they were a mistake, and the province will not repeat it. One million and a half of 3½ per cent. bonds fall due in five years, but the other issues don't fall due for 15, 18, 20, 26 and 44 years, the last issue being 4½ per cent. inscribed stock. The province is beginning the practice of providing sinking funds to meet loans, and it is investing its sinking fund moneys in these succession-free Ontario bonds whenever it gets the chance.

## Edmonton Bond Deal Concluded

An agreement for the release of the city bonds held under court order in Portland for some months on account of the purchasers, Morris Bros., becoming bankrupt, has been finally concluded. Negotiations have resulted in the city obtaining a net price of 88.12, American funds, under the thirty-day option given. The agreement provides for a net increase of 1.34 on the price in the original deal.

When the matter was last before the city council, that body authorized the mayor to enter into a new deal for the sale of the unsold debentures in Portland at a minimum advance on the original price of one point. Shortly after the council meeting, an offer of an advance of 1.79 came through to the mayor and he accepted it. In subsequent negotiations between the city and the trustees, the latter claimed that no authority was given for the 88.57 offer which the mayor first accepted. On the part of the trustees it was contended that the one point advance asked for by council would not be exceeded.

Proceedings were then started by the city, and have resulted in an offer of 1.34 over the price the bonds were first sold for being made. This compromise offer has been accepted by the city. Mayor Duggan stated that the trustees are ready to take up a block of \$150,000 of the bonds at

once, so these funds will be shipped to Vancouver as soon as the agreement is made. The agreement provides that the city will keep bonds to the value of \$150,000 in Portland at all times for a month when the option will expire. After that date the securities are to be returnable to Edmonton from Vancouver.

It is now almost three months since the bonds, amounting to about \$1,600,000, have been tied up, during which time the city has been put to a great deal of trouble and expense. The increase in price, which will net about \$23,000 more than the old sale, will reimburse the city to some extent, but then there is the question of exchange. It will be remembered that the bond issue was made for the purpose of redeeming securities falling due in New York, and the redemption was effected last January when exchange stood at about 17 per cent. The rate is now less than 15 per cent., so that the city stands to lose the difference. It is not possible to say how the city will fare in this regard, however, owing to the fact that payments will be made at varying periods over the thirty days and at different rates of exchange.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Elliee R.M., Man. ...	\$ 49,000	6	30-years	Mar. 19

Corporation Securities

42 KING STREET WEST

TORONTO - CANADA

November 1, 1930. Offer must be accompanied by a marked cheque for 1 per cent. on loan, and must specify whether the offer does or does not include accrued interest. A. L. Marsolais, secretary-treasurer.

**Three Rivers, Que.**—Tenders on the \$250,000 6 per cent. school debentures of the city will be received until 8 p.m., March 21, 1921, and not on March 15, as stated in these columns last week. The securities mature serially from November 1, 1921, to 1950, are in denominations of \$100 and \$500 and are dated May 1, 1920. Arthur Nobert, treasurer.

**Ford City, Ont.**—A short time ago the municipality called for bids on \$39,000 6½ per cent. 15-instalment debentures, but only one offer was received. The securities will again be placed on the market in the near future. J. F. Foster is treasurer of the town.

#### Bond Sales

**Halifax County, N.S.**—Eastern Securities Co., Ltd., have purchased \$15,000 6 per cent. 20-year debentures, maturing December 1, 1940, at 98.63, which is on about a 6.12 per cent. basis.

**Perth, Ont.**—The town has disposed of to W. L. McKinnon and Co. \$83,500 6 per cent. 30-instalment debentures. The deal was concluded privately.

**Grey R.M., Man.**—W. L. McKinnon and Co. have purchased \$25,000 5½ per cent. 29-instalment good roads debentures, guaranteed by the province, at a price of 91.10, which is on about a 6.38 per cent. basis.

**St. John, N.B.**—The bid of the Mahon Bond Corp., Ltd., for 99.08, which was the second highest, was omitted from the list of tenders on the \$54,000 school bonds given in these columns last week.

**Port Colborne, Ont.**—Harris, Forbes and Co. have been awarded \$19,500 6 per cent. 20-instalment debentures at 96.279, which is about a 6.47 per cent. basis. Tenders were as follows:—

Harris, Forbes and Co. Inc. ....	96.279
C. H. Burgess and Co. ....	96.08
A. E. Ames and Co. ....	95.69
Dominion Securities Corp. ....	95.57
Wood, Gundy and Co. ....	95.37
R. C. Matthews and Co. ....	94.50

**Manitoba.**—The \$500,000 5 per cent. 5-year issue of farm loan bonds purchased by the National City Co., Ltd., which was mentioned in these columns last week, was increased to \$1,000,000. The securities were sold in New York to yield the investor 7½ per cent.

**Bridgewater, N.S.**—W. F. Mahon and Co. and the Royal Securities Corp. have purchased \$55,000 6 per cent. 30-year bonds, maturing August 1, 1950, at a price of 97, which is on about a 6.20 per cent. basis. The same houses have also bought \$10,000 5 per cent. bonds, due June 1, 1961, at 81, which is on about a 6.30 per cent. basis.

**Nova Scotia.**—\$20,000 6 per cent. provincial highway notes, maturing March 1, 1928, have been purchased by the Eastern Securities Co., Ltd., at 98.63, which would be on about a 6.25 per cent. basis. Tenders were as follows:—

Eastern Securities Co., Ltd. ....	98.63
Royal Securities Corp. ....	98.56
J. C. Mackintosh and Co. ....	98.53
W. F. Mahon and Co. ....	98.09

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from February 27 to March 5, 1921:—

Schools—Clover Bar, \$3,000 8 per cent. 10-years annuity; Pioneer, \$7,000 8 per cent. 20-years annuity; Versailles, \$5,941 8 per cent. 15-years annuity; Iris, \$6,041 8 per cent. 15-years annuity; Glen Ellen, \$4,500 8 per cent. 10-years annuity; Wheat Centre, \$2,000 8 per cent. 5-years annuity.

Village of Marquis, \$1,500 8 per cent. 10-instalments, for water supply.

**Saskatchewan.**—The following is a list of debentures reported sold by the Local Government Board from February 27 to March 5, 1921:—

8 per cent. 10-year schools—Barton, \$1,400; Crown Life Insurance Co. Sandwell, \$4,000, Westlea, \$4,200, Scotsguard, \$2,800; Waterman-Waterbury Mfg. Co. Candiak, \$5,000; Nay and James. North Regina, \$2,500; C. C. Cross and Co., Regina.

Yeomans R.T., \$700 8 per cent. 15-years; Nay and James. Marriott, \$8,698 7 per cent. 15-years; H. J. Birkett and Co.

Village of Borden, \$2,000 8 per cent. 10-years, locally.

**Sherbrooke, Que.**—Rene T. Leclerc has been awarded the \$513,000 6 per cent. 10-year bonds of the city at 98.90, which is on about a 6.14 per cent. basis. The tenders were as follows:—

Rene T. Leclerc .....	98.90
Crédit-Canadien, Inc. ....	98.695
Royal Securities Corp., Ltd. ....	98.67
Masson and Forget .....	98.573
Versailles, Vidricaire and Boulais, Ltd. ....	98.17
L. G. Baubien and Co. ....	98
A. E. Ames and Co. ....	97.91
Beausoleil, Ltd. ....	97.80
Dominion Securities Corporation, Ltd. ....	97.35
Provincial Securities, Ltd. ....	97.31
Hanson Bros. ....	97.25
National City Co. ....	97.23
Nesbitt, Thompson and Co. ....	97.175

**Sandwich, Ont.**—The town has sold to Wood, Gundy and Co. \$228,333 6 per cent. debentures, maturing in 10, 15 and 25-instalments, at a price of 95.17, which is on about a 6.70 per cent. basis.

**Montreal, Que.**—An issue of \$1,500,000 6 per cent. serial bonds of the Protestant School Commission, maturing from 1925 to 1950, has been awarded to Wood, Gundy and Co., and A. E. Ames and Co., at a price of 97.884, which is on about a 6.20 per cent. basis. Other bids were:—

United Financial Corp., Ltd. ....	97.79
Dominion Securities Corp., National City Co., Ltd., Harris, Forbes and Co., Inc., and Hanson Bros. ....	97.637
Hew R. Wood and Co., and A. Jarvis and Co. bid 93.538 for \$750,000 of the issue.	

#### COMMERCIAL LIFE ASSURANCE COMPANY

As a company still in its organization stage, the Commercial Life Assurance Company made a creditable showing in 1920, under the direction of J. W. Glenwright, who is managing director. During the year applications were received for \$416,038 of insurance, of which \$405,038 was accepted and issued, making a total business in force of \$723,974, an increase of 81 per cent. over 1919. The premium income amounted to \$22,586, as compared with \$9,400 in 1919, an advance of 140 per cent. Death claims were \$3,182, while in 1919 the result was nil. Total expenses were \$36,451, as compared with \$24,001 in the previous year, and total income was \$53,444, against \$35,077 in 1919.

The balance sheet of the company shows total assets of \$109,699, of which \$96,006 is in the nature of government and municipal bonds, mortgages on real estate and cash. The net reserve on policies in force is \$29,763, as compared with \$17,731 in the previous year, while the investment reserve is \$2,000. Surplus to policyholders increased from \$68,248 in 1919 to \$77,414.

In his report, Mr. Glenwright points out that the company has over \$300 in assets for every \$100 of liabilities, and that interest earnings of the company at \$6,962 show an increase of 108 per cent. for the year. With regard to the expenses he says that the greatest possible care has been exercised, but the expansion in business will undoubtedly cause an increase in this feature.

## CORPORATION SECURITIES MARKET

**Urgent Selling of Stocks Has Abated, but the Underlying Conditions are Unchanged—Spanish River Bond Issue Authorized—Canadian Pacific Railway Will Do Financing this Year, but Not for the Present**

WHILE the abatement of the urgent selling movement this week gave the Canadian stock markets a much steadier appearance, there was no decided change in underlying conditions, and, generally, the situation is much the same as it has been for some weeks past. There is still the absence of that sentiment which is needed for a constructive market, but the bear element seems less prominent. For some time the stock exchanges have been discounting unfavorable developments, with due consideration for the future, until it appears that there is very little more for the bears to work upon. Now and again, however, weakness in a certain stock is unearthed, and the whole market, in the sensitive condition that it is, responds readily to the reports, whether authoritative or otherwise. The only event which will warrant a rise of a permanent nature will be a general and substantial improvement in the business and financial situation, and in the meantime prices will continue to follow their irregular course.

Trading in listed stocks in Montreal for the week ended March 16 resulted in the turnover of 54,805 shares, as compared with 62,456 previously, while in Toronto the figure was 20,088, as against 15,941. Bonds changed hands on the Montreal exchange to the extent of \$1,431,200, compared with \$1,388,750 a week ago, while the turnover in Toronto was \$1,503,110, as against \$1,215,250 previously.

Although bond trading showed a slight increase, this section of the market is not so active as formerly, while in some cases there were fractional declines. The large volume of new financing has no doubt been effective in this regard. According to reports, the recent offerings of pulp and paper securities are being well absorbed.

## Approve Bond Issues

Shareholders of the Spanish River Pulp and Paper Company, at a special meeting held in Toronto last week, unanimously approved a by-law of the company authorizing the new general bond issue, whereby the directors are authorized to borrow an amount not exceeding an aggregate of \$20,000,000, to be secured by an issue of general mortgage bonds of the company. A preliminary issue of \$3,000,000 was recently disposed of by the company, the money to be used for repaying part of the capital expended on the company's properties during the past few years. The circular addressed to shareholders stated that since July, 1915, over \$7,000,000 had been expended in enlarging and improving the company's properties, as a result of which the output has been increased by 110,000 tons per annum, making a total capacity of 230,000 tons, and resulting in the earnings for the six months ending December 31 last available for dividends, being in excess of \$2,500,000. The working capital has also been increased to over \$7,000,000.

At a special meeting of the shareholders of Ames-Holden-McCreedy, Ltd., this week, authorized the issue of \$2,000,000

7 per cent. second refunding mortgage bonds. It is understood that the greater portion of the \$2,000,000 has already been sold.

The Canada Land Irrigation Company, which is an amalgamation of the Alberta Land Company, of Southern Alberta, and the Canada Wheat Lands Company, must have more capital or go into liquidation, officials of the company have announced in London, England, in extending an invitation to shareholders to subscribe £300,000 of 7 per cent. prior lien debentures at par. The debentures are to be redeemable in 1929 and 1933 at a premium of 100 per cent.

According to reports current in New York, the Canadian Pacific Railway will probably do some financing some time during the current year, partly to take care of expansion planned. It is understood, however, that the management feels there is no special urgency about issuance of new securities, as cash and working capital are ample for ordinary purposes. According to Vice-President Coleman, the officials of the company have agreed that, while important extensions to the system must be made, particularly in the west, the present situation calls for conservative action.

The £2,000,000 5 per cent. 7-year notes of the Grand Trunk Railway System, which fell due in London on March 2 last, were retired.

## Riordon Stock Adjustment

While full details of the plans have not yet been worked out, the capital stock of the Riordon Pulp and Paper Co., Ltd., will shortly be adjusted. Directors of the Riordon Co., Ltd., which is the operating company, are giving consideration to this. At the time of the big merger last summer, it was arranged that the Riordon Pulp and Paper Co., Ltd., would continue only as a holding company of the shares which it received from the new Riordon Co., Ltd., in exchange for all its assets. No distribution was made, and consequently the position of the company has occasioned considerable market confusion, which will be cleared up by the proposed adjustment.

At the present time the Riordon Pulp and Paper Co., Ltd., retains in its treasury \$9,000,000 of the 7 per cent. second preferred and \$12,000,000 of the common stocks of the Riordon Co., against its own \$6,000,000 of common stock outstanding. This is in the proportion of 1½ shares of preferred and 2 shares of Riordon Co. common against 1 share of Riordon Pulp and Paper common. If the present plans of the board mature, as it seems likely they will at an early date, holders of old Riordon common will receive two shares of the new common for every one of the present securities held, the 7 per cent. preferred being retained, as at present, in the treasury of the holding concern to maintain the 10 per cent. dividend now being paid. In addition to the \$6,000,000 par value common stock outstanding, the old Riordon company has \$1,500,000 in 7 per cent. preferred issued, against which there is held in the treasury a similar amount of 8 per cent. first preferred of the new Riordon company. It is proposed that the former be made exchangeable for the latter, holders of the present securities benefiting through the change to the extent of receiving an 8 per cent. stock for their present holdings of the 7 per cent. shares.

# DIVIDENDS AND NOTICES

## TENDERS FOR PULPWOOD AND TIMBER LIMIT

## TENDERS FOR PULPWOOD AND TIMBER LIMIT

Tenders will be received by the undersigned up to and including the 4th day of July, 1921, for the right to cut pulpwood and pine timber on a certain area situated in the vicinity of Long Lake, District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 80 cents per cord for spruce and 40 cents per cord for other pulpwoods, and \$2.50 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for fifty thousand dollars (\$50,000), which amount will be forfeited in the event of the successful tenderer not entering into agreement to carry out conditions, etc.

The said \$50,000 shall remain on deposit until the pulp mill, as provided by terms and conditions of sale, is erected and in operation. Any timber cut in the meantime shall be subject to payment of dues and bonus as accounts for same are rendered. After the said pulp mill is erected and in operation, the deposit of \$50,000 may be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, shall be paid in the usual manner as returns for cutting of wood and timber are received and accounts rendered.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

All tenders should be enclosed in sealed envelope and marked plainly on outside, "Tender for Long Lake Pulp and Timber Limit."

**BENIAH BOWMAN,**  
Minister of Lands and Forests.

Toronto, January 24th, 1921.

N.B.—No unauthorized publication of this notice will be paid for. 493

### NOTICE OF DIVIDEND

The regular quarterly dividend at the rate of 8% per annum on the Preferred Stock of the Mutual Finance Corporation, Limited, has been declared by the Board of Directors, payable on April 15th, 1921, to paid-up stockholders of record March 31st, 1921.

**A. F. HEALY,**  
President. 495

Windsor, March 15th, 1921.

A copy of *The Monetary Times* of June 18, 1920, is wanted. Any subscriber forwarding one will have his subscription advanced one month.

Tenders will be received by the undersigned up to and including the 15th day of June, 1921, for the right to cut pulpwood and pine timber on a certain area situated on the Nagagami River and other territory adjacent thereto, in the District of Algoma.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 80 cents per cord for spruce and 40 cents per cord for other pulpwoods, and \$2.50 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for fifty thousand dollars (\$50,000), which amount will be forfeited in the event of the successful tenderer not entering into agreement to carry out conditions, etc.

The said \$50,000 shall remain on deposit until the pulp mill, as provided by terms and conditions of sale, is erected and in operation. Any timber cut in the meantime shall be subject to payment of dues and bonus as accounts for same are rendered. After the said pulp mill is erected and in operation, the deposit of \$50,000 may be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, shall be paid in the usual manner as returns for cutting of wood and timber are received and accounts rendered.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

All tenders should be enclosed in sealed envelope and marked plainly on outside, "Tender for Nagagami Pulp and Timber Limit."

**BENIAH BOWMAN,**  
Minister of Lands and Forests.

Toronto, January 24th, 1921.

N.B.—No unauthorized publication of this notice will be paid for. 494

### RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first week in March:—

		Canadian Pacific Railway		
		1921.	1920.	Inc. or dec.
March 7	.....	\$3,255,000	\$3,244,000	+ \$ 11,000
		Canadian National Railway		
March 7	.....	\$2,049,345	\$1,690,099	+ 359,246
		Grand Trunk Railway		
March 7	.....	\$1,764,260	\$1,654,205	+ 110,055

# Corporation Finance

**Saguenay Pulp Had Good Year—Gross Income Almost Doubled—Sawyer-Massey Profits Best in Some Years—McKinley-Darragh Mines Lost Money in 1920—Canadian Salt Company's Operations Were Affected Last Year—Simpson Company Reports Lower Net Earnings—Porto Rico Statement Reflects Utilities Recovery**

**Brazilian Traction, Light and Power Co., Ltd.**—Gross earnings of the company in January, 1921, amounted to 12,875,000 milreis, as compared with 9,655,000 milreis in the previous year. Operating expenses were 2,113,000 milreis higher, and net earnings for the month amounted to 6,217,000 milreis, being an increase of 1,107,000 milreis, as compared with January, 1920.

**British Columbia Telephone Co.**—The company has filed with the Dominion Board of Railway Commissioners an application for increases in exchange rentals and telephone charges amounting to \$397,000 per annum. The increases asked for are principally confined to the larger exchanges in the company's territory. In Vancouver an increase of \$1.50 a month on business telephones, making the charge \$7.50 instead of \$6, is asked for, and also an increase of 50 cents a month on residential telephones. In addition to the flat rate service, the company is asking for an increase of \$1.50 per 100 calls in its measured service to small business subscribers, making this rate \$5.50 for the first 100 calls and three cents for every additional call.

**Porto Rico Railways Co.**—An increase of 34 per cent. in the company's net earnings in 1920 is another reflection of the general recovery of public utilities, both in this country and abroad. The figure for last year was \$617,553, compared with \$459,543, a gain of \$158,010. Gross earnings amounted to \$1,402,735, compared with \$1,129,782. Operating expenses continue to be abnormally high, according to the report of D. E. Thomson, president. A drought of unprecedented severity in May, June and July compelled the resort to steam plant operation, resulting in a loss of over \$30,000. First mortgage bonds of the company amounting to \$50,500 were purchased and delivered for cancellation in accordance with the sinking fund requirements of the trust deed. The amount so far redeemed is \$502,500. Further purchases of such bonds have been made to the amount of \$34,000.

The sum of \$167,533 was expended during the year on capital account and paid out of earnings. After providing for interest charges and dividends on the preferred and common stocks, the surplus earnings amounted to \$266,091. This, with the undistributed profits at the end of 1920, \$289,172, make a total at credit of profit and loss of \$555,264, which, after appropriation to various reserves of \$140,000, leaves a balance carried forward of \$415,264. The company's position in regard to working capital also shows improvement, current assets being \$415,043, compared with \$261,870, and current liabilities \$223,782, compared with \$144,573. Total assets are \$8,537,980, as against \$8,341,413.

**Robert Simpson Co., Ltd.**—Profits of the company for 1920 were materially affected by the downward revision in prices, as shown by the annual statement, which has just been made public. Net profits amounted to \$1,052,281, as compared with \$1,986,343. Under the circumstances, however, the showing on the whole was satisfactory. Adding the balance brought forward from the previous year of \$1,689,463, there was available \$2,741,745, after deducting selling and general expenses, depreciation, bond interest, etc. This was disposed of by payment of \$201,000 dividend on preference stock at 6 per cent., \$385,250 dividend on common stock, \$212,000 war tax reserve and \$100,000 reserve for bonuses and employees' savings and profit-sharing funds. That left \$1,843,495 balance carried forward.

H. H. Fudger, president, in his report, called attention to the smaller stocks of merchandise on hand in the balance sheet of last year, the figure being \$3,886,121, compared with \$3,961,569. Advances to associated companies are reported at \$1,501,558, as against \$1,235,404. The company's working capital position has improved, current assets being \$6,300,-

115, against \$6,120,069, and current liabilities \$2,423,330, against \$2,518,055. Total assets are \$13,495,656, compared with \$13,755,016.

**Canadian Salt Co.**—According to the annual report, just issued, operating profits amounted to \$202,298, as against \$236,881, and, after payment of bond interest, business profits tax, and allowing for depreciation and reserve, etc., there were net profits of \$98,981, compared with \$136,286, or indicated earnings on stock of 8.1 per cent., compared with 17 per cent. last year. Adding the balance brought forward from 1919 of \$595,858, there was available for distribution \$694,840. Out of this was paid a special dividend of undivided surplus at December 31, 1916, amounting to \$400,000, and other dividends of \$88,000, leaving a balance forward of \$206,840. The \$400,000 was distributed to shareholders in March last on the basis of one share for two, thus increasing the capital stock from \$800,000 to \$1,200,000.

The company's working capital has suffered some decrease, current assets being practically unchanged at \$433,254, compared with \$432,674, while current liabilities are \$396,532, compared with \$320,187. Total assets are \$2,203,670, compared with \$2,116,918.

**McKinley-Darragh-Savage Mines of Cobalt, Ltd.**—A loss of \$40,574 on operations during 1920 was experienced by the company, as compared with a profit of \$354,128 in 1919. Dividends amounting to \$202,292 were paid during the year from surplus, which now amounts to \$122,735. In his report, H. Sibley, treasurer, states:—

"At the beginning of the year 1920 the price of silver was \$1.31 an ounce. At the close of the year the price had fallen to 64½c an ounce. As our average cost of producing silver during 1920 amounted to 85½c an ounce, the situation changed from one of operating at a substantial profit to one of operating at a steady loss. On January 1, 1921, therefore, it became necessary to close down the plant completely. While it will be possible to operate the mine in the future at less than 85½c an ounce, owing to lower wages, a much higher actual production per man per day, and a decrease in the cost of materials necessary to mining, it is improbable that the ores left in the McKinley Mine, which averaged in 1920 approximately 9 ounces of silver to the ton, can ever be produced profitably at around the present market prices. The reopening of the mine, then, is conditioned on a real strengthening in the world demand for silver bullion."

The balance sheet shows a reduction in current assets from \$579,100 to \$357,797, and an increase in current liabilities from \$101,478 to \$110,339. Total assets are now \$2,502,000, as compared with \$2,739,864 a year ago. The surplus is \$122,735, as against \$365,601.

**Sawyer-Massey Co., Ltd.**—After deducting administration expenses, profits for 1920 totalled \$223,815. The record was the best in some years, and was \$124,533 in excess of the profits of 1919. After paying bond interest, \$28,620; providing for federal income tax, estimated at \$12,000; reserving for plant depreciation, \$24,000, and making a reserve for possible inventory depreciation of \$50,000, the amount carried forward to the credit of profit and loss account was \$100,966. As the company had carried a debit balance in the profit and loss account of \$452,987 from the previous year, a debit balance still remains of \$352,020.

The company's total assets now stand at \$5,915,316, as compared with \$5,309,585 a year ago. Fixed assets, which stood at \$1,388,106 at the close of November, 1919, rose to \$2,292,662 during the past year, and notes and accounts receivable totalled \$1,658,134, as compared with \$1,446,776

## Why High-Speed American Presses must have Canadian Paper

**I**N every large industry there are fundamental reasons which make it indispensable to human welfare—and therefore permanent in character. The degree of permanence determines its value to the shrewd investor.

In Canada and the United States the newspaper is a unique educational and social force. It has become the mouthpiece of the aspirations of the race, of the ambitions of the individual—of all the forces that make for civilization. It has been called the People's University. It has made us the greatest readers in the world.

But the newspaper is also the vehicle of the greatest selling force in the world—advertising. Each year sees the necessity for a larger volume of sales, and new advertisers are being constantly created. So, until we cease to be manufacturers and merchants, advertising must of necessity (under normal conditions) increase.

High speed presses are essential to newspapers. The 2324 Daily newspapers in Canada and the United States print 31,000,000 copies daily—to say nothing of the weeklies. The consumption of newsprint in the United States has risen from 3 lbs. per capita in 1880 to over 40 lbs in 1920.

Outside the rapidly diminishing supply produced in the United States, only Canadian newsprint allows the great printing presses to develop the high speed demanded of them. They cannot maintain that speed with European paper.

With less than a week's supply of paper on hand, but with ample supplies of spruce coming to the mills on the Spring floods, only the Canadian mills with their perfected equipment can supply the enormous and growing demand from the greatest free market in the world—just across the border.

Even at the lowest prices predicted by the most pessimistic, the industry can still earn a large surplus over the requirements of its senior securities.

The well-advised investor knows that the recent falling off in demand is purely an insignificant dip in the curve of consumption that is constantly rising. The facts prove that the permanence of the largest exporting industry in Canada is established beyond all question.

*The average edition of the Chicago "Sunday Tribune" consumes as much newsprint as the total average consumption of Canada's daily and weekly newspapers. In its own mill at Thorold, Ontario, about 4,000 feet of paper are produced a minute, for its exclusive use. The International Paper Co., the largest newsprint producers in the world, with a plant at Three Rivers, states that it will not build any more plants in the United States. Even Lord Northcliffe's dailies, the London "Times" and "Daily Mail," are fed by mills on this side.*

## GREENSHIELDS & CO.

Investment Bankers

Toronto

17 ST. JOHN STREET, MONTREAL

Ottawa

WHAT WOULD THE WORLD BE WITHOUT PAPER

before. The reserve for depreciation increased to \$417,441, as against \$106,243 the year before. Bills and accounts payable aggregated \$1,981,196, an increase of \$264,918 for the year. Total current liabilities were \$1,989,375, as compared with current assets of \$3,034,399; hence the company's working position is strong, the excess of current assets over current liabilities being \$1,035,024.

**Saguenay Pulp and Power Co.**—The second annual statement of the company shows marked improvement over the first one. It will be remembered that previous to 1919 the statement was issued by the North American Pulp and Paper Co., but in June, 1919, that company and its subsidiaries, together with the Saguenay Power and Light Company, organized under the above name. The report is all the more interesting in view of the pending ratification by the shareholders of the North American Pulp and Paper Companies' Trust to the plan of exchanging their holdings for those of the Saguenay Company.

Gross income last year amounted to \$10,488,213, as compared with \$5,416,544 in 1919. After the addition of other income and the deduction of operating charges, there remains net income of \$3,574,925, as compared with \$1,415,177 in 1919. Deduction of interest, depreciation and other charges leaves surplus to be carried into the current year of \$1,409,812, a rather sharp increase from the surplus of \$33,651 remaining at the end of 1919.

The balance sheet also reveals a more comfortable position. Working capital has substantially increased, as shown by the following figures:—

	1920.	1919.
Current assets . . . . .	\$5,397,657	\$4,202,086
Current liabilities . . . . .	4,255,920	3,954,108
Net working capital . . . . .	\$1,141,737	\$ 247,978

### CASUALTY COMPANY OF CANADA

The Statement of the Casualty Co. of Canada, presented at the annual meeting held in Toronto on March 10, shows gross premium income of \$32,333, net premium income of \$28,900, interest on bonds \$1,854, and total net income of \$30,800; claims were \$13,153, and expenses, commissions and taxes \$13,900, leaving profits of \$3,800. The business in force has increased from \$17,248 to \$38,018. Assets are \$60,283, and liabilities \$21,807, leaving an excess of \$38,476, against the paid-up capital stock of \$47,266. The subscribed capital is now \$108,800.

The company has started a new line, automobile liability. C. S. Blackwell is president, and A. Wyburn Eastmure, managing director.

### PROSPECTS FOR LIFE BUSINESS

"When I left Toronto I was of the opinion that we would have considerable difficulty this year in keeping our western business up to last year's figures," said A. Gordon Ramsay, assistant general superintendent of the Canada Life in Winnipeg, on February 27. "In fact, we looked for a decrease. After visiting our various branches I am confident that while we will have to take our coats off, we will again this year show an increase, and that collections will be normal. There is a feeling of confidence to be observed, and although the farmers to some extent have been chafing at the tightening up of the banks, it seems to be generally admitted that they will go into spring on a generally sounder basis than for several years past. The banks expect to take full care of their customers' requirements, and this year there seems to be no discussion of government seed grain support, and the elimination of anxiety on this score supports the general feeling of confidence.

### RECENT FIRES

**Elevator of the Mitchell Hay and Grain Co., Winnipeg, Destroyed**—County Court House at Yarmouth, N.S., and Alexandra Block in Brandon also Damaged

**Beamsville, Ont.**—March 11—A fire in Brown and Co.'s bakery caused by smoke and water, about \$1,500 damage to the building and contents.

**Brandon, Man.**—March 10—The Alexandra Block on Tenth Street was damaged by fire. The loss is estimated at \$10,000.

**Kamsack, Sask.**—March 6—A fire broke out in Kalmakoff and Verigin's general store and completely destroyed the warehouse.

**Nicola, B.C.**—March 5—The store occupied by Nicola Stock Farm Co. was destroyed by a fire which was caused by the furnace. The loss is partly covered by insurance.

**Oyama, B.C.**—March 8—Fire destroyed the home of W. H. Rea, the post-office and the general store. The fire was caused by an oil lamp.

**Swanson, Sask.**—March 14—A fire broke out, destroying eight or nine buildings and causing large property loss.

**Wingham, Ont.**—March 14—Lloyd and Son's sash and door factory was damaged by fire. The damage was placed at \$2,000, partly covered by insurance.

**Winnipeg, Man.**—March 15—Fire of unknown origin caused damage estimated at \$30,000 in the elevator of the Mitchell Hay and Grain Co. The loss is covered by insurance.

**Yarmouth, N.S.**—March 10—The county court house was destroyed by fire with a loss of \$20,000.

### ADDITIONAL INFORMATION CONCERNING FIRES

**Hamilton, Ont.**—February 23—A fire broke out in the Orchard wing of the Ontario Hospital for the Insane. The loss to building is \$65,000 and \$25,000 to contents. There was one fatality.

**Manitoba.**—The fire commissioner's report for the month of January shows that during the month there were 124 fires, with a total loss of \$366,166. There were 53 dwellings destroyed and 17 fires on farm property. Overheated stoves and smoke pipes were responsible for 29 fires, defective and overheated chimneys caused 16, and there were 3 fires from spontaneous combustion. During the month there was one fatality.

**St. John's, Nfld.**—December 23—The picture and club-room outfits of the Star Movie Co. were destroyed by fire with a total loss of \$125,000. There is \$27,000 insurance.

**Toronto, Ont.**—March 2—The premises of the Imperial Trunk and Leather Goods Co. were damaged by fire. The loss is \$450, with insurance of \$3,800 in the Merchants Fire, Dominion Fire and American Equitable Fire Insurance Companies.

**Travers, Alta.**—February 17—The Guy Paulson Building was destroyed by fire with a loss of \$23,000 and insurance of \$11,050. A store belonging to A. Buchau was damaged to the extent of \$850.

**Vancouver, B.C.**—The Chief of the fire department, in a letter to *The Monetary Times*, states that during the month there were 74 alarms in that city with a loss of \$31,058. The following show the cause of fires:—Chimney fires, 20; carelessness with cigarettes, 2; electrical origin, 3; incendiary origin, 3; sparks, 1; matches, 1; explosion, 1.

**Vancouver, B.C.**—February 16—The fire which broke out in the frame storehouse in the C.P.R. yards did \$800 damage. The fire was caused by some oil-soaked clothing having been placed on hot water pipes.

**Waveig, N.B.**—February 20—One house and two barns belonging to O. E. Nixon were destroyed by fire, which was of incendiary origin. The loss was \$8,000 with no insurance.

## War-time Taxation Now Being Tested

Deflation and Business Depression Causes Some Revenues to Fall Off—Business Profits Tax will Probably be Allowed to Expire—Income Tax a Permanent Source of Revenue—Excise Taxes are Due for Revision, but Sales Tax will likely Remain

NOW that war time and even "reconstruction" expenditures are practically a thing of the past, the government is able to make a good financial showing from month to month. But there are fixed charges resulting from the war, such as interest and pensions, which will last indefinitely. These do not come down with the fall in prices, and will, therefore, be an increasing rather than a decreasing burden for some years to come.

When expenditures began to fall off last year, revenues continued buoyant, being aided by a more rigid enforcement of the income tax law. Now, however, some sources, especially the customs and excise taxes, are making a poorer showing. This is the result of a decrease in trade and general dullness in business.

Faced with these substantial expenditures, the government is obliged to consider its sources of revenue. War-time taxation has proved productive. In February \$5,545,352 was raised from inland war revenue, \$5,987,272 from the business profits tax, \$6,267,915 from the income tax, and \$611,248 from other war tax revenue. This is a total of over \$18,000,000, or over half the total from all sources. Receipts from the customs on the other hand were only \$9,955,564, compared with \$13,891,671 in February, 1920, and from excise duties only \$2,812,674, compared with \$3,517,590, was obtained. It is obvious, therefore, that some of the war taxes must become permanent. The income tax is now regarded as here to stay. The business profits tax will probably be allowed to expire, while the other taxes may remain with some revision.

### Special War Revenue Act

The Special War Revenue Act of 1915 levied a tax on bank circulation, on insurance premiums, on trust and loan companies, cable and telegraphic messages, railway and other tickets, bottles and packages, cheques, money orders.

In amending this act in 1920 the "luxury" and "sales" taxes were introduced. The former levied 10 per cent. on certain goods sold by retail at prices above those specified, and 15, 20 and 50 per cent. on certain others. These were calculated on the full value, but a number of other taxes of 10 and 15 per cent. were to be calculated on the excess over the exemption limit. These were to be paid by the consumer, and collected from him by the retailer.

The sales tax was a tax of 1 per cent. on sales by manufacturers and wholesalers, or jobbers, but in the case of sales by manufacturers to retailers or consumers, it was to be 2 per cent.

### Business Profits War Tax

The Business Profits War Tax Act, 1916, imposed a tax on profits for every year after the calendar year 1914. The rate was 25 per cent. of all profits above 7 per cent., in the case of incorporated companies and above 10 per cent. in the case of other businesses. Exceptions were made in the

case of companies employing a capital of less than \$50,000, life insurance, farming and livestock raising, and companies commissions or associations not less than 90 per cent. of the stock of which was owned by a province or municipality. Profits were defined as net profits for the accounting period, and in the case of non-Canadian companies, were to be the net profits from its Canadian business only. Returns were to be made by July 1, and the tax was to be paid by November 30 each year on the profits of the preceding year. The tax was to run for three years, that is, the profits of the calendar years 1915, 1916 and 1917 were to be taxed.

In 1917 this act was amended, the rate being increased to 50 per cent. on all profits in excess of 15 per cent., and to 75 per cent. in the case of profits in excess of 20 per cent., commencing with the year 1917. It was also made payable on one month's notice, and its duration was to be for at least 36 months, commencing with the beginning of the first accounting period ending after December 31, 1914.

In 1918 another amendment was passed, levying a tax of 25 per cent. on profits exceeding 10 per cent., where the capital was from \$25,000 to \$50,000. The tax was also extended to apply to profits of 1918.

In 1919 it was again extended to include the profits of that year. In 1920 it was again extended to 1920 profits, but the rate was changed to the following: Profits not exceeding 10 per cent. exempt; 20 per cent. on profits from 10 per cent. to 15 per cent.; 30 per cent. on profits from 15 to 20 per cent.; 50 per cent. on profits from 20 to 30 per cent.; and 60 per cent. on profits exceeding 30 per cent. Businesses employing capital of from \$25,000 to \$50,000 were to pay 20 per cent. of profits in excess of 10 per cent.

### Income War Tax Act, 1917

The Income War Tax Act, 1917, levied the following rates on personal income: 4 per cent. upon all income exceeding \$1,500 in the case of single persons and \$3,000 in the case of married persons; in addition, the following rates on larger incomes:—

Over \$	6,000 to \$ 10,000	2 per cent.
"	10,000 to 20,000	5 " "
"	20,000 to 30,000	8 " "
"	30,000 to 50,000	10 " "
"	50,000 to 100,000	15 " "
"	100,000	25 " "

Corporations and joint stock companies were required to pay the normal tax only on income exceeding \$3,000.

Returns of income were to be made by April 30 each year, and the tax was to be paid within a month after notice. The first tax was to be paid on the income of 1917.

In 1918 the exemptions were reduced from \$1,500 to \$1,000, and from \$3,000 to \$2,000, respectively. New rates were fixed, called the normal tax, supertax and surtax. The

first was 2 per cent. upon the income of single persons, from \$1,000 to \$1,500, and on the income of married persons from \$2,000 to \$3,000, and 4 per cent. upon all income above \$1,500 and \$3,000, respectively. The second varied from 2 per cent. on incomes from \$6,000 to \$10,000, to 50 per cent. on incomes exceeding \$1,000,000. The surtax was 5 per cent. of the normal tax and supertax on incomes from \$6,000 to \$10,000, 10 per cent. from \$10,000 to \$100,000, 15 per cent. from \$100,000 to \$200,000, and 35 per cent. ex \$200,000. Companies still paid the normal tax only.

In 1919 the normal tax was made 4 per cent. on all incomes exceeding \$1,000 and \$2,000, respectively, and 8 per cent. when it exceeded \$6,000. The supertax was abolished, and a surtax of from 1 to 65 per cent. substituted. The corporation tax was made 10 per cent. of incomes exceeding \$2,000.

In 1920 an additional 5 per cent. of the normal and surtaxes on incomes of \$5,000 and over, was added. It was also provided that one-quarter of the tax was to be paid on making the return.

### SUN TRUST COMPANY REPORT

The annual meeting of the Sun Trust Company was held in Montreal on March 7. The balance sheet shows the following assets: Real estate, \$1,903,959; mortgage loans, \$40,042; stocks, \$352,275; bills receivable, \$37,633; bonds, \$3,110,123. Total, \$5,759,994. J. B. Pelouquin was added to the directorate and the other directors were re-elected.

### STOCK BROKERS' DELEGATION

President E. G. Wills and a delegation of members of the Toronto Stock Exchange, interviewed Sir Henry Drayton, the minister of finance, on March 15, with respect to the form of a return of stocks held for speculation which is required by the government under the provisions of the Income Tax Act. They objected to the return in its present form, apparently on the ground that the preparation of a report showing in detail all stock transactions of a speculative character made in a broker's office would involve much labor and expense. Sir Henry Drayton, it is understood, while emphasizing the determination of the government to secure details of all taxable incomes, was able to meet the objections of the brokers, and indicate to them the extent of the information required for the purpose of the collection of the income tax.

### PRUDENTIAL TRUST CO.

In keeping with the reports of other trust companies which have already appeared, the annual statement of the Prudential Trust Co. reveals a handsome increase in business, together with a good advance in profits. The net profits for 1920 amounted to \$41,895, showing an increase of \$11,849 over 1919. Out of this amount provision is made for the dividend of \$5,918, covering the final quarter of 1920, and payable March 15, 1921, leaving a balance transferred to contingent reserve account of \$35,977. This, along with a sum of \$30,687, credited from 1919, brings the total of contingent reserve to \$136,441.

In the trust department the company reports investments under administration by the company of \$2,823,250, which is double last year's total of \$1,411,390. Cash in bank amounts to \$773,771, making a total of \$3,597,021, as compared with \$2,277,463 for 1919. In the guaranteed trust account the total is \$1,044,050, comparing with \$1,045,611 in 1919. The bond trusteeships of the company have grown from \$33,177,000 during the year to \$34,307,000 as at the end of 1920. Total assets are now \$5,510,163, compared with \$4,845,992 in 1919.

### SASKATCHEWAN MUNICIPAL HAIL ASSOCIATION

#### Surplus of \$577,221 Will be Held as Reserve Against Future Contingencies

**F**OLLOWING a meeting of the board of directors on March 7, the annual convention of the Saskatchewan Municipal Hail Insurance Association was held in Regina on March 8, with the President, A. E. Wilson, of Indian Head, in the chair. A surplus of \$577,224 for the year ended January 31, 1921, made possible the provision of a reserve fund. The surplus is made up of a balance of \$238,046 from the operations of the association in 1919 and \$339,177 from last year. The assets of the association include an item of \$324,336 as total arrears of assessments and penalties due the association from the municipalities; \$285,000 invested in farm loan debentures and \$11,500 cash in the bank.

#### Forty-Acre Limit

The delegates went on record as being in favor of the abolition of what is known as the 40-acre exemption clause of the Hail Insurance Act. Under one of the sections it is provided that an additional rate shall be fixed by the board of directors to be levied on all the land of an owner or occupant under crop in excess of 40 acres. By their vote the delegates ask an amendment to the act doing away altogether with the exemption of 40 acres.

Possibly the second most important resolution of the day had to do with the right of a tenant of a farm to come in under the municipal hail insurance scheme where the owner of the land has withdrawn. Considerable discussion centred around this point and finally the convention accepted the following resolution presented by delegates from Willow Bunch: "Whereas it is the intention of the Municipal Hail Insurance Association to provide protection against hail damage on all crops in the province and that such intention is thwarted by the withdrawal of lands by the owner when renting his land, he it therefore resolved that where an owner has withdrawn his land from the operations of the association it shall be within the right of the tenant to secure protection by applying for the same providing all dues are paid on demand."

#### Discuss Surplus

The fact that the association now has a surplus of over half a million dollars also brought forward an interesting discussion during the morning session. Some objection was raised to a large surplus by a representative from Big Quill municipality, who expressed the opinion that it was not a wise policy. The convention, as a whole, however, indicated that the experience of the association in 1916, when a half million dollar surplus was wiped out almost overnight, was one they had no desire to have repeated.

Hon. C. M. Hamilton, one of the vice-presidents of the association, reminded the convention that in 1915 when the association was beginning to accumulate a surplus there was an expression of opinion that a less amount than the flat rate of that time would be sufficient. In 1916, that was shown to be a fallacy. He thought that another agitation had grown up for a reduction of the flat rate but felt they should go slow in making any change. "The amount being paid by farmers of Saskatchewan under this system compared with the amount charged by line companies, gives to our farmers an insurance at an extremely low rate. To make insurance safe the risk must be distributed over a period of years and over as large an area as possible. I personally would like to see a surplus built up that would reach one or two million dollars if it can be done by charging a rate not more than half that charged by the line companies as at present."

The business of the Mahon Bond Corporation, Ltd., St. John, N.B., is now being conducted under the name of W. F. Mahon and Co., the name used in connection with the Halifax office.

# The Week in Parliament

## Railways Chief Subject of Discussion—Various Alternatives Proposed—Windsor-Michigan Bridge Company Incorporated—Bill to Amend the Bankruptcy Act

(Special to *The Monetary Times*.)

Ottawa, March 24, 1921.

Thursday, March 17

In House of Commons:—(a) Annual statement of Minister of Railways on government-owned railways; (b) Passing of two million dollars estimates for Department of Agriculture.

Friday, March 18

In House of Commons:—(a) First readings of following bills: one respecting Canadian Pacific Railway Company, another regarding Canadian Transit Company to build a bridge for railways and vehicular traffic from Windsor to State of Michigan, one respecting the Credit Foncier Franco-Canadien, and another respecting the London and Lake Erie Railway and Transportation Company; (b) Bill to amend Bankruptcy Act and enlarge scope of present act introduced by S. W. Jacobs of Montreal; (c) Resignation of Sir Herbert Ames as member for St. Antoine; (d) Third readings of act incorporating Bar Association, and act incorporating Gilmour and Hughson, Ltd.; and (e) Passing of another two million dollars estimates, justice and agriculture departments.

Monday, March 21

In House of Commons:—(a) First reading bill to incorporate the Quebec Union Electric Telephone Co.; (b) Consideration of bill to incorporate North American Trust Company of Canada and reference back to committee; (c) Second readings bills giving Canadian Pacific extended debenture powers, Canadian Transit Company incorporation, and London and Lake Erie Railway and Transportation Company, Credit Foncier Franco-Canadien cancellation of incorporation; (d) Discussion on Hocken resolution to appoint Federal Housing Board and finance erection of homes.

Tuesday, March 22

In House of Commons:—(a) Discussion on Mackenzie King resolution asking that government be required to produce all information, correspondence and accounts of Canadian National Railways on demand of members when not of confidential nature, and resolution defeated.

Wednesday, March 23

In House of Commons:—(a) Estimates; and (b) Private members' bills.

The Railway Situation

The principal event of the week was the annual report of Hon. J. D. Reid, Minister of Railways and Canals on the Government-owned railways. The situation disclosed as to the operating deficit and the information given that even the Grand Trunk Railway Co., and from which so much has been hoped, was not able to pay all its fixed charges from its surplus above operating costs has been the theme not only in speeches in the House but amongst members in gatherings outside. The final taking over of the Grand Trunk Railway is looked upon by the government as the real beginning of the testing time of their management of the railways. But the economies through the elimination of duplicate services and offices, and the better co-ordination of all the lines, which they expect to make things better next year along with proposed reductions in wages, could have been affected by means of boards established already for this purpose. Therefore the air is rich with suggestions as to what should be done.

Public ownership advocates are urging that the government should complete the co-ordination of the roads as

quickly as possible, and put in control as quickly as possible a strong board with the most capable executive as president or general manager that can be found. Private ownership advocates are asking that the Canadian Pacific Railway should take over the road and operate it under a fixed arrangement with the government. Members of the House like the Hon. A. K. MacLean and the Hon. T. A. Crevar have advocated that a House Committee should be formed to go into the whole question and to make it their principal business in Parliament to investigate all details of management and operation with the object of reporting to the House. On Tuesday the House defeated one resolution asking that all details should be furnished the House except matters of confidential nature. The subject will recur at every possible opportunity during the session.

### OPPORTUNITIES OF BRITISH COLUMBIA ARE MANY

An optimistic prospective and retrospective view was expressed by W. J. Blake Wilson, retiring president of the Vancouver board of trade at the recent annual meeting. To support his arguments, Mr. Wilson quoted comparative statistics showing the progress of the various industries, together with figures dealing with the vast natural resources behind each particular line of activity.

"Vancouver and British Columbia need have no fear of the future," he said. "The potential wealth of this province is so great, and her opportunities for safe and sound investment so many, it seems to me that if we exercise in future a greater degree of foresight and caution we need fear no repetition of the depressive periods which we have gone through during the past two years. With a safe and sound policy of immigration and a careful analysis of the individuals who will surely come to us from other countries in Europe, and a careful statement of the facts to the investor of the possibilities awaiting him in British Columbia, I believe that the future of our province will be second to none in the Dominion of Canada.

"One of the important factors in any country is the development of her agricultural plans. I would urge this board during the ensuing year to do everything in its power to develop a sound colonization scheme, having for its object the building up within our province of a strong rural community. Without this British Columbia cannot prosper as she should. We have the country, and the Motherland has the prospective settlers, and I submit that we must first encourage and do everything in our power to bring to Canada citizens of the British Empire."

The Vancouver board of trade is a big institution, its membership now totalling 1,200. For the coming year J. P. D. Malkin will be president.

Members of the International Association of Machinists are voting on a benefit insurance plan. By the proposed scheme each member between the ages of 15 and 80 will pay a flat rate of 50 cents a month for a minimum of \$500, in addition to the existing sick and death benefits of \$300. The insurance may be increased by \$50 each year until a total amount of \$2,000 has been taken.

The Privy Council of Great Britain on March 16 dismissed two petitions for leave to appeal, one being the case of *Standard Bank of Canada vs. McCrossan*, from Vancouver, and the other of *Walsh vs. Mackenzie*, from Nova Scotia, their lordships reiterating that they must decline to allow appeals from the Supreme Court of Canada except in very exceptional circumstances.

## MANITOBA WILL FOREGO NEW TAXES

Present Sources May be Called Upon For More, Says Treasurer Brown in Budget Speech—Estimates are High

IN his budget speech on March 18, Hon. Edward Brown, treasurer of Manitoba province, stated that it is not the intention of the government to tap any new sources of revenue this year. Some of the sources that are at present yielding revenue, however, will be called upon to provide more, and Mr. Brown forecasts an increased tax on unoccupied wild lands, increased automobile licenses, and extension of the Corporations Taxation Act to impose a tax of one per cent. on gross profits of all incorporated companies. He made no reference to the much-discussed provincial income tax.

### Increase in Expenditures

Mr. Brown emphasized the point that while the statement apparently showed an estimated decrease in current expenditures for 1921 of \$1,202,808, the actual increase in consolidated expenditures for the current year will be approximately \$800,000 higher than 1920. The reason for the 1921 estimates showing a decrease over 1920, while they are actually higher, is the fact that telephone accounts have been eliminated and placed under a separate head. The expenditures for 1920, Mr. Brown stated, were \$10,942,808, as compared with estimated expenditures of \$10,123,667. The \$819,141 over-expenditure the provincial treasurer ascribed to moneys spent in combatting the grasshopper plague, increased grants for widows' pensions, schools, agriculture and interest accrued in excess of last year.

While the expenditure showed an excess over the estimates, Mr. Brown pointed out that there was an increase in the revenue during the year this amounting to \$547,000.

Speaking of the telephones, Mr. Brown said there was no reason for the current expenditures being included in the public accounts. The interest charges on telephone bonds guaranteed by the province, amounting to \$600,000 annually, would continue to appear in the public accounts. The interest is repaid by the telephone commission. Telephone accounts served to increase the budget last year by \$1,880,000.

Commenting on the activities of the government, Mr. Brown described the past year as the year of greatest progress in the history of the province. For that reason, and because of the general financial conditions, it had, on the other hand, been a year of the greatest difficulties so far as the treasury department was concerned.

Detailed figures showing the financial position of the province are given elsewhere in this issue.

## BUYERS IN WEST ARE CAUTIOUS

Fair Volume of Business, However—Winnipeg Citizens Buying Street Railway Bonds—Transcona's Affairs

(Staff Correspondence.)

Winnipeg, March 23, 1921.

THIS week business is showing a slightly upward trend and spring seems to be close at hand. Some extensions of credit are being asked for and collections are not quite so good. Retail trade in many lines is quite active. From most reports business is better, and this improvement is likely to continue.

Throughout the west merchants are buying very carefully and are not carrying heavy stocks. In northern Alberta, and in Edmonton particularly, business connected with the development of the northern territory is showing great activity. Many hundred inquiries are being received in the northern city on the outlook and prospects for development this coming spring.

North of Edmonton is a vast expanse of territory, extending over an area of some fourteen hundred miles, the mineral and agricultural wealth of which is deserving of the

greatest effort toward development which can be put forward by the citizens of this city, said Hon. Frank Oliver, in an address at the Kiwanis Club luncheon recently. The prosperity of any city depended, he said, not alone on the industries established within its limits, but more particularly upon the development and expansion of the territory surrounding it. To insure the success of Edmonton, then, the vast possibilities of the north country must be utilized to the fullest extent. The city of Edmonton undoubtedly has a great future before it in connection with the development of the rich territory to the north.

### Sale of Winnipeg Electric Stock

The plan of the Winnipeg Electric Railway to sell part of the recent three million dollar issue locally is meeting with considerable success, and small investors are buying up a few shares of this stock, which yields a return of 7½ per cent. It is being offered on the partial payment plan, and is something of a departure for the Winnipeg Electric.

The affairs of Transcona, Man., are being ably looked after by Geo. P. Campbell, former secretary-treasurer, who has been appointed commissioner by the provincial treasurer to administer its affairs. Bondholders of the town will not suffer any loss. At a meeting of the ratepayers of Transcona, Mayor Lyon explained that outstanding taxes totalled \$500,000. To carry the town through to the end of the year \$285,000 was required. Money had been borrowed to pay teachers' salaries, and town hall salaries and accounts were unpaid; \$78,159 was owing the sinking fund and \$31,521 to the trust account. The tax collections in January and February totalled \$4,485, and only \$16,000 was held to meet a \$40,000 debenture debt payment due this month.

## THE BANK OF HAMILTON

The forty-ninth annual statement of the Bank of Hamilton, which has just made its appearance, is an interesting document, both from the standpoint of the general public and the shareholders. Notwithstanding the fact that the bank's fiscal year extended farther into the period of business depression than in the case of other similar institutions, current loans are shown at some five millions higher than previously. Demand deposits, however, which are largely from the business community, have been considerably reduced. But this decline was offset by a similar increase in savings deposits, so that the bank had approximately the same amount of funds at its disposal as in 1919.

Liquid assets comprise about 39.30 per cent. of liabilities to the public, while in the previous year the ratio was about 45.30 per cent. The change has been brought about by the fact that holdings of securities and call loans have been considerably reduced, while liabilities to the public have altered but little. The bank's position in this regard is still good, however, for it is considered good banking if the ratio is at 35 per cent.

The following figures show the change in the bank's position during the year, while the comparison with 1912 will serve to show the growth of the institution in recent years:—

	1920.	1919.	1912.
Capital paid-up . . .	\$ 4,998,220	\$ 4,000,000	\$ 3,000,000
Reserve fund . . . . .	4,849,110	4,200,000	3,500,000
Total assets . . . . .	85,348,503	84,134,109	48,907,883
Current loans . . . . .	50,416,647	45,318,138	30,381,052
Liquid assets . . . . .	29,601,193	34,667,655	15,907,853
Total deposits . . . . .	68,525,571	68,665,705	38,087,477
Circulation . . . . .	5,493,376	5,941,901	3,587,215

From the shareholders' standpoint, the statement should prove to be very satisfactory. Profits for the year were \$888,018, compared with \$847,104 in 1919. Distribution to shareholders was increased to 13 per cent., by a bonus of 1 per cent. The sum of \$649,110 was transferred to reserve, and after other provisions, a balance of \$139,264 was carried forward, as compared with \$85,249 in the previous year.

## IMMIGRATION AND INDUSTRY

FROM labor circles in every city in the Dominion comes an appeal for the restriction of the flow of immigration towards Canada. The business depression, and a certain amount of resulting unemployment is the argument advanced. From E. W. Beatty, on the other hand, comes the suggestion that the acquisition of new citizens in this way is the best solution of the difficulties of our national railways. The president of the Canadian Pacific said a few days ago that without immigration the prospects of the Canadian National lines were, in his opinion, hopeless, and any legislation which would stem the tide of desirable immigration must inevitably pile up further deficits. It was, he said, an aggressive immigration propaganda that built the Canadian Pacific Railroad, and he claimed that Hon. T. A. Crerar, leader of the National Progressive party, struck the right note when he declared before the Canadian Club in Montreal recently that a wise and vigorous policy of immigration would help solve the problem.

Mr. Beatty added: "I quite agree with those who object to immigration of city-bred continentals of poor physique and doubtful health, who would at once drift into slums, or of large communities of foreign-born who frankly declare that they do not intend to assimilate with English-speaking Canadians. But the gates of Canada should be opened once more not only to the British, French and United States immigrant, but also to the Scandinavian and the more desirable type of continental." He pleaded also the cause of the skilled mechanic, in addition to that of farm hands and domestics, on the ground that Canadian industry would be handicapped in its progress without them. He concluded: "Policies which are perfectly appropriate in the case of the United States, would not necessarily be applicable to this country. By all means let us exclude the undesirable immigrant, but admit

those who in time will contribute to this country's commercial prosperity and economic strength."

How are we to reconcile these arguments from both sides? Clearly it can only be a temporary state of affairs which would justify the closing of the door to eligible newcomers. Our Quebec compatriots and our agricultural citizens are furnishing this country with an increase in population, but the cities of Canada are rapidly joining the class of great centres of population which do not maintain themselves by natural growth. They have drawn indefinitely upon the rural districts while the French-Canadians have spread beyond their native province into Ontario and the west. Canada, however, can absorb a steady but substantial growth in both city and country. For a permanent immigration policy the policy of liberal restriction is the best.

While there will no doubt be some unemployment as long as prices continue to fall, a movement covering a period of years, in the summer time at least this will be scarcely noticeable. Legislation cannot be sufficiently elastic to adjust immigration to seasonal changes. In fact the influence of the new arrivals on the industrial situation each year can scarcely be large. Conditions frequently are reversed within a few months, before new legislation or even administrative changes could be put into force. Our immigration policy will on the whole be more satisfactory if framed in the light of Canada's needs over an extended period of years.

Some changes in the regulations governing the admission of immigrants are understood to be under consideration at Ottawa, however. These will, it is stated, maintain or increase the money regulations at present in force, and will admit only bona fide farm workers and domestic help. Immigration from the British Isles, France or the United States will, it is reported, not be hindered by the new regulations, but the bars will be kept up against immigrants from Central Europe. An important clause will deal with the admission of skilled labor. In the case of mechanics of all classes, the proposal is said to be to admit only such men as there is an actual demand for in any line of work.

### THE REPUBLICAN TARIFF POLICY

FROM Washington comes a report to the effect that the new Republican administration propose to enact, not only the Fordney Emergency Bill recently vetoed by President Wilson, but also to put up the tariff generally on protective lines. All the advices heretofore have been that this course was unlikely at least until a general revision of the tariff. Some disposition here has been to wait and see what is done at Washington and, in the anticipation that the developments would not be immediate, the proposal of deferring the Canadian revision till next session has been given a certain impetus.

If, now, the Fordney measure is to be re-enacted, without any possibility of presidential veto, the domestic situation will be affected, not only in the country but in Parliament. The bill would put a practically prohibitive duty on wheat, cattle and agricultural products generally, and, in effect, would largely close the United States market to these products from outside. The seriousness of such a policy is not minimized.

The effect may be to make more certain revision of the Canadian tariff this session in the light of the new conditions arising out of the Fordney Bill, whereas the deepening opinion of late has been favorable to deferring action, though no such course has ever been indicated officially. Canada is the largest customer of the United States and, if their market is to be closed to essential Canadian products, similar restrictions here on American importations will be advocated and will not lack support in the cabinet.

### MAKING LIFE INSURANCE A PROFESSION

THE Ottawa Life Underwriters' Association has passed a resolution urging that the profession of life insurance salesmanship be closed to all except full time men. It has been apparent for some time past that there is a general tendency, the result of a number of different influences operating towards a common end, to insist more and more upon the essentially professional character of the work of the insurance agent and at the same time to require of persons engaging in this work evidence of much more distinctive and extensive professional qualifications than formerly were thought necessary. In part, the movement has had its origin among the more experienced and competent insurance agents themselves, who have long been extremely impatient at the ease with which the selling of insurance to the public could be taken up by persons with no training in the theory and practice of insurance, with virtually no business or financial responsibility, and often with no intention of devoting themselves seriously and permanently to this form of service of the community or of making it anything more than a temporary or collateral means of obtaining income with a minimum of effort.

In the eyes of those who have equipped themselves with the knowledge and skill necessary for the really adequate and efficient supplying of the needs of the insuring public, it is exceedingly vexatious that the agency field should be continually invaded by haphazard sellers of insurance, whether these belong to the categories commonly designated as "part-timers" and "side-liners" or are of the still more objectionable class that use opportunities coming to them through their regular business occupations to snatch insurance commissions which they have not properly earned or deserved. The natural reaction of the minds of those who have made themselves insurance agents in a sound professional sense is that they ought to be protected from the intrusion and the ignorant or purely self-interested competition of such accidental, unqualified and irresponsible pseudo-agents; and the kind of protection which best commends itself to them is the establishment and enforcement of suitable professional qualifications for all persons who would become insurance agents.

### DUPLICATING CHARITABLE APPEALS

THE president of a large corporation touched upon a very important matter in a recent public utterance when he referred to the insistent demands which are being made upon joint stock companies and corporations for donations to charitable institutions and organizations. It is a well-known fact that from the legal point of view a company or a corporation is something entirely separate from its shareholders, and it is very natural for charitable organizations to take the same view when soliciting donations. This results in a duplication of appeals, for the company is expected to make a donation as a company, and the individual shareholders are appealed to as individuals. This state of affairs was intensified during the war period, when individuals and institutions gave unsparringly to war organizations, such as the Red Cross, Red Triangle Fund, etc., but now we are facing days of smaller profits and more difficult industrial and financial conditions.

Many institutions have reached the point where every contribution must be carefully considered, and executive officials feel that the dual nature of the shareholders' contributions should be recognized. Some have established a policy that no donations shall be made by the company as a company without the shareholders' consent, which really means that in the majority of cases the donation becomes a matter for the shareholder as an individual to decide and attend to himself. This seems to be a fair and reasonable policy, which will place all men on the same basis, in so far as donations to worthy charitable objects are concerned.

Alberta has, it is understood, undertaken to guarantee the bonds of irrigation districts. The credit of the province is not improved by linking it up with an enterprise which is local and industrial.

\* \* \* \* \*

Net earnings of the Canadian Pacific Railway have varied only about 5 per cent during the past three years. This ability to succeed in the face of quickly changing conditions is what makes it a premier security.

\* \* \* \* \*

The farmers of the west should be encouraged in any effort to facilitate and economize the marketing of grain. What they save in this way will benefit them directly and the rest of the country indirectly. As Canada is a wheat exporting country, however, the price of wheat here must be its price in the world market less the cost of carrying it from Canada to that market.

\* \* \* \* \*

Among the new securities offered this week are those of an Ontario metal company, a Nova Scotia paper company, an Alberta irrigation company and an Alberta garment manufacturing company. The industrial side of Canadian development is not being neglected in the investment field, and there is a solid basis for the emphasis laid by a couple of prominent underwriting houses on the fact that the prosperity of our governments and municipalities depend on the success of industry.

55, OLD BROAD STREET, E.C.2

## PERSONAL NOTES

HON. W. M. MARTIN, premier of Saskatchewan, has been sworn in as temporary successor to Hon. W. F. A. Turgeon who has resigned from the office of attorney-general of the province.

SENATOR SMEATON WHITE, of Montreal, has been elected to the directorate of the Steel Company of Canada to fill the vacancy created by the death of Francis H. Whitton, of Hamilton.

DR. JOHN HOSKIN, K.C., of Toronto, was elected vice-president of the Western Assurance Company and of the

British America Assurance Company at their recent annual meetings. He has been on the directorate of both for some years past and is also connected with several other prominent institutions, being president of the Canada Landed and National Investment Company. W. B. Meikle was re-elected president of both companies, and the following were re-elected directors in each case: Sir John Aird, Toronto; Robert Bickerdike, Montreal; Lt.-Col. Henry Brock, Toronto;

Alfred Cooper, London, Eng.; H. C. Cox, Toronto; J. H. Fulton, New York; D. B. Hanna, Toronto; E. Hay, Toronto; Miller Lash, Toronto; G. A. Morrow, Toronto; Hon. Fred. Nicholls, Toronto; Sir Henry Pellatt, Toronto; E. R. Wood, Toronto.

F. HOWARD WILSON has been appointed vice-president of the Merchants Bank of Canada, to succeed the late Andrew J. Dawes. For several years past he has been a member of the board of directors. Mr. Wilson is president of J. C. Wilson, Limited, one of the pioneer paper manufacturers of this country.

G. INNES MACKENZIE, of Winnipeg, has joined the firm of Reginald Lawson and Company, Limited, insurance agents, as manager of their casualty department. Mr. MacKenzie was formerly in the casualty department of Osler, Hammond and Nanton, and previous to going to Winnipeg some years ago, was prominent in the insurance field in Regina.

J. W. NORCROSS, president of the Canada Steamship Lines, Limited, has returned to Canada after a business trip abroad, extending over a period of several months. At a meeting of the board of directors in Montreal this week, Mr. Norcross reported the result of his overseas negotiations in respect to both ocean freight extensions and new financing, his efforts in this direction having been followed by altogether satisfactory results.

R. C. MACKNIGHT, assistant general manager of the Northern Life Assurance Company, has been appointed manager. Mr. MacKnight is in his 33rd year and is probably the youngest life company manager in the Dominion. Prior to entering the service of the Northern he was with the Canadian Bank of Commerce from 1904 to 1913, when he joined the Northern as head of the investment department.

Later he was made treasurer. His interest in the field organization led to his being placed in charge of the western agencies and of late he has had charge of the whole field work. The company has felt the benefit of his excellent work and the directors have every confidence that in placing the management in his hands they are assured of the rapid advance of the company.

### OBITUARIES

WILLIAM CLARKE, one of the pioneers of the pulp and paper industry in this country, and the founder of Clarke City, Quebec, now a prosperous manufacturing centre of 10,000 inhabitants, died in New York recently.

MARTIN J. GRIFFIN, C.M.G., LL.D., who for many years was parliamentary librarian in the House of Commons, died in Ottawa this week. He had been in failing health for some time and retired last June from the post of parliamentary librarian, a position which he had held for thirty-five years. Mr. Griffin was an unsuccessful candidate for the House of Assembly, Nova Scotia, in 1874. In 1881 he became editor-in-chief of the *Toronto Mail* and he occupied this position until appointed to the librarian's position in 1891.

### POSITION OF OSWALD BROTHERS

At a meeting of the creditors, held recently, the financial position of the stock broking firm of Oswald Brothers was reported as showing a deficit of \$212,000. Total liabilities were \$658,000, of which \$493,000 is unsecured, with assets of \$446,000. Gerald H. Bruce, former junior partner in the firm, to whose alleged defalcations its bankruptcy is claimed to be due, has not so far furnished any statement to the trustee.

BANK OF NOVA SCOTIA

*New Branch at Avenue Road and St. Clair Avenue, Toronto*

### AUTOMOBILE UNDERWRITERS' ASSOCIATION

A special meeting of the Canadian Automobile Underwriters' Association was held at the C.F.U.A. rooms in Montreal on March 15. The subject under discussion was the resignation of the Alliance Insurance Company, of Philadelphia, Insurance Company of North America and Providence-Washington Insurance Company, which action was the result of the decisions arrived at the meeting held in Toronto on the 23rd and 24th of February last. The meeting was able to convince the retiring members that it would be in the interest of all concerned that they continue their membership, with the result that the resignations were withdrawn. The rates previously promulgated and reported in our issue of the 4th of March are consequently in effect.

## THE STERLING BANK

OF CANADA

Perhaps the most important feature of our "Personal Service" policy is its effect on Collections. Clients have voluntarily reported that—due to personal attention—their collection Service is better and faster with fewer bills returned unpaid.

## SASKATCHEWAN RURAL MUNICIPAL ASSOCIATION

Resolution Criticizes Increases in Rates by Railway Board—  
Municipal Matters Explained by Government Officials

FINANCE was the outstanding subject of discussion at the convention of the Saskatchewan Association of Rural Municipalities, held in Regina, March 9-11. About 1,000 delegates were present. Premier Martin announced that the government intends to immediately appoint a commission of investigation consisting of five, two representing rurals, two urbans and one the government, to thoroughly inquire into the whole question, with a view of suggesting some line of policy that can be pursued with the object of making taxation as far as possible bear equitably on the entire population of the province.

The presidential address was given by Murdo Cameron, M.L.A., acting president of the association, who supported the plea of the premier for economy in municipal matters. He also made reference to the abolition of the supplementary revenue tax, expressing his pleasure at the move.

Hon. Geo. Langley, minister of municipal affairs, dealt with the subject of freight rates, and urged that a resolution condemning the attitude of F. B. Carvell, chairman of the Railway Board, be passed. Speaking of control of municipal finance, Mr. Langley said there was no difficulty in the expenditure of money, but councillors should make a point of knowing what money was coming in and arrange expenditure accordingly. The relationship between councils and banks should be one of perfect confidence.

Murdo Cameron, M.L.A. for Saskatoon County, who was formerly acting president, was elected president, and Thomas Moffat, of Viceroy, was elected vice-president.

The report of the advisory committee to the Wild Lands Commissioner went into detail as to assessment and the formation of the advisory committee, and referred to recent legislation in the matter of endeavouring to equalize taxation. The report concluded as follows: "As no general assessment had been made since 1914 the committee recommended that a new assessment be made throughout the province which the government thought advisable and brought down amending legislation. After going more fully into the question, and the demand of both the rural and urban associations to have some fair basis of equalization between them, the bill was withdrawn, and a promise made that a commission would be appointed to consider the whole question, and to try to find an equitable method of raising the public revenue tax. Awaiting the findings of the commission we recommend that no change be made in the assessment for the year 1921."

## Railway Board Criticized

The following resolution was passed regarding freight rates:—

"Resolved that this convention desires to protest in the strongest manner against the recent large and unreasonable increase of freight and express rates. The present high rates will result in making successful farming on the prairies difficult, if not impossible, and will retard indefinitely the further settling up of the farm lands in Western Canada; and we further protest against the want of sympathy with the public, where railway matters are concerned, manifested by the Railway Commission; and further, that a copy of this resolution be forwarded to the prime minister of Canada."

J. J. Smith, deputy minister of municipal affairs, gave an address on municipal matters. He pointed out that three measures exist which might be adopted by the municipality in an effort to bring about a reduction in the amount of interest paid on municipal loans, namely, economy and retrenchment in municipal expenditure, enforcement of prompt payment of taxes, and the creation of a surplus in the municipal treasury. Mr. Smith made extended reference to the amendment to the Rural Municipality Act at the last session of the legislature, and to the equalization of taxation.

## WHOLESALE PRICES STILL TREND DOWNWARD

February Index Number Show Further Substantial Decline—  
There Are Some Exceptions, However

STILL further substantial declines in wholesale prices of a number of commodities took place in February, according to the index numbers compiled by the Department of Labor. The index number of 262 commodities was 270.1 last month, as compared with 281.3 in January and 343.5 in February, 1920. With three exceptions, all prices were either lower or stationary, as compared with the preceding month. The exceptions were: Sheep and mutton, poultry and raw furs.

## Some Increases Since 1920

Some drastic reductions have been made since the beginning of 1920. For instance, the index number for raw furs a year ago was 1851.4, as compared with 492.1. There are some prices, however, which are higher. These are: Fresh fruits, both native and foreign; miscellaneous building materials; crockery and glassware; kitchen furnishings. Details of the February changes are as follows:—

## WESTERN ASSURANCE CO.

Due to the unfavorable conditions encountered in the marine field, the results attained by the Western Assurance Co. in 1920 were not quite as good as in the previous year. Marine premiums amounted to \$1,743,645, while losses were \$1,755,181, and the total expenses of the department \$2,148,492. The fire department shows much better results, however, premiums amounting to \$3,527,612, with losses of \$1,797,213, and total expenditure \$3,282,456. Total income for the year was \$5,488,427, compared with \$5,533,994 in 1919, while expenditure was \$5,430,948, compared with \$4,775,163. A balance of \$365,097 brought forward, the outcome of a succession of profitable years, enabled the company to pay the preference dividends and distribute 6 per cent. on common stock, and after the other necessary provisions, there was a balance of \$153,752.

In commenting on the year's business, the president, W. B. Meikle, said: "We cannot forecast whether or not we will pay the common dividend in September next. That must depend upon how the business shows up in the summer months, during which the most of our profit is made. The insurance business is one of 'averages,' and must be run upon a wide spread of business, and over a period of years before a true estimate of results can be formed. In a varied business such as ours, there are many fields which we, with confidence, rely upon for profit, and there are others where cycles of fat and lean years are met with; 1920 has hurt us in only one department."

## BRITISH AMERICA ASSURANCE CO.

In general with other companies operating in the marine insurance field, the experience of the British America Assurance Co. in 1920 was unfortunate. Marine premiums amounted to \$579,631, as against losses of \$1,136,694 and total expenses of the department of \$1,286,800. The result of the operation of the fire, hail and automobile department was more favorable, the credit balance being \$245,085. But, on the whole, the company lost on operations for the year, the debit balance, after taking into consideration interest and rents, amounting to \$314,887. With the exception of 1914, last year was the only set-back the company has had since 1908. From December, 1908, to December 31, 1919, the total of the yearly profits amounted to over \$2,400,000, and the debit of 1920 operations must, of course, be set against this.

Commenting upon the conditions in the marine field, the president, W. B. Meikle, said: "The most annoying source of loss has been the abnormal claims for damage through poor packing and the thieving of goods, which went rampant over many parts of the world. Various methods have been tried to cure the evil, but it became evident that the government and dock authorities must give better police protection; that the punishment meted out to those found guilty should be severe and not influenced by the threats of the labor unions; that the railroads and steamship companies should not evade the loss or damage through negligence to merchandise whilst in their care by all sorts of restricted bills of lading, and that cover of the the marine policy should not extend beyond a reasonable number of days after the goods were landed. So far as our business was concerned, we found that we could not wait any longer for marine underwriters to agree upon united measures, and we cut out all marine insurance for shippers whose business had proved unprofitable and retired from such agencies as did not make the selection of risks from the underwriter's point of view their primary thought and duty."

By defeating the Northern Assurance on March 10 by 3-2 in overtime play, the team representing Robert Hampson and Son, Ltd., won the championship of the Insurance Hockey League, Montreal. These two teams at the close of the regular schedule had each won seven and lost one, each team having defeated the other by the margin of one goal.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended March 18, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Mar. 18	6	17	4	0	5	2	0	0	0	34	..
Mar. 11	14	13	0	0	4	1	6	0	0	38	16
Mar. 4	5	12	0	2	1	2	9	0	0	31	16
Feb. 25	16	14	0	4	2	2	8	2	0	48	12

## EXCHANGE QUOTATIONS

Quotations of exchange on European countries and the United States as at March 23, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Can., Mar. 17.	Can., Mar. 23.	N. Y., Mar. 23.

United States ...	141 <sup>11</sup> / <sub>16</sub> p.	131 <sup>11</sup> / <sub>16</sub> p.	....

## BUSINESS CONDITIONS

River conditions favor the early opening of navigation, says R. G. Dun and Company's March 19 review of business conditions in the Montreal district, but the Labrador ice coming down this spring is said to be unusually heavy, and to be badly blocking the entrance to the gulf. First sailings of regular liners from Britain for this port are timed for April 8 or 9. The break-up of the country roads has not effected general collections in this province, and Ontario remittances are favorably spoken of, but there is room for considerable improvement in northwestern payments. In the grocery trade there is a steady consumptive movement. Sugar refiners are all working to moderate capacity and claim they should be getting advanced prices, but they all remain on the same level, quoting 10½ cents for standard granulated. Corn syrup, starch and rice have been quoted at lower figures of late, and further easing off seems to be anticipated.

Regarding the Toronto district, it is pointed out that settlement of wage disputes is being attempted in many trades at present and a great deal depends upon the outcome for even a semblance of prosperity in this country the coming summer rests to a large extent on the harmonious working together of labor and capital. Packing house employees are said to be dissatisfied and a strike may be called that would effect about 4,000 men. Express rates have become so high that rapid delivery by this service is no longer worth while, when the enormous cost is considered. Large establishments are seriously contemplating reverting to freight as their transportation bills mount out of proportion to the advantage gained by express service. Trade still lags somewhat but factories, etc., have recently taken on employees after an extended period of idleness, and an increased buying capacity should soon be evident. Industrial plants are showing more activity from day to day; retail trade generally is also picking up, although the buying done at the wholesales continues to be characterized by cautiousness, and this is noted in dry goods where present prices are expected to rule for some time. Woollen jobbers short of stock easily replace at very reasonable figures, and there appears to be a healthier demand.

## THE WHEAT POOL

Scheme Now Being Discussed Reveals Some Dissension Among Western Farmers — The Question of Finance

BY ANGUS LYELL

INTEREST in the wheat pool planned by the farmers in the west continues. The topic is usually a live subject of debate at all important agricultural gatherings. But although the best minds of the United Grain Growers and the Canadian Council of Agriculture have been planning ways and means of making the project workable, the path to success does not appear to be quite clear. At the convention of the United Farmers of Alberta it was expected that the president would elucidate matters, but about all that he did was to urge caution, which was somewhat disappointing to the rank and file. Even Mr. Crerar did not tell his hearers how the scheme could become operative.

Nevertheless, most of the farmers' leaders are clamoring for the co-operative marketing of wheat. A considerable measure of success has been attained by the farmers in the west in their mercantile efforts. The net profit of the United Grain Growers for the year ending August 31 last was \$463,675.64, the turnover of the company, including that of its subsidiary concerns, being about \$113,000,000. The Saskatchewan Co-Operative Elevator Company, another strong concern, is also making substantial progress. The farmers' political organizations are gaining in strength. "Why should we not, then," ask some of the ambitious leaders, "market our own wheat? Let us combine and make a bold bid for the control of the trade."

### Would Eliminate Competition

From pronouncements already made it would appear that the kernel of the project is the elimination of competition. It is recognized that this could not be obtained at once, but it is calculated that farmers producing about half of the grain crop would enter the combine. These would undertake to market all of their crop through their own association for a period of not less than five years. During this time a number of the others might be gathered into the fold. If finally the bulk of the farmers entered the combine, competition would be practically eliminated.

The project is one on which a hasty opinion should not be given. If certain associations of farmers wish to combine for the purpose of marketing their produce, they have a perfect right to do so. In both California and Washington the fruit growers have been marketing their product for some time through a co-operative agency. Their efforts have been fairly successful. They operate, however, under conditions somewhat different from those which would be encountered by the prairie farmers.

### Essentials to Success

Perhaps the most vital factors in the success of the project are:—

1. Co-operation and loyalty among the farmers themselves.
2. The difficulty of financing the scheme in its initial stage.
3. The difficulty of obtaining and maintaining efficient organization and management.

The venture as already outlined embraces a scheme for the marketing of at least half of the wheat crop, or some hundred million bushels of wheat annually. Included in the pool would be farmers from all over the prairie. The plan is to have one and not several "pools." Is such a scheme workable?

I have said that for the success of the project it is vital that there should be co-operation and loyalty among the farmers themselves. I am afraid that this cannot be obtained if the venture is to embrace producers in all of the prairie provinces. There are signs of suspicion, even distrust, among some of the groups already. It has been openly whispered that a separate movement is being planned in Saskatchewan. Some of the Alberta "locals" have been demanding an explanation of this. If there is to be one organization only for the marketing of the wheat, why two organizations for the supply of mer-

chandise? Why two powerful, yet separate, elevator companies? The Grain Growers' Grain Company of Manitoba and the Alberta Co-Operative Elevator Company combined in 1917 under the name of the United Grain Growers. Why does the Saskatchewan Co-Operative Elevator Company stand aloof? And if in the matter of elevator service and the supply of farm equipment and merchandise there cannot be complete co-operation and combination, may we expect such a gigantic scheme for the marketing of wheat?

### Relation to Politics

In the political field there are signs which indicate the creation of conditions which may tend to disruption. The cleavage on fundamental matters of policy between Mr. H. W. Wood, as president and leader of the United Farmers of Alberta, and the Hon. T. A. Crerar, the federal leader of the farmers' party, is well known. Mr. Wood stands for the closed door and group or class representation, whereas Mr. Crerar and Mr. Drury would admit to the party all those who broadly stand for what they term progressive legislation. Today this cleavage may be adroitly covered, but before long it will assert itself. As a matter of fact, Mr. William Irvine's book, "The Farmers in Politics," which was published the other day, is a defence of the group idea in politics. In it he states that "the United Farmers originated as an industrial group" and that "apart from the group idea the farmers' movement has no meaning and no future." Before long the strength of the ties which bind together the several units of the farmers' party will be tested.

I doubt if it is possible for a majority of the farmers to form and maintain one group for any length of time. But assuming that half of the prairie farmers can band themselves together for the co-operative marketing of their wheat and that they can raise sufficient capital for the initial stage of the venture, what can they accomplish?

We are told that the intention is not to endeavor to maintain high prices for wheat used for home consumption, but to get the best price for the surplus or exportable part of the crop. Now this price is determined largely by the competition of other nations, by international supply and demand. The farmers contend that at present they are largely at the mercy of the grain speculators, since necessity often compels them to sell in the fall when prices are generally low. They desire a rearrangement of things so that they may not have to do this; they plan to eliminate the middlemen and jobbers.

### Banks Might Be Formed

It is obvious, I think, that an important part of the scheme would be the formation of agricultural banks. How otherwise could credits be arranged for the numerous producers who would decide to delay the sale of their wheat until the spring? If the company which had control of the marketing of the crop had to undertake the financing of its members over perhaps a considerable part of the year, it would require to be capitalized on a huge basis. If the farmers get control of the legislatures in the prairie provinces one of the first steps they will take, as far as I can judge, will be the establishment of agricultural banks. Such banks appear essential to any concerted efforts they may make to establish their economic theories.

I come now to the matter of obtaining and maintaining efficient organization and management. While the necessary membership and capital for the co-operative marketing of the wheat crop might be obtained, the project could not succeed without efficient control. Can the farmers attract to their scheme men big enough to handle it? This is a point which should be very carefully pondered. The average farmer knows quite well that he is ignorant of the way in which a matter of this kind should be conducted. And he is beginning to perceive that his leaders are little better informed. Mr. H. W. Wood and his fellows talk but in generalities. They evade specific issues.

By all means let us have a wheat pool if it is going to usher in better conditions for the community in general. Let us eliminate the grain brokers, middlemen and jobbers if we

## Is Your Property Still Unsold—Still To Let

We will sell or rent it for you. We can do it for you, because we are doing it every day for others. Collection of Rents, Efficient Management of Apartment Houses, Stores, Offices and Factory Buildings—we do these things exceptionally well.

For the service we render our fees are small. By comparison with previous results, our services very often cost the owner nothing.

can get on better without them. But let the advocates of the scheme cease making random and sweeping statements, often not based on facts, and get down to the elemental things. And they would be well advised to obtain competent advice from outside sources before launching on a gigantic project such as that they plan.

### ONTARIO LOAN COMPANIES 1920 FIGURES

Assets Totalled \$211,233,110—Recent Changes in Supervision and Inspection—The Deposit Situation

**A** SUMMARY of the assets and liabilities at the end of 1920 of forty-two loan corporations registered in the province of Ontario has been issued by the Registrar of Loan Corporations, showing total assets of \$211,233,110. The figures are as follows:—

ASSETS.	
Office premises .....	\$ 3,995,464
Real estate held for sale .....	6,598,563
Mortgages on real estate .....	137,387,676
Loans on stocks and bonds .....	5,086,361
United Kingdom, Dominion of Canada, and provinces of Canada securities .....	13,526,778
Canadian municipals, school districts and rural telephone debentures .....	12,399,331
Other bonds, debentures and debenture stocks...	6,310,972
Stocks .....	12,149,604
Cash in banks and other institutions .....	12,517,523
Other assets .....	1,250,834
	\$211,233,110
LIABILITIES.	
<b>To the Public—</b>	
Debentures and debenture stock ..	\$94,363,875
Deposits .....	29,514,893
Money borrowed .....	1,471,498
Other liabilities .....	2,858,094
	\$128,208,361
<b>To Shareholders—</b>	
Capital stock .....	\$46,517,600
Reserve funds .....	32,527,876
Dividends unpaid .....	1,182,413
Profit and loss .....	2,786,858
	83,014,748
	\$211,233,110

In submitting the detailed report for 1919 recently the Registrar discussed methods of examining loan and trust companies, the form of their annual statement to shareholders, and their deposit business. It is pointed out that a new form of return, uniform with that to be used by the Dominion, has been agreed upon. A standard form for the annual statements to shareholders and depositors has also been arrived at. It is also suggested that legislation should be enacted to provide for the regular inspection of loan and trust companies of the province.

#### Deposit Business

Regarding deposits, the following is said:—

"Repayments of sterling debentures during the last two years have been substantial and the acquisition of new money from Great Britain and European countries practically nil. Because of the high rates of interest paid by Dominion and provincial government and municipal bonds, the companies have been able to increase their domestic borrowings on debentures only slightly. Moneys received on deposit have been substantially increased; in the case of three of the smaller companies the limit of borrowing on deposits allowed by statute has already been reached and a number of other companies are nearing a similar embarrassment. The demand for mortgage loans is also increasing for urban building and farm loan purposes as the return to normal con-

ditions proceeds. So much is this the case that it has become a matter of real concern to the public as well as to the companies that the supply of moneys available for such loans should receive large increment. With the closing of the British and foreign markets to the loan companies and the limited sale of loan company debentures locally, the only available source of increase in funds for this purpose is the supply of moneys received through deposits. It is entirely to be expected, therefore, that the companies will ask to have the present limit of deposits increased if this normal development is to be provided for.

"Some agents for British investors in loan company debentures have for many years looked coldly upon the extension of the deposit business of Canadian loan companies, for the reason that the Canadian depositor is believed to be in a preferred position because of his right to withdraw his deposit moneys on short notice. Their influence has been sufficient to induce some companies who have access to the British money market not to exercise their right to take deposits. The fear is now expressed by some Canadian companies that any extension of the present statutory limit of deposits might result in a withdrawal of British money now invested in loan companies' debentures. Other British agents hold a directly contrary view. They state that the opinion above quoted has long since been disproved, and the present disposition of the British investor is to regard the increase in deposits of Canadian companies as an indication of local confidence in the company receiving them, and therefore an additional inducement to the British investor.

"Subject to the settlement of that disputed question in a manner which will maintain the confidence of British investors the department believes that from the standpoint of the public interest the only question which can be raised as to the desirability of extending the present limit of deposits is whether or not the deposit features of the loan company business are adequately safeguarded. It is apparent that the necessary safeguards are two: First—The investment of the moneys of the company in the best possible form of security. Second—The maintenance of a sufficient amount of cash and readily marketable or liquid securities to meet any sudden demand which may be made upon the company for withdrawal of deposit moneys.

"The department feels justified in recommending to you that if these two features are amply protected a reasonable extension of the limit of money which may be received on deposit by loan corporations might safely be allowed. If the deposit business of loan companies increases, a double advantage to the public will accrue, namely, a greater supply of mortgage loan moneys at moderate cost and a better rate of interest on savings deposits.

#### Deposit Business of Trust Companies

"In the case of trust companies, the transaction of the receiving of moneys on deposit is quite different from that in the case of loan companies. With a loan company the relationship of the company to the depositor is the ordinary relationship of debtor and creditor, while on the other hand the relationship of a trust company to its depositor is the relationship of trustee to 'cestui que trust.' This latter relationship involves the limitation of the character of the investment into which the moneys of the depositors may be placed to the class of security definitely authorized by statute for trust funds, and it involves also a definite ear-marking and setting aside of those securities for the benefit of the depositors as distinguished from any other class of claimant or creditor of the trust company.

"The present Ontario act, however, has not made clear the intention to distinguish the borrowing of money by taking deposits (which is forbidden by the statute) from the receiving of moneys in trust for investment (which right is given by the statute). It is in the interests of the public and the companies that the intention of the act should be made plain, and the department respectfully recommends that the legislature should be asked to clarify this situation."

## Your friend and The Canada Trust Company

Should you wish to have a friend act as executor without burdening him with book-work and other details this can be arranged by naming The Canada Trust Company co-executor.  
Competent and careful accounting is essential to the proper management of your estate.

### MINERAL PRODUCTION INCREASED IN 1920

More Copper, Gold, Iron, Nickel and Zinc Produced Than in 1919—Reduction in Output of Lead and Silver

MINERAL production in Canada in 1920 showed an increase, and the values, in spite of declines in prices, are generally higher. This is shown in a preliminary report of the Department of Mines. There has been a wide range in price of many metals and mineral products during the past six or seven years and the continuation of high prices for many products has of course resulted in greatly increasing the total value of the mineral production, even when the actual quantities of metals or minerals obtained might be decreasing. For instance, the average price of coal at the mine has increased from \$2.49 in 1913 to \$4.65 in 1920, so that the same tonnage of coal as was produced in 1913, viz. 15,012,178 tons would have a value in 1920 greater by over \$32,000,000 than was placed upon it in 1913.

Estimates of the total probable value of the mineral production of Canada during 1920 made on the first of January last, were short about 8 per cent. of the preliminary figures now available. Sufficient allowance had not been made for the increased production and increased value of cement, clay, quarry and other similar structural material products. The coal mining industry too had responded more extensively, and at higher values than had been estimated, to the heavy demand for fuel.

The total estimated value of the metal and mineral production in 1920 was \$217,775,080, which is greater than the total value reached during any preceding year. Compared with the production in 1919 valued at \$176,686,390, an increase of \$41,088,690 or 23.3 per cent. is shown, while compared with 1918 the previous maximum year the increase was \$6,473,183 or 3 per cent.

#### A Wrong Impression

The evidence toward the close of the year of economic depressing, falling prices, restriction or complete cessation of operation at numerous points tended to monopolize the public mind, and to divert attention from the fact that Canada's mining industry during 1920 had furnished an output, the value of which was greater than had been attained in any previous year.

The metallic production which in 1918 was valued at \$114,549,152 and fell in 1919 to \$73,262,793 has increased in 1920 to \$77,236,370. The metallic production is still less in total value than that reached during each of the years 1916, 1917 and 1918.

The total value of the non-metallic production including clay and quarry products in 1918 was \$96,752,745, which was increased in 1919 to \$103,423,507, and has now again been increased in 1920 to \$140,538,710. Although about \$23,000,000 of this increase is due to coal alone, about \$10,000,000 to

the increased production of cement, clay and quarry products, there is evidence of a remarkable growth and development in the exploitation of Canadian non-metallic mineral resources.

#### Gold Output Maintained

The past year has shown a quick recovery in the production of copper, nickel, and zinc amongst the metals and in the production of coal and many other non-metallic products. Gold production has continued to increase during each of the past two years, though the increment has been very small, and Canada occupies an almost unique position in being perhaps the only gold producing country which has not shown a serious falling off in the production of this metal. In the production of zinc, asbestos and coal the highest pinnacle of production has been reached during the year just closed. True it is that some products such as graphite, magnesite and pyrites have apparently not been in strong demand, yet the production of these as well as of chromite, gypsum, fluorspar, mica and salt have not only been well maintained but have been materially increased, while the production of feldspar has been more than doubled.

Shortage of fuel throughout the greater part of the year in central Canada and insufficient transportation facilities have tended to restrict shipments. The production of lime and cement was seriously affected by the fuel shortage, while car shortage restricted, or hampered the shipments of coal, asbestos, feldspar, and other products. In many camps labor was none too plentiful and wages for the most part were maintained at the highest levels.

It is probable that in the production of metals the recovery to higher output levels has been too rapid. With the exception of silver, metal prices were well maintained throughout the first nine months of the year, copper holding during this period at slightly above the average of the previous year, lead at about 50 per cent. above the average of 1919, and zinc at 30 per cent. in excess of the previous year's average.

#### A Fall in Prices

Toward the end of the year, however, market conditions appeared to indicate the accumulation of excessive stocks, and the crash in metal prices during October, November and December showed the desire of holders to unload. The fall in silver prices began in January and was accelerated in October.

The severe price decline has resulted in the recent closing of a number of mining operations with the consequent labor unemployment involved. Some of these must perforce remain closed or work at part capacity until exhaustion of accumulated stocks restores the market demand, or higher prices, or until the operators are able to reduce costs of production to the point of successfully meeting prevailing prices.

It is not intended to discuss here the probable effect of the year end price decline and economic depression upon the mineral output during the coming year, but the hope may be expressed that it will rapidly be followed by an industrial activity based upon more healthy conditions of price and profit. While Canada has her domestic problems in respect to supplies of iron and petroleum and distribution of coal, the great basic factors of her enormous mineralized areas, her great known resources in coal, nickel, copper, gold, zinc, asbestos, and other metals and products too numerous to specify, and her infinitely greater latent possibilities should never be lost sight of. These will continue to form the basis of industry and of national development ever growing in extent and accelerated with increasing knowledge of better methods of recovery and use.

The Confederated Investment Corporation, Ltd., fiscal agents for Canada-Metropolitan Securities Corporation, Ltd., have recently extended their operations to Ottawa and Boston, opening up offices in both cities. The Canada-Metropolitan specializes in automobile financing.

## Foiled!

With the spoils almost within his grasp. The combination punched out. The handle wrenched off. The heavy vault door burned through. Still the bolts will not shoot back. The door will not open. Foiled—and forced to leave empty handed.

This is the invariable experience of any burglar who attempts to rob a vault equipped with the Dillon Automatic Re-Locking Vault Lock. A device that is absolutely Burglar Proof and assures complete protection, particularly for valuable papers that cannot be replaced.

The outstanding feature of the Dillon Locking Device is that the locking bolts on vault doors are held intact and never move from their position when the combination has been completely destroyed either by punching, blowing or burning out with gases.

Over 2500 banks are now equipped with Dillon equipment. Every case where it has been put to the test it has foiled the "would be" robber.

*Write, on your business letter head, for complete information and we will arrange for a private demonstration to prove its efficiency.*

# Exports Again Decline in February

All Accounts Showed Reductions, but the Most Notable was in Agricultural, Vegetable and Animal Products—Imports Were Almost Stationery, and Thus, for the First Time in Many Months, an Unfavorable Balance Was Registered

ANOTHER large drop in sales of agricultural, vegetable and animal products contributed to a reduction of about \$15,675,000 in the February exports. Every account was lower than in the previous month, but the above mentioned were the most notable. As compared with February a year ago all exports show declines, among which animal products, textiles, iron and steel and miscellaneous products, are conspicuous. Inquiries for our lumber, pulp and paper have become less active, and this is reflected in a slight decline in exports of these products. The market abroad for Canadian meats is indifferent, but in the case of other animal products, such as butter and cheese, the volume of sales has been well maintained.

Turning to the other side of the balance sheet shows that imports did not fall off to the same degree as exports, and thus, for the first time in many months, an adverse balance of a few millions was registered. The changes for the month were not important, the net decline amounting to but \$300,000.

There is now but one month to the close of the fiscal year, and the unfavorable balance stands at about \$26,500,000. It is unlikely that this will be overcome, but when it is considered that at the end of September last there was a balance against Canada of some \$164,000,000, the result is not altogether unfavorable. The details of the February trade statement, together with the figures for eleven months, as prepared by the Department of Customs, follows:—

## INDUSTRIAL INSURANCE\*

Greatest Opportunity for Agency is in This Field—How Business May be Obtained and Kept

BY ALFRED W. MCLEOD  
New Westminster, B.C.

INDUSTRIAL insurance can be made the most important source of income to any agency. The value of the individual risks are the largest, and they are less likely to be controlled by loan or other financial interests, while the class, as a whole, is the favorite target for the mutuals, reciprocals, outside brokers, and last, but not least, the big city agents.

In the past few years the insurance on many of the large lumber plants, as well as other industrial risks, have been lost to the local agents through their own fault. You will say this was not always so, as the companies sometimes declined to accept this hazardous class of risk; but again I say, this was their fault, for had they been fully alive to the responsibilities of their position, they would have seen that the plants referred to were properly looked after from an insurance risk point of view, for if this were done they would have proved profitable to their companies, as they have to those who did secure the risks.

The keynote, to my mind, in dealing with this class of insurance, is service—service to the insured, service to the companies and service to ourselves—a threefold service, wherein each is interlocking, the result being satisfaction to the assured, profitable business for the companies and a handsome income for the agent.

## Must Keep Informed

The first and most important point is to study, not in a haphazard fashion, but thoroughly, the rating schedules, including deficiency charges and protection credits, as well as the language and meaning of all coverings and clauses in common use on industrial plants. This knowledge may be gathered in various ways, and, if we are alive and aggressive and willing to take the trouble, no difficulty will be experienced. One of the best sources of information is some good insurance paper. Don't say, "I'm too busy," "I've no time to read," for in taking that attitude you are not fair to your company, your clients or yourselves. The insurance paper is published for the busy insurance man. It is intended to save him time, and to give him more latitude and opportunity for the development of his business. The rightly conducted periodical for the insurance agent solves many of his problems and inspires him to do his best, and encourages him when he gets discouraged. Insurance rates on industrial plants, as we know, are largely made up of numerous charges for deficiencies, while they are also affected by many credits which may be secured for details of protection.

## Advise Customer Fully

We should be able to tell a present or prospective client immediately the exact amount of any charge or credit that affects his plant. We should not only be able to point out where the larger savings can be made, but should be able to give intelligent advice right down to the last cent, as a few cents in the rates mean many dollars in large industries, and those in control of plants are always keen to make every saving consistent with security, while at the same time the agent is not only being of service to his client, but also to his company, which is more pleased to write the improved risk at a reduced rate, and at the same time he often makes himself indispensable to the assured.

The owners of large plants prefer to place their insurance with the man who knows his business, and in many instances lines are placed with outside or travelling brokers,

who are able to serve him in this respect better than agents who are on the spot.

Some of us criticize the office of the Board of Underwriters because their inspectors do not go to the assured and point out the deficiencies or lack of protection which raises their rates, but it is the duty of the agent to get the information and pass it on to the client to let them know we are looking after their interests.

Knowing the deficiency charges and protection credits, though, is only a portion of the service we should be able to give. We should also thoroughly understand the numerous forms and clauses, such as specific and blanket coverings, co-insurance, average, prejudice, adjusters, work and materials, exceptions, warranty, variations, occupancy, noon, and many other clauses which are or may be used for the protection of the assured, and to give the companies a clearer understanding of the risk they are accepting.

## New Business and Renewals

We should see that there is never any doubt in the mind of the assured that the property is covered for the amount specified and from the date desired. This refers particularly to placing of new business and renewals of expiring policies. I have heard many criticisms of agents who have not delivered renewal policies before the old ones expired, or who had not given any covers in the case of new business for several days, and even weeks, after instructions were given to place same. The completion of policies, we know, are often delayed owing to new forms being drawn or a revision in rates, and we may know the insurance is in force, but the assured feels safer if we immediately send him in writing a statement of how the insurance is covered, giving the names of the companies and the amount in each. Another point along this line is the giving of full information in writing to our companies concerning new industrial risks we are placing, or changes in conditions concerning plants we have already covered. This will save much correspondence and many cancellations and replacing of policies to any extent, many of which are due to lack of information accompanying daily reports.

Changing values and rising and falling prices should always be kept in mind, while extensions and additions to plants on which we carry insurance also affect the interest of the assured. We should keep in touch with these conditions, making regular inspections, and be able to advise our clients intelligently on this phase of our covering.

## Losses Show Insufficient Coverage

Experience shows that in over 50 per cent. of the total loss adjustments the owners have sustained serious monetary loss because of insufficient coverage, in some cases causing insolvency.

Proper appraisals should be made before a fire, and we should know a representative of a good appraisal company, and be able to tell our clients where they are able to have this work done.

The protection we offer or give should be beyond question as to responsibility. We should, however, not only know the standing of the companies we represent, but should also keep on hand information concerning the position of all insurance institutions transacting business in British Columbia, and should be able to give our clients any information they may wish along this line. We should not run down other companies just because we do not represent them, and without regard to their standing, this will react to our loss.

In making our service as near 100 per cent. efficient as possible, we are, to my mind, performing a great service to the country and the nation at large in reducing the great fire waste in Canada. This means dollars to every citizen. We should know our business so well and be so crammed full of enthusiasm about it as to forget to use arguments as to why insurance should be carried, and confine ourselves to giving actual, definite information, with the assurance and certainty that familiarity with our subject is sure to bring.

\*An address before the British Columbia Fire Insurance Agents' Conference.

To the Honorable,  
The Provincial Treasurer of Manitoba,  
Winnipeg, Manitoba.

11th February 1921.

Sir:—  
In accordance with Orders-in-Council Nos. 24740 and 33982, we have conducted a periodical audit of the Books and Accounts of the Acting Comptroller-General of the Province of Manitoba, for the fiscal period ending 30th November, 1920, and we hereby certify that the attached Balance Sheets (Capital, Current, Deferred and Trust) are in accordance therewith as at that date.

The Accounting work of the Comptroller-General's Department, involving the verification by the respective auditors appointed for that purpose of all receipts and disbursements, and the correlating of the whole transactions in the Comptroller's Books, continues to be carried out in the same manner as in the previous years.

The securities representing the Investments in Bonds, Debentures, and Stocks, have been produced for our inspection, and these are set forth in detail in our report thereon, submitted to you herewith. The Cash in Banks has been verified by certificates furnished by the Banks concerned.

We further beg to certify, that in our opinion, the attached Combined Balance Sheet is properly drawn up, so as to show a true and correct view of the financial position of the Province as at 30th November, 1920, as shown by the Books of the Acting Comptroller-General.

We have the honour to be,

Sir,  
Your obedient servants.

JOHN SCOTT & CO.,  
Chartered Accountants.

# Railways and Irrigation Before Alberta House

Agreements for Acquisition of Alberta and Great Waterways Railway by Province, and of Edmonton, Dunvegan and British Columbia by Canadian Pacific to be Approved—Irrigation Bonds May be Guaranteed—Cities Want More Revenue

ORIGINALLY scheduled to open on January 26th, the Alberta legislature did not commence its 1921 session until February 15, owing to the serious illness of Premier Charles Stewart. The speech from the throne did not forecast any changes of importance, but it was announced that legislation would be introduced confirming the taking over for operation by the C.P.R. of the Edmonton, Dunvegan and British Columbia Railway, and the acquiring by the government of the Alberta and Great Waterways Railway. There was no debate on this speech, as it was not considered to contain anything of a controversial nature.

## Railway Agreements

The agreements relating to the two railways mentioned above were tabled on February 18. One shows that John D. McArthur, termed the "owner" of the Alberta and Great Waterways Railway, on July 23 last agreed to procure the release of liabilities to the railway company to J. D. McArthur Co., Ltd., and Union Bank of Canada, the railway's creditors, and transfer to the provincial government all the issued capital stock of the company, also releasing all his personal claims of whatever nature against the railway. In return, the government grants McArthur an option to reacquire the capital stock, the option running to July, 1927. Exercise of such option is dependent on payment to the government of an amount "equal to the total of all moneys expended by it in connection with the fixed charges upon and the construction, betterment, maintenance and operation of the said line of railway and the purchase of equipment therefor in excess of the net revenues received from such operations," and interest on the moneys expended. At any time, however, during the life of this McArthur option, the government may proceed to sell the railway on payment to McArthur of \$710,000, which is the amount the railway is indebted through McArthur to the Union Bank of Canada.

The agreement in which the C.P.R. takes over the E.D. & B.C. for operation recites the deeply involved financial condition of the company, whereby it defaulted on interest payments of its bonds guaranteed by the provincial government. The gist of the arrangement whereby the government induced the C.P.R. to lease the E.D. & B.C. for operation is that the government agreed on July 21, 1920, to advance \$1,000,000 to the C.P.R., and such additional sums, not to exceed \$1,500,000, or a total of \$2,500,000, to the C.P.R. as manager, these funds to be used "to eliminate the present deferred maintenance of the E.D. & B.C. and bring the lines of that company to a reasonable standard of operating efficiency, to be agreed between the government and the C.P.R. as manager." The agreement provides that the government shall arrange for the physical connection between the C.P.R. lines and the E.D. & B.C. tracts.

The moneys advanced by the government for the improvement of the Edmonton, Dunvegan and British Columbia Railway by the C.P.R. as manager are to be repaid by July, 1925, or by July, 1930, at the option of the E.D. & B.C. That is, within five or ten years, as the case may be, meanwhile drawing interest at six per cent. per annum, payable half yearly. As security the government takes a first mortgage on all the E.D. & B.C. property, which takes priority, by arrangement, over all claims of J. D. McArthur and his creditors. The manager company is to hold the lines for five years and thereafter, subject to a three months' notice of termination of the agreement. The manager company's remuneration is to be 15 per cent. of the revenues of the railways in excess of working expenditure, as defined in the Railway Act, "such compensation to be payable only out of the surplus earnings of the railways, after payment of fixed

charges." Working expenditure shall include all salaries or wages of all persons exclusively engaged in the service of the E.D. & B.C.

## Natural Resources

On February 22, A. F. Ewing, leader of the opposition, urged the province's claim for the return of natural resources from the Dominion, moving the following resolution: "This House declares that the people of Alberta, to the same extent and in the same manner as the people in the other provinces, are entitled to the lands, mines, minerals and other resources within the area, and to enjoy the full benefit thereof, as well as to administer the same for the advantage of its people, and emphatically protests against our natural resources being unjustly withheld to be exploited by any political party at Ottawa. This House urges the constant and continued application to, and negotiations with the Dominion government be made for the surrender to the province of the public domain within its boundaries, of which it is now unfairly and unjustly deprived. This House further declares that the province is entitled to compensation for lands within its area heretofore alienated for purely Federal purposes."

This subject was debated until March 7, when after several amendments the following resolution was passed:—

"This House declares that the people of Alberta, to the same extent and in the same manner as the people in the other provinces, are entitled to the lands, mines, minerals, and other resources within the area, and to enjoy the full benefit thereof, as well as to administer the same for the advantages of its people, and emphatically protests against our natural resources being withheld. This House urges that constant and continued application to, and negotiations with the Dominion government be made for the surrender to the province of the public domain within its boundaries. This House further declares that the province is entitled to the immediate transfer of our natural resources on fair and equitable terms having regard to the alienation of lands for federal purposes, and taking into consideration subsidies paid in lieu of lands. This House is pleased to note that the Prime Minister of Canada is endeavoring to effect a settlement of this question at the present time."

## Municipal Legislation

The municipal legislation is voluminous, Calgary, Edmonton, Lethbridge, Medicine Hat, and Red Deer all having their charters amended. There is also a bill to amend the Municipal Hospitals Act of 1919, and a bill respecting drainage districts.

The most contentious item in the Calgary charter is the application for the right to impose a "minimum service" or poll tax on all citizens, to be offset against other taxes. Medicine Hat is asking virtually the same power. Lethbridge, which already has the power to impose a poll tax is asking amendments to its charter to make application of the tax more efficacious, among them one providing that all persons must apply personally or by agents to the city assessor to have their names put on the assessment list not later than August 20 in each year to obtain advantage of offset of the poll tax against property taxes. Another interesting amendment asked by Lethbridge would give the city council of that city power to designate any particular section of the city as a residential, manufacturing, warehouse or wholesale district and regulate the nature, style and size of buildings to be erected within such district and their distances from the street line.

Like the larger cities of the province, Red Deer also is coming before the legislature asking for the right to impose

a poll tax on all persons, twenty-one years or over, to be offset against other taxes. Following the Medicine Hat plan, however, Red Deer is asking that persons earning under \$75 a month be exempted from paying the poll tax. Red Deer also asks the same provision as Medicine Hat that employers be compelled to collect the tax from their employees, and it may be deducted from wages.

#### Other Legislation

Land came in for more taxes for educational purposes. The "Educational Tax Act" provides for a levy of three mills on all land not exempt from taxation by the province, and on occupants of land which is exempt, and of one and one-half cents per acre on grazing and mineral lands.

The "Minimum Wage Board," another bill before the House, provides for the appointment of a board of five members, two representing employers, two representing employees, and a chairman.

A bill to amend the Irrigation Districts Act, 1920, is one of the most important measures before the house, as the irrigation works, which it was thought would be started by last year's legislation, are still only on paper.

Although its capital is only \$10,000, the "Imperial Pipeline Co.," may increase this in accordance with the Alberta Companies Act. Charles E. Taylor, engineer, Edmonton, Joseph Carr, Edmonton, and W. L. Taylor, Calgary, are the incorporators, and the bill authorizes the company to lay pipelines for gas and oil. Authority to construct pipelines is also given to the Ratepayers' Gas and Power Co., Ltd.

The Calgary and Southwestern Railway, incorporated in 1918, is given two years to commence, and five years to complete, construction work.

The "Premier Insurance Co." will be incorporated with a capital of \$500,000, which may be increased to \$1,000,000, if its bill goes through. Twelve thousand must be subscribed before the general meeting for the election of directors. The head office is Calgary, and the provisional directors are A. C. Ruby, Calgary, insurance inspector; J. L. Brown, Didsbury, accountant; P. R. Reed, Didsbury, insurance manager; R. Ontkes, Crossfield, hail insurance adjustor, and David F. Ferrel, Jenner, farmer and collector. The lines authorized are all branches excepting life.

#### Aid to Irrigation

The irrigation question came up for discussion at a cabinet meeting on March 12. It is understood that a decision that much more advanced aid to irrigation projects would be given this year than last, finally was arrived at, though the details of how this aid is to be advanced still remain to be finally decided upon in caucus. There were three general proposals discussed for irrigation aid. One was a proposal for the government to guarantee without reservation payment of interest on all irrigation bonds. Another was to guarantee the bonds themselves up to a certain amount of their par value, 50 to 75 per cent. The third was complete and total guarantee of all the bonds.

About as many different opinions were expressed on these three points as there were cabinet ministers at the meeting. One important point agreed upon was that whatever aid is given to irrigation projects shall be of a general nature, applying to all, and no specific project would be singled out for attention. A majority of the ministers were inclined to lean to the proposal of a direct and full guarantee of all irrigation bonds of properly organized and supervised districts but they fear adverse sentiment of the majority of the government members in caucus, especially the northern members, who are clamoring for further aid for the northern railways.

#### COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended March 18:—

La Rose Mine, 67,370; Coniagas Mine, 130,960; O'Brien Mine, 64,000; total, 262,330. The total since January 1 is 1,897,256 pounds, or 948.6 tons.

#### AVERAGE VALUE OF LAND INCREASED

\$48 Per Acre in 1920, Compared With \$46 in 1919—Farm Wages Increased—Values of Livestock Show a Decrease

**E**STIMATES of the 1920 values of farm lands, farm help, livestock and wool have just been made by the Dominion Bureau of Statistics.

According to the returns received, the average value of the occupied farm lands of Canada, which includes both improved and unimproved land, together with dwelling houses, barns, stables and other farm buildings, is \$48 per acre, as compared with \$46 in 1919, \$41 in 1918, \$38 in 1917, \$36 in 1916 and \$35 in 1915. By provinces, the value in 1920 is highest in British Columbia, viz, \$175, as against \$174 in 1919, land in this province having a special value due to orcharding and fruit growing. In the other provinces, the average values of farm lands per acre are as follows: Ontario and Quebec \$70; Prince Edward Island \$49; Nova Scotia \$43; Manitoba \$39; New Brunswick \$35; Saskatchewan and Alberta \$32.

A further advance is recorded in the average wages paid for farm help in 1920, as compared with the previous year, and the averages for 1920 are again the highest yet reached. For the whole of Canada, the average wages per month of farm helpers during the summer season of 1920 were for men \$86, and for women \$47, including board, the average value of which was \$26 per month for men and \$20 per month for women. In 1919 the corresponding averages were: \$78 for men, including board value \$24, and \$43 for women, including board value \$19. For the complete year the average value of wages and board was \$821 for men and \$492 for women, as compared with \$764 for men and \$465 for women in 1919. By provinces, the average wages per month for male and female helpers, respectively in the summer season and including board were, in 1920, as follows, the figures for 1919 being given within brackets for comparison: Prince Edward Island \$60 and \$32 (\$51 and \$28); Nova Scotia \$73 and \$38 (\$69 and \$34); New Brunswick \$79 and \$35 (\$79 and \$35); Quebec \$86 and \$40 (\$76 and \$37); Ontario \$75 and \$44 (\$70 and \$40); Manitoba \$98 and \$58 (\$89 and \$52); Saskatchewan \$102 and \$60 (\$94 and \$55); Alberta \$107 and \$62 (\$95 and \$58); British Columbia \$95 and \$63 (\$96 and \$64).

#### Farm Livestock and Wool

As compared with 1919, the values of farm livestock show a considerable decrease. For Canada as a whole, horses under one year average \$49, as against \$55 in 1919; horses one year to under three years \$102, as against \$108, and horses three years old and over \$151, as against \$161; cattle under one year \$20, as against \$25; cattle one year to under three years \$45, as against \$56, cattle three years and over \$67, as against \$83. For all descriptions, the average value per head for Canada is for horses \$106, as against \$119 in 1919; for milch cows \$80, as against \$92; for other cattle \$47, as against \$58; for all cattle \$59 as against \$70; for sheep \$10 as against \$15; and for swine \$23, as against \$25. For swine per 100 lb. live weight the average is \$15, as against \$16 in 1919. The average price per lb. of wool in 1920 for Canada is 22 cents for unwashed and 32 cents for washed, as against last year's records of 55 cents and 70 cents per lb. By application of the average values per head to the numbers of farm livestock, as returned in June last, it is possible to calculate approximately the total value of farm live stock in Canada for the year 1920, with the corresponding values for 1919 in brackets as follows: Horses \$361,328,000 (\$435,070,000); cattle \$561,500,000 (\$708,821,000); sheep \$37,263,000 (\$50,402,000); swine \$81,155,000 (\$102,309,000). Thus, the total value of these descriptions of farm livestock amounts to \$1,041,246,000, as compared with \$1,296,602,000 in 1919.

The 1920 annual report of the Canadian National Exhibition, Toronto, shows revenue of \$775,076, while expenditures were \$631,354, leaving a balance of \$143,722.

# Why

THE MONETARY TIMES OF  
CANADA IS ONE OF THE  
BEST ADVERTISING MEDIUMS

**1.—Reputation.** "*The Monetary Times*" is conducted upon lines which have gained for it the highest reputation for integrity and independence of judgment, and its opinions and pronouncements as regards new issues offered for public subscription, and other like matters with which it essentially deals, are respected accordingly.

**2.—Circulation.** "*The Monetary Times*" circulates extensively not only throughout Canada but also in the United Kingdom and in every financial center throughout the world. Circulation statement, showing distribution, available to bona-fide advertisers.

**3.—Readers.** "*The Monetary Times*" by the nature of its contents is of interest to all classes of investors. It appeals to a large and constantly increasing number of readers, including Government and Municipal Authorities, Bankers, Insurance Officials, Directors, Managers and Secretaries of Companies and members of the various Stock Exchanges—by the great majority of whom the paper is not only read, but carefully filed for reference.

**4.—Prominence of Advertisements.** The space available for advertisements being strictly limited, announcements appearing therein secure very marked prominence.

**5.—Advertising Policy.** Advertisements which are apparently designed to entrap the unwary, to induce people to part with hard-earned savings, and to tempt necessitous debtors to take almost the only step which could possibly make their financial troubles greater, are consistently declined by "*The Monetary Times*." The business of newspaper publishing is not in the opinion of the owners of "*The Monetary Times*," one which is free from moral responsibility.

For these reasons "*The Monetary Times*" offers an excellent, if not absolutely unique, medium for the announcements of all who desire to cultivate business with a clientèle of the highest class.

Sample copies and advertising rates cheerfully supplied.

## ANNUAL REPORT OF THE DIRECTORS

Submitted to the Shareholders at the Annual General Meeting of the Company  
in Toronto, on Monday, March 21st, 1921

Your Directors in submitting their Annual Report for the year ended 31st December, 1920, have pleasure in drawing attention to the fact that the past year has been one of the most progressive and prosperous in the history of the Company.

In the Annual Report for the year 1919 our Shareholders were advised that owing to the period of reconstruction which ensued after the Armistice conditions were far from encouraging, but that during the last six months of 1919 our orders exceeded any similar previous period. Fortunately that growth in the volume of business accepted by the Company both continued and increased during the year 1920, and at the close of the year there were carried over uncompleted contracts amounting to seven and a half million dollars.

The Profit for the year amounted to \$2,213,731.14, from which is deducted the sum of \$326,300.14 for interest and \$530,741.95 which has been reserved for Depreciation, leaving a net Profit of \$1,356,689.05. Dividends at the rate of 8% per annum and a Bonus of 2% were paid on the Common Stock and 7% on the Preference Stock of the Company, leaving a balance of \$342,574.80 carried to the credit of Profit and Loss account, which, added to the balance of \$436,097.48 brought forward from the previous year, makes a total of \$778,672.28 at the credit of that account. This amount, together with our Reserve of \$5,000,000.00, makes a total Surplus of \$5,778,672.28.

While Dividends have been earned and paid since the Company was first organized, your Directors have always been careful to set aside from year to year an adequate sum for Depreciation and Reserve. As a result of this conservative policy continued over a long period the amount at the credit of Depreciation Reserve stands at \$5,091,949.40, and the amount at the credit of Surplus account stands at \$5,778,672.28. Having in mind the fact that our Shareholders in the past have been agreeable to the policy of a reasonable distribution of the profits earned, in order that the Company might build up a substantial Reserve, it is proposed to submit to the Shareholders at a Special General Meeting to be called for the purpose, a proposition whereby a portion of our accumulated Surplus may now be distributed to the Common Stock Holders in the form of a Stock Dividend of 20%.

A record of Dividends paid out since 1893 will be found on page 17. This amount added to the Reserve set aside for Depreciation, and the Surplus which has been accumulated, aggregates the sum of \$22,685,818.07.

With regard to our Inventory, your Directors have adopted a conservative policy. All active materials have been taken

at or below cost; any goods that may be considered obsolete have been taken at the scrap value, and adequate reserves have been provided to guard against any shrinkage in value.

The Company has no outstanding Bonds, Debentures, Mortgages or prior liens of any description, other than a nominal charge of \$63,750.00 on properties purchased, and on which existing Mortgages still current are not yet due.

While the amount at the credit of Current Accounts and Bills Payable is in excess of last year, this has been caused by the increase in our Inventory of raw materials, Work in Progress, Pay Rolls, etc., necessitated by the increased volume of orders booked. On the other hand the liquid condition of the Company's Assets may be noted, the total of our liquid Assets amounting to \$16,081,604.04, or nearly \$8,000,000.00 in excess of our current Liabilities.

In our last Annual Report, Shareholders were advised that owing to the manufacturing and distributing facilities of the Company being overtaxed additions and extensions had been authorized. These are now practically completed and equipped, at a cost of \$1,890,775.81, and will enable us to manufacture to greater advantage. The total floor area of our several manufacturing plants is 2,055,464 square feet, and our Pay Roll for 1920 amounted to over \$6,000,000.

The outlook for the electrical industry is most promising, as the demand for hydro-electric power is greatly in excess of the supply. The reason for this condition, favorable to the electrical industry, is because the use of electric power leads to more economical operation of industries and public utilities, and the convenient use of numerous household appliances for heating, cooking, lighting, etc. A survey of Canada's available water power shows nearly 20,000,000 horse power available, of which only about 2,000,000 horse power has been utilized, but other powers will be developed as the need arises, and will afford a growing and continuing market for electrical machinery and appliances.

In concluding this Report, which I am signing on behalf of the Directors as President and General Manager of the Company, I have to say that I do so for the last time, having decided to retire from these responsible positions. Since I organized a syndicate thirty-three years ago, for the purpose of investigating the possibilities of the electrical industry as a field for investment, I have maintained a policy of personal control and direction of all details of the business, large and

small. The Capital of the original syndicate, from which our present Company sprung, was \$10,000.00, whereas our Assets to-day are over \$31,000,000.00. This remarkable growth necessitated a corresponding increase in responsibilities, and I have concluded that it is not only fair to myself to ask for a measure of relief, but also none the less fair to the interests of the Shareholders that younger men should succeed me and carry on. During my long period of service I have been fortunate in maintaining the respect and confidence of your Directors

with whom it has been my privilege to be associated in our mutual efforts towards building up a great and prosperous Canadian industry, and they have expressed the desire that I accept the position of Chairman of the Board of Directors, in which position I will be able to continue to keep in touch with the affairs of the Company, and my services will be available for assistance and advice when required.

FREDERIC NICHOLLS, *President.*

## HIGHER ESTIMATES FOR ALBERTA

Small Surplus is Estimated for 1921, However—Treasurer Does Not Plan to Increase Taxes

HON. C. R. MITCHELL, provincial treasurer of Alberta, delivered his budget speech in the Legislature on March 11. The total ordinary revenue for the year 1921 is estimated at \$12,778,879, and the total current expenditure at \$12,736,284. This is an increase of approximately \$2,000,000 in both revenue and expenditure over the preceding year of 1920. Mr. Mitchell announced that the government of Alberta was not considering imposing any increased forms of taxation during the current year. The \$2,000,000 increase in revenue is expected to come from increases in the ordinary sources, such as Dominion subsidy, school land sales, attorney-general's department, including liquor revenue, land titles fees and telephone receipts.

The only reference to irrigation aid contained in the treasurer's remarks was a paragraph to the effect that if the province had possession of its natural resources, it might consider a plan of "helping the farmer, who cannot be helped by either drainage or irrigation projects—that is, we could then arrange for their removal to new locations in vast districts not now occupied where crop failures seldom occur, and thus permit the dry areas to revert to the use which nature intended, viz., live stock raising." Mr. Mitchell added that railway transportation into these new areas was improving daily. The finding of oil and mineral deposits in the far north would increase traffic. "A twofold advantage would thus accrue to the province," said the treasurer. "A large section of its people would be placed in a more favorable position, financially, and the northern transportation systems would be naturally strengthened."

A large part of the treasurer's remarks were devoted to statistics showing the enormous increase in the agricultural, dairying, live stock and mining industries of the province.

## Alberta's Public Debt

The provincial treasurer, referring to the provincial debt at one stage of his remarks, said: "The gross public debt of the province as at December 31, 1920, amounted to \$41,989,900. Of this sum, \$15,834,394 is represented in the telephone system, \$471,501 in demonstration farms and \$6,815,649 in other revenue-producing investments. So that if we deduct these utilities and investments, which amount to \$23,121,545, the net debt is reduced to \$18,868,354. Of this sum, only \$920,387 can be said to be in unproductive undertakings, and is made up chiefly of discount on bonds and other patriotic relief."

The provincial treasurer gave a brief capitulation of the province's assets and liabilities, in which he said that the excess of assets over liabilities is represented by the sum of \$104,660,482. In the assets he included the Dominion of Canada debt allowance of \$8,107,500; school lands trust fund, amounting to \$13,388,456 in principal money, paid and outstanding; unsold school lands held for future benefit to the value of \$81,967,783; telephone plant valued at \$14,584,394. He added: "If all these \$100,000,000 assets that we may now claim were wiped out summarily, we still have that inalienable asset—the right of taxation."

Although it is registered in Saskatchewan, the Ontario Wind Engine and Pump Co., of Toronto, lost an action in a Regina court because it was shown that the company did not maintain an office in the province.

At the annual meeting of the Office Furniture and Supplies Co., Ltd., held in Brockville on March 15, the following officers and directors were elected: President, T. Sisman, Aurora; vice-president, W. H. Comstock, Brockville; Managing-director, H. K. Bowes, Brockville. Directors—Hon. G. W. Fowler, Ottawa; Capt. McVittie, Toronto; J. Gill Gardner and W. B. Reynolds, Brockville.

## ALBERTA HAD HALF MILLION SURPLUS IN 1920

Public Accounts Presented in Legislature Show Revenue of \$10,919,776 and Expenditure of \$10,423,356

THE total revenue of Alberta during 1920 was \$10,919,776, and the total expenditure \$10,423,356, leaving a surplus of \$496,420 on income account, according to the public accounts of the province brought into the legislature on March 7 by Hon. C. R. Mitchell, provincial treasurer and acting premier.

The revenue came from the following sources: Dominion subsidy, \$1,621,075; school lands, \$692,028; treasury department, \$639,426; provincial secretary's department, \$1,628,482; attorney-general's department, \$1,596,204; public works department, \$67,926; agricultural department, \$158,382; telephone department, \$1,913,913; legislation, \$2,449; executive council, \$200; educational department, \$43,061; King's printer, \$9,284; municipal affairs department, \$2,508,465; public health department, \$29,151; public utilities, \$4,436; miscellaneous, \$5,287; total, \$10,919,776.

## Expenditures for 1920

The total expenditures included the following: Public department, \$1,568,106; civil government, \$632,654; legislature, \$178,914; administration of justice, \$1,405,510; public works department, \$1,608,231; education, \$1,785,163; agricultural and statistics, \$544,256; public health department, \$367,104; railways branch, \$7,151; telephones branch, \$1,879,303; general administrative, \$235,136; municipal affairs department, \$148,543; miscellaneous, \$55,833; total, \$10,423,356.

Figured on the same basis, the public accounts of 1919 showed a surplus of \$316,990, so that the surplus for 1920 was \$79,420 greater than that of 1919. The municipal affairs department under deputy minister J. H. Lamb, was the greatest revenue producer of any department, the collections of tax arrears having been especially good. The actual cash surplus on hand, which is figured from the difference between revenue from all sources including capital funds, amounting to \$15,881,106, and the grand total expenditure of \$15,358,056, leaves cash on hand of \$523,050. The telephone department shows a net surplus of \$34,610. The expenditures in this department for 1920 included large sums to cover maintenance and sinking fund charges. In the division of expenditures between capital and income accounts, net expenditure on capital was \$6,814,018 and on income account \$8,544,037, which gives the total as \$15,358,056 as cited in the foregoing. In the same way, on the revenue side of these two accounts, capital shows \$6,611,103 and income \$9,005,862, a total of \$15,881,106.

## WESTERN CANADA COLONIZATION ASSOCIATION

At a special meeting of the directors of the Western Canada Colonization Association, held in Saskatoon on March 19, Robert Hobson, of Hamilton, Ont., was elected president and chairman of the board; M. A. Brown, of Medicine Hat, vice-president and chairman of the executive committee, and Major-General A. D. McRae, C.B., of Vancouver, managing director.

Upon General McRae mainly will devolve the task of setting up a colonization machine, and making it work. General McRae has extensive financial and commercial interests in British Columbia, but he was for long engaged actively in land settlement operations of the prairies. At the outbreak of war in 1914 he resigned his directorships in various commercial enterprises and placed himself at the disposal of the Canadian government, which appointed him lieutenant-colonel in charge of all remounts west of the Great Lakes, and in this capacity he won special commendation from the Canadian Royal Commission on war purchasing.

# DIVIDENDS AND NOTICES

## TENDERS FOR PULPWOOD AND TIMBER LIMIT

Tenders will be received by the undersigned up to and including the 15th day of June, 1921, for the right to cut pulpwood and pine timber on a certain area situated on the Nagagami River and other territory adjacent thereto, in the District of Algoma.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 80 cents per cord for spruce and 40 cents per cord for other pulpwoods, and \$2.50 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for fifty thousand dollars (\$50,000), which amount will be forfeited in the event of the successful tenderer not entering into agreement to carry out conditions, etc.

The said \$50,000 shall remain on deposit until the pulp mill, as provided by terms and conditions of sale, is erected and in operation. Any timber cut in the meantime shall be subject to payment of dues and bonus as accounts for same are rendered. After the said pulp mill is erected and in operation, the deposit of \$50,000 may be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, shall be paid in the usual manner as returns for cutting of wood and timber are received and accounts rendered.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

All tenders should be enclosed in sealed envelope and marked plainly on outside, "Tender for Nagagami Pulp and Timber Limit."

**BENIAH BOWMAN,**

Minister of Lands and Forests.

Toronto, January 24th, 1921.

N.B.—No unauthorized publication of this notice will be paid for.

# Analysis of Business Failures in 1920

Personal Causes are Still More Prominent as Reason for Insolvency—Lack of Capital Caused 34 Per Cent.—Comparison on Basis of Credit Ratings, Liabilities, and Capital Employed

FAILURES in Canada in 1920 are estimated by Bradstreet's at 979, compared with 626 in 1919. This is an increase of over 50 per cent. The firms failing in 1920 had assets of \$11,477,757 and liabilities of \$22,139,575, while the figures for 1919 were \$5,104,534 and \$10,120,232. An analysis of these figures is shown herewith, giving the causes, and classifying them according to credit ratings, to liabilities and to capital employed. Commenting on the figures, Bradstreet's say:—

"Canadian like American failures were on an ascending scale in 1920, the number, 979, being 56 per cent. in excess of the total for 1919, which latter saw the smallest total recorded. Liabilities also expanded, totalling \$22,139,575, over double the 1919 total and equal to the liabilities of 1919 and 1918 combined. Personal causes of failure found even greater play than they did in the preceding year, the proportion due to the individual being 79.3 per cent., against 77.3 per cent. in 1919, 72.8 per cent. in 1918 and 73.5 per cent. in 1917. In fact, little over a fifth, 20.7 per cent., of all failures were non-personal, as against 22.7 per cent. in 1919.

"As usual in newer countries, lack of capital led in responsibility for failure with 34.1 per cent. of all failures as

against 35.8 per cent. in 1919. Incompetence, with 20.8 per cent. against 20.1 per cent. in 1919, and inexperience, with 8.1 per cent. against 5.4 per cent. in 1919, showed increased proportions, as did fraud, with 9.9 per cent. against 8.9 per cent. in 1919. Neglect also reaped a larger total, 2.9 per cent. in 1920 against 2.4 per cent. in 1919. Of non-personal causes, specific conditions, with 18.6 per cent. against 20.9 per cent. in 1919, showed the most important decrease from the preceding year. Personal causes affected liabilities to the extent of 76.2 per cent. as against 87.1 per cent. in 1919, the big decrease being accounted for largely by the small proportion, 6.3 per cent., due to fraud in 1920, as compared with 21.3 per cent. in 1919. Lack of capital, the leading cause in Canada for years, was credited with 52.8 per cent. of all liabilities, as against 45.5 per cent. in 1919. Inexperience, with 4 per cent. against 2.2 per cent. in 1919, and incompetence, with 10 per cent. against 13.1 per cent. in 1919, were the two other principal personal causes affecting liabilities. Specific conditions operated to produce 22.3 per cent. of the failure liabilities in 1920 as against 11.5 per cent. in 1919, and competition here, as in failures, drew a slightly larger total than in 1919."

## SUMMARY—DOMINION OF CANADA, NEWFOUNDLAND AND ST. PIERRE AND MIQUELON.

A gathering of representatives of Anglo-Canadian banking, commercial and professional interests, resolved to pro-

ceed in the formation of a Canadian Chamber of Commerce in London.

## PROGRESS OF THE TRUST COMPANIES

### Soundness and Conservatism Reflected by Recent Advances— New Capital to Take Care of Increased Business

A RECENT number of the *Executor and Trustee*, issued by the Toronto General Trusts Corporation, comments as follows on trust company affairs:—

"The opening of 1921 finds Canadian trust companies in an exceedingly strong position, their financial standing not being in any way affected by the period of deflation. This happy state of affairs is due in large measure to the character of the legislation under which these companies have been incorporated. When the first trust company—the Toronto General Trusts Corporation—was formed in 1882, its founders were fortunate in having before them the record of the operation of such companies in the United States extending to over half a century. They knew the strong features of the business which had made for permanence and strength, and also the flaws through which many abuses had crept in, and by co-operating with the government, assisted in having sane and sound legislation placed on the statute book.

#### Are Essentially Conservative

"Conservatism is the guiding policy of Canadian trust companies, and, as has been well said by a former controller of the United States treasury: 'Conservatism is really the foundation of all good banking, and is more especially so in trust company operations than in anything else. Purely trust functions of the old-fashioned trust company are undoubtedly the highest development of the principle of credit and confidence, they are the highest application of that principle to the relation of man to man in business.' Canadian trust companies are not commercial banks with trust company privileges; they have restricted their operations to services of a trust and agency business only.

"There are at present about 30 companies conducting the regular trust company business in Canada. The total amount of assets under their care is now approximately three-quarters of a billion dollars—not a bad showing surely for a young country with a population of less than eight millions. These assets are made up as follows:—

Capital and reserve funds .....	\$ 47,000,000
Guaranteed funds .....	42,000,000
Trust funds .....	661,000,000
	\$750,000,000

"At the beginning of 1916 these amounted to \$375,000,000, thus making an increase in business of 100 per cent. in four years. These figures speak for themselves as to the increase in the wealth of the Dominion and of the confidence of her citizens in her trust companies.

#### Increases in Capital

"During the past year two of the leading companies increased their capital stock by half a million dollars, in each case the new stock being readily taken up at a good premium. The companies have also done a large business as trustees for bondholders, registrars and transfer agents. There will undoubtedly be a large increase in this class of business in the future, as the business of the country increases.

"And the prospects of a large increase in Canada's business in the near future are bright. One of the delegates at the International Financial Conference held at Brussels a few months ago, out of his full knowledge of the affairs of Canada, as well as of the other countries there represented, has said that he is convinced from what he learned at this conference that Canada is the most fortunate land on the face of the earth; we have lots to do, there are tremendous resources to develop, and we must prepare for a tremendous population. The industrial development of the Dominion will require large amounts of capital. This capital will be used in a great variety of ways; companies with heavy capitaliza-

tion will be formed, and in all of these transactions the Canadian trust companies will participate to a large extent.

"There has also been a notable increase in the number of voluntary or living trusts created within the past few years, in which trust companies have been appointed trustees. This class of business is also sure to increase with the growing wealth of the country.

"Altogether Canadian trust companies have reason to be well satisfied with the progress they have made."

## MANUFACTURERS' ASSOCIATION MEMBERSHIP

Last year was the most successful year in the history of the C.M.A., so far as increase in membership was concerned; 662 applications were accepted and 131 resignations. All resignations were due to such causes as liquidation, ceasing manufacturing, etc. This gave a net gain last year of 531 members. The second most successful year was 1901, when the net gain in membership was 485, and the third most successful was 1905, when the net gain was 328.

From May 1, 1920, the beginning of the association's fiscal year, to January 15, 1921, the membership work of the association showed the following: Applications, 238; resignations, 143; net gain, 95. The reasons given for the above resignations are classified as follows: Out of business, 41; not manufacturing, 20; amalgamations, 19; arrears, 33; deceased, 3; no reason, 2; financial difficulties, 4; additional representatives dropped, 21. Total, 143.

## LAND MORTGAGE COMPANIES OF ONTARIO

The annual meeting of the Land Mortgage Companies' Association of Ontario was held on March 10 in Toronto. Twenty of the twenty-three member companies were represented. C. W. Cartwright of the Landed Banking and Loan Co., Hamilton, who presided, said that the aggregate assets of the twenty-three companies forming the associations amounted to a little more than \$133,000,000 out of assets of \$211,000,000 of all the companies operating in Ontario. This large sum represented investments of funds intrusted by many thousands of shareholders, depositors and debenture-holders, largely the accumulation of many small sums, which had been made available for loaning to Canadian farmers and home-owners. "The responsibility resting not only upon the directors and managers of the company," he said, "but also upon governments and legislatures of carefully avoiding any action which may jeopardize the funds with which these institutions have been entrusted, is one which all should look upon as a sacred trust." Mr. Cartwright expressed satisfaction at the termination of the moratorium in Ontario, and said the example would well be followed by Western Provinces still retaining it.

Vice-president George H. Smith, of the Canada Permanent, said that in the 34 years of its history, there had never been a disastrous failure among members of the association and none of any kind for many years.

The report of the executive committee cited recommendations made to the registrar of loan corporations which included raising the cash deposits on subscribed stock upon application for incorporation from \$50,000 to \$100,000. It was also suggested that loan companies lending on government bonds should be limited to the bonds of governments within the British Empire. Limit of duration of debentures should be extended from the ten to twenty-five years, according to another suggestion.

Regret was expressed that the retirement from the executive of D. B. Wadsworth, who is resigning from the position of manager of the London and Canadian. His place on the executive was filled by the appointment of W. C. Noxon, his successor in the London and Canadian Loan. J. A. Davidson, of Stratford, manager of the British Mortgage Co., was appointed to succeed the late Mr. Kittermaster of Sarnia on the executive. Otherwise the former officers and members of committee were re-elected.

## DEBENTURE INDEBTEDNESS AND RELIGION

### Regina School Board's Case Establishes That This is Question of Security, Not of Legality of Issue

THE Regina Public School Board's action against Spitzer, Rorick and Co., of Toledo, briefly referred to in *The Monetary Times* of December 24th last as being decided in favor of the former, brought forth some interesting points as affecting the security and legality of debenture issues. MacKenzie, Thom, McMorran, Bastedo, and Jackson, of Winnipeg, were solicitors for the city.

In the spring of 1913 the school board decided to issue debentures for \$500,000 for the building of two new schools. A representative of the firm of Spitzer, Rorick and Co., of Toledo, was in the city about that time, and on the 12th of April, 1913, submitted an offer of 95 for the whole issue to be taken up in instalments running to the 1st of November, 1913. The bond firm was to print the debentures and the school board was to furnish complete transcripts of all the proceedings leading up to and culminating in the issue of the debentures, evidencing their legality to the satisfaction of the purchasers' attorneys, and should those attorneys deem any additional by-laws necessary the school board were to pass same. The offer was accepted by the school board, the debentures were printed, issued and countersigned at the department of education and everything was going nicely so far as the school board knew, until the 8th of July, 1913, when Spitzer, Rorick and Co. wired to know if lands liable to assessment for debenture indebtedness at the time of issuing of any debentures remained liable for such debenture indebtedness until fully paid, or would lands in the district be released from liability if transferred from the present owner to Roman Catholics. The dealers offered to, and did take up \$100,000 at the agreed price on the express understanding that they should not waive their rights under the contract.

#### Question of Security Only

The school board upon advice took the position that the matter referred to by Spitzer, Rorick and Co. was not a question going to the validity of the debentures. As a matter of fact, the school board was advised, and I personally think, the law is, that a transfer of land from a Protestant public school supporter to a Roman Catholic separate school supporter does relieve the land from the public school debenture indebtedness incurred while owned by a Protestant. The school board, therefore, submitted that the bond firm had their own representatives here and had their own solicitors examining our law, and were presumed to know it, that the debentures were perfectly legal under the Act and if they did not give the debenture holders as much security as the purchaser originally thought, it was purely a matter of security and not of law.

The remainder of the issue, \$400,000 worth, was sold for the best price obtainable, namely, 90 to Spencer, Trask and Co., of New York, and after a lengthy correspondence the school board through Marshall and Fraser, attorneys at law of Toledo, Ohio, on the 15th of September, 1914, filled a claim for \$20,000 damages in the United States District Court at Toledo, Ohio, against Spitzer, Rorick and Co., being the 5 point deficiency on the \$400,000 worth of debentures which they declined to take up. The case came to trial in 1917 and in January of 1919 the trial judge gave judgment in favor of the school board for \$20,000 with 6 per cent. interest from the 1st of October, 1913. Motion for a new trial was made before the same judge and refused on the 24th of March, 1919. An appeal was taken to the United States Circuit Court of Appeal and heard at Cincinnati and dismissed. A motion for rehearing was made before the same Court and dismissed and an application to the Supreme Court of the United States for a Writ of Certiorari was refused and accordingly last month the full amount of the judgment was paid. Incidentally, it was paid in United States funds which realized a tidy premium in being remitted to Regina.

On the trial of the action the argument with respect to illegality on the ground of non liability of Catholic owners

to previously assessed public school debenture indebtedness was not seriously urged, but the ground was shifted to numerous technical objections arising during the course of the issue of the debentures and there were a good many of these. The most formidable objection from the legal point of view to be gotten over, was that the acceptance of the school board of the bond company's offer was not under seal and was therefore not enforceable through lack of mutuality. What really won the school board their suit, however, was the application of what is known as the McCarthy Case (*Railroad Co. vs. McCarthy*, 96 U.S. 267), by reason of which the Court refused to give effect to the defenses asserted for the reason that they were not raised at the time the contract was repudiated nor until the filing of the answer in the suit, more than a year later.

## DOUBLE PAYMENT OF SHARES BY MISTAKE

### Alberta Court Holds Stockholder's Claim Has Not Priority Over Claims of Other Creditors

A PERSON who pays for shares of stock of a company and afterwards pays again for the same shares in mistake and seeks to recover the amount mistakenly paid in garnishee proceedings, the money being in court under his garnishee summons when the company goes into liquidation, is simply a creditor of such company and is not entitled to any priority over the other creditors, according to a recent decision of the Supreme Court of Alberta.

Justice Walsh briefly sets forth the facts and the reasons for his decision as follows: "Schultz, after paying \$400 in full for the shares of this company (Wayne Coal Co., Ltd.) stock for which he had subscribed, paid the company again in full for the same by mistake. He sued the company for this money some six months after the second payment was made, and in that action he issued a garnishee summons against the Standard Bank of Canada, which paid into court the sum of \$399.25, being the amount which it admitted owing the company at the date of the service of the garnishee summons. Shortly afterwards, and whilst this money was still in court, the company went into liquidation. Schultz claims to be entitled to this money and the liquidator also lays claim to it. The Master at Calgary has given effect to the liquidator's claim and from his decision Schultz appeals. The question is asked whether or not Schultz is entitled to have this money paid out to him in priority to all other creditors.

#### Company a Debtor, Not a Trustee

"If the identical money which he paid in error to the company had been preserved in specie or so ear-marked as to have retained its identity there might be some force in this contention. But that is not the case at all. What I am asked to order is that out of the assets which should otherwise be available for distribution *pari passu* amongst the creditors \$400 should be taken and set apart for repayment to him of the money which the company improperly received from him. I do not think that I can do that. In my opinion neither this particular fund nor any other part of the assets of the company is impressed with a trust in favour of Schultz. The company undoubtedly owed him this money, but in my judgment as his debtor, and not his trustee. He sued the company as his debtor, and so if there was any question of election about it he determined the matter by the form of his action. His statement of claim is not before me but it must have been for money had and received. Under the rules he could only have issued a garnishee summons in an action for a debt or liquidated demand, and so it must be that his action was in a form which clearly shewed that he treated the company as his debtor. The garnishee summons which he issued could only have issued upon an affidavit proving the company's indebtedness to him. If he was not before, I think he thereby elected to become and became a creditor of the company and his claim must be disposed of on that basis. If he had carried that action to judgment it would simply have been for the recovery of the amount of this debt."

# News of Industrial Development in Canada

Large English Manufacturing Company Will Extend Its Operations to Canada—Pulp and Paper Official Tells an Optimistic Story—Substitution of Steel for Wooden Ships for Deep-Sea Fishing is Being Considered by Nova Scotia Ports—Canada Iron Foundries Contemplating Extension of Plant

**E**XTENSION of operations of the English Electric Co., Ltd., to Canada has been announced from London, Eng., and a Canadian board has been appointed with Gordon F. Perry, president of the National Iron Corporation, Toronto, as chairman. According to reports, large factories are to be built in Toronto, but the office of the British Trade Commissioner for Ontario has not yet received word to this effect nor any other details, but it is expected that the plans will be announced shortly.

In the words of Capt. E. J. Edwards, senior British Trade Commissioner, Montreal, the entrance of the company into this country is an event of industrial importance. He explains that the company is a merger, two years old, of seven large British engineering manufacturers of all kinds of electrical railway, steam and other plant, which has more recently joined hands with other even larger organizations, until now it is the largest of its kind in the Empire, with a capital of between \$75,000,000 and \$100,000,000, and employing, in the different plants on the other side, probably more than 50,000 men. The participating companies include John Brown and Co., Ltd.; Harland and Wolf, Ltd.; Dick, Kerr and Co., Ltd.; Coventry Ordnance Works, Ltd.; United Electric Car Co., Ltd.; Willans and Robinson, Ltd.; Phoenix Dynamo Mfg. Co., Ltd.; Siemens Bros. and Co., Ltd.; and Siemens Bros. Dynamo Works, Ltd.

These organizations can handle land or ocean transportation or other propositions of any magnitude, according to Capt. Edwards, and while there is no detail yet available in Montreal of the English Electric Co.'s plants proposed to be established at Toronto, the event is viewed as one of the first importance, considerably larger than any of the other enterprises established in Canada by old country organizations since the war.

## Sherbrooke and New Industries

A very interesting survey of the industrial situation in Sherbrooke, Que., is presented by the Industrial Committee of the Board of Trade in its annual report, and several points have more than local application. With regard to the question of new factories, the report states that at this time there are several angles, which are briefly as follows:—First—It would be unwise to turn away from Sherbrooke any industry wholly financed and which would need only our co-operation in finding a site upon which to build a building. It would evidence, certainly, a lack of progress to turn such factories away. And if such an industry should become available it is considered wise to select one, somewhat different from the industrial classifications now existing here, in order to make our industries more varied. Second—It is worthy of note, however, that we are receiving applications from already financed industries.

Third—There are some industries, partially financed but wanting buildings already erected. There are no such buildings as are desired, available in Sherbrooke, at the present time. Fourth—The finance needed for several concerns by local men has been provided on certain conditions, the amount ranging from \$25,000 and up, but as the conditions have not been met yet, these matters are not for publication. In short, there are a few projects requiring the sale of stock. The Sherbrooke investors are not looking for this kind of investment at this time, and the local money market does not warrant the encouragement of such proposals.

Of new industries establishing plants in Sherbrooke, are the following firms:—The Superheater Co., Ltd.; the Regal Tire and Rubber Co., Ltd.; Cluett, Peabody and Co.; English

and Scotch Woollen Mills; Office Requirements, Ltd.; and Pressure Proof Rings, Ltd.; besides a new model city suburb with its 100 houses of modern design, and the technical school and the Old People's Home which are to be constructed during the coming year, at an estimated cost of over \$600,000.

## The Pulp and Paper Trade

Of late there have been numerous adverse reports regarding the pulp and paper industry, but George H. Cahoon, Jr., president of the Laurentide Co., Ltd., who has just returned from the United States, has a different story to tell. Having been on a holiday trip he admits that he has been out of touch with the situation during the past two months, but he says that he had had an opportunity of seeing the statistics of the various bureaux in New York, on which he based the conclusion that the demand for paper was holding up satisfactorily. There had been a falling-off in consumption of approximately 15 per cent. from normal, but this was due to several factors, chief among which was the natural inclination on the part of United States publishers to await the putting into effect of the new price of 5½ cents per pound, or \$110 per ton, which will be effective from the first of April next, before filling their usual requirements.

"The paper industry," said Mr. Cahoon, "is in a particularly healthy condition. There are no large supplies of the finished product on hand, and the general inclination on the part of manufacturers seems to be toward curtailing production, rather than to dissipate their valuable resources by piling up stocks. Compare the paper industry with any other branch of manufacturing activity in this country or elsewhere, and it will be clear to anyone that it is in a class entirely by itself, especially so far as the newsprint situation is concerned."

The Industrial and Educational Publishing Co., Montreal, have decided to establish a paper mill at St. Anne-de-Bellevue, Que., to supply paper for their own needs and possibly for outside trade. Publishing a large number of trade and other journals besides doing a large job printing trade, they anticipate being able to use themselves the greater part of the product of the mill. They own a large piece of ground, contiguous to their plant and near the G.T.R. and C.P.R. stations—and as the mill will be within twenty miles of Montreal, it is expected that waste paper collected from the metropolis will form the principal source of fibre. Both steam and electric power will be used.

Due to the large amount of manufactured product on hand and the prospect of a limited market, the hydro-electric pulp mill at Campbellford, Ont., has closed for an indefinite period.

In connection with the general movement in the Lumber industry in New Brunswick for extended hours of labor and reduced wages to meet the new conditions, the E. Burt Lumber Co., which operates mills at Cardigan station on the Gibson branch of the C.P.R. and carry on lumbering operations on the Keswick River, have asked their millmen to accept a cut of 15 per cent. in wages and to return to a schedule of 59 working hours per week. Previous to last year the working schedule was 10 hours daily except Saturday, with 9 hours that day; last year there was a reduction to 9 hours daily.

## Iron and Steel

Consideration is at present being given by fishing ports of Nova Scotia to the possibility of substituting steel fishing schooners for the traditional wooden-built type for deep-sea fishing. The advantages of the steel-built vessels are many,

and it is understood that the Nova Scotia Steel and Coal Co. is contemplating the construction of a steel-built, two-masted schooner, fitted for deep-sea fishing. The company is also investigating the possibility of constructing small steel hulls.

The location of a wheel making plant to cost \$150,000 as a subsidiary of its present plant in Fort William, Ont., is in contemplation by the Canada Iron Foundries, Ltd.

The plant of the Canada Steel Foundries, Ltd., at Longue Point, Que., has been closed, and 650 men have been thrown out of work. Employees were asked to accept a reduction in wages of 20 per cent., and refused. Officials of the company, however, state that the shops were not closed on account of labor trouble, for there is no strike. As no reason has been given for the closing of the plant, apparently there is a lockout.

Lack of coal orders has resulted in a general slump in the coal industry in Cape Breton. The Dominion Coal Co.'s collieries are practically idle, and about 10,000 railroad workers, miners and other classes of labor are affected.

The International Nickel Co. at Copper Cliff, Ont., has announced a general reduction of 15 per cent. on all payroll rates in the mining and smelter division, effective on April 15 next. Married men are not affected. At present there are 300 part-time men at the International Co.'s smelter and mines, a full-time force of 700 being maintained. It will not go below the minimum of 700, and there will be no further cuts in production or forces, officials state. There are plenty of men available and willing to work, if only on part time.

#### Cheese Factories Operating

Several cheese factories in the Brockville, Ont., district have started operations for the season. Already a few lots of cheese have been forwarded to Montreal, the price received being about 25 cents.

A new industry, the Thermos heating system, is opening a factory in Winnipeg, L. P. Corbett, Toronto, manager of the company, has announced. Mr. Corbett has just returned from the west, where he installed this system in the Canadian Pacific Railway stations as far west as Wilkie. "We expect that the western business will be better than the east," Mr. Corbett said.

A factory for manufacturing certain lines of wood work is to be started shortly in Mahone, N.S. Mahone Bay is ideally situated for manufacturing anything out of wood, as there are large areas of forests only a few miles distant and electric power will be available by spring.

#### NEW INCORPORATIONS

Total Capital for Week Ended March 23 is \$16,957,750. Compared With \$11,236,000 Previous Week

AUTHORIZED capital of \$16,957,750 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended March 22, compared with \$11,236,000 for the previous week. A comparative summary by provinces is as follows:—

	Week ended March 15.	Week ended March 23.
Dominion .....	\$ 1,700,000	\$ 5,635,750
Alberta .....	908,000	.....
British Columbia .....	1,570,000	955,000
New Brunswick .....	130,000	.....
Ontario .....	3,670,000	9,470,000
Quebec .....	3,258,000	897,000
Totals .....	\$11,236,000	\$16,957,750

The following is a list of companies recently incorporated under Dominion charter, with head office and authorized capital:—

## Fifty-one Years of Steady Progress

One of the most brief yet impressive histories of Canadian financial institutions is contained in the annual record of The Mutual Life of Canada. The current issue will be ready in a few days. A copy will be sent to you on application. It contains fifty-one successive summaries, showing in the parallel columns the increase from year to year of the company's various receipts, expenditures, etc. No other document could better convey the idea of solid, uniform achievement, and the momentum of the advance is now greater than ever. The prospects are bright for a still more rapid expansion within the next few years. The assets of the company exceed \$40,000,000, and the assurances in force have reached \$206,000,000. There is a gross surplus of more than five million dollars over and above the amount necessary to guarantee all policies, so that the position of the company, in spite of the strain of recent years, is one of uncommon strength.

## NEWS OF MUNICIPAL FINANCE

Lethbridge Will Reimburse Sinking Fund With Bonds—  
Ontario Municipalities Gain by Amendment to  
Assessment Act—Glace Bay Ratepayers  
Complain of Poor Management

**Orillia, Ont.**—The tax rate for 1921 will be 46 mills, as compared with 47 mills last year.

**Glace Bay, N.S.**—A movement is on foot amongst the ratepayers to have legislation passed at the present session of the provincial parliament. It is understood that a delegation will go to Halifax at an early date to impress upon the government the situation and the need of legislation. A poor financial state of affairs and bad management generally by the council is complained of.

**Edmonton, Alta.**—That the city's loss on the Portland bond deal would be \$100,000, affecting the tax rate by slightly over a mill, is the estimate of Mayor Duggan. He points out that no definite figure could be named now on account of the varying rates of exchange expected during the coming month, if the negotiations now on for the release of the securities are completed.

In spite of the fact that the city had made a better deal than the old price provided, this is partially absorbed by the interest to the Imperial Bank for the temporary borrowing of \$2,000,000 on the New York redemption last January. It is also estimated that the loss on exchange in reselling the bonds will be around \$45,000. Bank interest of 7 per cent. on the temporary loan is estimated at \$50,000, making a total of \$95,000, approximately.

**Sandwich, Ont.**—A reduction in the tax rate from 39 mills to 23 mills is announced by E. R. North, town clerk. Explaining this rather unusual change, Mr. North remarks: "In 1920 our property was not assessed at its actual value, but only at about one-quarter of what it was worth. This year the assessment has been raised nearly 50 per cent., and consequently the tax rate has been lowered. Our expenses this year will be approximately the same as last year, and consequently with the increased assessment, the rate is reduced considerably. Property in Sandwich is assessed for about \$6,000,000 this year. If it were assessed at its par value, the tax rate would be cut down to about 12 mills. Even with the higher assessment this year, the property is still only assessed at about half of its real value."

**Chatham, Ont.**—According to the annual report of the Utilities Commission, there is a surplus on hand of \$23,000, which is the accumulated surplus of the various boards which have been in charge of the hydro, and which has been raised chiefly during the past few years. It is also reported that the commission, besides saving this money and giving the people service, has also paid off its own debentures with interest.

In addition to these the present commission has established and has now in operation an up-to-date steel plant, manufacturing high-grade steel castings from low-grade steel scrap. The power used for this purpose is hydro, supplied to the city at night, but which has never heretofore been used. In this way the peak load for Chatham is not affected, and money is made for the commission.

**Lethbridge, Alta.**—The burgesses of the city will be called upon to vote on a by-law on April 8, covering the sum of \$148,118. This becomes necessary to conform to the regulations of the Public Utilities Board of the province in regard to payments into the sinking fund. The vote is for the purpose of enabling the city to obtain bonds to be placed in the sinking fund so that they can be sold when required should the sinking fund need the cash, to meet the objections of the Public Utilities Board. The bonds will be in the shape of collateral to be placed in the sinking fund. The sinking fund will not require the cash for the next ten years.

The object of the by-law is to reimburse the city for funds spent in capital expenditure, and which have been

already paid for out of current funds. The amount is spread over the last seven or eight years. The by-law has received the sanction of the utilities board, in that the sums expended, and now sought to be bonded for payment into the sinking fund, were before the functioning of the board in January 1, 1916, after it was brought into being in October of the year previous.

**Windsor, Ont.**—Commenting on income assessment in his annual report, A. Black, assessment commissioner, says: "Income assessment has been subject to many changes, through amendments to the assessment act. In 1905 when the present act went into force the exemption in urban municipalities was \$900 for householders and \$500 for non-householders. The exemption was increased every few years up to 1920, when householders were allowed \$2,000 and a further sum of \$200 for each dependent child under 18 years of age; and non-householders were allowed \$1,000. The increased exemptions of 1920 caused a large reduction in the number of persons assessable in the urban municipalities of the province, the net decrease for Windsor being 100 as compared with 1919, but the returns show that the actual decrease was 170.

"Through the united efforts of the assessment commissioners of the province, the government was induced to amend the assessment act by making stock holders assessable for income derived from shares or stock held in any incorporated mercantile and manufacturing company. This amendment has more than recouped the municipalities for the loss caused by the increased exemptions of income derived from personal earnings. Moreover, it has shifted the burden of taxation from the shoulders of the wage earner to the shoulders of the capitalist who can better afford to pay the tax. Notwithstanding the reduction in the number of persons assessed for income, the assessment from this source has been increased by the sum of \$165,650, exclusive of \$84,000 involved in the city's appeal to the Appellate Court."

**Athabasca, Alta.**—Brief mention was made in these columns last week of a deadlock between bondholders and the town council, and as a result the town council had resigned. The incidents leading up to this action date back five or six years. In 1915 the council recognized that difficulty would be experienced in raising the amount of money necessary to retire the debenture repayment of \$14,000 annually, and in 1916 notified bondholders that it anticipated such difficulty in meeting future payments, but nothing definite was arrived at as a result of this notification.

In January, 1917, when the payment of interest and principal was due the council informed the purchasers of the bonds that it was unable to pay. In May of the same year the council made a proposal to the bondholders, setting out an amount that the council considered it could pay annually, and thereby extending the life of the debentures for a period of fifteen years, without interest, which would mean that the bonds would produce 4½ per cent. instead of the original 7 per cent., but pointed out that in the suggested rearrangement the bondholders would still receive 100 cents on the dollar. This suggestion was turned down and a counter proposal made. The matter then hung fire until the Municipal Finances Commission was formed by the provincial government, and the council made application to that body to have its affairs investigated, and this was done at a meeting of the commission held in Edmonton, January, 1920.

The Act empowering this commission provided that any finding that it might make in connection with the readjustment of debenture repayments must have the approval of three-fifths of the holders of the amount of the issue, thereby allowing the bondholders to dictate its terms. The commission at a later date drafted an order which was received by the town almost a year later in January, 1921, which was essentially a reproduction of the previous proposals, which had been carefully considered by the council and found impracticable. After further consideration of the finding of the commission the council appealed to the provincial gov-

ernment to consider a readjustment and not to confirm the finding of the commission.

Owing to its inability to advise on such a readjustment the council found it necessary to resign rather than take the responsibility for levying a rate which it considered would be prohibitive and altogether beyond the means of the town. There are only approximately forty resident rate-payers, and the order referred to provided for additional assessment of the improved property in the town. A

well-attended meeting of the resident ratepayers was held at Athabasca, when the mayor, W. J. Dent, ex-Mayor F. R. Falconer and the secretary-treasurer, J. P. Evans, explained the history of the financial condition of the town, and showed that the council had now taken the only course left open. The meeting unanimously approved the action of the council in resigning. The whole matter now rests with the department of municipal affairs, who have been notified of the action of the council.

## Government and Municipal Bond Market

**British Columbia Sells Securities for Disposal in United States—Nova Scotia Will Borrow—Legislation to Guarantee Irrigation and Drainage Bonds Will be Introduced by Alberta Government—Quebec Roman Catholic School Commission Makes Loan at Better Rate Than Previous Issues**

**I**MPROVEMENT in the government and municipal bond market continues, although the movement is less perceptible. In the past two weeks, the activity in Ontario municipals has somewhat diminished, but there have been substantial offerings from other quarters, and some of these have been taken up at better prices than previously noted. The Montreal Protestant School issue was purchased on a 6.20 per cent. basis last week, while this week, the Quebec Catholic School bonds found a buyer at 6.14 per cent.

The principal event of the week was the sale of \$2,000,000 British Columbia bonds, but this will not affect the Canadian market, as these were bought for disposal in the United States. Another provincial issue is pending, namely, Nova Scotia. These securities will be made payable in Canada or the United States at the option of the purchaser.

Victory bonds continue to change hands in fairly substantial volume, with prices steady. There were fractional declines in two issues this week, as illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	98¾	98½	98¾	98
1927 .....	97	97½	97	97½	97
1937 .....	98	99¾	99¼	99¾	99½
1923 .....	98	98	97½	97¾	97¼
1933 .....	96½	98½	98	98½	98
1924 .....	97	96½	95¼	96½	96
1934 .....	93	95¾	94¾	95¼	94¾

Ever since the Lethbridge Northern Irrigation District \$5,400,000 7 per cent. 30-year bonds failed to attract offers last January, the trustees and all those interested in the district have been waiting anxiously, although not without anticipation, for the definite announcement by the provincial government of its policy in regard to the guaranteeing of irrigation bonds, and last week the hopes of all were realized when it was decided at a caucus of private government members to give complete and full guarantees of both interest and principal on the bonds of organized irrigation districts. Coupled with this was a statement that the government intends to place drainage schemes on the same guarantee basis.

### Coming Offerings

Belle Plaine, Sask. ...	15,000	..	20-instal.	Apr. 4
Kamsack, Sask. ....	13,400	7	15-instal.	Apr. 15

**Nokomis, Sask.**—Tenders will be received for \$20,000 8 per cent. 15-instalment debentures. (See advertisement elsewhere in this issue.)

**Township of York, Ont.**—Tenders will be received until March 29, 1921, for the purchase of \$200,000 6 per cent. 20-instalment hydro-electric debentures.

**Belle Plaine, Sask.**—Tenders are invited until April 4, 1921, on \$15,000 debentures, repayable in 20 annual instalments. L. P. Wisbey, secretary-treasurer.

**New Liskeard, Ont.**—An issue of debentures to provide for financing the new pumping system of the municipal waterworks is being disposed of locally at par.

**Ellice R.M., Man.**—None of the tenders on the \$49,000 6 per cent. 30-year good roads debentures, guaranteed by the province, were accepted, and the securities are being sold locally.

**Kamsack, Sask.**—The town is offering \$13,400 7 per cent. electric light debentures, repayable in fifteen equal annual instalments. The net profit of the electric light department for 1920, according to L. W. Andrews, the treasurer, after paying all operating and overhead expenses and expending an amount of \$9,494 on capital account, was \$6,792. (See official notice elsewhere in this issue.)

**Toronto Township, Ont.**—Neelys, Ltd., have purchased \$79,600 6 per cent. 20-instalment debentures at a price of 98.75, which is on about a 6.15 per cent. basis. Public tenders were not asked, but a few bond dealers were asked to bid. About a year ago the debentures were put on the market and were purchased by C. H. Burgess and Company, but through some technicality they were turned back upon the municipality. An Act has been passed by the Ontario legislature, however, validating the issue.

### Debenture Notes

**Craik, Sask.**—Ratepayers have authorized the raising of \$66,000 for school purposes by debentures.

**Toronto, Ont.**—The board of control has sanctioned an issue of debentures by the Toronto Harbor Board to the extent of \$4,000,000.

**Essex County, Ont.**—Authorizing the expenditure of \$650,000 to build good roads, the council has passed by-laws for a bond issue covering the amount.

**Glace Bay, N.S.**—An act authorizing the issue of \$200,000 6 per cent. 30-year school bonds, is being sought by the school board of the city council, which body will in turn have to obtain the permission of the provincial legislature.

**Danville, Que.**—All tenders have been rejected for \$33,000 6 per cent. bonds, of which \$18,000 mature in 1940 and \$15,000 in 1957. The Municipal Debenture Corporation submitted the highest tender at 99.66 for the short maturity and 95.73 for the long.

**Brandon, Man.**—The amendments committee of the provincial legislature has given approval to the city's request to sell 7 per cent. debentures to the extent of \$100,000 for the establishment, maintenance and equipment of public playgrounds. The city also was granted permission to cancel

42 KING STREET WEST

TORONTO - CANADA

5 per cent. debentures to the extent of \$19,000 and substitute 6 per cent. debentures maturing July 1, 1943, for the same amount. This sum represented part of a \$200,000 issue at 5 per cent. made in 1913 for the Brandon waterworks. The request was preferred on the grounds that the city could not obtain money at 5 per cent. The committee accorded similar permission in connection with the balance of \$72,000 of an issue for \$280,000 5 per cent. debentures for the Brandon General Hospital. These will be issued at 6 per cent.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from March 5 to 12, 1921:—

8 per cent. 10-year Annuity Schools—Pitt, \$3,000; Loon Lake, \$1,000; North Star, \$1,500; Lone Spruce, \$1,200; Al-luvia, \$1,500; Crocus Vale, \$3,500; Wimmer, \$4,500. Pine-hurst, \$3,000 8 per cent. 10-years instalment. Rosewood, \$7,000 8 per cent. 20-years annuity.

**Village.**—Hawarden, \$1,500 8 per cent. 7-years instalment, for plank sidewalks.

**Nova Scotia.**—The province is calling for tenders on \$1,500,000 6 per cent. bonds. It is understood that alternative offers are requested for 5 and 10-year bonds, payable in Canada and United States, or 15 and 20-year bonds, payable in Canada only.

#### Bond Sales

**Eastview, Ont.**—Turner, Sprague and Company have purchased \$38,000 7 per cent. 20-year debentures at a price of 102, and \$26,000 6½ per cent. 20-year debentures at 96.25. Proceeds of the issue will be used for sidewalks, water services and other local improvements.

**Montreal West, Que.**—Several blocks of bonds, totalling \$282,000, bearing interest at 5½ per cent. and maturing in 10, 20, 30 and 40 years, have been sold to Versailles, Vidri-caire and Boulais at a price of 91.8625, which means that the municipality pays about 6.15 per cent. for its money. Tenders were as follows:—

Versailles, Vidricaire and Boulais .....	91.8625
Dominion Securities Corporation .....	90.67
Hew R. Wood and Co. ....	90.478
Hanson Brothers .....	88.87
Beausoliel, Ltd., offered 94.50 for the 10-year bonds, which amounted to \$34,000.	

**British Columbia.**—The Dominion Securities Corporation and Dillon, Read and Company have purchased \$2,000,000 6 per cent. 5-year bonds, payable in Canada and the United States, at a price of 103.77, which means that the province pays about 5.15 per cent. for its money for the present. The cost of the loan will be greater in the long run.

The following is a list of tenders:—

	Payable Canada and U.S. 5-yr. bonds.	10-yr. bonds.
Dominion Securities Corporation ...	103.77	101.317
Carstens & Earles, and Seattle National Bank .....	102.3152	99.351

20-year bonds, payable Canada only:—		
Dominion Securities Corp., A. E. Ames & Co., and Wood, Gundy & Co. ....		95.35
W. A. Mackenzie & Co., R. C. Matthews & Co., and R. A. Daly & Co. ....		95.31
Harrison Bros. and A. Jarvis & Co. ....		*95.21

\*For \$1,000,000, with option on the balance.

**Saskatchewan.**—The following is a list of debentures reported sold by the Local Government Board from March 5 to 12, 1921:—

**Schools.**—Yorkton, \$45,000 20-years 7 per cent.; Regina Sinking Fund Trustees. Cabri, \$3,500 15-years 8 per cent.; Nelson, \$3,000 10-years 8 per cent.; St. Imre, \$600 8-years 8 per cent.; Tarnoville \$1,175 10-years 8 per cent.; McLaren, \$1,400 10-years 8 per cent.; Sniatyn, \$2,000 10-years 8 per cent.; C. C. Cross and Co., Regina. Pauline, \$3,800 10-years 8 per cent.; Waterman-Waterbury, Regina. West Otthou, \$850 5-years 8 per cent.; Chas. Reusch, Otthou.

**Rural Telephones.**—Victor, \$1,000 15-years 8 per cent.; Ridpath, \$1,000 15-years 8 per cent.; A. L. Koyle and Co., Saskatoon. Renown, \$4,000 15 years 8 per cent.; Kansas, \$3,800 10-years 8 per cent.; H. C. Well, Regina. Dinsmore, \$1,500 15-years 8 per cent.; Wood, Gundy and Co., Saskatoon. Bertdale, \$6,300 15-years 8 per cent.; C. C. Cross and Co., Regina.

**City.**—Saskatoon. \$52,200 20-years 6½ per cent.; Saskatoon Sinking Fund, Saskatoon.

**Town.**—KerRobert, \$4,500 10-years 8 per cent.; various, KerRobert.

**Rural Municipalities.**—Star City, \$12,000 10-years 8 per cent.; various, Naisberry, Norton, \$6,000 10-years 8 per cent.; C. C. Cross and Co., Regina.

**Three Rivers, Que.**—The Provincial Securities Company has purchased \$250,000 6 per cent. 30-instalment debentures at a price of 97.77, which is on about a 6.20 per cent. basis. Tenders were as follows:—

Provincial Securities Company .....	97.77
Beausoliel, Ltd. ....	96.97
A. E. Ames and Company and G. L. Beaubien and Company .....	96.33
Versailles, Vidricaire and Boulais .....	96.07
Rene. T. Leclerc .....	95.64
Hanson Brothers .....	94.37

**Toronto, Ont.**—The Separate School Board has awarded to the National City Co., Ltd., \$350,000 6 per cent. 20-year debentures at 96.79, which is on about a 6.29 per cent. basis. Tenders were as follows:—

National City Co., Ltd. ....	96.79
United Financial Corp., Ltd. ....	96.17
Dominion Securities Corp. ....	95.86
Dymont, Anderson & Co. ....	95.52
A. Jarvis & Co. ....	95.41
Wood, Gundy & Co. ....	94.54

**Quebec R.C. Schools, Que.**—There was keen competition for the \$700,000 bonds of the commission, which are guaranteed by the city of Quebec, and the margin between the highest and lowest bid was very small. Alternative offers were asked for 6 per cent. 10-year bonds, or 5½ per cent. 30-year bonds. The former type of security proved to be the most popular. The United Financial Corporation, Ltd., got the bonds at a price of 98.92, which is on about a 6.14 per cent. basis. Tenders were as follows:—

	6%	5½%
	10-years.	30-years.
United Financial Corp., Ltd. ....	98.92	....
Versailles, Vidricaire & Boulais, and Municipal Debenture Corp. ....	98.89	91.08

## CORPORATION SECURITIES MARKET

Stock Prices Continue to Pursue Irregular Course—New Stock of Price Brothers is on Three Per Cent. Basis

NOTHING occurred in the Canadian stock markets this week to give a new view of the general situation. At first it seemed as though prices were on the mend, and some observers, bolder than the rest, ventured the opinion that the turn had arrived, but subsequent events proved differently, and survey of the lists at the close on March 22 revealed a goodly number of net declines for the week. As one financier has candidly put it, even the most experienced observer feels himself unable to foresee with any confidence the probable drift of things. The change may come from causes as unexpected and as suddenly as those which came into view on the side of reaction and depression last fall. It does seem, however, as if the stock markets have taken into account everything of significance, but if such be the case, it does not necessarily mean that prices will go up. If the bears are played out and the bull element is unable to find anything to work upon, the natural result will be a dull period. Money is easy and has been for some time, but this is of secondary consideration.

## General Electric's Movements

One thing of considerable interest in financial circles was the annual report of the Canadian General Electric Company, but the announcements contained therein, both usual and unusual, had already been anticipated and discounted by the market, and the stock of the company receded slightly. That the report is a good one, and that the prospects for the future are bright, is clearly evident. With the two per cent. bonus, the dividends paid to shareholders last year were on the same basis as in the nine years previous to 1908. From 1909 to 1919 a conservative policy in regard to dividends had been conducted by directors, and as a result a very substantial surplus, in addition to an adequate depreciation reserve, has been built. A 20 per cent. stock bonus will be distributed to shareholders, but still the reserve will stand at a good figure.

Trading in listed stocks in Montreal for the five days ended March 22 resulted in a turnover of 51,843 shares, compared with 54,805 in the six previous days, while in Toronto the figure was 10,242, as against 20,088. Bonds changed hands on the Montreal exchange to the extent of \$637,461, compared with \$1,431,200 a week ago, while the turnover in Toronto was \$1,155,500, as against \$1,503,110 previously.

The directors of Price Brothers, Limited, have declared their first dividend since the distribution of their stock by the old company. This dividend is at the rate of three-quarters of one per cent., and leads to assume that the company has gone on a 3 per cent. dividend basis. At the time of the reorganization of the company's capital last year shareholders received five new shares for one old one, so that the dividend basis on the old capital would have been at the rate of 15 per cent. It is understood that the company's officials are at present busily engaged providing the necessary data for the Montreal Stock Exchange Committee to have the new stock listed on as early a date as possible.

## Pedlar People Bond Issue

The Pedlar People Ltd., of Oshawa, through H. J. Birkett and Company, are offering \$275,000, the unsold balance of an issue of \$500,000 of 8 per cent. first mortgage bonds, maturing \$25,000 each year from 1923 to 1940, and \$50,000 in 1941. The company itself is a close corporation, and the whole of its \$400,000 of capital stock is held by the Pedlar family and those who have been associated with it for the past twenty years. The business was started by the late George H. Pedlar in 1861, and the present company was formed in 1892. A new factory has just been erected, and the present bond issue is to care for it. Last year's profits of the concern were \$140,000, equal to three and a half times interest on the bonds. The company's business is the manufacture of sheet metal roofing, automobile parts, garages, etc.

An offering of \$200,000 8 per cent. cumulative first preference shares of the Great West Garment Company, Ltd., Edmonton, is being offered in the west at par (\$100), with a bonus of one participating second preference share. The authorized capital of the company consists of \$375,000 8 per cent. cumulative first preference shares, \$125,000 participating second preference shares with a par value of \$25, and \$250,000 common shares, of which \$125,000 is convertible into first preference. There is no bonded debt. The company manufactures workmen's clothing, and distributes its own goods in the west. It is well known, and the present issue is needed to take care of the growing business.

Reference was made in these columns last week of the offering of \$300,000 7 per cent. prior liens debentures of the Canada Land and Irrigation Company in London, England. A report from Alberta states that this company owns the new irrigation project at Vauxhall, where it has 200,000 acres of irrigated and 300,000 acres of dry land. Its assets are just now beginning to make a return after more than ten years of construction work on the irrigation project. It is the opinion that the company has a block of the finest irrigation land in Canada, plenty of water for 200,000 acres, and eventually the undertaking will pay out and make a big profit for the shareholders. Heavy land sales in the Vauxhall district will be made this year.

## Clarke Brothers Issue

An offering of \$1,250,000 7 per cent. first mortgage 15-year sinking fund bonds of Clarke Brothers Paper Mills, Ltd., is being made by John Stark and Company, Toronto, at 97, with a bonus of 30 per cent. common stock. Clarke Brothers Paper Mills, Ltd., was organized under a Dominion charter fully avoiding any action which may jeopardize the funds in 1920, is an enterprise associated with Clarke Bros., Ltd., which was formerly a partnership of W. G. and W. W. Clarke, who have been in business for over forty years at Bear River, N.S., during which time they have developed and successfully established a series of allied industries, based chiefly on the products of the forest. Clarke Bros., Ltd., own the majority of the stock of Clarke Bros. Paper Mills, Ltd., and has guaranteed this issue of bonds as to principal, sinking fund and interest.

An attraction of the present issue of bonds is that principal and interest are payable in New York funds. Sinking fund payments will be made annually, commencing 1925.

**NOTICE**

**TENDERS FOR PULPWOOD AND TIMBER LIMIT**

Tenders will be received by the undersigned up to and including the 4th day of July, 1921, for the right to cut pulpwood and pine timber on a certain area situated in the vicinity of Long Lake, District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 80 cents per cord for spruce and 40 cents per cord for other pulpwoods, and \$2.50 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for fifty thousand dollars (\$50,000), which amount will be forfeited in the event of the successful tenderer not entering into agreement to carry out conditions, etc.

The said \$50,000 shall remain on deposit until the pulp mill, as provided by terms and conditions of sale, is erected and in operation. Any timber cut in the meantime shall be subject to payment of dues and bonus as accounts for same are rendered. After the said pulp mill is erected and in operation, the deposit of \$50,000 may be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, shall be paid in the usual manner as returns for cutting of wood and timber are received and accounts rendered.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

All tenders should be enclosed in sealed envelope and marked plainly on outside, "Tender for Long Lake Pulp and Timber Limit."

**BENIAH BOWMAN,**

Minister of Lands and Forests.

## LONDON BOND CORPORATION

The London Bond Corporation, Ltd., announce the increasing of their capital from \$100,000 to \$500,000. The volume of business handled by this concern has grown considerably, and it was found advisable to increase the capital to take care of future business, which is expected to be large.

The company deals exclusively in guaranteed government, municipal and corporation bonds. They are also interested in the financing of well-established local industries. The directors of the company are as follows: George M. Reid, president; T. P. Allan, vice-president; A. T. Little, P. A. Thomson, J. E. Magee and E. D. McNee, directors. E. B. Almon, manager.

## INSURANCE RATES TO BE REVISED

The Halifax rate situation was the subject of considerable discussion at a special meeting of the Canadian Fire Underwriters' Association which was held recently. The managers present interested in Nova Scotia concurred in the view that prompt measures should be taken to put Halifax upon a proper rating basis, and the result was the appointment of a committee of six managers, of which W. E. Baldwin, of the Continental Insurance Company, was made chairman. This committee will shortly proceed to Halifax to meet the Nova Scotia board, and to insist that a very much higher rate be established until conditions are radically improved. It is expected that the committee will stop at St. John and be joined there by some of the provincial managers, so that it will be representative in character, embracing managers from Montreal, Toronto and the maritime provinces. This, it is expected, will accomplish some satisfactory results.

The Nova Scotia Board of Fire Underwriters has requested the National Board of Fire Underwriters to send

some of its fire protection engineers to Halifax to reinspect the city of Halifax with a view of determining its proper fire protection classification. When this is arrived at the Nova Scotia board, by comparison with that of other cities, can formulate the proper base rate for Halifax and the application of the C.F.U.A. rating schedule should then produce adequate as well as equitable rates. Considering structural conditions and deficiency of fire protection in Halifax, it is contended that a revision of rates is necessary.

## DEBENTURES FOR SALE

### TENDERS FOR DEBENTURES

#### TOWN OF KAMSACK

Tenders will be received by the undersigned up to five o'clock p.m. on Friday, April 15th, 1921, for the purchase of \$13,400.00 of 15-year 7% Electric Light Debentures. Repayable in equal annual instalments of principal and interest.

Neither the highest or any other tender necessarily accepted.

L. W. ANDREW,  
Treasurer.

Kamsack, Sask.

# Corporation Finance

**Canadian General Electric Had Prosperous Year—Stock Bonus to be Paid Out of Surplus Earnings—Canadian Pacific Maintained from Railroad and Lake Steamer Revenue, but Only by a Very Narrow Margin—Special Income Account Made Fine Showing—National Breweries Working Capital Impaired as a Result of Extensions—Some New Financing is to be Done to Liquidate Obligations and Complete Work Already Under Way**

**Quaker Oats Co.**—The end of 1919 showed a surplus of three-quarters of a million, but the year 1920 closed with a deficit of over eight millions. For the first half of the year business was reported good, but in September began what H. P. Cowell, president, refers to as "an economic storm, the like of which has never been known." The total inventory shrinkage amounts to over five million dollars. The net result of the year is a shrinkage in profit and loss surplus from \$11,565,588 to a balance of but \$1,263,163 at the first of this year. Of this \$2,250,000 is attributable to a 25 per cent. common stock dividend declared last September.

Reference is made to the company's Canadian plants by the president in the statement that accumulated provision of \$711,735 is made for exchange loss of foreign assets, including Canadian assets in excess of permanent working capital of \$4,000,000.

**Port Hope Sanitary Manufacturing Co., Ltd.**—Profits were \$81,212 in 1920, before providing for depreciation, income tax and other charges, compared with \$132,015 in 1919. After deducting interest and bank charges, depreciation, etc., amounting to \$34,605, compared with \$52,604 previously, there remained a net profit of \$46,610, compared with \$79,411. The company's cash position shows little change, current assets being \$250,729, compared with \$302,834, and current liabilities \$40,017, compared with \$71,116. Total assets are \$1,436,524, against \$1,401,412.

Speaking of the record of the past year, L. M. Wood, president, states that the volume of business showed a substantial increase, while profits were considerably reduced. "The year opened with a rush and promised a largely increased business with good profits, but operating conditions became so difficult, owing to scarcity of raw materials, unreasonable demands from labor, and poor production, that the slump in business, which developed in the fall, was in many respects a distinct relief. Necessary adjustments were being made to get back to conditions approaching normal, and the plant is now operating on a much more satisfactory basis than for some time past.

**Northern Ontario Light and Power Co.**—Gross earnings of the company for 1920 amounted to \$909,427, compared with \$835,126 in 1919, an increase of 8.90 per cent. According to the report of D. Fasken, president, the increase would have been much larger, if the small rainfall had not necessitated a curtailment in the supply of power.

After deducting operating expenses, maintenance, taxes, etc., there were net profits of \$605,940, compared with \$573,401, an increase of 5.67 per cent. Further deductions for bond interest, exchange, charges, etc., left a profit for the year of \$298,285, as against \$286,920, a gain of 3.96 per cent. Adding the surplus of \$654,376 from the previous year, there was then a total surplus of \$952,861, from which \$250,000 was transferred to reserve, against \$125,000 in the previous year, and a preferred stock dividend of \$142,968 paid, leaving a surplus at the end of the year of \$559,893. Total assets are now \$13,470,890, compared with \$13,322,759. Dominion government bonds held by the company were increased by \$120,000, making a total investment in those securities of \$370,500.

**National Breweries, Ltd.**—Trading profits of the company for 1920 show but a small decline from the previous year, the figure being \$976,609, as compared with \$1,061,350 in 1919 and \$616,265 in 1918. After deductions for depreciation reserve, bond interest and preferred dividends, there re-

maintained a balance of \$598,988 applicable to the common stock outstanding, representing 26.57 per cent., or \$6.64 per share on the \$25 par value securities. The year's result in this respect compared with 24.23 per cent. in 1919, and 10.5 per cent. in the preceding period. Dividends on the common deducted, there remained a surplus of \$238,300 to carry forward into the current year, against \$479,346 in 1919, and \$236,509 in 1918. The balance standing to the credit of profit and loss account, as at December 31 last, amounted to \$1,618,238.

The balance sheet, in some respects, was not as favorable as the earnings statement, however, working capital showing a severe impairment, as a result of extensive additions and improvements effected during the year. The sharp reduction in net current assets was due primarily to the existence in 1920 accounts of bank loans totalling \$1,000,000, an increase of nearly \$500,000 in bills and accounts payable, and by reductions of some \$535,000 in investments, and \$200,000 in cash on hand.

At the annual meeting, V. Boswell, one of the vice-presidents who presided, forecasted new financing to liquidate outstanding obligations and provide for the completion of work already under way, the cost of which would be approximately \$500,000. No indication was given as to the total amount of new financing in contemplation. The position of working capital during the past three years follows:—

	1920.	1919.	1918.
Current assets .....	\$2,447,076	\$2,681,369	\$2,462,652
Current liabilities .....	1,809,739	350,237	256,640
Working capital .....	\$ 637,337	\$2,331,132	\$2,206,012

Other changes are not very important, but the principal comparisons are:—

	1920.	1919.
Property .....	\$6,158,973	\$4,569,834
Bonds .....	1,500,000	1,580,000
Depreciation reserve..	235,304	495,382
Total assets .....	\$10,192,581	\$8,834,857

**Canadian Pacific Railway.**—Earnings equivalent to 11.4 per cent. on the \$260,000,000 common capitalization, are shown in the annual statement of the enterprise for 1920, compared with 10.8 per cent. in 1919; 10.97 per cent. in 1918; 15.89 per cent. in 1917; and 16.76 per cent. in 1916. The increase in percentage, which takes into consideration the inclusion of special income, is accounted for more by the latter item than from the railways and lake steamers only, which showed a reduction from the preceding year, and is the smallest since 1917, the year in which the company began issuing statements for a fiscal year ending with December 31.

Last year, earnings on the common stock, outside of special income, equalled 7.17 per cent.; in 1919, 7.32 per cent.; in 1918, 7.85 per cent.; and in 1917, 11.78. In 1919 earnings from special income equalled 3.48 per cent., against last year's 4.23, the latter incidentally being the largest in the periods mentioned above. Gross earnings of the railway last year were the largest in its history, totalling \$216,641,349, against \$176,929,060 the preceding year, and \$157,537,698 in 1918. Operating expenses at \$183,488,305, however, showed an almost corresponding increase, and with an increase of over \$600,000 in fixed charges, and deducting the usual \$500,000 pension fund reserve, the balance left for dividend distribution amounted to \$21,877,635, about \$393,891 down from the preceding year.

After dividends, a surplus of \$450,359 compared with \$844,250 the preceding year, and \$2,203,621 in 1918. Special income at \$10,966,448 showed an increase of over \$1,900,000, and after dividends of 3 per cent. had been deducted, and the balance added to previous surplus the present surplus at credit of special income amounts to \$18,580,291.

Over a period of three years, the principal items in the earnings statement compare as follows:—

	1920.	1919.	1918.
Gross earnings .....	\$216,641,349	\$176,929,060	\$157,537,698
Working expenses ..	183,488,305	143,996,024	123,035,310
Net earnings .....	33,153,044	32,933,036	34,502,388
Fixed charges .....	10,775,409	10,161,510	10,177,513
Balance after preferred	18,650,359	19,044,250	20,403,621
Common dividend ..	18,200,000	18,200,000	18,200,000
Net surplus .....	450,359	844,250	2,203,621
Special income .....	10,966,448	9,049,342	8,128,751
Balance after dividend	3,166,448	1,249,342	328,751
Surplus .....	18,580,291	15,413,843	14,164,501

Canadian General Electric Co., Ltd.—Prosperity is written plainly in the annual report of the company for 1920. During the last six months of 1919 the company's orders exceeded any similar previous period, and that growth in the volume of business accepted both continued and increased last year, and at the close there were carried over uncompleted contracts amounting to seven and a half million dollars.

Profits for the year amounted to \$2,213,731, as compared with \$1,617,989 in 1919, from which is deducted the sum of \$326,300 for interest and \$530,741 which has been reserved for depreciation, leaving a net profit of \$1,356,689, compared with \$1,093,320. Dividends at the rate of 8 per cent., per annum and a bonus of 2 per cent. were paid on the common stock and 7 per cent. on the preference stock, leaving a balance of \$342,574 carried to the credit of profit and loss account, which added to the balance of \$436,097 brought forward from the previous year makes a total of \$778,672 at the credit of that account. This amount, together with the reserve of \$5,000,000 makes a total surplus of \$5,778,672.

In his report, Frederic Nicholls, president says: "While dividends have been earned and paid since the company was first organized, your directors have always been careful to set aside from year to year an adequate sum for depreciation and reserve. As a result of this conservative policy, continued over a long period, the amount at the credit of depreciation reserve stands at \$5,091,949, and the amount at the credit of surplus account stands at \$5,778,672. Having in mind the fact that our shareholders in the past have been agreeable to the policy of a reasonable distribution of the profits earned, in order that the company might build up a substantial reserve, it is proposed to submit to the shareholders at a special general meeting to be called for the purpose, a proposition whereby a portion of our accumulated surplus may now be distributed to the common stock holders in the form of a stock dividend of 20 per cent."

The balance sheet shows the following principal changes:—

	1920.	1919.
Capital assets .....	\$ 14,752,057	\$12,783,496
Inventory, etc. ....	9,892,969	6,043,173
Accounts receivable ..	4,757,942	3,426,397
Investments .....	894,086	576,914
Total current assets ..	16,091,604	10,705,961
Bills payable and current liabilities .....	8,468,245	2,403,364
Common stock .....	8,754,400	8,000,000

The company has no outstanding bonds, debentures, mortgage or prior liens of any description, other than a nominal charge of \$63,750 on properties purchased, and on which existing mortgages still current are not due.

Niagara Falls Power Co.—The consolidated annual report of the Niagara Falls Power Company and the Canadian Niagara Falls Power Company shows total operating revenue of \$6,031,950, being an increase of \$933,850 over the previous

year. From this, operating expenses, taxes and amortization took \$2,352,023, an increase of \$610,853. After interest, dividends and other charges, the net income amounted to \$2,241,148, as compared with \$2,084,055 in 1919.

The officers of the company and its board of directors confidently look forward to an early and full resumption of former activities of the great industries of the Niagara frontier. They have every reason to believe that the demand for low-priced electric power and reliable service, which has progressively increased during the two decades last past, will continue in growth for many years, and that such recessions as from time to time may occur will be slight and of short duration.

West India Electric Co., Ltd.—Gross earnings of the company for 1920 amounted to \$490,180, showing an increase of \$106,516 over the previous year. Operating expenses reached the figure of \$354,360, an advance of almost the same as that in gross earnings, so that net amounted to \$135,820, as compared with \$136,066. After all other charges, net income stood at \$74,538, as against \$83,567 in 1919 and \$89,602 in 1918.

In his report to shareholders, James Hutchinson, president, says: "The receipts from all departments of the company's business were most satisfactory, the largest since the inception of the enterprise, but the difficult conditions pertaining to operation which existed during the previous year continued throughout 1920. The higher scale of wages for motormen and conductors came into effect on the 1st of January, and there were also increases to the staffs of the different departments. An unfortunate loss of a cargo of coal in the early spring through shipwreck had, through the peculiar situation which existed in the fuel market, to be replaced at much higher prices, which added very materially to the cost of operating the auxiliary steam station. The expenditure on account of injuries and damages exceeded very largely that of all former years. These were the contributing factors to the very large increase in operating expenses, which reached the high figure of 72.30 per cent. of the receipts."

The balance sheet shows few changes of significance. Investments are lower, while cash is higher. Surplus stands at \$680,238, compared with \$627,076 previously.

Dominion Engineering Works, Ltd.—The first annual statement of the company consists of a balance sheet and a directors' report. Assets are shown at \$8,544,102, comprising in part \$22,000, \$4,500 bills receivable, \$430,037 inventories. Lands and buildings are valued at \$1,275,038, machinery and tools at \$1,661,975, and contracts, patents and goodwill at \$4,136,824. Suspended assets, including starting expenses, etc., amount to \$130,239. Besides the \$8,000,000 preferred and common stock, liabilities consist of \$260,000 notes payable, \$52,515 bank overdraft, and \$231,586 accounts payable and accrued charges.

Directors report that during the year there has been installed a large proportion of the additional plant required for the manufacture of water turbines of all capacities, including the largest possible to transport. Turbines are being made for Laurentide Power Co., Montreal Power Consolidated, Shawinigan Water and Power, and Spruce Falls Company. These are ten turbines in all comprising over 110,000 h.p. in all. The Cedars Rapids wheels are duplicates of those already installed, and were until last year the largest wheels that had been built. The Shawinigan wheel will be the largest wheel of this type in existence.

The business entered up to the 31st December, including that taken over from the Dominion Engineering and Machinery Company amounted to \$3,400,000, approximately distributed: Paper-making machinery, \$1,700,000; hydraulic machinery, \$1,650,000; foundry sales, \$56,000.

The Dominion Engineering Works, Ltd., is a subsidiary of the Dominion Bridge Company, and was formed last year to produce in Canada machinery which comes largely into use in the development of the production of power and the manufacture of pulp and paper. An offering of \$1,400,000 8 per cent preferred stock was made last summer at 98, with a bonus of 25 per cent. common.

## RECENT FIRES

Plant of Howe Sound Mining and Smelting Co. at Britannia Beach, B.C., Destroyed—Departmental Store of Crummy Bros., Ltd., Grande Prairie, Alta., Also Destroyed

Beaconsfield, Ont.—March 15—Two barns on the farm of O. C. Sovereign, situated on the Stone Road, in North Norwich township, were destroyed by fire. The total damage is estimated at \$3,500, with insurance of \$1,150. The barns were struck by lightning.

Belleville, Ont.—March 17—The farm buildings and contents on the farm of Robert Wadsworth at Paudash Lake, North Hastings, were destroyed by fire. The loss is partly covered by insurance.

Brandon, Man.—March 15—The home of John Zeneski, 456 Twenty-first Street North, was destroyed by fire. The loss is estimated at \$800, with insurance of \$500. A defective stove was the cause of the fire.

Britannia Beach, B.C.—March 20—The plant of the Howe Sound Mining and Smelting Co. was destroyed by fire. The plant was valued at \$750,000.

Cayuga, Ont.—March 21—The Cayuga High School was damaged by fire with a loss of \$30,000, while the insurance is \$10,000.

Dundurn, Sask.—March 16—The home of Martin Shkvarok was destroyed. One fatality.

Grande Prairie, Alta.—March 18—The department store of Crummy Bros., Ltd., was destroyed. It is believed that the blaze originated as the result of a coal gas explosion. The loss is estimated at \$100,000.

Hamilton, Ont.—March 16—One of the buildings of the Grasselli Chemical Works, Burlington Street East, was destroyed. The loss was covered by insurance.

March 17—The residence of H. L. Ferrey, 55 Fairleigh Crescent, was damaged. The fire, which was caused by hot ashes, did damage amounting to \$1,500. The Empire Building, King William and Hughson Streets, was damaged. The loss is \$2,000.

Maxville, Ont.—March 17—A restaurant, occupied by A. Poulos, was damaged to the extent of \$2,000, with no insurance.

Medicine Hat, Alta.—March 15—The home of A. E. Barker, 708 Eighth Street, was damaged. The fire, which was caused by an overheated stove, did \$200 damage.

New Toronto, Ont.—March 19—Fire caused by overheating in the drying-room destroyed the top and part of the first floor of the New Toronto Leather Works. The loss is estimated at \$15,000.

St. Scholastique, Que.—March 19—Damage estimated at \$18,000 was done by a fire which destroyed a garage and a store, and did considerable damage to two dwellings.

St. Stephen, N.B.—March 19—Sampson's garage and the carriage factory adjoining were destroyed by fire.

Sault Ste. Marie, Ont.—March 17—The residence of Mr. Andrews, 412 Charles St., was damaged by fire. There were four fatalities.

March 21—The residence of Stephen Dean, of Tarentorus Township, was destroyed by fire, together with the contents.

## ADDITIONAL INFORMATION CONCERNING FIRES

Alexandria, Ont.—March 3—The grocery store belonging to John Boyle was destroyed by fire. The loss is \$9,000, with insurance of \$4,515 in the Merchants and Norwich Union insurance companies. R. H. Cowan's hardware store was also destroyed, with a loss of \$23,500. There is insurance of \$9,100 in the Northern, Guardian, Norwich Union, Liverpool and London and Globe, Caledonia and Monarch insurance companies.

Lethbridge, Alta.—February 1—The blacksmith's shop of the Federal Coals, Ltd., was destroyed by fire. The loss is \$2,266, with \$1,600 insurance in the following companies: Alliance, British General, London Guarantee and Accident, Scottish Union and Springfield insurance companies.

Lethbridge, Alta.—February 8—In the vicinity of 9th Ave. and 8th St. South, there were two houses damaged by fire and also two barns at the rear. The fire is believed to have started by the overheating of a stove in one of the barns. The total loss is \$6,344 with insurance of \$4,369.

Loiselleville, Ont.—February 26—Loiselleville Catholic School was damaged by fire with a loss of \$5,800. There was an insurance of \$4,400 in the London Mutual Fire Insurance Co.

Manitoba.—The fire commissioner's statement of fires for the month of January show that during the month there were 124 alarms, with an estimated loss of \$366,166. There was one fatality. The following were the causes of fires: Stoves and furnaces, 29; chimneys, 16; smoking, 12; electricity, 11; hot ashes, 9; matches, 7; spontaneous combustion, 5; explosions, 3. The following are the class of structures damaged: Dwellings, 53; farm buildings, 17; stores, 7; apartment buildings, 5; garages, 4; theatre, 1.

Medicine Hat, Alta.—March 2—A frame building, which was used as a garage by the Canada Land and Irrigation Co., Ltd., was destroyed by fire. The loss is \$2,800, with insurance of \$1,550 in the Royal Exchange Insurance Co.

Montreal, Que.—February 18—A fire broke out in the residence of F. LaRoque, 39 Maria St., doing \$800 damage to the contents. There is insurance of \$800 in the Sun Fire Insurance Co.

Montreal, Que.—February 28—A fire broke out on the premises of the General Cigar Co., Ltd. (controlled by Imperial Tobacco Co.), corner Parthenais and Amity Streets. Insurance as follows:—North America, \$30,000; United States, \$15,000; Prov. Wash., \$10,000; Firemen's Fund, \$10,000; Alliance, \$12,500; Employers, \$10,400; Nova Scotia, \$10,000; General of Perth, \$12,000; Canada Security, \$5,000; Canadian Fire, \$7,500; Globe Indemnity, \$19,000; National of Hartford, \$30,000; Century, \$12,500; Beaver, \$2,500; New Jersey, \$2,500; British Dominions, \$10,000; Fidelity-Phenix, \$10,000; Phenix of Paris, \$6,000; Globe and Rutgers, \$10,000; Glens Falls, \$10,000; Vulcan, \$7,000; London Mutual, \$5,000; Traders and General, \$5,000; National Benefit, \$8,000; Niagara, \$10,000; Yorkshire, \$7,500; Great American, \$7,500; Westchester, \$5,000; Northern, \$5,000; Springfield, \$10,000; Royal Scottish, \$10,000; Queensland, \$10,000; Liverpool and London and Globe, \$10,000; British Dominions, \$10,000; Niagara, \$10,000; Norwich, \$5,000; Commercial Union, \$5,000; North British and Mercantile, \$25,000. Total, \$395,200. Loss about \$35,000.

Saskatoon, Sask.—February 16—The Cahill Block was destroyed by fire with a total loss of \$158,630, with insurance of \$178,500.

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first two weeks in March:—

	Canadian Pacific Railway		Inc. or dec.
	1921.	1920.	
March 7	\$3,255,000	\$3,244,000	+ \$ 11,000
March 14	3,176,000	3,130,000	+ 46,000
Canadian National Railway

## February Bank Statement

Current Loans Increase Slightly, While Demand Deposits and Circulation Were Much Lower  
—Savings Continue to Trend Upward—Ratio of Quick Assets Showed Smaller Percentage,  
But the Liquid Position Improved Slightly on the Whole—Security Holdings Increased

	February, 1920.	January, 1921.	February, 1921.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	\$ 620,069,555	\$ 584,025,710	\$ 561,578,474	— 9.5	— 3.9
Deposits after notice	1,187,027,307	1,313,093,870	1,318,855,482	+11.0	+ 0.4
Current loans in Canada	1,257,015,902	1,264,490,463	1,266,235,381	+ 0.7	+ 0.2
Current loans elsewhere	180,711,238	173,379,729	163,044,476	— 9.5	— 5.8
Loans to municipalities	52,690,790	59,637,682	67,719,881	+28.8	+13.6
Call loans in Canada	127,251,919	112,474,318	112,680,497	—11.8	+ 0.18
Call loans elsewhere	184,469,882	191,854,003	190,413,527	+ 3.2	— 0.5
Circulation	223,979,666	229,608,213	211,640,296	— 5.4	— 7.9

IT can hardly be said that the changes in the February bank statement throw any new light on the business situation generally. A small increase in current loans seems to indicate a slight revival in trade, but on the other hand, the large decline in circulation reflects fewer transactions by wholesalers and retailers, with due consideration for the decline in prices, of course. It may be that manufacturers are preparing for the improvement in trade, thus accounting for the increase in loans, but the change has not been very significant.

Call loans in Canada are moderately higher, but this account, as compared with a year ago, indicates a falling off in activity on the stock exchanges. The course of the current and call loans in Canada during the past thirteen months is given in the following figures:—

	1918.	1919.	1920.	1921.
	\$	\$	\$	\$
January	132,687,066	140,819,656	170,206,805	191,854,003
February	160,239,494	155,983,681	184,469,882	190,413,527
March	167,296,701	160,116,443	205,202,133	
April	179,818,531	155,533,666	206,229,451	
May	172,259,879	157,176,325	213,964,182	
June	170,034,476	167,236,045	219,214,431	
July	167,112,836	178,098,434	203,045,209	
August	160,544,990	174,176,578	193,888,245	
September	159,680,810	169,532,489	186,962,960	
October	157,040,858	158,194,085	188,367,459	
November	171,035,732	169,626,880	218,183,194	
December	150,248,322	172,232,161	211,442,652	

The following table shows the principal loan accounts during recent years:—

Loans.	Current in Canada.	Call in Canada.
1920—February	\$1,257,015,902	\$127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,470,153	113,598,923
September	1,417,520,756	114,669,611
October	1,405,401,227	113,135,902
November	1,357,973,118	108,471,340
December	1,301,804,342	114,703,246
1921—January	1,264,490,463	112,474,318
February	1,266,235,381	112,680,497

### Call Loans Abroad

The decline in call loans abroad is the result of the continuance of the liquidation of speculative accounts on the New York exchange. This liquidation has been so thorough, that the employment of American bank resources in demand loans is probably smaller in the aggregate than in a number of years. Canadian banks have been affected largely, but such loans are still some \$6,000,000 above a year ago. The monthly movement of call loans abroad since January, 1918, is illustrated by the following figures:—

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	\$ 771,635,208	\$ 43,661,379	\$ 67,591,769	\$ 89,890,982
1916	760,873,181	56,099,719	81,949,125	139,138,651
1917	813,302,717	86,944,350	78,786,535	162,344,556
1918	859,363,147	109,678,140	76,722,163	160,239,494
1919	1,095,301,791	130,590,063	79,154,121	155,983,681
1920	1,257,015,902	180,711,238	127,251,919	184,469,882
1921	1,266,235,381	163,044,476	112,680,497	190,413,527

From the above figures it will be seen that current loans elsewhere and call loans in Canada are the only two accounts below last year's record. The falling off in the first-mentioned account reflects to a certain degree the condition of business abroad, in comparison with the situation in Canada.

Loans to municipalities increased 13.6 per cent. last month, in accordance with the usual tendency at this time of the year, when councils must borrow in anticipation of the year's receipts. Advances to provinces have followed a fairly even course, and are now but a few thousand below a year ago.

### Trend of Deposits

Demand deposits again substantially decreased, but savings deposits were considerably higher. The trend during the past few months is illustrated by the following figures:—

# Chartered Banks' Statement for February, 1921

## LIABILITIES

NAME OF BANK	Capital Authorized	CAPITAL STOCK		Amount of rest or reserve fund	Rate per cent. of last dividend declared	Notes in circulation	Bal. due to Dom. December.....	657,496,742	1,293,007,488				
1921—January.....	584,025,710	1,313,093,870				
February.....	561,578,474	1,318,855,482				

The following table shows deposits for the past six years:—

Feb.	On demand.	After notice.	Total.
1915.....	\$331,415,179	\$ 671,088,613	\$1,002,503,792
1916.....	389,825,667	827,242,609	1,118,068,276

It is apparent that total deposits in Canada have increased largely over a year ago. On the whole, however, the banks have about the same amount of funds at their disposal, taking into consideration the fact that the credit balance of the Dominion government has been reduced from \$217,059,832 to \$105,121,289, and deposits abroad have increased from \$277,478,631 to \$305,778,387. Balances due provincial governments also show an increase of about \$5,000,000, as compared with February, 1920.

Cash holdings were reduced last month, as will be seen from the figures given below. In addition, bank balances were much lower, so that the ratio of quick assets to liabilities to the public was reduced from 23.58 per cent. in January, to 22.92 per cent. The declines above mentioned, however, were offset by an increase in security holdings, result-

# Chartered Banks' Statement for February, 1921

Of the deposit in Central Gold Reserves \$11,502,533 is in gold coin; the balance is in Dominion Notes.

J. C. SAUNDERS, Deputy Minister of Finance.

ing in an increase in the ratio of liquid assets to liabilities to the public, the figures for January and February being 48.79 and 48.88 per cent., respectively.

Gold and sub-coin in Canada ..... + \$ 140,376  
Gold and sub-coin elsewhere ..... - 3,610,433

Total change ..... - \$3,469,857

Dominion notes in Canada ..... - \$1,578,267

Dominion notes elsewhere ..... 1,423

Total change ..... - \$1,579,690

In regard to the holdings of securities, it is interesting to note that the account "Dominion government and provincial government securities," increased by about \$11,500,000 over January. As short-term loans to the Dominion government are included under this heading, and as there were no new provincial bond sales in February, it is reasonable to

suppose that the above increase was the result of advances to the government by the banks against treasury bills, which is the custom usually followed.

Substantial additions to the paid-up capital and reserve are again shown, the changes being as follows:—

<b>Total additions..</b>	<b>\$71,500</b>	<b>\$122,548</b>	<b>\$215,227</b>

## THE WEEK IN PARLIAMENT

## Report of Mercantile Marine Was Feature of Week—Fleet Paid Operating Expenses and Earned 2.35 Per Cent. of Cost

(Special to *The Monetary Times*.)

Ottawa, March 31, 1921.

Tuesday, March 29

In House of Commons:—(a) First readings of following bills: one to incorporate Standard Insurance Co. and one respecting Western Dominion Railway Co.; (b) General statement by Hon. C. C. Ballantyne, Minister of Marine and Fisheries, on Canadian Government Merchant Marine; (c) Amendment by Hon. W. L. Mackenzie King, Liberal Opposition leader, to motion to go into supply, calling on government to call all bye-elections quickly so that representatives of vacant seats may sit in present parliament, debated and defeated by government majority of 31; (d) Interior department estimates; and (e) Third readings of following bills, one respecting Montreal, Ottawa and Georgian Bay Canal Co., one respecting Oshawa Railway Co., one respecting Thousand Islands Railway Co., one respecting Kettle Valley Railway Co., one respecting Manitoba and North-Western Railway Co. of Canada, one respecting Quebec Central Railway Co., one respecting the Essex Terminal Railway Co., one respecting the Ottawa, Northern and Western Railway Co., one to incorporate the Mayo Valley Railway, Ltd., one respecting the Dominion Life Assurance Co., one to incorporate Fidelity Insurance Co. of Canada.

In Senate:—(a) Post Office Act Amendment bill abolishing registration in parcel post service and substituting a system of insurance, making \$100 the maximum, and making it necessary for letters with insufficient postage to be delivered immediately, collecting penalty postage, without intervention of dead letter office; (b) Second readings of following bills: One respecting Quebec, Montreal and Southern Railway Co., and one amending the Exchequer Court Act to make unquestioned the right of the Commissioner of Patents to appear before the Exchequer Court when any person appeals from his decision or ruling and to appeal from that Court to the Supreme Court.

Wednesday, March 30

In House of Commons:—Debate on DesLauriers resolution to suspend immigration until normal condition of affairs is established, and resolution withdrawing, after statement from Hon. J. A. Calder, Minister of Immigration, that he would give full information as to policy when his estimates are discussed.

In Senate:—Debate on Post Office Act Amendment bill in committee.

After the Easter adjournment parliament re-assembled on Tuesday, March 29. As a rule the House takes a day or two to settle down into its stride, but both parties locked horns at once over the general statement of the minister of marine and fisheries, Hon. C. C. Ballantyne, as to the operations of the Canadian Government Merchant Marine in 1920, and the amendment of the Hon. W. L. Mackenzie King, Liberal Opposition leader, to the motion to go into supply, asking that all bye-elections should be held at once. Most of the progressive members voted with the government, the second time that its forces have divided on an important division.

The minister's statement, which has been eagerly awaited, covered the operations for 1920 of the 47 vessels now in operation, showing the total net earnings to be \$781,460, after a deduction of \$667,665 for depreciation, making available a payment to the government of about 2.35 per cent. on the money expended for building these ships, placed at \$49,243,604. Insurance premiums of one million dollars on eighty per cent. of value of vessels were included in the operating expenses. As the government loans were placed at five and

five and a half per cent., this means a deficit so far as fixed charges are concerned. The minister gave detailed figures to show how far the freight rates dropped in 1920, and the small demand for vessels for foreign trade, causing many to be laid up in many countries. The minister, however, stressed the advantage to Canada of having Canadian vessels appearing in all the important ports of the world, but he expressed disappointment that Canadian manufacturers and exporters are not reaching out more aggressively to secure the trade thus placed within their reach. There will be sixty-three vessels in the government fleet when the sixteen now being constructed are completed. The total tonnage will be 374,254 dead weight.

## Interest on Foreign Credits

A Roumanian interest payment of \$1,475,234 falls due on April 1, and there is no indication that the payment will be met. The interest is due on a credit of \$22,000,000 advanced by the Dominion government to Roumania for the purchase of goods in Canada. The actual credit made available was \$25,000,000, but the whole of the credit was not utilized. So far, Roumania has made no interest payments on the credit advanced by Canada. An interest payment of \$909,526, which fell due on October 1, was not met, Roumania asking for an extension of time till April 1. An interest payment of \$153,916 due on the Greek loan on December 31, it is stated, also remains unpaid. In this case, the recent change of government in Greece has apparently caused delay. The previous interest payments were met in full and negotiations were opened some weeks ago with the London representative of the recently established Greek government to secure payment of the interest due on December 31.

## WESTERN FARMERS WAIT ON WEATHER

## Opposing Views on City Income Tax—New Motor Financing Company

(Staff Correspondence.)

Winnipeg, March 31, 1921.

**R**ATHER backward weather for this time of the year was experienced in Winnipeg and throughout the west this week and over Easter, but it is expected that a fairly early spring will open out very soon. The farming outlook in all parts of the west is in excellent shape, as a great deal of fall plowing in preparation for this spring's crop was done before the freeze-up came. Farmers are now all in readiness to get right on the land, and from all reports, will have plenty of help.

Considerable discussion has taken place in Winnipeg this week regarding the proposed city income tax, and many prominent business men, representing large interests, have appeared before the legislative committee, making strong opposition to the city imposing an income tax. Neighboring municipalities adjacent to Winnipeg are also strongly opposed to the proposed measure, since the city will, if it gets the opportunity, tax the non-resident who earns a living in the city. The city of St. Boniface and other municipalities are strong in their objection to the measure. In spite of the apparent unanimous opposition to the city income tax, it appears quite possible that the present legislature will provide for the imposition of an income tax. Those opposing the measure were not prepared to express views regarding the manner in which additional money would be provided.

A new financial company has just been formed in Winnipeg for the handling of motor cars' notes. The officers of the company include, Captain William Robertson, president; James Auld, barrister, vice-president; G. R. Crow, G. V. Hastings, Alex. H. Brown, John Stovel, and Chas. H. McFadyen, directors.

### THE PROPOSED TURN-OVER TAX

REPRESENTATIVES of the Canadian Manufacturers' Association, the Wholesale Grocers' Association, the Retail Merchants' Association and the Canadian Credit Men's Association are meeting in Toronto this week to discuss federal taxation. The meeting is held at the instance of Sir Henry Drayton, minister of finance, who takes the view that if manufacturers want the business profits tax to cease, they must offer an alternative form of revenue. The manufacturers wish to have both the business profits tax and the income tax on corporations done away with, although it is not probable that the income tax will be reduced in any way. Theoretically, both these taxes are paid by the consumer, as capital and business enterprise command their market price regardless of taxation, and the latter must accordingly be passed on in the form of an enhanced price. As a matter of fact, however, both taxes are of such recent introduction in this country, that business has not yet become adjusted to them—i.e., the taxes have not entirely been passed on to the consumer. The business profits tax, advancing rapidly above a certain return upon capital, has been especially onerous; it was originally a three-year tax, and has been renewed from year to year; it is not expected that it will be renewed this year, however.

Both these taxes, and especially the business profits tax, fell heavily upon the manufacturers. The wholesalers and jobbers are also making a contribution in the form of a sales tax. The retailers escaped, apart from the work of collecting a luxury tax from their customers last year. The manufacturers now propose that the sales tax be extended to a turnover tax, payable by all classes of business. At the meeting this week, W. H. Lamont, quoting figures prepared by the Canadian Manufacturers' Association, stated that the internal turnover, after making allowances for export trade, fisheries and other exceptions, would, at its source, be about \$4,000,000,000, which, allowing for a turnover three times, would reach a total of \$12,000,000,000. A profit of 15 per

cent. increased this figure to \$18,000,000,000, upon which a tax of 1 per cent. would produce \$180,000,000. The business profits, sales and income taxes last year produced \$112,000,000 altogether.

A turnover tax would unquestionably be fairly easy of collection, and, at the same time, productive of revenue. Manufacturer, wholesaler and retailer would all pay. The tax would be added to the price at every stage. It would, therefore, be an indirect tax paid by the consumer. The present taxes, on the other hand, are in part paid by manufacturers and other concerns. Would the proposed turnover tax be an improvement, or is it merely an attempt on the part of the manufacturer, who knows he cannot escape altogether, to shift the immediate payment in part to other classes of business, and the ultimate incidence of the tax to the consumers as a whole?

### THE BRITISH CATTLE EMBARGO

ENGLISH wits of the 17th century ridiculed an expedition Sir Walter Raleigh by relating that "There was a fleet that went to Spain, when it got there it came back again." Hon. Manning W. Doherty, minister of agriculture in Ontario, has just made an expedition to Great Britain to protest against the British embargo on the importation of cattle from abroad. Now he is back again, but the embargo remains. He expresses himself as hopeful that it will be removed—after the Imperial Conference in June.

The minister's visits followed protests made by the Dominion and provincial governments, such protests being not so much against the embargo itself as against a supposed implication that Canadian cattle are diseased. He was treated with courtesy, and addressed several meetings, including a large one in the London Guildhall on March 9, at which a resolution was passed urging the removal of the embargo. The importance of the question in the old country is seen from the fact that it was the main issue in a by-election in which Sir Arthur Griffith-Boscawen, president of

the board of agriculture, was defeated by a Labor candidate. Nevertheless there is ample evidence that such an attempt to interfere in British politics is unwarranted. The London *Morning Post* has been particularly critical of the visit. On the other hand the campaign of the *Daily Express* in favor of the removal of the embargo is alleged to be due to the fact that its proprietor, Lord Beaverbrook, is a former Canadian, although he is now a British peer and an ex-member of the British House of Commons. The protests are not due to the view that it is the Dominion government alone which should speak. The British North America Act, as is well known, did not create a Dominion of *provinces*, but a Dominion *and provinces*, all deriving their authority from the Imperial government; agriculture is, moreover, within the jurisdiction of both Dominion and provincial governments. They show, however, that Great Britain resents colonial influence in purely internal affairs, just as Canada long ago insisted on the right to govern her tariffs and other internal affairs without intrusion on the part of Great Britain.

#### WHO CAN MOST SAFELY BE BONDED?

SOME time ago there was a popular story to the effect that a fat man was good-natured only because he couldn't fight and couldn't run. Perhaps it is for the same reason that fat men are conspicuously honest, but on the other hand, it may be because avoiderpois and cunning do not go together. "Let me have men about me that are fat, sleek-headed men, and such as sleep o' nights. Yond Cassius has a lean and hungry look; he thinks too much; such men are dangerous." So Cæsar expressed it, and modern surety companies, having criminal records at their disposal, are of the same opinion.

The experience of surety and guarantee companies has produced more than a preference for the weighty, however. Many interesting conclusions are drawn, although being generalities, there are always exceptions. Married men are better risks than single men, on the whole. The "trusted" employee, meaning the faithful and conscientious, is not always the most trustworthy. The "erank" is usually a good risk, because his abnormal tendency is apparent, and it is probably for the same reason that the profane man, who voices his protest against society by word of mouth, seldom robs it of material goods. One of the most useful inferences from the companies' experiences, however, is that based on race. The Anglo-Saxon is found to be the most honest of all the races represented in positions of trust on this continent. When the Anglo-Saxon does err, however, his defaultations are large; having once decided upon a dishonest course, he does not lack the courage to do the job well. Of continental Europeans, who are practically the only others covered by the experience of the companies, the Dutch, Scandinavians, Danes and Germans, which are races closely akin to the Anglo-Saxon, come second. The French, Spanish and Italians are found to be less trustworthy, being more inclined to petty larceny, but seldom stealing large sums.

These and other points regarding the experience of surety companies, were set forth by F. N. Withey, a representative of the National Surety Co., of New York, at meetings of the Lions' Clubs of Toronto, and Oshawa on Wednesday and Thursday, respectively, of this week. Mr. Withey is on a lecture tour, and will speak at other gatherings in Ontario, Quebec and the west.

#### LIABILITY OF STOCK EXCHANGE MEMBERS

WHILE the limited liability form of business organization has increased in popularity in almost every other field, it has not been looked upon with favor in stock exchange circles because of the volume of transactions put through without specific security. Every week sees the incorporation in Canada of some businesses previously con-

ducted by individual proprietors or by partnership. The larger firms engaged in underwriting bonds and stocks are incorporated. In this field transactions are, generally speaking, on a cash basis, securities being bought outright for cash, hypothecated to the banks with an ample margin of security to the latter, and sold to the investor for payment in full in cash. A large proportion of the business of a stock exchange firm, on the other hand, is a marginal business. The customer accompanies his order with a cash margin, but he does not see his securities because they are kept by the broker as security for the balance. The latter obtains a loan on them from the banks. The active stocks are usually the most favored by marginal speculators, however, and the banks therefore favor loaning to brokers whose liability is not limited by their firm's paid-up capital. Again, stock exchange membership is on a personal basis, the members being individuals representing firms, and unsecured transactions between members are large, so that the stock exchanges as a whole have favored the partnership with unlimited liability method of doing business.

The Toronto Stock Exchange has, however, adopted a new policy. In February a by-law was passed allowing members to represent firms of limited liability. A number of the members' firms, previously partnerships, have since been incorporated. This has the advantage of avoiding the complications so often met where the bond and underwriting branch of a business was conducted by a company, while the stock exchange branch was conducted by a partnership under a similar name. Nevertheless the change, insofar as it has been put into effect by incorporation, affects not only the fellow members of an exchange, but also the banks and customers dealing with a firm so incorporated. In such cases it will be well for the banks to bear in mind that their security against the disappearance of margins on pledged stocks, through a drop in the market, is limited to the capital of the brokerage firm. Customers also, who have no way of knowing whether a broker has actually purchased securities with funds paid him, must bear in mind that only a limited capital, not the entire personal property of the members of the firm, is available in the event of its insolvency.

Recent trade returns show a falling off in Canadian exports. Even at that no business is better than business with Roumanians who do not pay.

The minister of marine would have been better advised if he had commenced his mercantile marine as the expensive trade-promoting agency which it is now proving to be, rather than as a profitable enterprise.

The National Railways have not been, and apparently cannot be, removed from politics. The appeal of the president, D. B. Hanna, at the commencement of his management, to the public to support their own road, and the recent order that employees should not engage in politics, are proof that the management has not been that of a private railway. The attention given to the subject in parliament shows that the National Railways are still a department of government.

#### MUCH ADO ABOUT NOTHING

A prominent foreign official was addressing a gathering of the leading financial lights of New York, following the floating of a new bond issue for his government. In the corner at press table reporters were earnestly endeavoring to "get" what he said, although he spoke English with an 85 per cent foreign accent. To make matters worse he read his speech instead of saying it, and as he went further he read with ever-increasing speed and accent. Finally all the reporters gave up and sat looking out of the window, except one whose knowledge of French and shorthand kept him busy to the end. After half an hour the foreign official finished amid applause and the one active reporter was eagerly questioned by the others. "Well what did he say?" they asked. The reporter carefully scanned his five pages of shorthand notes, then looked up seriously. "As far as I can see," he said, "all he said was 'Thanks for the loan.'"

## PERSONAL NOTES

PAUL H. HORST has been appointed manager at Winnipeg, Man., of the Canadian Surety Company, with supervision over the province of Manitoba, Saskatchewan and Alberta. Mr. Horst is a lawyer by profession, and has had considerable experience in the insurance field.

R. H. HAMLIN, general manager of the Empire Sash and Door Factory, Winnipeg, Manitoba, has been recently elected director of the Western Life Assurance Company. Mr. Hamlin has been closely connected with civic and the business life of Winnipeg for a number of years.

RUFUS CHOATE MACKNIGHT, who has been appointed general manager of the Northern Life Assurance Company of Canada, has introduced new methods into field organization along thoroughly advanced and scientific lines, as a result of which the company has made noteworthy progress. The system devised by Mr. Macknight provides for the selection and development of the most skilful and proficient

of representatives trained by the company in technical and personal efficiency, the especial objective being to insure the permanence of new business and to develop the highest and most reputable type of salesmanship. The plan includes a system providing commissions, increasing monthly income, an interest in the business for every representative to safeguard him against possible hardships in case of accident or disease, and to protect his family in the event of death.

ALEX. INCH, formerly deputy fire commissioner for Manitoba, has been appointed manager for Alberta and Saskatchewan for the Canadian Foamite Firefoam, Limited. Mr. Inch intends to give considerable attention to fire prevention work in these provinces. His headquarters will be in Calgary.

ALEXANDER ROBERTSON, who has been with the Liverpool and London and Globe at the head office, Montreal, for the past twelve years, has resigned his position with that office to fill an important post in the fire branch of the Motor Union Insurance Co., at Canadian chief office, Toronto.

## GENERAL ELECTRIC CHANGES

Hon. Frederic Nicholls has retired from the presidency of the Canadian General Electric Co., and at the same time relinquishes his position as general manager. He has consented to become chairman of the board, however, and will therefore remain in close touch with the work of the executive. Senator Nicholls has been the prime factor in the up-building of the Canadian General Electric, and over a period of thirty-three years he has seen the company's assets grow from \$10,000 to \$31,000,000. He was born in England and ever since coming to this country at the age of eighteen years, he has been intimately connected with the electrical industry. The retirement of Senator Nicholls necessitated many other changes in the executive of the company. A. E. Dyment, who has been chairman of the board of directors, was promoted to the presidency; Stephen Haas, one of the directors, becomes vice-president; J. J. Ashworth, up to the moment assistant general manager, assumes the position of general manager; and J. A. Bremner, controller, is made assistant general manager. Mr. Dyment, the new president, has had a wide experience in financial affairs, first as a lumberman, and afterwards as a stockbroker. He was a member of the Toronto Stock Exchange.

A. E. DYMENT

## OBITUARIES

STEPHEN GEORGE WRIGHT, supervisor of Ontario agents for the Motor Union Assurance Company, died last week at his home, 1418 Ossington Avenue, Toronto. Mr. Wright was born in England 41 years ago, but had lived in Toronto since he was three years of age. He was well known in insurance circles.

EDWARD WILLIAM WAUD, superintendent of the branches of the Molsons Bank, died last week at his late residence, 350 Kensington Avenue, Montreal, Que., at the age of 57 years. The late Mr. Waud was born in Yorkshire, England. He came to Canada with his parents when only 9 years of age. He was educated at Fawcett's School, Montreal. At the age of 17 he entered the Molsons Bank, with which he remained throughout the remainder of his life, holding in turn the positions of manager of the bank's branch at Owen Sound, manager of the Woodstock, Ont., branch, inspector of branches at Montreal, and later superintendent of that department.

WILLIAM T. RAMSAY, who was at one time superintendent of the Canada Life Assurance Company, but who retired in 1908, died at Gibraltar on March 27, at the age of 63 years, where he had gone for the benefit of his health. He had lived in Hamilton when the Canada Life had its head office there, but most of his life was spent in Toronto, where he was well known. The name of Ramsay has been linked with the Canada Life for more than a half a century. In 1859 A. G. Ramsay came from Scotland to be manager and secretary of the company, and he remained constantly with it until in 1900, when, after 40 years of service, he retired from the presidency, to which he had risen. The late Wm. T. Ramsay was a son of the former president, while A. Gordon Ramsay, who is at present assistant general superintendent of the company, is a grandson.

## NEW BRITISH EMPIRE STEEL PROPOSAL

## Nova Scotia Steel, Dominion Steel and Halifax Shipyards to be Included—Proposed Balance Sheet of Merger

ON April 7 the shareholders of the Dominion Steel Corporation and of the Nova Scotia Steel and Coal Co. will vote on the proposal to exchange their shares for stock in the British Empire Steel Corporation. Halifax Shipyards is the third corporation which it is planned to include. Originally intended to include these and about six other companies, and to have total assets of \$474,016,350, the revised plan is for assets of \$168,736,285. Accompanying the notices calling special general meetings of the shareholders on April 7, are projected balance sheets of the British Empire Steel, and statements by president R. M. Wolvin, of Dominion Steel, and D. H. McDougall, of the Nova Scotia.

The modified form of the consolidation, which is to comprise only the Dominion Steel Corporation, the Scotia enterprise and Halifax Shipyards, is then dealt with in the statements, which proceed: "Your directors consider that the advantages of an alliance between the two senior and principal companies are so well known and appreciated that it is unnecessary to present them formally in this circular. The inclusion of the Halifax Shipyards, Ltd., another Nova Scotia enterprise, would appear to be a logical outcome of its situation on the eastern Atlantic seaboard and will provide an important outlet for the products of the Dominion Corporation and the Scotia company. Halifax is admirably situated as a relief port for vessels which become disabled on the north Atlantic. During the last two years, the company's slipways at Dartmouth hauled out 895 vessels of all classes, and repairs were executed on 294 ships at Halifax Graving Docks. At present two 10,500-ton vessels are in course of construction."

## The Balance Sheet

The projected financial statement, as at December 31, 1919, follows:—

ASSETS	
Properties, plant, etc. ....	\$150,956,605
Less depreciation .....	20,122,938
	<hr/>
	\$130,783,667
Deferred balances .....	\$ 79,208
Cash .....	1,574,220
Uncalled capital (since called) .....	300,000
Call loans .....	1,449,404
Government bonds .....	3,872,105
Notes and accounts receivable .....	11,792,169
Inventories .....	15,388,099
Investments .....	2,232,299
Deferred charges .....	1,119,358
Bond redemption .....	145,751
	<hr/>
	\$168,736,285
LIABILITIES	
1st preferred 7% cumulative stock ..	\$ 19,950,000
2nd preferred 7% cumulative stock ..	57,350,000
Common stock .....	24,450,000
	<hr/>
	\$101,750,000
Less to be held by constituent companies	7,965,000
	<hr/>
	\$ 93,785,000
Funded debt .....	\$ 31,102,475
Deferred payments .....	1,484,000
Bank loans .....	3,670,270
Notes payable .....	367,497
Accounts payable .....	7,702,679
Uncompleted contracts .....	1,935,150
Deferred credits .....	1,075,600
Reserves .....	1,303,456
Combined surplus .....	26,310,154
	<hr/>
	\$168,736,285

## Capitalization

The proposed stock issues of the new corporation aggregate in amount \$101,750,000, of which \$5,605,000 second cumulative preferred and \$2,360,000 common or \$7,965,000 in all, will be held by one of the constituent companies, the Dominion Iron and Steel Co., leaving \$93,785,000 as the net total issue to be made to exchange for individual holdings of the present securities. The initial share capital will be divided as follows:—

7 per cent. cumulative preferred Series B. ....	\$ 19,950,000
7 per cent. cumulative second preferred .....	57,350,000
Common shares .....	24,450,000
	<hr/>
	\$101,750,000

The 7 per cent. cumulative preference shares Series "B" are to be offered in exchange for outstanding preference shares of the companies which enter the consolidation. Such exchange of preference shares will be at the option of the holders. The cumulative preference shares Series "B" rank with the cumulative preference shares Series "A" as a first preference both as regards dividend and distribution of assets on a winding-up. The cumulative second preference shares are to be exchanged for the outstanding common shares of the companies entering the consolidation. The bond and debenture issues of the various companies are to remain undisturbed. The British Empire Steel Corporation, will be able from time to time to obtain additional capital by the sale of 8 per cent. cumulative preference stock Series "A," which it has authority to issue.

## Working Capital

The position occupied by the three constituent companies when the figures were compiled, it will be seen, was particularly strong as respects working capital, current assets of \$34,375,999 exceeding liabilities of a similar character, amounting to \$13,675,597, by the substantial sum of \$20,700,402. In the circular to the shareholders of the two principal companies, the following statement is made: "As the end of the fiscal year of the Dominion Steel Corporation, Ltd., is not reached until 31 March, it is not practicable to submit a balance sheet for the year 1920 but assurance can be given that the earnings of the combined companies for the year 1920 have been satisfactory. In addition to the government and legal fees in connection with the incorporation of the British Empire Steel Corporation, Ltd., ample provision is made in the financial statement to cover all expenses, including cost of investigations, appraisals, audits and reports incidental to the plan."

Another interesting feature of the circular is contained in the details given as to the distribution of the new securities. These are as follows: The 7 per cent., preference shares Series "B" to be exchanged as follows:—

For 6 per cent. Dominion Steel preferred	\$ 7,000,000
For 7 per cent. Dominion Iron preferred	5,000,000
For 7 per cent. Dominion Coal preferred	3,000,000
For 8 per cent. Scotia preferred .....	1,200,000
For 6 per cent. East, Car preferred ..	750,000
For 7 per cent. Halifax Shipyard preferred .....	3,000,000

Total .....

The 7 per cent. second preference shares to be exchanged as follows:—

For Dominion Steel C. Common .....	\$40,850,000
For Nova Scotia S. common .....	13,500,000
For Halifax Shipyards, common .....	3,000,000

Total .....

The common shares to be exchanged as follows:—	
For Dominion Steel Common .....	\$17,200,000
For Scotia Steel common .....	6,000,000
For Halifax Shipyards common .....	1,250,000

Total .....

\$24,450,000

BANK BRANCH NOTES

The Royal Bank of Canada has opened branches at Oakville, Ont., and Sundridge, Ont. The Canadian Bank of Commerce have opened a branch at the corner of Arlington St. and Notre Dame Ave., Winnipeg.

The Royal Bank has purchased property at Woodbine and Danforth Ave., Toronto, and will build a branch there.

The Union Bank is to spend \$150,000 on extensions to the branch at Main St. and William Ave., Winnipeg.

D. M. Morris has been promoted to assistant inspector of British Columbia branches of the Royal Bank of Canada.

Arthur Swinford has been appointed manager of the Canadian Bank of Commerce at the corner of Stafford and Grosvenor St., Winnipeg.

The New York branch of the Merchants Bank of Canada opened for business on March 28 in its new offices at 38 Wall St., building formerly occupied by Post and Flagg.

HOLIDAY BUSINESS WAS DULL

R. G. Dun and Co. report on Montreal district conditions as follows: "Prospects for the early opening of navigation continue favorable, and the first sailings from Britain for this port will be that of a freighter from Glasgow on the 6th prox. The general trade situation shows gradual improvement and a further quickening is to be noted in several lines. Eastern and central collections may be almost classified as good, and there has been some little improvement in far western remittances. Easter shopping in all lines of wearing apparel has been fairly brisk, and wholesalers report a goodly aggregate of sorting orders. The majority of dry goods retailers were light buyers early in the season, preferring to await market developments, and it is evident stocks are low as a rule, as the majority of the orders now coming to hand call for quick shipment.

Regarding the Toronto district the following is said: Chilly weather had an unpleasant effect upon Easter shopping for the first days of last week, but the public show great interest in Easter goods and the volume should compare very well with average seasons. Wholesalers are content for the time being to ship moderate replenishment orders and to keep their own stocks within bounds, while admitting that should a sudden demand arise, they could easily be caught short stocked. Hosiery, underwear and knit goods are not being ordered from the mills in any quantity, and the mills are not prepared to manufacture against a doubtful future. Yarn orders are cancelled, or not granted in quantities, coarse to medium qualities are quoted 25 to 35 per cent. lower, and fine counts are also down considerably. Men's furnishing trade is sluggish and clothing has not moved too freely. Tailoring business improved which may have an effect upon woollens. Ladies' apparel sells well and makers are rushed frequently.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 31, 1921, compared with the corresponding week last year:—

	Week ending Mar. 31, '21.	Week ending Apr. 1, '20.	Changes.

# Municipal Legislation Featured Quebec Session

Metropolitan Commission Bill and Changes in Montreal Charter Were Outstanding Measures—  
Adjoining Municipalities Grouped With City—Bill to Limit Rentals Failed to Pass—Great-East  
Life Insurance Company Incorporated—Scottish Trust and North American Trust Companies

THE 1921 session of the Quebec legislature was prorogued on March 19. Supplementary estimates for the year ending in June next were presented on the 19th by the Hon. W. G. Mitchell, provincial treasurer. They provide for an additional expenditure of \$1,572,517. Included in this amount is \$25,000 for exchange on the public debt; \$47,049 for contingent expenses and salaries in the legislature; \$150,000 for administration of justice, \$84,500 for lunatic asylums; \$72,388 for health, of which \$47,388 is for protection of the public against venereal disease; \$128,500 for public works and labor; \$150,000 for agriculture; \$579,625 for improvement and maintenance of roads; \$177,000 for lands and forests; \$25,000 for colonization, mines and fisheries, and \$104,600 charges on revenue.

## Montreal Charter Bill

The city of Montreal bill was one of the last to be passed, and several amendments were made. A clause authorizing the city to pay pensions to certain former employees, inserted by the private bills committee, was struck out. Hon. Mr. Perron also inserted an amendment to provide that the city of Montreal may have an additional special borrowing power of one million dollars. The administrative commission had asked for unlimited borrowing power for its waterworks development, claiming that there was only one million dollars of the special loan left. The lower house committee and the committee of the council objected to such an amendment, and Hon. Mr. Perron made a concession by the grant of one million. This and the million already on hand is considered to be quite sufficient for all the work which can be done for some time to come.

Changes were also made in the Montreal commission bill. One of these provided that the municipalities comprised in the scheme must provide for the expense of the commission in their budgets. Another amendment provided that the budgets of the three municipalities in difficulties — St. Michel de Laval, Montreal North and Pointe aux Trembles — should be submitted to the commission for approval.

The city of Montreal, while retaining the majority of membership, will not have its finances controlled by the commission. None of the members of the commission will be paid, the clause providing for an indemnity of \$20 per member per sitting being dropped. All the municipalities within a certain radius of Montreal will be under the control of the commission, but certain of the smaller agricultural communities, municipalities outside, which will not be affected by the growth of Montreal for half a century, probably will be left entirely out of the scheme. The commission will practically be an endorsing organization, guaranteeing the bonds of the municipalities contiguous to Montreal for a period of forty years. The only cost to the municipalities will be the cost of administration, which will not be heavy. The three municipalities that are in bad shape — Montreal North, St. Michel and Pointe aux Trembles — will have money advanced to them to meet their interest obligations, this money to be repaid within a period of forty years.

One of the important government bills of the session — that respecting disputes between employers and employees of municipal public services — was also passed. It is intended to meet an evil which is growing in Canadian cities. It is entitled the "Municipal Strike and Lockout Act," and will apply to policemen, firemen, waterworks employees and those in charge of the incineration of garbage in municipal employ. It will be unlawful for either lockout or strike to be called without the dispute being submitted to a board of arbitration.

## Other Municipal Legislation

A compromise was reached on the city of Verdun bill, regarding the demand of Mayor Leclair that the city of Montreal should be compelled to pay taxes on the full valuation of its

property in Verdun, the assessable value of which is between two and three million dollars, despite the clause inserted by Montreal in Verdun's bill, ten years ago, that for twenty-five years all Montreal's property shall be assessed at \$450,000 and the taxes paid not to exceed \$4,500. The effect of the compromise will be that Verdun will assess all the land owned by Montreal, but exempt the buildings. This will mean that Montreal will be assessed about \$1,500,000 and that Verdun will receive from the metropolis about \$30,000 in taxes. The effect of this will be to reduce the rates in Verdun next November by about 22 cents per \$100.

One of the most important bills introduced during the later days of the session was a "Public Assistance" bill. There is created a bureau of public charities, with provision for a director of the bureau, whose duties it will be to carry out such instructions as may be given him by the government. The duties of the bureau provide for the carrying out of the act in such a way as to assist public charitable work; intimate and effective co-operation with public charities; investigation of applications for grants; distribution and supervision of the use of the grants made to institutions, and the taking of the necessary means for obtaining the deportation and repatriation of immigrants who are liable to be deported under the Canada Immigration Act. All institutions which are recognized by the Lieutenant-Governor-in-Council as public charitable institutions, and which accept the conditions of the bureau, may benefit by the privileges granted by the act, and a list of such institutions is to be published each year in the official Quebec Gazette. Applications for recognition must be to the bureau.

The funds for this assistance will be provided mainly by an amusement tax. The bill provides that there shall be a tax of 25 cents on every one-dollar admission ticket to race meetings, 50 cents on every two-dollar ticket, and so on in like proportion. When the receipts of pari-mutuel machines amount to \$10,000, 10 per cent. will be deducted from bets, 6 per cent. to go to the race track association and 4 per cent. to the government; if the receipts amount to \$15,000; 5 per cent. will go to the race track association and 5 per cent. to the government; if \$20,000, 4 per cent. will go to the race track association and 6 per cent. to the government, and so on. One-half of the proceeds of the general amusement tax will be given to the municipalities to be distributed to local charities, and the other half will be paid to the government.

A bill dividing the Crown lands into two sections, one for dealing with the leasing of timber rights, and the other for development by settlers, was also passed. A contract between the government, the Interprovincial and James Bay Railway Company and the Canadian Pacific was ratified. An act respecting the construction of a railway from Kipawa to Riviere des Quinze was passed.

## Quebec Municipal Law

Another act contains many proposals for important changes in the conduct of municipal affairs in the province. Perhaps the biggest change is that abolishing the right of municipalities to grant exemptions of taxation or commutation of taxes for industries or commercial establishments. Another important clause forbids any municipality, directly or indirectly, to grant aid to industries.

Demands are made by municipalities year after year to the legislature for power to adopt loan by-laws without the sanction of the proprietors, but in future this will be impossible, for a clause forbids that all municipalities except Montreal and Quebec must submit loan by-laws to a vote of proprietors, notwithstanding any provision in their charters to the contrary. Power is given the comptroller of provincial revenue to take proceedings against any municipality which neglects

to deposit with the provincial treasurer the sinking fund necessary and required by loan by-laws.

At present municipalities can only provide for lighting in their districts, but under a new clause they will, in future, be able also to supply power and heating in the municipality. An amendment of much interest to financial men is that it is proposed to extend for another year the clause permitting temporary loans which had been in force during the war. When any vote is being taken on loan by-laws only property owners who are electors can vote, and so many women proprietors have thus been unable to vote. Under a new clause the right is given to the husband whose wife is a property owner to vote on such by-laws.

On a motion of the leader of the opposition a committee was appointed to report on the publication in official form of the debates in the legislature. On March 15 the house passed a motion asking that the federal Railways Act be amended so as to authorize the National Railways to give free transportation throughout Canada to members of provincial legislatures, instead of limiting this free transportation to the provinces in which the legislators reside.

#### Will Borrow for Universities

Grants of \$1,000,000 each were authorized to Laval and McGill Universities. This is payable by annual instalments of not more than \$200,000 each to each university. This is the same as was done for the University of Montreal last year, and there is provision also made whereby the provincial treasurer may hand over to Laval, McGill and also the University of Montreal the amounts for each in one payment. This may be done by delivery of bonds to the amount, or in cash derived from the negotiation of such bonds.

In addition the Lieutenant-Governor-in-Council may authorize the treasurer to contract a loan or loans, not to exceed in the aggregate the sum of \$6,000,000, such loans to be by means of bonds, debentures or inscribed stock, for a term of not more than fifteen years, at a rate of interest of not more than 5½ per cent., with the proviso that the treasurer may redeem such loans at any time after five years from date of issue. It is to be noted that the last provincial government loans were issued at 6 per cent., consequently Mr. Mitchell is of opinion that money is becoming easier. The proceeds of this \$6,000,000 loan are to be used as follows: \$3,000,000 for the three universities; the surplus used to refund to the consolidated revenue fund advances made for purposes covered by the Good Roads Act, 1912, until such time as a loan shall be made under any act authorizing a loan for good roads. The bonds issued under this measure are to be free of succession duties.

#### Workmen's Compensation

Premier Taschereau stated on March 17 that workers had sent delegations to the government to ask that no change be made in the Workmen's Compensation Act this session; that it be studied and amendments be prepared by next session. That was exactly what the government had done and intended doing. The workers had asked for an arbitration act and it had been given them; they had asked for a law regulating the construction of scaffoldings, and it had been given them. They did not want a final settlement of the compensation act this year, and that desire also was being granted.

Hon. Peter Bercovitch's bill to limit rentals failed to pass the house. He urged, however, that the house should accept the principle of the bill; that something should be done towards restricting the greedy landlord at a time when prices and wages are falling; the bill, said Mr. Bercovitch, aimed at unscrupulous, profiteering landlords, who cared little for the public weal.

Hon. Mr. Taschereau admitted that there were abuses in Montreal, but did not agree that it was certain that they existed in other parts of the province, and the premier specially warned the rural members that the bill applied in rural municipalities as well as in Montreal. He would vote against the application of the bill because it was not practicable, and because of its principle, seeing that it was an invasion of private rights. Quebec had emerged from the war stronger than had

the provinces which declared a moratorium. With such legislation started there would be no knowing where it would stop, and next year the member for St. Louis might bring in another law to restrict earnings on something else. The bill would hit landlords in the rural sections who had spent much on improvements, even though the improvements demanded much more than a 20 per cent. increase. He referred to attempts to control paper and sugar prices. The increases in rentals, went on the premier, were in many cases due to the tenants themselves, who bid against each other to get houses, and landlords could not resist the temptation to accept the highest bidder. He claimed that with decreasing wages workmen could not pay a 20 per cent. increase, so the law would not benefit them.

All bonds of the province, issued or to be issued, were made registerable, provision being also made for the collection of a registration fee.

The "Alcoholic Liquor Act" provides for the taking over of the liquor business by a commission of five members appointed by the government.

The Scottish Trust Company and the Anglo-American Trust Company, incorporated in 1919 by the province, have had their time for commencing business extended to July, 1923. The Strathcona Fire Insurance Company, incorporated in Quebec in 1909, is by an amendment authorized to write fire, automobile, marine, inland transportation, theft, burglary, riot and property damage insurance.

The Montreal Cotton Company, in return for furnishing the city of Valleyfield with 125 h.p. of electrical energy, has had its annual taxes payable to the city fixed at \$21,000.

The Great East Life Insurance Company is incorporated with head office in Quebec and the following provincial directors: Henri Grandbois, lumber merchant, St. Casimir; Dr. P. C. Dagneu, Quebec; J. T. Chenard, insurance agent, Quebec; Joseph Samson, mayor of Quebec; L. A. Richard, Quebec; Rev. J. G. C. Plourde, Grand Riviere; S. Vachon, insurance agent and printer.

#### THE COST OF FIRE PREVENTION

That insurance companies are primarily responsible for property conditions which invite fire is a view commonly held by the public, points out H. W. Crossin, of Armstrong, De Witt & Crossin, Ltd., in the Toronto Board of Trade News for March.

"Theoretically at least," says Mr. Crossin, "it makes no difference to insurance as a whole what conditions are maintained. Whether water protection is good or bad, construction high-class or ordinary, ordinances and laws good and well enforced or not; whether conditions as a whole are good or bad and losses great or small, insurance will be adjusted to meet the conditions which exist.

"Perhaps our practice of endeavoring to load the insurance companies, as far as possible, with the cost of most of our methods of improving conditions has been the means of creating the idea that the responsibility is theirs. It is quite evident that at one time the general impression seemed to be that only the insurance companies were interested in anything which worked for fire prevention or extinguishment. Probably this was due to the fact that fire brigades were originally organized by insurance companies for the protection only of the property insured by the companies supporting them. Later, however, we find municipal fire brigades and salvage corps were organized, but were maintained solely by a direct tax on insurance companies. Fortunately, however, we are getting away from that idea, but we have one important office, viz., the fire marshal's office, which should be independent, but which is maintained by a tax on the companies. The result is that there is always a feeling that any activities of that office are prompted by and for the sole benefit of the companies. We must absolutely get away from the idea that the business of the fire insurance companies is to reduce the fire waste. Unquestionably the cause and cure are in the hands of the public, and in the last analysis the responsibility is its entirely."

## BRITISH COLUMBIA ESTIMATES HIGHER

Revenue of \$17,010,595 and Expenditure of \$16,980,208 for Year 1921-22 — Net Debt Is \$46,616,436

HIGHER estimates for the year ending March 31, 1920, and again for the year ending March 31, 1921, were made by Hon. John Hart, British Columbia minister of finance, in his budget speech on March 17. He first reviewed the financial position of the province as shown by the public accounts for the year ended March 31, 1920, which were recently reviewed in *The Monetary Times*; these showed an excess revenue of \$2,293,600, and an excess of assets over liabilities of \$13,316,744. He also pointed out that results for the first nine months of the current year gave a balance on the right side.

Regarding the coming year 1921-22, he said:—

## Revenue and Expenditure

"The estimates of revenue and expenditure for the coming fiscal year have been carefully and conservatively made, and, in the case of expenditure, strictly in accordance with the government's policy. We look for a revenue of \$17,010,595, an increase over the current fiscal year of \$3,032,350, showing an estimated surplus of \$30,386 over the estimated outlay on current account. The total estimated expenditure for the year is placed at \$16,980,208 on current account, and \$2,868,765 capital expenditure out of income, a total of \$19,848,974, an increase over the current year of \$2,435,140.

"The revenue anticipated through the various departments is as follows: Department of Attorney-General, \$4,239,000; Department of Agriculture, \$41,000; Department of Education, \$74,000; Department of Finance, \$8,374,615; Department of Fisheries, \$30,000; Department of Lands, \$3,416,000; Department of Labor, \$35,000; legislative fees, \$2,000; Department of Mines, 163,000; Department of Provincial Secretary, \$522,480; Department of Public Works, \$66,500; Department of Railways, \$47,000.

"The estimated expenditures by services, compared with the present year, are as follows:—

	1921-22	1920-21
Public Debt .....	\$ 2,829,633	\$ 1,838,378
Legislation .....	109,870	109,870
Premier's Office .....	13,680	13,880
Dept. of Agriculture .....	386,778	342,736
Dept. of Attorney-General .....	1,659,207	1,183,720
Dept. of Education .....	3,418,227	2,864,613
Dept. of Finance .....	960,450	959,579
Dept. of Fisheries .....	18,090	18,090
Dept. of Industries .....	28,300	28,300
Dept. of Lands .....	1,774,400	1,324,395
Dept. of Labor .....	96,740	97,600
Dept. of Mines .....	306,004	375,201
Dept. of Provincial Secretary .....	2,400,420	2,013,086
Dept. of Public Works .....	2,903,808	2,745,223
Dept. of Railways .....	74,600	49,900
Chargeable to Capital .....	2,868,765	3,449,981
	\$19,848,974	\$17,413,833

## Bonded Indebtedness

"At March 1, 1921," said the minister, "the gross bonded indebtedness of the province was \$44,511,436, and temporary borrowings from the bank \$7,360,000, together with advance to the district of South Vancouver of \$790,000. Analyzing this total, it will be found to be made up as follows:—

Consolidated revenue for liabilities prior to November, 1916 .....	\$25,576,936
Dyking Debentures .....	445,000
Land Settlement Board .....	2,650,000
Pacific Great Eastern Railway .....	15,878,000
Better Housing Act (loans to municipalities) .....	1,361,500
Soldiers' Land Act .....	1,900,000

Water Act, 1914 (conservation) .....	\$1,195,000
Department of Industries .....	915,000
South Vancouver Loan Act, 1918 .....	790,000
British Columbia University Act, 1920 .....	100,000
Public Works Trunk Roads Loan Act, 1919, and British Columbia Highways Act, 1920 .....	1,850,000
	\$52,761,436
Less Treasury Bills held for reissue .....	100,000
Gross debt as at March 1, 1921 .....	\$52,661,436
Less Sinking Funds on hand .....	6,045,000
Total net indebtedness March 1st, 1921 .....	\$46,616,436

"Against the borrowing on account of the Pacific Great Eastern Railway Company the province holds as security £1-217,522 10s. Pacific Great Eastern first and second mortgage guaranteed debenture stock, which, in Canadian currency at \$4.86%, is equivalent to \$5,925,195. This stock has been pledged to the province by the railway company as collateral security for the repayment of the loan of \$4,800,000, which forms part of the increased indebtedness of the province shown above.

## Taxation Changes

Regarding taxes the minister said:—

"It is proposed to amend the Taxation Act at the present session in the direction of making an allowance to mines on account of depletion. This allowance will not apply to this year, but during the coming months the department will look into the systems employed by the Dominion government, as well as in the United States, for arriving at a fair figure for this item of deduction, so that a satisfactory method of fixing depletion in this province may be established.

"An amendment will also be submitted changing the taxation year for income and personal property taxes. Returns must be made before the 31st day of March in each year instead of at the end of September, as at present. The rebate of ten per cent. for payment before June 30 will not be allowed, but the taxes will be in arrears after that date and will be subject to a penalty of 1 per cent. per month until paid, in keeping with the Dominion act.

"As was foreshadowed in my last budget address, the department is now engaged on the equalization of assessed values of crown-granted timber limits, and it is expected that the major portion of this undertaking will be completed before the end of the year.

"The work of the taxation branch of my department continues to be effectively carried on, with the result that the percentage of taxes being collected has risen to a most gratifying point. By way of comparison, it may be well to give a statement of the taxes assessed and collected during the last five years, which will make this plain:—

	Taxes	
	Assessed	Collected
1916 .....	\$2,731,039	\$1,906,641
1917 .....	4,553,026	3,432,721
1918 .....	4,634,873	4,977,649
1919 .....	5,823,985	6,072,809
1920 .....	5,232,634	6,371,309

"To show the necessity of effecting a prompt settlement of taxes where possible, it is only necessary to mention the fact that arrears for 1916 and previous years outstanding on the rolls on December 31, 1920, were \$432,430.20. A considerable portion of this is income on personal property, which I am afraid is uncollectable. For the year 1919, with double the levy, the total arrears outstanding is only \$560,741.27, of which only \$77,876.09 is for personality and income.

"The total arrears outstanding on December 31, 1920, amounted to \$2,768,439.05. These figures will show that not only has the department collected approximately 70 per cent. of the taxes levied, but in addition has cleaned up over \$3,000,000 of arrears outstanding when this administration took office and which had been owing from as far back as 1904."

**DIVIDEND NOTICES**

**DOMINION TEXTILE COMPANY, LIMITED**

**NOTICE OF DIVIDEND**

A dividend of one and three-quarter per cent (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st March, 1921, payable April 15th to shareholders of record, March 31st, 1921.

By Order of the Board.

JAS. H. WEBB,

Secretary-Treasurer.

462

**THE STEEL COMPANY OF CANADA, LIMITED**

**ORDINARY DIVIDEND No. 17**

Notice is hereby given that a dividend of one and three-quarters per cent. on the issued and fully-paid Ordinary Shares of the Company has been declared for the quarter ending March 31st, 1921.

**PREFERENCE DIVIDEND No. 39**

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully-paid Preference Shares of the Company has been declared for the quarter ending March 31st, 1921.

The above dividends are payable May 2nd, 1921, to shareholders of record at close of business, April 9th, 1921.

By Order of the Board.

H. H. CHAMP, Treasurer.

Hamilton, Ontario, March 17th, 1921. 509

**NOVA SCOTIA STEEL AND COAL COMPANY, LTD.**

**DIVIDEND NOTICE**

A dividend of two (2%) per cent. on the Preferred Stock and one and one-quarter (1¼%) per cent. on the Ordinary Stock of the Company has been declared, payable on April 15th, 1921, to shareholders of record at the close of business on March 31st, 1921.

By Order of the Board.

THOMAS GREEN,

Cashier.

New Glasgow, N.S., March 24th, 1921. 508

**CANADIAN CAR AND FOUNDRY COMPANY, LIMITED,  
MONTREAL**

Notice is hereby given that a Dividend of one and three-quarters per cent. (1¾%) on the paid-up Preference Stock of this Company for the quarter ending March 31st, 1921, has been declared, payable on the 11th day of April, 1921, to Shareholders of record at the close of business on the 26th day of March, 1921.

By Order of the Board.

A. C. BOURNE,

Secretary.

Montreal, March 18th, 1921. 500

**McINTYRE PORCUPINE MINES, LIMITED  
(No Personal Liability)**

**DIVIDEND No. 13**

Notice is hereby given that a dividend of 5 per cent. (5%) on the issued Capital Stock of the Company will be paid on the 2nd day of May, 1921, to Shareholders of record at the close of business on April 8th, 1921.

By Order of the Board.

M. P. VAN DER VOORT, Secretary.

Dated at Toronto, March 28th, 1921. 513

**DEBENTURES FOR SALE**

**TENDERS FOR DEBENTURES**

**TOWN OF KAMSACK**

Tenders will be received by the undersigned up to five o'clock p.m. on Friday, April 15th, 1921, for the purchase of \$13,400.00 of 15-year 7% Electric Light Debentures. Repayable in equal annual instalments of principal and interest.

Neither the highest or any other tender necessarily accepted.

L. W. ANDREW,

Treasurer,

Kamsack, Sask.

505

**TOWN OF NOKOMIS**

Town Debentures for Sale: \$20,000, fifteen equal annual payments, interest eight per cent. Can be divided into \$5,000 lots. Address offers to

C. L. CAMPBELL,

Town Clerk,

Nokomis, Sask.

502

**TOWN OF VERMILION, ALBERTA**

Sealed tenders marked, "Tender on Debentures," will be received by the undersigned up to Monday, April 18th, for the two blocks, viz.: (1) \$20,000.00 at 6½%, term 20 years, repayable in 20 equal annual instalments of principal and interest; purpose, to build fire hall, buy engine and construct underground water tanks. (2) \$6,000.00 at 7%, term 20 years, repayable in 20 equal annual instalments; purpose, electric light and power extension.

Debentures are a debt on the town at large.

The highest or any tender not necessarily accepted. Tenders will be opened 8 p.m., April 18th, 1921.

H. P. LONG,

Secretary-Treasurer,

Vermilion, Alberta.

507

**SUIT FOR AUTOMOBILE DAMAGES**

The Quebec Court of Review, in reversing a judgment of the Superior Court, maintained the right of an insured party to sue in his own name the author of damages he has sustained, even if his loss has been paid by an insurance company. An automobile belonging to Meyer C. Ginsberg was struck by an express wagon of the Matthews-Blackwell Company descending St. Lawrence street. Ginsberg sued the company for \$470 damages. The court below had dismissed plaintiff's action on the ground that his claim had been in fact paid by an insurance company, and plaintiff had no interest, and therefore no action.

## ALBERTA'S MUNICIPAL HOSPITAL SYSTEM

Eight Hospitals are Now in Operation—Charges are Light, Most of Expenses Being Met by Taxation

BY ANGUS LYELL

THERE are now eight municipal hospitals in operation in Alberta—those at Drumheller, Vermilion, Cardston, Mannville, Bassano, Islay, Onoway, and Lloydminster; and the establishment of three more has been approved, in the districts of Hanna, Viking, and High River.

The scheme is one of comparatively recent date, legislation authorizing it dating back only to the year 1917. As a matter of fact, it was the following year before the plan became workable. The former minister of Health and Municipal Affairs, the late Hon. A. G. Mackay, did much to promote the success of the measure.

## Hospitals are Self-Supporting

These hospitals are self-supporting and are erected on popular request, the procedure being for the municipal councils or ratepayers of at least nine townships to petition the minister to form a hospital district. The minister then enquires into the possibility of these townships being able to finance the erection and maintenance of a hospital. He may, if he considers the area too restricted, consult adjoining townships. In a case where the plan appears feasible, it is submitted to the ratepayers of the area concerned, who record by vote their approval or disapproval.

So far little difficulty has been experienced in financing any of the hospitals. The four districts which have issued debentures—Drumheller, Cardston, Mannville, and Vermilion—have sold these readily and at a substantial price. Drumheller had an issue of \$50,000 twenty-year hospital debentures which sold at 106, the interest rate being seven per cent. Vermilion sold \$35,000 of similar debentures at 105. The issues were apparently attractive to bond dealers.

In all of the districts already formed, except Onoway, where the charge is two dollars a day, ratepayers using the hospitals pay only one dollar a day, except for use of the operating room at Drumheller, Mannville and Vermilion, where there are charges of \$2.50 for minor and \$5 for major operations. Transients and those who are not ratepayers are charged \$3.50 a day.

## Costs Met by Taxation

The main revenue is the tax on the area included in each hospital district, but so far this has been very light. In nearly all of the districts, the charge per quarter section per year has been less than \$4.80. Bassano is an exception, the reason being that in this district there is a good deal of rented land against which taxes are not levied.

While the hospitals are being built according to certain standards, they are developing according to the needs of the several communities. Three types are already discernible.

There are the usual town hospitals, such as those at Cardston, Bassano, Mannville and Vermilion, where there is very little need of outside or district nursing. The hospitals here are two story buildings, erected on modern lines. Medical aid is available daily.

Then, as in the case of Onoway, there is the country hospital, which often has no doctor in attendance. This place was really established in 1913 by the Church of England but was donated to the department last year and converted into a municipal hospital. A graduate nurse is in charge, and several first aid stations are operated in connection with it.

The third type is that of the hospital at Drumheller, which was formally opened in July last. Here we have the best of the municipal hospitals as yet erected. The district is a large one, comprising thirty-three townships, and its centre, Drumheller, is an active coal mining town. There was much need of a modern and efficient hospital and such has been provided. The building is a three-story one. The

equipment includes X-ray apparatus, sun rooms, operating rooms, and so on.

The popularity of the scheme is well reflected in the vote taken recently at High River on the proposed formation of a hospital district there. Since February last, the establishment of a district has been under consideration, the area involved being considerably large. Proximity to Calgary and the obvious advantages of medical treatment there were factors against the scheme. Yet the vote in favor was 1,202 as against 257.

## Directed by Municipalities

The administration of each municipal hospital is in the hands of a board formed of representatives from each of the municipal councils concerned. The number is fixed by the minister, who, in certain circumstances, may appoint members, as, for example, where municipalities have failed to do so and in the case of Local Improvement districts.

In a province with a large area, such as Alberta, the need of well-equipped hospitals at several points is obvious. The story of the hardships experienced by many settlers has not yet been written. Near proximity to a hospital is an essential of modern life. But in thinly populated districts, such provision is well nigh impossible. The plan suggested by the Alberta legislature is that several townships should combine, form a hospital district, and in that way finance the erection and maintenance of a modern hospital. The levy for taxes on the owners of the land in these districts is but trifling. And these, in the case of sickness necessitating use of the hospital, pay but a minimum daily rate. The scheme is not only fair, but it is essentially practical. Nor is it one depending on charity. Each hospital is self-supporting. And it is in connection with the development of the measure that the name of the late Hon. A. G. MacKay will be best remembered. A hard and tireless worker, he did this very best to promote the establishment of these hospitals.

## MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Tendencies previously noted are again reflected in the February statement of the Montreal City and District Savings Bank and La Caisse d'Economie de Quebec. Deposits continue to increase, the change in the former institution in that regard being particularly good. The Montreal bank shows a considerable reduction in loans for the month, with substantial advances in security and cash holdings. On the other hand, the Quebec bank reports a great amount of loans, with a reduction in cash, and small changes in securities. The following are the principal comparisons:—

## Montreal City and District Savings Bank

## JOINT BANK ACCOUNT AND THE WILLS ACT

Where Such an Account Is Opened With View to Making Gift After Death, This Gift Is Not Valid Unless Mentioned in Will

WHERE a person deposits money in a bank to the joint account of himself and another person it is a question of intention whether such transaction is a gift *inter vivos* or is a transfer of property by way of trust or whether it is a gift which is not to take effect until the donor's death, and where the evidence shows that this latter is the case the transaction is of no validity by reason of the formalities of the Wills Act, requisite in such cases, having been disregarded. This is the substance of a recent decision of the New Brunswick Supreme Court.

## How Joint Account Was Started

The action was brought by Frank I. Shortill, as executor of his father's will, against Helen Grannan, concerning certain moneys deposited to the joint account of his father and Helen Grannan. Prior to April, 1914, the late Owen Shortill had in the savings department of the Bank of Nova Scotia at Fredericton a deposit to the amount of \$1,100 or thereabouts. He withdrew this money on April 15, 1914, and on the same day deposited it in the Bank of Montreal at Fredericton in his own name and that of the defendant, the defendant being described as Helen M. Grannan. At the same time he and the said Helen M. Grannan signed an agreement with the Bank of Montreal to the effect that all moneys from time to time deposited to the said account, and interest, might be withdrawn by either of them, and each of them authorized the bank to accept as sufficient acquittance for any amounts withdrawn from said account from time to time, any receipt, cheque or other document signed by either or both of them. It was further provided in the agreement that the death of either the said Owen Shortill or Helen M. Grannan should in no way affect the right of the survivor to withdraw the moneys deposited in the said account. It will be seen, therefore, that the deposit in the Bank of Montreal in the joint names of Shortill and his niece was on the condition that the money could be drawn by either or the survivor. After Shortill's death, which took place on August 6, 1919, the balance then in the Bank of Montreal to the credit of joint account amounting to \$1,147.22 was withdrawn on August 11, 1919, by the defendant. The plaintiff claims that the money was not the property of the defendant, but belonged to him as executor under his father's will. This will was not put in evidence, but throughout it was treated as having been made some years before the money was withdrawn from the Bank of Nova Scotia by Shortill and redeposited in the Bank of Montreal.

Not a Gift *Inter Vivos*

Chief Justice Hazen in his judgment says:

"It seems to me that the claim of the defendant that this is a gift *inter vivos* cannot be sustained on the evidence of the defendant herself. The money was in the Bank of Nova Scotia, and in some way or other the plaintiff had, or he and his father thought he had, some control over it. For this reason his father decided to change it and put it in the joint name of himself and Miss Grannan, at the Bank of Montreal. For what purpose he was doing it can only be judged from Miss Grannan's statement of the conversation she had with him. Her statement that he said he was going to have it in their names jointly, and at his death she was to have the money; her statement that he made the remark to her that he wanted her to have it at his death; his further statement that if there was any money left at his death she was to have it, all seem to me to negative the idea of a gift *inter vivos*.

"I fail to find any evidence of intention on the part of Shortill to create a trust or become a trustee. By no act which admits of any other interpretation did he evidence that he himself had ceased to become the beneficial owner of the money in question and that such legal right to it, if any, as he retained was held by him in trust for Miss Grannan. At any time during his lifetime he could himself have drawn out every cent of the amount under the agreement entered into, and Miss Grannan would have had no redress.

## Intention Was Testamentary Gift

"In the present case I have come to the conclusion, in view of the evidence, that the intention of Owen Shortill was that the gift should not take effect until after his death. The fact that he had believed that he had arranged with the Bank of Nova Scotia that the money should go to his son Frank; the fact that he evidently changed his mind and decided that his son Frank should only get the farm and that what was left of the money in the bank should after his death go to Miss Grannan; the statements he made to Miss Grannan which I have already quoted, and which are practically the only evidences of his intention, all indicate that the gift which he intended was testamentary in its character, and this to my mind is sustained by the way in which the money was treated after it had been deposited in the Bank of Montreal. The fact that Miss Grannan did not for years, not until after Shortill's death, draw one cent of the money; that she treated it as if it was his absolutely, and acted upon his directions in regard to it, confirm me in this view, and are of such a character as to almost lead to the conclusion that Miss Grannan viewed the matter in that light.

"Having concluded that there was no gift *inter vivos*, and that there was no transfer of the property by way of trust, and that the gift was not to take effect until the donor's death and was therefore testamentary in its character and therefore of no validity by reason of the formalities of the Wills Act, requisite in such cases, having been disregarded, I have reached the conclusion that 'the plaintiff must succeed.'

## INSURANCE LICENSES AND AGENCY NOTES

In addition to the classes of business for which it is already licensed, the Niagara Fire Insurance Co. has been authorized to transact in Canada the business of hail insurance.

The Occidental Fire Insurance Co. has also been licensed to transact hail insurance in Canada, in addition to other classes.

Several provincial registrations have also been granted. In British Columbia the London Assurance Corporation has been licensed to transact inland marine and inland transportation insurance. Previously the company was writing marine and automobile only.

The United Assurance Co., of Calgary, has been authorized to transact fire and hail business in the province of Manitoba.

Two certificates of registration have been issued by the Alberta department of insurance, one being to the La Sauvagarde Life Insurance Co. to transact life business, and the other to the Merchants' Casualty Co., Winnipeg, to write automobile insurance.

At the present session of the Manitoba legislature, an application will be made to incorporate the Northwestern General Insurance Co.

The "Order of the Scottish Clans for the Province of Manitoba," has ceased to transact business in the province of Manitoba.

Rainie and Keator, Halifax, N.S., have secured the agency for the Maritime provinces and Newfoundland of the Tokio Marine and Fire Insurance Co. This company has total assets of nearly fifty million dollars and a net surplus of over thirty-nine millions. Hitherto it has had no agency in this field. Another new agency recently secured by Rainie and Keator is that of the New Jersey Insurance Co. with head office at Newark.

Reginald Lawson and Co., Ltd., insurance agents, Winnipeg, with offices in the Merchants' Bank Building, have engaged G. Innes Mackenzie as manager of the casualty department.

Fred. W. Evans Co., Ltd., have been appointed general agents for Montreal and district for the Merchants' Marine Insurance Co., Ltd.

# News of Industrial Development in Canada

**Discount of Pound Sterling Here Preventing General Movement of British Capital to this Country—Flax Growing in New Brunswick Will be Encouraged—Whalen Pulp and Paper Company Engages Dollar Company to Market Products**

**T**HERE are many British manufacturing companies which are contemplating extending their operations to Canada, but the time has not yet arrived when there will be any general movement. In the first place business conditions demand care in expansion at the present. The chief reason, however, is the discount of the pound sterling here. While in Victoria, B.C., last week, Lieut.-Col. T. A. Ross, foreign representative of the powerful Rudge-Whitworth manufacturing and engineering group of industries in Britain, expressed his views on the situation. He said:—

"Development will hinge, of course, on the readiness of capital to invest in enterprises, and I may say that the British investor these days is a very rare and cautious man, especially while the pound sterling is at a discount. When it returns to par, or something near it, you may expect with confidence a general movement of British investment capital to Canada. British investors want to be sure that they are properly safeguarded and confiscatory legislation is something that they naturally strive to avoid. The country with the best record in this respect is likely to secure the most generous treatment from Britishers who have money to put into industrial enterprise."

In connection with the expanding of the flax growing industry in the province of New Brunswick, Max Hudson, manager of the Eastern Flax and Seed Co., Ltd., of Shediac, has been in conference with the provincial department of agriculture. Mr. Hudson stated that last year the company had planted twenty acres of land in flax, the average yield from which had been over seven bushels of flax seed to the acre and two and one-half tons of straw. The company had put in a mill for processing the flax and this year had one hundred acres ploughed and ready for seeding. Last year's crop had been made into tow and marketed in the United States, but this year the company were considering putting in equipment to manufacture the fibre into linen yarn, the Maritime Linen Mills at Moncton having agreed to take the whole output of yarn.

## The Pulp and Lumber Trade

Negotiations have been closed whereby the Canadian Robert Dollar Co. will market all the products of the Whalen Pulp and Paper Co., including pulp, lumber and shingles for a period of three years. In the face of the fact that all the exports of the Powell River and Ocean Falls Companies are marketed through the Crown Willamette Pulp and Paper Co., of Portland, the announcement that the Dollar company will control the sales of the three Whalen Pulp Mills and all the lumber and shingles from these plants is regarded with satisfaction. "British Columbia products through a British Columbia port is our motto," said T. W. McGarry, president of the Whalen company, "and we feel when acquiring the world-wide system of the Dollar company in opening new markets and developing those we already have, we are putting our sales department in the best hands we could possibly secure. Every office of the Dollar company in all foreign ports will become an office for the sale of British Columbia pulp and other forest products."

Work has commenced at the plant of the Western Canada Pulp and Paper Co., at Howe Sound, B.C., both on construction work and pulp manufacturing. The plant closed down some months ago when the market sagged to an unprofitable basis on Kraft paper. The Kraft market has improved slightly, and the outlook is much better. Several new units are being added to the company's mill, and when installed the company's plant will have a capacity of 40 tons per day.

Fraser Companies, Ltd., together with practically all of the other lumber concerns in the province have definitely

determined not to open their mills this year except on a 10-hour day basis with reduced wages. The local unions of the International Timber Workers of America are opposing these plans.

Lumber production by the mills of the Ottawa Valley during 1920 showed a decrease of 26,030,350 feet or about ten per cent. of the cut by the same mills in 1919. The output of lumber for 1920 amounted to 275,670,000 feet. Lath production increased by nearly three million pieces and shingles declined by about one and one-quarter million pieces. The lumber exports from the Ottawa consular district to the United States amounted to 127,531,430 feet, an increase of 22,780,449 feet over 1919. Of the Ottawa Valley mills, W. C. Edwards and Co., now the Gatineau Co., Ltd., was the largest producer of lumber, lath and shingles. This company in 1920 manufactured 60,000,000 feet of lumber, ten million pieces of lath and a like number of pieces of shingles.

## Coal Production Reduced

That at the present time the Dominion Coal Co. can only get a sale for 100,000 tons of coal a month, about one-third of a normal monthly output, and until such time as the company can get a market for the whole of their output, it means that the company will only be able to operate their mines at Glace Bay, N.S., about one-third time. This was the statement made by Assistant General Manager H. J. McCann, last week.

The Ames-Holden-McCreedy, Ltd., report they are running full blast in all departments, leather, rubber and canvas shoes, and conditions have not only improved, but show signs of further progress. All their factories are now operating again.

Galt, Ont., is to have another new industry, Hi-Speed Tools, Ltd., in which local capital is interested. The new firm has received its charter and is capitalized at \$40,000. The new wing of the Perfect Machinery Co.'s works has been leased and the machinery has been ordered, most of it from local concerns and on or about April 10th, it is expected the baby industry will be in operation.

Three branches of a new industry for British Columbia are to be established by the Orange Crush Bottling Co., Ltd., which has its head offices in Winnipeg, with a factory there and others at Brandon, Saskatoon, Calgary and Edmonton. Vancouver, Victoria and Nelson will be the locations for the proposed branches in British Columbia.

The Service Motor Truck Co., of Wabash, Ind., which acquired a \$50,000 factory site on the London and Port Stanley Railway some months ago, and which later cancelled its building plans pending a settlement of business conditions, has notified officers of the London, Ont., Chamber of Commerce that construction will begin in June. The company will build three buildings 110 by 300 feet and a powerhouse as the first group, and expects to have several hundred men employed in the autumn. The factory here is intended to provide for Canadian business and export trade in the British possessions.

The first commercial use of a deposit of fine white Kiselgur clay, the only known deposit of its kind on the continent, is being made in the manufacture of a fire lighter with kerosene as the fuel. The fire lighter in the form of a small brick is being manufactured in Medicine Hat by an arrangement with the owner of the deposit, H. McKellar, a farmer at Waldeck, Saskatchewan. Another valuable clay deposit discovered at Lumsden is shortly to be developed. This is a shale which, actual test has shown, can be converted into pressed brick, wire cut brick and hollow tile of the first grade. A company capitalized at \$250,000 is to be organized by the owners of the property.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**General Meeting of Saskatchewan Municipal Bond Holders to be Called—Government Again Emphasizes that Obligations of Defaulters Will not be Assumed—Regina Sinking Fund Earned a Surplus—South Vancouver Conditions Improved**

**B**ONDHOLDERS of the town of Humboldt, Sask., met in Toronto last week, and passed a resolution requesting the Dominion Mortgage and Investments Association to call a meeting of all the holders of Saskatchewan debentures and Saskatchewan government securities. The action of the mortgage company is called with a view to considering ways and means of protecting bondholders' interests in Saskatchewan in view of the number of defaults by municipalities that have taken place. It is felt that it is necessary that all parties interested in Saskatchewan municipal securities should get together and discuss some way of dealing with the situation.

This action, when brought to the attention of the provincial government, was resented, in that it was interpreted to be a further effort to bring the province to assume the liabilities. Speaking on behalf of the government, Hon. C. A. Dunning, provincial treasurer, stated: "The government of Saskatchewan, while willing at all times to assist defaulting municipalities and thus protect their interests and the interests of those who hold their bonds, will not be driven into assuming liability for the obligations of defaulting subdivisions of the province.

"Certain financial interests in eastern Canada and the United States, who are bondholders in one or other of the few defaulting towns in Saskatchewan, have been using every influence to force the government of this province to assume the debts of towns which are unable to pay the interest on their own debentures. The government has steadily refused to agree that the whole province should be taxed to pay the bonds of any individual municipality or the interest on them.

"Several weeks ago one of the financial interests concerned stated in a letter to me that a boycott of Saskatchewan securities would be organized in eastern Canada, and that every means, political and otherwise, would be used to force the government to yield. This despatch indicates that the battle is on, and, judging from its contents, wholesale misrepresentation is one of the weapons to be used. Some difficulty may result from the campaign," said Mr. Dunning, "but not enough to force the government to agree to such an outrage as proposed."

These views are somewhat along the same lines as those expressed by Hon. George Langley, minister of municipal affairs, a short time ago, and further emphasize the policy which has been adopted.

**London, Ont.**—A tax rate of 38.8 mills has been set by the council, as compared with 40 mills last year.

**Oshawa, Ont.**—The tax rate for 1921 will be 40 mills on the dollar, the highest for some years and an increase of 2½ mills over last year.

**Winnipeg, Man.**—All lands in arrears of taxes for one year or more will be sold on or after May 15 next, according to a decision of the finance committee.

**Estevan, Sask.**—Coupons of the bonds issued by the town will be paid if presented again, according to John Appleton, secretary of the Dominion Mortgage and Investments Association, who has been closely in touch with the situation.

**Kingston, Ont.**—Gross surplus of the city's electrical plant in 1920, according to the audit of the Hydro-Electric Commission, was \$31,557, or more than 20 per cent., and the net surplus \$19,599, the sum of \$11,958 having been placed to the credit of the reserve account.

**Sherbrooke, Que.**—The city's budget for 1921 calls for general expenditures of \$374,654. Current expenditures on waterworks are estimated at \$91,324, and revenue for the department at \$95,000. The estimated expenditure by the electric and gas department is \$272,353 and revenue \$330,550.

**Swift Current, Sask.**—At a meeting of bondholders in Toronto this week it was decided to appoint a committee, with power to employ a solicitor, to take such action as was deemed advisable to protect the bondholders' interests. It was felt at the meeting that, with proper management and co-operation, the city could overcome the difficulty without discredit to itself or the province. The vicinity of Swift Current has suffered from four successive bad crop years.

**Essex Border Utilities, Ont.**—When Riverside and Tecumseh are incorporated as towns by act of the Ontario legislature, the township of Sandwich East will sever its relations with the Essex Utilities Commission. The two baby municipalities, which at present are part of the township, will take over the township's financial obligations incurred while within jurisdiction of the commission. R. C. Maisonville and Reeve Maurice Renaud, commissioners for Sandwich East, will cease to serve on the commission after the incorporation of the new towns has been approved by the legislature.

**Regina, Sask.**—Total assessment for 1921 is \$58,760,740, compared with \$58,132,180 in the previous year. Increases are shown in the improvements, income and business assessment, but land assessment shows a decrease of about \$59,000. Exemptions are \$15,219,470, as against \$15,190,300 in 1920, leaving the taxable assessment as follows:—

	1921.	1920.
Public school supporters . . .	\$40,712,780	\$40,088,340
Separate school supporters . . .	2,828,490	2,853,540

**Oak Bay, B.C.**—The district is among those fortunate municipalities of the province who can report small tax arrears and a sinking fund surplus, in addition to other favorable features. Last year's accounts were closed with a surplus of current revenue over current expenditures of \$11,295. The bank overdraft on current account was reduced from \$53,122 to \$37,603.

At December 31, 87.34 per cent. of the current year's taxes were paid and 79.41 per cent. of arrears outstanding at January 1, 1920, had been collected. Total tax arrears were \$52,025, compared with \$89,981 at the end of 1919 and \$156,376 at the end of 1916.

Sinking funds required amount to \$409,751, while the funds actually on hand are \$442,427, a surplus of \$32,675, as compared with a surplus in the previous year of \$31,658. Of the fund \$438,212 is invested in Dominion and provincial bonds and debentures and the rest is cash in the bank.

**South Vancouver, B.C.**—After having experienced all the trials and tribulations which accompany financial embarrassment, the municipality is rapidly regaining its prestige. At the time the provincial government appointed F. J. Gillespie commissioner in May, 1918, South Vancouver had not defaulted, but everything pointed to a default on account of the money market, and the over-expenditure that the municipality has been making in previous years, and from the fact that single tax had obtained for years. From 1910 to 1914 the assessment had been rushed up from \$13,609,203 to \$43,815,311. This value was certainly inflated, for the property was never worth that amount of money. The assessment now is between twenty-four and twenty-five millions, and taxes are levied on both land and buildings.

Another unfavorable feature before the provincial government commissioner took charge, was the poor collections. In 1916 the collections were but 35.75 of the levy. In 1920, however, the result was about 80 per cent. Total tax arrears at December 31, 1920, including consolidated taxes and accrued interest, amounted to \$300,298, which compares with \$550,547 at the end of 1919, and \$1,113,877 at the end of 1918.

The sum of \$96,667 was paid into the sinking fund during the year, whereas the annual amount required was \$73,968. Loans from the Canadian Bank of Commerce and Lumberman's Trust Co. amounted to \$529,164, against which there is cash on hand amounting to \$171,326, leaving a balance of \$357,837. Temporary loans at December 31, 1919, amounted to \$673,999, against which there was cash amounting to \$105,151. This shows an improvement in the financial condition for the year 1920 of \$211,009.

Regina, Sask.—The city's sinking fund earned a surplus of \$35,817 in 1920. After setting aside as a reserve the sum of \$10,000, a balance of \$25,817 remains to be turned over to the city. This will be used to reduce the tax rate for this year, and will be equivalent to a reduction of about two-thirds of a mill on the 1921 tax levy. The policy of setting aside a sum each year from the surplus as a reserve was adopted last year.

According to the annual report of the sinking fund trustees, which has just been completed by City Treasurer

Snowball, secretary to the trustees, and certified by Gladwell and Wilson, city auditors, the sinking fund has earned a total surplus of \$110,273, since the present policy of investments was adopted. Of this amount \$89,565 has been returned to the city to be used for current expenditures. The total amount of money available for investment by the sinking fund last year was \$644,391, which was applied as follows: Debentures redeemed, \$58,084; new investments, \$465,964; accrued interest paid on new investments, \$8,372; balance of surplus earnings for 1919 applied to city general fund, \$27,748. This left a balance of cash on hand and in the bank at the end of the year amounting to \$84,221. Practically all of this has since been invested.

The average yielding rate of the sinking fund investments in the aggregate is 6.01, but during last year, on account of the attractive securities available, the earning rate for 1920 investments was in the neighborhood of 7 and 7 to 8 per cent. The report shows that at the end of the year there was a sum due the sinking fund on account of the 1920 levy, amounting to \$52,681.

## Government and Municipal Bond Market

**Ontario and Nova Scotia Issues Featured This Week's Activities—York Township Sells on 6.32 Per Cent. Basis—Bond Houses are Evincing Interest in Irrigation Bonds Following Announcement of Alberta Government's Policy—Legislation Has Yet to be Passed—Transfer Books of 1918 and 1919 Victory Loans Are Closed for Month on Account of Interest Payments**

**I**NTEREST in the government and municipal bond market centered chiefly around the offerings of Ontario and Nova Scotia provinces. Outside of these there was very little activity. York Township disposed of its securities on a basis of about 6.32 per cent., as compared with a 6.40 per cent. rate when the municipality made a loan in January.

Since the announcement of Premier Stewart, of Alberta, concerning the guaranteeing of the bonds of the Lethbridge Northern Irrigation District, bond houses in every part of Canada have been sending enquiries to the district's office. Secretary Dunning has stated that Dominion bond houses are showing a very lively interest. Many of these houses showed absolutely no interest when tenders were first called for last January. Mr. Dunning is of the opinion that there will be no difficulty in disposing of the securities when the time comes, and anticipates receiving much better than par if the interest rate is left at 7 per cent. As soon as legislation is passed a conference will be held between government officials and trustees of the irrigation district to determine on the class of bonds to be issued. It is probable that the bonds will be of the same type as previously determined, namely, 7 per cent., maturing in 30 years.

There was a narrowing down in trading of Victory bonds as a result of the Easter holidays, and there were slight price recessions in all but two issues. The department of finance has given notice that on account interest payments due May 1, 1921, the transfer books of the 1918 and 1919 Victory loans will be closed from March 31 to April 30, inclusive, that is, the 1923, 1933, 1924 and 1934 maturities. Bonds which are received at the department for transfer after March 31, will not be transferred until after the opening of the transfer books on May 1.

The recent movement of prices is illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922	98	98 3/4	98	98 1/2	97 3/4
1927	97	97 3/4	97	97 1/2	97
1937	98	99 3/4	99 1/2	99 3/4	98 3/4
1923	98	97 3/4	97 1/4	97 3/4	97
1933	96 1/2	98 3/4	98	98 3/4	98 3/4
1924	97	96 1/2	96	96 3/4	96
1934	93	95 1/4	94 3/4	95	94 3/4

### Saskatchewan Municipal Authorizations

Seven hundred and fifty-one applications by cities, towns, villages, rural municipalities, school boards and rural telephone companies for permission to make capital expenditures were authorized by the Saskatchewan Local Government Board during the calendar year 1920, according to the annual report of the board. The amount of these authorizations was \$5,783,228.

A total of 796 applications, amounting to \$6,519,826 was made to the board during the year. Thirty-six of these, amounting to \$346,290, were refused; 86 were reduced by a total of \$296,608; and nine, amounting to \$93,700, were pending at the end of the year. The authorizations were distributed as follows: Cities, \$550,280; towns, \$353,152; villages, \$107,650; rural municipalities, \$86,828; school boards, \$2,460,508; rural telephone companies, \$2,224,809. The total number of authorizations by the board to similar applicants in 1919 was 773, amounting to \$7,190,937.

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

### R. A. DALY & Co.

BANK OF TORONTO BUILDING  
TORONTO

**Cap-de-Madeline, Que.**—Tenders will be received until April 6, 1921, for the purchase of \$40,000 6 per cent. bonds, dated November 1, 1920, and due 1921-50.

**Victoria, B.C.**—The city is calling for tenders on an un-sold balance of bonds amounting to \$244,501.81 up to April 4, 1921. The securities bear 6 per cent. interest and mature from 1921-30 and from 1921-35.

**Rockwood R.M., Man.**—Tenders will be received until April 28, 1921, for the purchase of \$70,000 6 per cent. 30-in-stalment good roads debentures, guaranteed by the province both as to principal and interest. V. W. McFarlane, Stonewall, Man.

**Sainte-Marie-de-Saybec, Que.**—Tenders will be received until April 18, 1921, for the purchase of eight debentures of \$500 each and thirty-eight debentures of \$200 each, maturing September 1, 1940. T. Levesque, secretary-treasurer.

**Vermilion, Alta.**—Tenders will be received until April 18, 1921, for the purchase of \$20,000 6½ per cent. 20-in-stalment fire hall debentures, and \$7,000 7 per cent. 20-in-stalment electric light and power debentures. (See advertisement elsewhere in this issue.)

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board, from March 12 to 19, 1921:—

Schools.—8 per cent. 20-years annuity—Indian Head, \$50,000; Langenburn, \$27,000; Allendale, \$6,700; Marquis, \$16,000. 8 per cent. 15-years annuity—Crane Valley, \$4,500; Merrywood, \$3,300; Foam Lake, \$19,000. 8 per cent. 10-years annuity—Eagle Bank, \$1,500; Petroffsk, \$1,200. 8 per cent. 15-years instalment—Prairie Valley, \$5,500; Free Soil, \$15,000. Altona, \$1,200 8 per cent. 10-years instalment; Kimball, \$1,000 8 per cent. 7 years annuity; Progress, \$600 8 per cent. 3-years instalment.

Village of Verwood, \$1,000 8 per cent. 5-years instalment, for electric light meters.

#### Bond Sales

**Mimico, Ont.**—C. H. Burgess and Co. have purchased \$24,000 6½ per cent. 30-in-stalment debentures at a price of 99.50. Another bid of 99.14 was submitted by Wood, Gundy and Co.

**Albert R.M., Man.**—Edward Brown and Co. has purchased \$50,000 6 per cent. 30-in-stalment good roads debentures, guaranteed by the province, at a price of 96, which is on about a 6.38 per cent. basis.

**York Township, Ont.**—An issue of \$200,000 6 per cent. 20-in-stalment Hydro-electric debentures has been awarded to the Dominion Securities Corp. at a price of 97.379, which is on a 6.32 per cent. basis. Other tenders were:—

Æmilius Jarvis & Co. ....	97.27
United Financial Corp., Ltd. ....	97.061
Wood, Gundy and Co. ....	96.87
R. C. Matthews & Co. ....	96.66
Dymont, Anderson & Co. ....	96.61
National City Co., Ltd. ....	96.57
C. R. Clapp & Co. ....	96.525
A. E. Ames & Co. ....	96.19

**Saskatchewan.**—The following is a list of debentures reported sold from March 12 to 19, 1921:—

Schools.—Glenhurst, \$2,000 8 per cent. 10-years, Hoosier, \$2,400 8 per cent. 10-years, Haywood, \$1,500 8 per cent. 10-years, Harmonia, \$2,500 8 per cent. 15-years; C. C. Cross and Co. Regina, \$25,000 6½ per cent. 30-years; Canada Trust Co. Church Hill, \$1,200 8 per cent. 10-years; Waterman-Waterbury Mfg. Co. Peebles, \$650 7½ per cent. 10-years; C. J. Rosborough.

Rural Telephones.—8 per cent.—Rainton, \$1,000 15-years; C. C. Cross and Co.; Gowanbrae, \$1,100 14-years; J. Blue, Kinistino. East Mildon, \$7,500 15-years; Harris, Read and Co.

City of Weyburn, \$1,200 6¼ per cent. 30-years; Weyburn Sinking Fund.

Town of Gravelbourg, \$61,500 7 per cent. 30-years; C. N. McMannas, Moose Jaw.

**Nova Scotia.**—The province has sold \$1,500,000 6 per cent. 5-year bonds, payable in Canada and New York, to a syndicate comprising the National City Co., Wood, Gundy and Co., and E. H. Rollins and Son, of Boston, at a price of 102.987, which means that for the present the money costs the province about 5.30 per cent. A number of tenders were received as follows:—

A. Jarvis & Co. ....		95.76
**J. C. Mackintosh & Co., A. E. Ames & Co., United Financial Corp., Ltd., R. C. Matthews & Co., and J. M. Robinson & Sons .....	96.843	96.843
Dominion Securities Corp. ....	96.79	96.79

\*For a \$1,000,000 issue this syndicate offered 101.642 for 5-year bonds and 100.014 for 10-year bonds.

\*\*For a \$1,000,000 issue this syndicate bid 97.063 for 15-year bonds and 97.063 for 20-year bonds.

The highest bid for 10-year bonds payable in the United States was on about a 5½ per cent. basis, and if the province had desired to sell securities payable in Canada only, it would have had to pay about 6.10 per cent. for its money.

**Ontario.**—A large syndicate, headed by A. E. Ames and Co., were awarded \$6,000,000 6 per cent. 6-months' treasury bills, payable in Canada only, at a price of 99.53, which means that the province pays about 6.98 per cent. for its money. In addition to this offer, there were four bids for 6 per cent. 10-year bonds, payable in Canada only, as follows:—

Harris, Forbes and Co., and National City Co., Ltd. ....	97.77
A. E. Ames and Co., and syndicate .....	97.637
G. A. Stimson and Co., and syndicate .....	97.371
Canada Bond Corporation, and syndicate .....	97.323

The highest offer for the bonds was on about a 6.20 per cent. basis. There were no offers for one-year treasury bills.

The successful syndicate is comprised as follows:—A. E. Ames and Co., Wood, Gundy and Co., Dominion Securities Corporation, A. Jarvis and Co., R. C. Matthews and Co., C. H. Burgess and Co., United Financial Corporation, Ltd., Housser, Wood and Co., W. A. Mackenzie and Co., R. A. Daly and Co., Canadian Debentures Corporation, Morrow and Jellett, Canada Trust Co., Osler and Hammond, McLeod, Young, Weir and Co., and MacNeill, Graham and Co.

*Our Service to Investors*

**SAVE—INVEST**

**T**HE "growth" of savings wisely invested is frequently the basis of financial independence. Persons of limited means can now make such investments through us, safeguarded by our expert knowledge of financial conditions.

Investing by this method is decidedly remunerative. Ordinary savings can be applied to the purchase of high-grade Securities, by which the capital invested is fully secured and a high rate of interest assured.

Now is a propitious moment to purchase, conditions being decidedly favorable to the small investor. A letter seeking advice, and marked "Service to Investors," will receive prompt attention. Address:—

passed by shareholders. A preliminary issue of \$3,000,000 was recently disposed of by the company, the money to be used for repaying part of the capital expended on the company's properties during the past few years.

A special meeting of the Canadian Salt Co. shareholders will be held at Montreal on April 7, for the purpose of ratifying a by-law authorizing the issue of general mortgage serial gold bonds of the company, to the amount of \$1,000,000. The circular accompanying the notice states that of the proposed issue of \$1,000,000 of 7 per cent. twenty-year bonds, \$356,000 will be reserved for the redemption of first mortgage bonds. It is proposed to sell only \$400,000 of the balance at the present time, the remainder, \$244,000, being reserved to provide funds for extensions and betterments from time to time. The proceeds of the \$400,000, now to be sold, will be used for funding capital expenditures already made, for providing the money required for certain additions and improvements, and for increasing working capital.

The Dominion Loose Leaf Co., of Ottawa, has declared a dividend of 10 per cent. on the common stock of the company for the year 1920. About a year ago, \$150,000 of preferred stock of the company was sold on the market. The preferred shares are 8 per cent. cumulative and participate in dividends with the common shares up to 12 per cent. Consequently preferred shareholders will be entitled to an extra dividend of 2 per cent., so as to equalize their rate of dividend on the common.

At an extraordinary general meeting of the members of the "Bull River Electric Power Co., Ltd.," held at Fernie, B.C., resolutions were passed that the company be wound up voluntarily, with the appointment of A. J. Moffatt, of Fernie, as liquidator.

**FIRE INSURANCE COMPANY OF CANADA**

Gross premiums written by the Fire Insurance Co. of Canada in 1920 amounted to \$405,404, showing an increase of \$80,333 over the preceding year. The net business written amounted to \$202,136, showing an increase of 18 per cent.

The expense ratio, including all taxes, was low at 35.43, as against an average of 40.27 per cent. of all Canadian companies for 1919. On the other hand losses were heavier, the ratio to premiums being 44.76 per cent., as compared with an average of 42.65 per cent., for all Canadian companies in 1919.

The balance sheet shows total assets of 467,292, as compared with \$373,398 in 1919. Surplus of assets over liabilities is \$30,071, against \$24,144 previously.

In his report to shareholders R. Dandurand, president, states: "Your directors have considered it desirable to pursue in the last year a conservative policy, in view of the uncertainties which will naturally follow the conditions of readjustment through which the country is passing. This will not be departed from—it may mean that our revenue may not increase as much as it would have otherwise done; but, for the time being, it is considered the wisest course to follow."

The Fire Insurance Co. of Canada was incorporated in 1916 under a Dominion charter, and a Dominion license was issued in October, 1918. The paid-up capital is now \$199,000, and there is a reserve fund of \$114,933. Other results as given above indicate that in two years good progress has been made.

At an extraordinary general meeting of the Colonial Trust Co. a special resolution was passed, namely: "That the company be wound up voluntarily and that the Bankers' Trust Co. of Victoria be appointed as liquidators."

**WEYBURN SECURITY BANK**

The Weyburn Security Bank has the distinction of being the youngest and smallest Canadian chartered bank, but notwithstanding, its value to the country is not to be discounted. It has some twenty-four branches, all of which are in Saskatchewan, and in view of the concentration of its efforts in this one province it is able to render a more valuable service than otherwise.

Last year profits were reduced from \$62,220 to \$57,742, while the balance sheet also reflects the change in conditions, which particularly affected the west. The usual 7 per cent. dividends were paid and other necessary provisions made. Nothing was transferred to reserve, however, and the balance carried forward stood at \$14,306, compared with \$8,545 at the end of the previous year.

The following figures show the principal changes which occurred during the year, and also gave an idea of the progress made by the bank since its inception:—

	1920.	1919.	1911.
Total assets	\$4,009,163	\$4,588,163	\$1,069,995
Current loans	1,964,428	1,912,027	684,488
Liquid assets	1,584,476	2,270,003	248,838
Capital paid-up	524,560	478,661	301,300
Reserve	225,000	225,000	15,000
Deposits	2,761,866	3,411,030	503,429
Profits	57,742	62,220	26,682
Circulation	430,490	418,960	235,855

**WEEKLY BANK CLEARINGS**

The following are the Bank Clearings for the week ended March 24, 1921, compared with the corresponding week last year:—

	Week ended Mar. 24, '21.	Week ended Mar. 25, '20.	Changes.
Montreal	\$100,802,152	\$121,556,498	— \$20,754,346
Toronto	94,309,284	96,115,240	— 1,805,956

Sherbrooke	1,035,454	1,001,365	+ 34,089
Kitchener	928,553	1,175,370	— 246,817
Windsor	2,735,048	2,996,785	— 261,737
Prince Albert	306,087	481,505	— 175,418
Totals	\$300,185,978	\$345,501,205	— \$45,315,227
Moncton	1,178,264		

The following are the shipments of ore from Cobalt Station for the week ended March 24th:—

La Rose Mine, 65,970. The total since January 1 is 1,963,226 pounds, or 981.6 tons.

**QUEBEC HAS BENEFITED BY BOARD OF TRADE**

At the annual meeting of the Quebec board of trade recently, John T. Ross, retiring president, reviewed the industrial development of the city, and attributed many of the benefits which have accrued to the commercial life of the community to the efforts of the board.

Referring to the business in the local port, Mr. Ross stated that notwithstanding the splendid elevator and dock facilities, and although Quebec was 214 miles closer to the prairie grain fields than before the construction of the Transcontinental railway, no grain has been exported from Quebec. This was explained by the fact that the freight rate to Quebec and Montreal have been fixed at such a high figure that it costs four cents per bushel less to send grain from the Canadian west via Buffalo to New York than to send it to Quebec. In 1916, the management of the government railways, after much consideration, made a freight rate of six cents per bushel for carrying export wheat from Armstrong on the Transcontinental Railway to Quebec. This had immediate effect and quite a number of steamers were loaded here that year with grain. The special rate was soon cancelled with the result that last year 53,000,000 bushels of Canadian grain has been exported via the States.

Reference was also made by Mr. Ross to the completion of the Quebec bridge and the resumption of the fast line of steamers to Quebec by the C.P.R. He also called attention to the great prospects for the province and the city in the development of the north country and forecasted that with the new pulp development and the readjustment of freight rates Quebec would become a great distributing centre.

**PROVIDENT ASSURANCE COMPANY**

The annual meeting of the shareholders of the Provident Assurance Company was held in Montreal on March 14th. In presenting the annual report J. C. Gagne, managing director, dealt at length on the present condition of the insurance business and the many problems that have arisen and which have been dealt with by insurance directors and association executives. Mr. Gagne brought to the attention of the meeting the steady progress in the company's business, notwithstanding the increased competition due to numerous foreign companies entering the Canadian field. The Provident's premium income for 1921 amounted to \$543,373. The company now has powers for transacting fire insurance.

**WANT HIGHER TELEPHONE RATE**

Increases in rates charged by the Manitoba government telephone system of from 30 to 48 per cent., effective April 1, are sought in an application which has been filed with the public utilities commissioner. It is estimated that the revised tariffs would produce an additional \$800,000 of revenue, but would still fall short by \$150,000 from the estimated expenditures for the current year. Increased cost of operation and the necessity for expensive extensions to the system are given in explanation of the application.

Balfour, White and Co., of Montreal, have opened an office in Toronto at 6 Jordan Street, under the management of S. F. Hayes. This house has specialized in unlisted securities, and a department is also being organized to take care of the selling of bonds.

**WANTED**

Two Actuarial Assistants, Department of Insurance, Ottawa; initial salary \$1,440 per annum plus bonus provided by law. Apply Secretary, Civil Service Commission, Ottawa. 515

# Corporation Finance

**Abitibi Net Earnings Show Large Increase—Ames-Holden-McCreedy Had Deficit Last Year—Profits of Holt Renfrew Fell Sharply in 1920—Canadian Westinghouse Enjoyed a Good Year—Canadian Pacific Railway Operating Expenses Were Lower in February**

**Oakolo Company of Canada, Ltd.**—The company, which was organized about two years ago, is in the hands of the liquidator. The liquidator, E. R. C. Clarkson, is issuing a statement to the shareholders, showing the company has only \$183,916 worth of assets to meet liabilities of \$582,262. The liabilities are divided as follows:—To trade creditors, \$121,652, of which \$14,609 is secured and \$5,498 ranks as preferred, the balance of \$455,610 being due the shareholders.

**Dominion Linens, Ltd.**—Net profit, before providing for depreciation, etc., was \$58,872, compared with \$76,190 in 1919; \$71,142 in 1918, and \$50,578 in 1917. Out of the year's profits the sum of \$19,320 was allowed for depreciation on plant, machinery and equipment, practically unchanged from 1919. Preferred dividends were paid amounting to \$24,500, and a bonus of 5 per cent. on common stock amounting to \$10,000. After reserving \$5,000 for Federal taxes for 1919 there remained \$35,169 at credit of profit and loss, compared with \$49,594.

Although there is a considerable increase in inventories, there has been a decrease in bank loans. Inventories stand at \$291,496, compared with \$175,926. Bank loans have been reduced from \$50,200 to \$30,000. Accounts and bills receivable, on the other hand, have declined from \$96,500 to \$38,366, while accounts payable have risen from \$10,484 to \$64,308.

**Canadian Westinghouse Co., Ltd.**—Operations of the company proved to be highly satisfactory in 1920, earnings for the year amounting to \$1,251,080, compared with \$1,416,205 in 1919. The sum of \$225,000 was written off for general depreciation, and a reserve of \$110,000 created for the payment of Dominion taxes for 1920, leaving net profits of \$916,080, compared with \$600,936 for 1919. From the year's profits, dividends at the rate of 7 per cent. per annum, and an extra dividend of 2 per cent. were paid, amounting to \$615,524, leaving a balance of \$300,555 carried forward to profit and loss, which account shows as of December 31, 1920, a surplus of \$2,114,828, exclusive of all reserves.

For the purpose of securing additional working capital, made necessary by the increased business and activities of the company, the outstanding capital stock was increased from \$6,229,400 to \$7,417,900 by the issuance of 11,885 new shares. These were subscribed at par by the shareholders of record June 30, and payments were completed October 1.

**Canadian Northwest Land Co., Ltd.**—The sales of the company for the year 1920 amounted to 23,762 acres, for which the sum of \$418,251 was obtained, as against sales in 1919 of 48,352 acres, from which an aggregate of \$773,765 was derived. The sales in the year decreased by 24,589 acres, and the revenue of the company by \$355,513. The average price obtained in 1920 was \$17.60 per acre, compared with \$16.02 per acre in 1919, an increase of \$1.58. There were no townsite sales during the year, but, in any event, the liquidation of the company's townsite holdings is fast approaching completion.

The amount of the original purchase by the English company was 2,200,000 acres. Of this total there was taken over by the Canadian company, as at the 31st of December, 1893, 1,928,318 acres. On the 31st of December, 1920, the unsold lands amounted to 180,552 acres. The balance of principal outstanding on contracts for farm lands at 31st December last amounted to \$2,572,470, all bearing interest.

Following the custom adopted by the directors, the total amount of the past year's farm land sales has been transferred to the profit and loss account, which now stands at \$3,141,707, an increase in the year of \$98,593. A further distribution on realization of assets amounting to \$5 per

share was paid to the shareholders in February last. As each payment of this kind is made the assets of the company are proportionately depleted, and in consequence these payments cannot in any way be regarded as dividends.

**Canadian Pacific Railway.**—Traffic earnings of the railway in February showed a decline from February a year ago, but, for the first time during this or last year, operating expenses of the big enterprise showed a reduction also, a reduction greater than that in gross earnings, so that the result of the month's work was a gain in net earnings. Gross for the month amounted to \$12,768,986, expenses to \$11,955,594, and net to \$813,391, the last-named showing an increase of \$99,518 over February, 1920.

In February last year, gross earnings of the railroad showed an increase of \$2,492,936, with expenses nearly \$300,000 higher in comparison with February, 1919. In the past February gross earnings were down \$788,116, the first decline to be recorded this or last year, and expenses were down about \$100,000 more. The decline in gross from last year's figures compares with the largest increase last year over the preceding year, amounting to \$6,503,979 in October, in which month also expenses showed an increase of \$4,150,939.

Over the past 14 years, February earnings are exceeded in that month only once, that being in 1920; but net earnings have been exceeded every year except in 1920, 1909, and 1908. The best February net was made in 1913, when it was \$2,520,070. In January, for every dollar received by the company, 95 cents was paid out in operating expenses; in February the expense was reduced to 93.7 cents.

**Holt Renfrew and Co., Ltd.**—A sharp falling off in earnings is shown in the annual statement of the company for the year ended January 31 last. Profits from operations after deducting general selling expenses, amounted to \$171,592, down from \$403,592 in the previous annual statement. After all charges including a full year's preferred dividends as against a half-year charged up in the 1920 report, net earnings were \$9,161 as compared with \$273,973 a year ago and a surplus of \$173,973 after adjustment. The profit and loss balance is now \$183,135.

Outstanding changes in the balance sheet of the two years include a reduction of \$128,368 in inventories of skins, manufactured furs, etc., shown, according to the statement, "at cost after deduction of reserves approved by the managing director." These stocks are carried at \$1,440,591 in the 1920-21 accounts. Bank loans as at January 31 last were \$850,000, compared with \$580,000 in the preceding statement, although an item of \$34,324 shown in the latter under the heading "sundry loans" finds no counterpart in the report of last year. The position as to working capital underwent some impairment in the twelve months, the total of \$850,265, as at January 31, 1921, compared with \$1,171,487 a year ago.

**Riordon Co., Ltd.**—Contrary to the custom of former years, the financial statement of the Riordon Pulp and Paper Co. will not go forward with the notices calling the shareholders' meeting for April 21 next, the change being due to the fact that the operating company's fiscal year does not end until June 30, next, the business of the older concern having been taken over at that date in 1920.

There were made available for publication, however, the figures showing the combined earnings of the Riordon Pulp and Paper Co. for the six months ended June 30, last, and those of the now operating company from that date to December 31, 1920. These, according to official information, amounted to \$4,642,630, from which there was written off

### AUDITORS' REPORT

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of the Bank Act, 1913, we report to the Shareholders as follows: We have audited the above Balance Sheet and compared it with the books and vouchers at Head Office and with the certified returns from the Branches. We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash, and verified the securities representing the investments of the Bank, at its Chief Office and principal Branches at a date other than that of the verification at the Chief Office on the 28th February, 1921, and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

Auditors

HAMILTON, 14th March, 1921.

for depreciation, depletion and other reserves, a total of \$958,042, leaving net earnings available for interest charges at \$3,684,588.

After meeting interest charges, amounting to \$614,213, there remained a balance available for application to dividends amounting to \$3,070,375. From this was deducted \$480,000 for dividends on the outstanding preferred shares in the hands of the public, with \$525,000 distributed among holders of the common securities, leaving a combined net surplus for the year after all charges of \$1,965,385. The earnings figures detailed above do not take into account the profits accruing to the Riondon Company from the operation of its subsidiary, the Gatineau Co., which produced in the twelve monthly period in excess of 100,000,000 feet of pine lumber, and showed net earnings, after interest charges, of more than \$400,000.

**Ames-Holden-McCreedy, Ltd.**—As the result of the conditions which prevailed in the boot and shoe industry, the company resorted to the drastic policy of completely shutting down the leather footwear factories during the greater part of 1920. Operations were confined chiefly during the year to the manufacturing of rubber footwear, the year's gross sales in 1920 being \$6,614,552, against \$6,658,263 for the full twelve months' period preceding. After deducting manufacturing and selling costs and allowing for depreciation, but before taking into consideration fixed and other charges, the loss on the year's operations amounted to \$110,501 against a profit of \$602,099 for the eight months covered in the previous statement and \$632,764 for the entire 1918-19 period.

All deductions made, the net loss in 1920, after three quarterly dividends on the preferred stock was paid, the deficit for the year totalled \$639,836, against a surplus of \$176,150 in the previous statement and \$323,322 in 1918-19. Owing to the radical changes effected in the leather footwear industry, the company was compelled thoroughly to survey its position as to inventories, it having been necessary to absorb the sum of \$822,768, thereby converting a credit balance standing to profit and loss account, as at December 31, 1919, of nearly a million dollars into a debit one of \$470,250 as at the same date last year.

A comparison of the balance sheets of two periods shows that the position as to working capital underwent extensive impairment in the year, being reduced to \$551,513, a decline in the year of approximately \$2,000,000. Among the current assets, cash was down by almost \$37,000, the 1920 figures standing at \$25,566, while accounts receivable fell off by approximately \$350,000 to \$399,888. Holdings of stock in associated companies and other sundry investments are shown in the 1920 statements at \$43,530 compared with \$18,770 a year ago. Inventories were lower by upwards of \$600,000 at the end of 1920, aggregating \$3,396,824 against over \$4,000,000 in 1919. Bank loans and bills payable grouped together in the 1920 report are given at a total of \$2,791,185 compared with \$1,604,761.

**Abitibi Power and Paper Co., Ltd.**—Operations of the company in 1920 resulted in net earnings applicable to the outstanding common stock amounting to \$3,613,592, as compared with \$801,730 in the 1919 report, and \$41,202 earned in 1918. This showing is equal to \$14.45 per share earned on the issued no-par-value common shares, which would equal about 72 per cent. on the old capitalization. A year ago earnings equalled 16 per cent. on the old common stock issue, and 8.82 per cent. in 1918. Receipts in last year reached \$10,580,142, compared with \$6,029,353 in 1919, and \$5,650,264 in 1918. After expenses there was available for interest, depreciation, taxes and dividends, etc., a balance of \$5,043,133, against \$2,125,717 in 1919, and \$1,643,653 in 1918. In 1920, dividends paid at the rate of \$6 per share on the common stock, took up \$1,500,000 against \$300,000 on the old stock in 1919.

Turning to the balance sheet shows that if liabilities on construction are taken into account, the net working capital amounts to only \$266,000, as against \$1,369,439 in 1919.

Total assets are shown at \$23,121,681, compared with \$17,097,762. Principal changes are as follows:—

	1920.	1919.	1918.
Property .....	\$19,870,405	\$13,820,554	\$13,224,203
Investments .....	685,503	463,150	483,687
Inventory .....	3,273,869	1,944,769	1,877,489
Funded debt .....	8,107,500	6,160,600	5,768,200
Construction liability ..	1,272,906	147,451	523,008
Bank loans .....	850,000	250,000	1,068,000
Reserve .....	2,738,303	1,995,650	1,489,237
Surplus .....	3,688,571	1,574,979	1,073,249

The president, F. H. Anson, refers in his report to the issuing of \$4,000,000 bonds, but this is not reflected in the statement. The money was used to reimburse the treasury for expenditures made on capital account, and to provide working capital. The increased capacity of the mills of the company has necessitated the carrying of increased inventories, not only of logs but of all other supplies, with the result that a corresponding increase in working capital is required.

## RECENT FIRES

**Belleville, Ont.**—March 23—Fire broke out at the home of Mrs. Ivey Wooler. Loss partially covered by insurance.

**Blackie, Alta.**—March 23—The Blackie Trading Co., the Long Fee Chinese Cafe and the Blackie Hardware Co. were destroyed by fire. The loss is \$72,000 with insurance of \$40,000.

**Capreol, Ont.**—March 28—A large part of the Yonge St. business section was damaged by fire. The total loss is estimated at \$60,000.

**Coatsworth, Ont.**—March 27—A fire broke out in the grocery store belonging to A. C. Martin and damaged several adjoining buildings. The loss is \$20,000, partly covered by insurance.

**Cobden, Ont.**—March 23—The grocery and confectionery store of Robert Cook on Main St. was damaged by fire. The loss is estimated at \$6,000, partly covered by insurance.

**Eastview, Ont.**—A fire broke out in the living rooms occupied by C. LaChapelle, over his grocery store, corner of Overton and Marier Streets. The loss is \$5,000.

**Esterhazy, Sask.**—March 16—A fire destroyed the home of S. J. Bartok. The loss is estimated at \$4,000.

**Fredericton, N.B.**—March 20—Dibblee's drug store was damaged to the extent of \$1,000, when a fire originated from an electric stove.

March 25—The lumber mill at Manzer's Siding, owned and operated by Howard Dunphy, of Nashwaak Village, was damaged by fire.

**Hamilton, Ont.**—March 25—Spontaneous combustion is believed to be the cause of a fire which did about \$50,000 damage to the warehouse and stock of the F. F. Dalley Co., Ltd., Hughson St. North.

March 29—A gasoline torch was the cause of a fire which resulted in a loss of \$500 to the East End shoe repair shop, 662 King St. East.

**Moncton, N.B.**—March 25—The C.N.R. round house was destroyed by fire. The loss is \$5,000.

March 28—The warehouse and machine shops of the Record Foundry and Machine Co. were destroyed by fire. The total loss is estimated at \$80,000, partly covered by insurance.

**Montreal, Que.**—March 28—The St. Andrew's Curling Club building, 1 St. Matthew's St., was damaged by fire.

**Ottawa, Ont.**—March 26—An explosion of flour-dust over some bake-ovens was the cause of a fire which destroyed the bake shops and store houses of the Slinn Bread Co., Ltd., 458 Catherine St. The damage is estimated at \$100,000.

**Perth, Ont.**—March 13—A fire damaged the millinery department of dry goods store of H. M. Shaw. Loss, \$1,500.

**St. Johns, Que.**—March 24—A fire broke out in the second floor of the Belding Paul Corticelli, Ltd., premises on Richelieu St.

## Dominion Companies' Powers to Do Business

Charters Now Effective in all Parts of Canada—Provinces May However Regulate Business, Collect Taxes, and Require Information—Provincial Control of Insurance and Other Kinds of Business Not Affected

ACCORDING to the decision of the Privy Council of Great Britain in the company licensing cases, reported in *The Monetary Times* of March 4, a Dominion charter gives a company the right to do business in all parts of Canada. As the provinces, however, have, under the British North America Act, the power to control property and civil rights, and can, in fact, regulate most lines of business, a company with a Dominion charter may find it necessary to conform to provincial regulations before it will be permitted to do business. This is especially the case in the insurance, loan, trust and liquor businesses, as almost every province has established some kind of control in these fields.

Practically every province has a department of insurance, which requires every company to register and secure a license. This is true also of companies incorporated by the province itself, as the certificate of incorporation is regarded as something quite apart from the process of registering in the department concerned and conforming to its regulations. The decision just reached makes it unnecessary for a Dominion company to secure recognition as a company by a province, but it will none the less have to obey the laws and regulations governing the line of business in which it is engaged. One of the provincial superintendents of insurance, discussing the decision, says: "The rights we possess are, in my view, to tax Dominion companies, to compel them to register for the purpose of supplying information, to impose penalties for failure to observe provincial laws, and to subject them to laws of general application, such as a *bona fide* law of mortmain or laws dealing with the form of contracts. These rights exist, I think, as against Dominion, foreign and provincial companies."

### The Insurance Field

The Ontario superintendent of insurance, V. Evan Gray, comments as follows upon the judgment:—

"The judgment in general seems to confirm and strengthen provincial jurisdiction in insurance matters, especially when it is read in connection with the judgment of the Privy Council in the insurance case of 1916, and the only conclusion I can form is that the province may continue to enact valid and binding legislation of a general character in reference to the making of contracts of insurance within the province, and make the same equally binding upon Dominion licensed companies as upon other insurers. The statements of the judgment quoted, which maintain the provincial authority as to contracts and taxation and mortmain, seem to be ample authority for this view. The confirmation of the provisions of the Ontario Mortmain Act seems to provide any further evidence required to indicate the complete liability of Dominion licensed insurance companies to comply with the general provisions of the provincial acts relating to contracts of insurance."

Regarding the insurance powers now exercised by the provinces, Mr. Gray expresses his personal opinion as follows:—

"In summary, from the standpoint of jurisdiction in insurance matters only, the present judgment of the Privy Council does, in my opinion, confirm and strengthen provincial jurisdiction, and it does not derogate in any important particular from the control or authority which the provincial legislature may exercise over all persons or corporations carrying on the business of insurance within the province so long as that authority does not discriminate against Dominion companies as such, and does not attempt to impose sanctions or conditions affecting the capacity or status of the Dominion licensed companies."

### Provincial Revenue

From the standpoint of provincial revenue, it is expected that a loss will be suffered, for there will be a greater tendency for companies to take out Dominion charters. Fees charged for the incorporation of companies will, therefore, be lost to the provinces.

While it is only certain clauses of the company licensing acts of Ontario, Saskatchewan and Manitoba that are declared *ultra vires* by this judgment, it is applicable to legislation which has been passed by most of the provinces since 1900. These acts, applied to foreign companies, including in that category not only companies incorporated by other countries, but those incorporated outside the enacting province and companies incorporated by the parliament of Canada. As regards the latter class, the Dominion authorities had consistently adhered to the view that such provincial legislation was *ultra vires*, and a number of provincial enactments had been disallowed on that ground.

In 1900 an act was passed by the province of Ontario, which at first imposed merely nominal requirements on Dominion companies. An amendment of this act in 1903, making the requirements for Dominion companies more onerous was challenged by the Department of Justice and an undertaking was secured that it would be repealed. Before the next session of the legislature a change of government occurred and the undertaking was not carried out. The Ontario Act having accepted this allowance in this fashion, the other provinces followed suit, and all except Quebec passed enactments following more or less closely the Ontario model.

### The John Deere Case

In 1911, at the instance of the Canadian Manufacturers' Association, a case, John Deere Plow Co. v. Wharton, was taken from the British Columbia courts to the Privy Council, which decided in favor of the Dominion, holding that the company in that case having been incorporated under a Dominion charter, could not be required to take out a license under the British Columbia Companies Act as a condition of exercising its powers in that province. The provisions of the British Columbia Act had been copied almost verbatim from the Ontario Act, but the Ontario authorities declined to recognize the British Columbia decision as binding, relying on some

small differences to establish a distinction. The government of Manitoba, whose act had been practically copied from that of Ontario, adopted a similar view. Several other provinces attempted by slight amendments to their acts to preserve their substantial effect.

The province of Saskatchewan, interpreting the John Deere decision to mean that Dominion companies must be treated without discrimination, combined its Foreign Companies Act with the Companies Act of Saskatchewan, and required Dominion companies to go through the same process of incorporation and licensing as local companies and bring them substantially under the provisions of the local company law. At the same time the province of Saskatchewan took the initiative (which no other province had previously undertaken) in enforcing the act by bringing proceedings against several companies.

#### Attitude of Supreme Court

The issue having thus been raised, test cases were also instituted at the instance of the Canadian Manufacturers' Association in Manitoba and Ontario. The decisions of the Canadian courts up to the Supreme Court of Canada were uniformly in favor of the provinces, with the exception of the decision of Justice Masten of Ontario, whose judgment is now sustained by the Privy Council. Dissenting judgments were also given by Justice Ferguson of Ontario and Justice Perdue and Justice Haggart of Manitoba. In the Saskatchewan cases the Privy Council reverses the unanimous opinions of eleven judges of the courts below.

The decision is that the company licensing and registration acts of Ontario, Manitoba and Saskatchewan are *ultra vires* and invalid insofar as they purport to affect Dominion companies. Their lordships hold that the acts in question are of the same general character as the act held to be *ultra vires* in the John Deere Plow case.

The argument against some of the provincial enactments was that these enactments sought under the guise of taxation to nullify the powers of Dominion companies. Their lordships say:—

"What cannot be done directly cannot be done indirectly. This is a principle which has to be kept closely in view in testing the validity of the provincial legislation under consideration as affecting Dominion companies.

"The methods by which the direct taxation is to be enforced may be restricted to the bringing of an action, with the usual consequences. It does not follow that because the government of the province can tax that it can put an end to the existence or even the powers of the company it taxes for non-compliance with the demands of the tax-gatherer.

"If the condition of taking out a license had been introduced, not so as to affect the status of the Dominion company, but simply for the purpose of obtaining payment of a direct tax for provincial purposes, or of securing the observance of some restriction as to contracts to be observed by the public generally in the province, or of causing the doing, by that public generally, of some act of a purely local character only under license, their lordships would have been prepared to regard the condition as one which it was within the power of the province to impose. Even then it would have been requisite to see that the provincial legislature was not, under the guise of imposing such direct taxation, really doing something else, such as imposing indirect taxation.

"Their lordships have come to the conclusion that the real effect of this act, as expressed or implied by its provisions, is to preclude companies of this character from exercising the powers of carrying on business in Ontario, to the same extent as in other parts of Canada, unless they comply with a condition sought to be imposed, that of obtaining a license to do so from the government of the province. . . . Their lordships are, therefore, of opinion that these provisions cannot be regarded as confined only to such limited purposes as would be legitimate, and that they are therefore *ultra vires*."

#### BUSINESS STILL QUIET IN WEST

Failures are Numerous—Winnipeg will Borrow for Schools—  
"Made-in-Winnipeg" Exposition Planned

(Staff Correspondence.)

Winnipeg, April 7, 1921.

THE weather locally and throughout the west is not at all favorable this week for spring work, but as soon as good weather comes, the farmers are reported to be all in readiness to get their crop in. Business is somewhat quiet in the west just now, and quite a number of failures are taking place at western points. Collections are also reported slow. In Winnipeg, business is only fair, but the outlook for building this year is brighter. A very successful building and construction exposition was concluded last week, which it is stated over one hundred thousand people visited.

Announcement is also made of a "Made in Winnipeg" exposition to be held in the Board of Trade Building from May 9th to the 14th. The output from Winnipeg industries in 1920, with an invested capital of \$97,698,825 and an estimated annual pay roll of \$24,308,982 was valued at \$120,092,013 according to officials of the above exposition. Statistics of the value of the output show the main manufacturers to have produced during the year goods as follows: Flour and grist mills \$14,487,398; slaughtering and meat packing \$6,236,236; butter and cheese \$2,905,648; bags, cotton, \$2,750,623; electric light and power \$2,335,911; lumber products \$1,818,567; bread, biscuits and confectionery \$1,816,671; printing and publishing \$1,785,001; malt liquors \$1,663,905; coffees and spices \$1,704,424; foundry and machine shop products \$1,493,567; furnishings goods, mens, \$1,147,456.

On the Winnipeg stock exchange, some movement is reported of local stocks, including the Union Bank, Standard Trust, and Home Investment, at good prices.

A shoe factory is to commence business in Winnipeg this spring, promoted by Geo. C. Lennox. Mr. Lennox has been engaged in business in Winnipeg as a jobber for some years, and has decided to give up this business and establish a shoe factory. A number of prominent Winnipeg people are interested in this new enterprise.

The two million dollar by-law of the Winnipeg school board was passed this week by a substantial majority. The money to be raised as a result of this by-law is for additional school accommodation, which is badly needed at the present time.

#### IMMIGRATION TO CANADA

The following is a statement of immigration to Canada, from April to February, 1920-21, compared with that of the corresponding months of 1919-20:—

	1920-21.			Increase over	
	British.	From U.S.A.	Other countries.	Totals.	1919-20.
April . . . . .	6,229	6,324	734	13,287	18%
May . . . . .	12,414	5,353	1,844	19,611	92%
June . . . . .	9,844	4,720	1,780	16,344	109%
July . . . . .	10,472	4,301	1,888	16,661	50%
August . . . . .	7,404	5,838	2,510	15,752	4%
September . . . . .	6,405	4,227	2,718	13,350	....
October . . . . .	7,602	3,945	3,305	14,852	3%
November . . . . .	4,695	3,262	2,890	10,847	34%
December . . . . .	1,968	2,110	3,105	7,183	14%
January . . . . .	987	1,751	1,515	4,253	1%
February . . . . .	1,380	1,936	2,012	5,328	16%
Totals . . . . .	69,400	43,767	24,301	137,468	29%

"Silver and Gold" is the title of a pamphlet just issued by Lorsch and Co., 56 King Street West, Toronto, dealing with the present situation and the Canadian mines.

# The Week in Parliament

Railway Situation Still Absorbs Attention—Dominion Life and Fidelity Insurance Bills Get First Readings—Several Railway Measures Under Way

(Special to *The Monetary Times*.)

Wednesday, April 6

Ottawa, April 7, 1921.

Thursday, March 31

In the House of Commons:—(a) Passing of Trade and Commerce estimates, including bounties on linen yarn spun in Canada, and on crude petroleum and \$120,000 to maintain Honorary Advisory Council of Industrial and Scientific Research.

In Senate:—Considered in committee amendment bills to Exchequer Court Act and Post Office Act.

Friday, April 1

In the House of Commons:—(a) Appointment of special committee to inquire into all matters pertaining to the fuel supply of Canada; (b) Estimates Trade and Commerce, especially item of \$1,175,000 for administration of Canada Grain Act, item of \$230,000 for Trade Commissioners and commercial agents, \$100,000 for development and extension of Canadian trade and various sums covering necessities of Weights and Measures branch, Gas and Electricity branch, mail subsidies and steamship subventions, and Patent and Copyright branch; (c) Second readings of following bills,—act respecting the Western Dominion Railway Co. and act to incorporate Standard Insurance Co.

In Senate:—(a) Second reading Canadian Bar Association bill; (b) Third readings Exchequer Court and Post Office Act amendment bills; (c) First readings of following bills:—Act respecting Dominion Life Assurance Co., act to incorporate Fidelity Insurance Co. of Canada, and act to incorporate Mayo Valley Railway Co., Ltd.; (d) Second readings of following bills,—respecting Montreal, Ottawa and Georgian Bay Canal Co., one to amend act to incorporate Gilmour & Hughson, Ltd., one respecting Oshawa Railway Co., one respecting Thousand Islands Railway Co., one respecting Kettle Valley Railway Co., one respecting Manitoba and North-Western Railway Co. of Canada, one respecting the Quebec Central Railway Co., one respecting Essex Terminal Railway Co., and one respecting the Ottawa, Northern and Western Railway Co.

Monday, April 4

In House of Commons:—(a) First readings bills to incorporate the Fort Smith Railway Co., bill to amend the Railway Act by putting vessels on inland waters under Railway Commission introduced by J. E. Armstrong of East Lambton, Mr. Caldwell's amendment bill to Fertilizer Act making it necessary to mark commercial fertilizer better to prevent fraud; (b) Special Parliamentary Committee appointed to inquire into question of Proportional Representation.

Tuesday, April 5

In the House of Commons:—(a) Discussion on alleged Grand Trunk Railway default in which it was announced that government was insisting on immediate vesting of management of Grand Trunk in government as well as handing over of preference and common shares pending decision as to value by Board of Arbitration; (b) First reading Canada West Indies Trade Agreement, 1920, bill; (c) Discussion resolution to adopt agreement made with France regarding customs privileges exchanged and bill introduced and read first time; (d) Second readings of following bills:—One to incorporate Fort Smith Railway Co.; (e) Decision to appoint special Parliamentary Committee to consider all questions germane to government railways and their maintenance in efficiency and restoration to solvency.

In House of Commons:—(a) Discussion status of Catholic National Unions versus International Unions and Minister of Labor's condemnation of former. Mr. Ernest Lapointe attacking minister's views on question; (b) Railway estimates.

In Senate:—Discussion trade of port of Quebec, and ways of advertising Canadian grain from United States ports to this port.

Railway Question Still Uppermost

As in other weeks the railway question again overshadowed other questions in its importance. The news that the government had been corresponding with Sir Alfred Smithers with the object of having the management of the road turned over to the Dominion government at an early date caused this excitement. Correspondence brought down Wednesday shows that the Dominion government refused to pay bonds falling due on April 1, or to extend the time of the Board of Arbitration if this were not done. At latest reports the Grand Trunk had unwillingly submitted to these proposals.

Special committees were appointed during the week to inquire into the fuel supply of Canada, proportional representation and the conduct and best methods of improving the government-owned roads as to service and finances.

War Loan Committee's Work

Replying to Hon. W. S. Fielding in the House on Wednesday, Sir Henry Drayton, Minister of Finance, stated that the committee of bankers handling the Canadian government bonds had purchased bonds to the par value of \$70,329,050 between January 22, 1918, and January 20, 1919, when the committee was disbanded for the first time. From August 16, 1919, when the committee was revived, until November 30, 1920, when it was again discontinued, the committee purchased bonds to the par value of \$229,206,650. During the first period of its existence the committee disposed of bonds to the par value of \$64,549,400 and \$190,259,100 during the second period. At the close of the first period, bonds with a par value of \$5,779,650 remained in the hands of the committee, and to par value of \$108,917,550 at the end of the second period.

At the close of the first period the bonds remaining in the hands of the committee were taken over by the Minister of Finance for sinking fund purposes at 99½ for 1922's and 99¾ for 1927's. These were the ruling market prices.

After returning the unsold bonds and crediting its accounts with interest earned by bonds on hand from time to time, the committee was able to show a surplus on operations of \$124,088. No interest was charged in the committee's books on cash advances by the Department of Finance from surplus loan funds, and which amounted to \$10,950,000.

During the second period the committee paid in \$293,529,680 for bonds purchased, and \$184,318,978 was received by the committee as the proceeds of sales. Since the close of the second period bonds to the par value of \$19,719,250, being the total accumulations of bonds of the taxable 1919 issue, had been placed in the hands of investors.

This left \$89,228,300 held by the Finance Department, all of which bonds were exempt from taxation and become available for sinking fund purposes. Accounts from the second period showed a surplus from operations of \$714,233 after meeting all expenses. This result was arrived at after taking into consideration interest earned on bonds held from November 24, 1919, to December 1, 1920, but disregarding any interest accruing after December 1, 1920, as well as interest amounting to \$2,140,864 accruing on bonds to the

par value of \$34,272,750, which were purchased between August 26, 1919, and December 15, 1919. Out of this the sum of \$1,160,308 was provided to reduce the book values of current account bonds to the closing bid prices of the Toronto Stock Exchange on January 22, 1921. During the second period \$107,000,000 was advanced to the committee by the Department of Finance. These advances were from Victory Loan balances on hand, and no interest was charged against them on the committee's books.

### LIFE UNDERWRITERS MEET IN WINNIPEG

Further Advances of State Insurance Forecasted—Taxation Criticized—Training of Life Insurance Salesmen

(Staff Correspondence.)

Winnipeg, April 7, 1921.

THE second annual institute of the Winnipeg Life Underwriters, jointly in connection with the University of Manitoba, was very successfully carried out this week in the western metropolis, with over two hundred delegates in attendance. Life insurance men from all parts of western Canada, as well as several from the east, were gathered together, and the addresses delivered and the practical discussion that took place, had great inspirational as well as educational value.

Courtney Barbour, general agent of the Equitable Life Assurance Society in Chicago, and Darby A. Day, also of Chicago, were the special speakers. On the opening day of the conference Mr. Barbour gave an address on "Life Underwriting," in which he emphasized the importance of the business. He mentioned the needs the various underwriting agencies are expected to conserve, and touched on the different phases of underwriting. He urged his hearers to appreciate the significance of their "tremendously important business as compared with other business and asked them to realize what was expected of them by reason of their being associated with it. We are associating with the biggest business operating in this land or any other land to-day that man can be related to," he said. Mr. Barbour described the family as a corporation, the head of which has a responsibility in underwriting the needs of the group. If he does not live up to his responsibility he is an undesirable citizen, Mr. Barbour declared. He pointed out to his hearers that they were charged with the responsibility of being able to analyse the needs that exist in their particular community, and to diagnose the situation that exists in each group with which they have contact in the development of man.

#### The Medical Viewpoint

Dr. E. W. Montgomery, medical director of the Sovereign Life, Assurance Co., gave a most instructive address at the luncheon on the opening day, in which he mentioned a number of points that field men should know in selecting prospective risks, including heights and weights, blood pressure, signs of tuberculosis, and methods by which field men would be able to determine whether applicants were suitable candidates or not. Some insurance companies, he said, are too selfish in refusing to give insurance to any but perfectly healthy people, but in spite of this he was confident that most insurance companies were altruistic enough to make arrangements for better benefiting the community.

In the afternoon of the second day of the institute, John A. Tory, of the Sun Life, Toronto, spoke on uniform legislation throughout Canada, covering matters relating to the insurance business. This, said Mr. Tory, was one of the aims of the Dominion Association. The association, he said, was desirous of having trained men in the field selling insurance, and with this object in view was seeking to establish training centres, or have the universities introduce courses for educating insurance men. Taxing life insurance premiums, Mr. Tory said, was taxing thrift, and he considered

that it was a wrong procedure to tax the savings of the people.

C. W. Rowley, of the Canadian Bank of Commerce, also spoke on insurance from the point of view of the banker, and indicated the relation which the purchase of insurance had to the borrowing of a customer. He explained the great value of what is known as business insurance, and instanced the case of a well-known United States business man who bought one million dollars worth of life insurance for the protection of specified business interests in the event of his death.

#### Nationalization

Professor Reginald Jones, of the department of economics at Manitoba University, in an address, raised the question of the nationalization of life insurance and the possibility that the present system might be replaced by a system of government control, under which insurance would be made compulsory. There can be little doubt that at least some approach to government insurance will be made in years to come. The state must care for the aged, and the only way in which this can be done is through a system of taxation. It is recognized that what the life companies must do is to improve the life insurance situation by lessening the cost of operation, and securing still better results for the public. If the companies continue to make progress in the future, as they have in the past fifty years, there is no doubt that these desired results will be attained.

The matter of institutional advertising was ably discussed on the last day of the institute by M. D. Anderson, of the Aetna Life, Winnipeg. Mr. Anderson outlined a plan of advertising that the Winnipeg Life Underwriters' Association have been carrying out during the past year. He stated that the managers of the Winnipeg branches of life insurance companies, and head offices located here, had contributed a fund amounting to \$4,000, which had been spent on a publicity campaign in the "Winnipeg Free Press," with very excellent results.

Mr. Anderson pointed out that the Dominion association were about to begin a plan of institutional advertising and would spend \$30,000 on a Dominion-wide campaign. Mr. Anderson felt that this amount was altogether too small, and thought that when the plan got under way, that the Dominion association would undoubtedly see the advisability of going in for institutional advertising in a much larger way, stating that \$130,000 would be more in keeping with the ideas of the Winnipeg association.

#### Law in Life Insurance

Travers Sweatman, K.C., of Winnipeg, at the closing session gave a very instructive address on "Law in Life Insurance," in which he touched on many points that field men are met with every day.

The sessions of the institute were ably presided over by J. E. Buchanan, of the Monarch Life, president of the Winnipeg Life Underwriters' Association. The banquet on the closing day was addressed by John A. Tory on "Life Insurance in Canada and its Possibilities for the Future." He referred to the two and a half billion of life insurance in force in Canada at present, and the thirty-three million paid out in Canada on war claims and the flu. He also referred to the wonderful progress that has taken place in life insurance in the last ten years, and how the field force of any company were its greatest asset.

Mr. Tory believed that the time is coming when the agents in the field will have to be educated life insurance salesmen. He firmly believes that the development of life insurance in Canada will be such that the past will fall into insignificance. Referring to the subject of state insurance, Mr. Tory believes that private companies can better handle the business of insurance than any party government such as we have at present, and that if the companies so manage their business and keep clean their affairs that public opinion would be with the private concerns as against state insurance.

### NATIONAL REVENUE AND EXPENDITURE

**D**URING the fiscal year which ended on March 31 ordinary revenue of the Dominion exceeded ordinary expenditure by nearly \$94,000,000. Despite the decline in customs and excise revenues noticeable in the last few months, revenue for the 12 months was \$451,366,029, as compared with \$380,832,507 in 1919-20. Ordinary expenditure in 1920-21 was \$357,515,278, in comparison with an ordinary expenditure of \$340,880,668 in 1919-20.

Revenue of the departments compares as follows:—

Revenue.	12 months to Mar. 31, 1920.	12 months to Mar. 31, 1921.
Customs .....	\$167,429,812	\$162,812,951

### CO-ORDINATION OF RAILWAY TRAFFIC

**O**NE of the points emphasized in a series of articles issued by the publicity department of the Canadian National Railways is co-ordination. A recent statement says:—

"Among the favorable factors that loom up in connection with the amalgamation of the Grand Trunk into the Canadian National System is the supplying of U.S. railway connections for the National System in which, as pointed out, the C.P.R. has had previously a marked superiority over the C.N.R. The Grand Trunk receives a much greater tonnage from U.S. railways than the C.P.R. does. The Grand Trunk will also supply in a large measure the proportion of high class freight that is badly needed by the National System and on which a long haul should enable it to pay some of its interest charges. It has a fine tonnage in merchandise and manufactured goods. The Grand Trunk provides in many respects what the National System previously lacked and only a reasonable time to allow normal peace-time development is required to give the National System all the tonnage required to produce earnings sufficient to cover its annual expenditures.

"Any one who does not believe that Canada can produce the traffic should move to another country, and anyone who thinks that Canada cannot produce men to administer honestly and capably the great railway properties that the Dominion government has acquired levels a criticism at the character of her citizenship that should be resented. Canada is not trying to create a government-owned transportation monopoly but proposes to protect her investments and those of the provinces, in a common-sense way, by the operation of the great railway system as a corporation would operate it for business profits, and without political interference. The problem in other countries has not been to get the railway men but to get men in politics who are statesmen, and who at the sacrifice of some temporary political advantage will keep their hands off the railways."

## SOMETHING ABOUT NATIONAL DEBTS

CANADA, with one-half the population, owes five times as much as Mexico. The "Mexican Review" (Washington), also points out that Australia, with one-third the population, owes four times what Mexico does. Argentine owes one-third more than Mexico, with one-half the population. Belgium owes seven times as much as Mexico, but has only one-half as many people. With about one-tenth the population, Ecuador owes one-fifth more than Mexico. Holland, with little more than half the population of Mexico, owes nearly three times as much. New Zealand, with but one-tenth Mexico's population, has a debt more than double that country's. Portugal has over three times Mexico's debt, with less than one-third the population. The newly erected state of Poland, with about the same population, has an indebtedness twenty times that of Mexico. Roumania, with about the same population within her new boundaries, owes ten times as much as Mexico. Switzerland, though her population is only one-third, owes about the same amount as Mexico. And just think of it, Great Britain, with less than three times the population, has a public debt almost exactly one hundred times as great. The only country so far to confess bankruptcy is poor little, broken Austria, which, with one-third the population, is saddled with a debt more than forty times as great as Mexico's, a proportionate indebtedness of one hundred and twenty to one. Why pick on Mexico?

## A BANK'S STATIONERY DEPARTMENT

SOME "Sidelights on the Stationery Department," are given in the latest number of the *Royal Bank Magazine*. The extent of this work in a large institution is shown by the fact that the department has an annual turnover of over \$700,000, and a staff numbering 18—ten in the office and eight in the warehouse. The cost of packing cases in 1920 alone amounted to \$7,000. Although the head office of the Royal Bank is in Montreal, its stationery department is located in Toronto on Colborne St., being a better distributing point, and also the centre of the manufacturing stationery industry of the Dominion. For purposes of distribution, the branches of the bank are divided into six districts—Maritime, Quebec, Ontario, Middle West, British Columbia and Foreign. Each is supplied twice a year, so that there is one division to be supplied every month. Requisition forms are distributed, filled in, showing quantities on hand and required by each branch, and then summarized by the stationery department, which is thus enabled to check off the requirements with the stock on hand.

Meeting foreign requirements presents special difficulty. R. M. Woollatt, who writes the above-mentioned article, describes these as follows: "Distribution of stationery supplies to branches in Canada presents no particular problem other than a smoothly running organization, but distribution to foreign branches bristles with difficulties and problems. It will be readily understood that this was a difficult matter during the war, but few of the staff know the real problems it actually did present. Foreign branches were very patient under the long delays which were bound to occur between the time the supplies were packed for shipment and the date of their arrival. It is necessary to furnish forms and books in a number of different languages and currencies for different branches, and every country has its own peculiar customs regulations in regard to packing, weighing, invoicing, etc., which have to be carried out to the letter. Latin-American countries are notoriously difficult to ship to. To further add to the difficulties of shipping, a considerable number of foreign branches cannot be reached direct from a Canadian port. In order to prepare a foreign invoice every class of merchandise has to be weighed separately, and the weights turned into kilos, as a specific duty is charged."

## NEW RAILWAYS NOT WANTED

INCREASING deficits on the National Railways does not seem to discourage new railway ventures. One of these is the proposed extension of the Temiskaming and Northern Ontario Railway from Cochrane to James Bay. As the *Pulp and Paper Magazine* points out, however, to build a railway on a foundation of pulpwood is a precarious undertaking. The freight on pulpwood is generally mentioned as the principal source of revenue. For some time it would be the only source of revenue. A generous estimate (or conservative exaggeration!) gives the amount of pulpwood that would be made available by such a road 38,000,000 cords. This means that 30 to 50 thousand square miles of wooded country would have to be served by the road. That calculation would assume that the road could be reached from all points from 50 to 75 miles on each side. With the principal rivers running parallel with the rails, it is difficult to see the probability of such a condition, especially in view of the very lavish distribution of muskeg over this area.

It is not considered good form in Northern Ontario to criticize this idea of railway extension. In fact a very prominent and clear thinking man in the district created quite a bit of feeling for suggesting that the possibility of profit to the road should be carefully estimated from an accurate survey before the government commit itself on the matter. That suggestion should certainly be followed. Hauling pulpwood will not support a railroad. What else is there in the country? If the idea is to open up farm land, miles and miles of land could be found, probably of better quality, along government roads already built and suffering this day for want of traffic. Why assume an avoidable and unnecessary debt?

"Men who advocate personal privilege in these days are social anarchists," said a temperance speaker in Toronto recently. The world of anarchists has lasted a long time.

\* \* \* \* \*

The Dominion government is now wondering if those who urged it into the policy of railway nationalization will desert it in the hour of public ownership's trial.

\* \* \* \* \*

Several life insurance companies are experiencing a decline in business compared with 1920. The experience of financial institutions will be the same as that of industry, though the effects are not met so quickly.

\* \* \* \* \*

Bonds should not be sent through the mail without being insured, especially as the cost of such insurance is very small. Out-of-town investors wishing to send bonds to investment houses in another city for sale can insure them in two ways. They can take them to their local bank, who will undertake to deliver the bonds to their destination, registering and insuring them, or they can notify the investment house that the bonds are being sent. The investment house will at once have them insured and deduct the cost of the insurance from the proceeds of sale. Insurance costs 10 cents per \$1,000 worth of securities represented.

\* \* \* \* \*

## RISE IN MONEY HURTS TRADE

Hungarian merchants who purchased foreign goods when the exchange rate on the kroe was at its lowest ebb are threatened with ruin, they told Finance Minister Hegedus on March 25 by the rapid rise in the value of the kroe from 500 to 250 to the dollar. "If you continue to improve our money we are ruined," they declared.

Merchants who purchased foreign goods when the kroe was practically worthless now are unwilling to cut down prices and the public refuses to buy at the old prices. Consequently business is at a standstill.

## To Investors

IF you wish to buy or sell Victory Loan or other bonds, we would remind you that our branches at Toronto and Montreal have departments especially organized for this purpose.

## PERSONAL NOTES

CHAS. J. BINMORE, after having served thirty-five years as treasurer of the Montreal Protestant School Board, has retired.

SIR THOMAS WHITE, has resigned as a member of Parliament for Leeds, in order to accept a position as one of the arbitrators on the purchase of the Grand Trunk Railway.

NORMAN B. STARK, formerly member of the Montreal bond house of N. B. Stark and Company, and more recently with W. R. Grace and Company, has joined the Montreal office of N. A. Macdonald and Company, bond dealers.

J. ARTHUR CONNORS, a representative of the United States Tariff Commission, was in Regina last week for the purpose of studying the agricultural situation in Western Canada. Among those on whom he called were the minister and deputy minister of agriculture and the Saskatchewan-Manitoba manager of the Canadian Co-operative Wool Growers, Limited. The purpose of Mr. Connors' visit to Canada at this time is to secure data in regard to the agricultural, fisheries and pulpwood industries and possibly other industries, the products of which are imported into the United States.

E. R. PEACOCK, formerly of Toronto, has been nominated to a seat on the directorate of the Bank of England. Mr.

Peacock is a native of Canada, having been born in Glengarry County, Ontario. He was educated at Queen's University and after graduating, became dean of Upper Canada College for a number of years. At the present time he is vice-president of the Dominion Securities Corporation, president of the Barcelona Light, Power, and Construction Co., vice-president of the Brazilian Light, Power and Traction Company, and trustee for the bondholders of the Mexican Light and Power

Company. For a number of years he has held a prominent position in London among financiers, and his appointment to the directorate of such an institution as the Bank of England is a recognition of his merits.

## OBITUARIES

PHILIP H. YAWMAN, president of the Office Specialty Manufacturing Company, Limited, Newmarket Ont., died at Rochester, N.Y., on April 5.

GERALD STUART FORBES, manager of the Danforth Avenue branch of the Merchants Bank of Canada, Toronto, died this week in Montreal. Mr. Forbes went to Montreal to stay with relatives, intending to rest and recuperate, but was forced to enter a hospital. The youngest son of the late Alexander Mackenzie Forbes, he was born and brought up in Montreal. He had been with the Merchants Bank of Canada in Toronto for the past ten years, and previously had served the bank in Quebec.

JACOB LEWIS ENGLEHART, late chairman of the Temiskaming and Northern Ontario Railway Commission, died in Toronto on April 6, in his seventy-fourth year, after an illness lasting five days. As a business man and philanthropist of the highest type, his name and deeds will long be remembered, particularly in Northern Ontario, where his best work was carried on. A pioneer in reality in Northern

Ontario, he was in his younger days a pioneer in business. Born in Cleveland, Ohio, on November 2, 1847, he received his education in the public schools of that city, and for a time was engaged in commercial enterprises there. In 1870 he moved to London, Ont., and was one of the pioneers to investigate the oil-fields of that section of the province. He organized the firm of J. L. Englehart and Company, which was the first concern to operate an oil refinery in Ontario. He sold his interest to the London Oil Refining Company, and was on the eve of returning to the United States when he purchased the Carbon Oil Company, which later became part of the Imperial Oil, Limited, of which Mr. Englehart became vice-president. In 1912 Mr. Englehart was elected a director of the Bank of Toronto. He was also president of the Crown Savings and Loan Association of Petrolia, and vice-president of the London and Western Trust Company.

## BANK BRANCH NOTES

The Imperial Bank has opened a branch at College and Shaw Streets, Toronto.

The Canadian Bank of Commerce is transferring its branch at East and Queen Streets, Sault Ste. Marie, to a new building on Queen St., opposite the end of McDougall St.

The Royal Bank of Canada intend to establish a branch at Lipton, Sask., this summer. The building is to cost \$10,000. Announcement has been made that the Bank of Montreal has purchased the Commercial Hotel property at Stratford, at the price of \$40,000. The bank plans to erect a new bank building.

The branch of the Bank of Montreal at Yonge and Wellington Streets, Toronto, will be merged with the main office, Toronto, on or about the 16th inst., after which date all business will be transferred to the latter office.

Angus McLean, of the Bank of Montreal staff, has been transferred to Brandon, as manager. He was formerly at Raymond as accountant.

E. Potter, of head office staff of the Sterling Bank, has been appointed acting supervisor of western branches, with headquarters at Winnipeg.

The Bank of Montreal announces the following: A. J. N. Willoughby appointed acting manager at Logan Ave., Winnipeg; A. G. Duncan appointed acting manager at Oak River, Man.; S. C. Bunting, manager at North Battleford, appointed manager at 365 St. Catherine St. West, Montreal; S. Hall, manager at Oak River, appointed manager at North Battleford, Sask.; R. Y. Inglis appointed acting manager at 2440 Park Ave., Montreal.

ANOTHER ACTIVE INVESTMENT MONTH

MARCH bond sales were not equal to the large total of a year ago, but were considerably in excess of the previous month, according to the record of *The Monetary Times*. The amount of securities absorbed in Canada last month, however, was much larger than in March, 1920, when United States investors took more than forty millions of the total of offerings. Thus far this year nearly 70 per cent. has been

sold in Canada. The following is a comparative summary of all borrowings for the month under review:—

	Mar., 1921.	Feb., 1921.	Mar., 1920.
Government .....	\$10,500,000	.....	\$14,850,000
Municipal .....	5,671,037	\$ 9,660,503	8,646,566
Corporation .....	7,425,000	.....	1,115,276
Railroad .....	.....	.....	24,000,000
<b>Totals .....</b>	<b>\$23,596,037</b>	<b>\$17,660,503</b>	<b>\$48,611,842</b>

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of March:—

Canadian Pacific Railway				
1921.		1920.		Inc. or dec.
March 7	\$3,255,000	\$3,244,000		+ \$ 11,000
March 14	3,176,000	3,130,000		+ 46,000
March 21	3,211,000	3,283,000		— 72,000
March 31	4,824,000	5,832,000		— 1,008,000
Totals	\$14,466,000	\$15,489,000		— \$1,023,000

Canadian National Railway				
March 7	\$2,049,345	\$1,690,099		+ \$ 359,246
March 14	2,229,596	1,625,485		+ 604,111
March 21	2,130,892	1,577,062		+ 553,830
March 31	3,087,907	2,868,680		+ 219,227
Totals	\$9,497,740	\$7,761,326		+ \$1,736,414

Grand Trunk Railway				
March 7	\$1,764,250	\$1,654,205		+ \$ 110,055
March 14	1,841,416	1,753,684		+ 87,732
March 21	1,750,890	1,854,767		— 103,877
March 31	2,559,630	2,817,276		— 257,646
Totals	\$7,916,186	\$8,079,932		— \$ 163,736

## CONDITION OF BUSINESS

Commenting on Montreal trade conditions during the past week, Dun's *Review* to-morrow will say: "The laying of the channel buoys is being actively prosecuted, and everything will be in shape for the season of ocean navigation by the beginning of next week, but the first trans-Atlantic liner will only reach here about the 25th inst. The St. Lawrence canal system is also ready for service. Country roads are in somewhat unsettled shape, but collections are well maintained, and the week shows a marked decline in failures, only six district insolvencies being listed, with liabilities of \$71,000. The late fine weather has been beneficial to the dry goods trade, inducing an increased flow of orders by mail as well as from travellers. Nothing new is reported in values, but there is still a shortage of some lines of staple domestic cottons. Woollen men still complain of slow business, but retail stocks of clothing are said to be showing steady diminution, and manufacturers in that line are anticipating better conditions. Grocery travellers are disposed to grumble over light orders, but there is steady buying from day to day and the aggregate of business is very fair."

Toronto conditions are reported as follows: "Wholesalers, with few exceptions, do not make comparisons of this year's sale total with that of 1920. To do so is unfair to themselves to their travellers and to their business. Figures recorded last year will be surpassed eventually, but just now it is usually more pleasant and reasonable to compare 1919. Some lines of merchandise are in very good demand, a much better tone prevailing among retailers after a dull post-holiday week. Prints and gingham are still scarce and substantial demand exists for marquisettes, foulards, etc.; the warm bright weather stimulating call for light stuff. Rush orders have been received for oilcloths and lineoleums. Woollens are not brisk. Some improvement is evident in men's wear and rain coats while practically all suppliers of ladies' apparel are busy. Manufacturers of whitewear occasionally have trouble procuring competent operators. Makers of children's and boys' clothing receive some good orders. The men's clothing trade brightened and prospects are a little more promising. There has been a most gratifying improvement in the boot and shoe trade and most Ontario factories are operating profitably."

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended April 1, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Apr. 1	9	17	1	3	0	5	0	0	0	36	9
Mar. 25	9	13	0	0	4	5	2	2	0	35	13
Mar. 18	6	17	4	0	5	2	0	0	0	34	..
Mar. 11	14	13	0	0	4	1	6	0	0	38	16

## WEEKLY BANK CLEARINGS

Bank clearings for the week ended April 7 are given below, compared with the corresponding week last year. Western figures are not available owing to storms:—

	Week ended		Changes.

## When Your Will is Read

After your death it will be a matter of importance to your heirs whom you have appointed as your Executors and Trustees.

If you have appointed this Corporation with its wide experience in estate management, which is financially responsible, and bestows careful attention on every estate under its care, to whom your heirs can go for friendly counsel at all times—they will have absolute proof that you had their best interests at heart when the Will was drawn, especially in the appointment of the Executors and Trustees to carry out its terms.

Consult us to-day regarding your Will.

All communications treated in strictest confidence.

## CO-INSURANCE AND USE AND OCCUPANCY

### Whether or Not Co-insurance Clause is Included Determines Size of Premiums—Rating and Fireproof Properties

"CO-INSURANCE, Use and Occupancy, and Other Important Phases of Fire Insurance," was the subject of an address by G. J. Malcolm, branch secretary of the General Accident, Fire and Life Assurance Corporation, before the Toronto Insurance Institute on March 17. In introducing his subject Mr. Malcolm said:—

"You all know what the Co-insurance Clause is, but it is a peculiar thing that many insurance men find it very difficult to explain, and there is quite a widespread idea that the clause has not only to be explained, but also to be justified. I do not know why this should be so except that it is pretty generally misunderstood, both in its underlying principles and in its operation. To understand it properly, it is no good analyzing it grammatically; we have to get down to 'rock bottom,' and 'rock bottom' in insurance means, of course, the need for adequate premium income, or, shortly, premiums.

#### A Question of Premiums

"It is obvious to the most untechnical person that if the insurance companies do not collect sufficient premium to cover their running expenses, their reserves, and, if they are lucky, make a small profit, in addition to paying their losses, then they cannot stay in business. It seems to me, however, that instead of remembering this fundamental fact, too much emphasis is laid on the question of rates, which, after all, is a secondary consideration, being only the most convenient way of assessing each assured by charging him a percentage of his insurance in order to arrive at the premium which he has to pay the insurance companies.

"When explaining the Co-insurance Clause I prefer to put the emphasis on the premiums that the companies must derive from the insurance carried, and for the following reasons:

"Although the fire companies cannot arrive at an accurate table of experiences, such as governs a life company's rate-making, yet by tabulating our experience we can arrive at a pretty fair idea of the amount of loss that any class of risk will show in a year. It is, therefore, theoretically, comparatively easy to state how much premium the companies must collect on that class of risk in order to enable them to pay their losses and carry on business, and come through with a small profit. From this it follows that, looked at from the insurance companies' point of view, the normal rate for any class of risk is really the co-insurance rate, for, assuming that each property owner is complying with the terms of the co-insurance clause, the co-insurance rate can be arranged to produce sufficient premium to enable the companies to show a profit. If, however, the majority of property owners prefer not to carry the Co-insurance Clause and elect to insure for only a nominal percentage of their insurable value, it is obvious that, as this will not make any difference to the amount of loss sustained on the class, but on the other hand will greatly reduce the total amount of insurance written, in order to obtain adequate premium out of this reduced amount of insurance, the companies have to increase the percentage charged to each assured. In other words, they have to put up the rate.

"Premium income is what we must have, and if the large majority of assured are underinsured then it will appear that each is paying more than his share of the total premiums, because his premium will bear a higher proportion to the amount of insurance he carries—but his rate is only larger because his insurance is smaller.

#### Adjusting the Rates

"We sometimes have rating committees attempting to adjust the rate (on the contents, say, of fireproof buildings), and to fix a graded scale of credits and increases proportionate to the amount of co-insurance carried. One such table that has recently been published takes the 80 per cent. co-insurance rate as the normal; if 90 per cent. co-insurance is carried the rate is reduced 5 per cent.; and if 100 per cent., or full co-insurance is carried the rate is reduced 10 per cent. On

the other hand, if the amount of co-insurance is less than 80 per cent. the rate is increased in a fairly rapidly rising scale, but in the opinion of our C. F. U. A. Rating Committee, the rate of increase is not nearly sufficient in the table I have in mind. I have not been able to find out the principle upon which the scale to which I am referring was built up, but the basic principle that must underlie all such attempts is what I have been trying to make clear above, viz., that a certain total of premium must be derived from policies covering on contents of fireproof buildings in order to cover all the outgo connected with such insurance.

"If 80 per cent. co-insurance is carried it is a fairly simple matter to strike the percentage that must be paid by each property owner, and you will note that the rule in Ontario is that every policy covering on fireproof property must carry co-insurance. The assured do not understand this, however, and think that we should be able to name a rate that would allow them to carry just sufficient to cover their anticipated loss in any fire, but they would not be any better off with such a rate as it would have to be high enough to produce the same premium from the reduced amount of insurance that the companies would have obtained from insurance subject to 80 per cent. co-insurance, and this is where the table to which I have referred seems to fall down.

"Our C. F. U. A. Rating Committee is of the opinion that if only 50 per cent. co-insurance is carried the 80 per cent. co-insurance rate should be increased at least 50 per cent., as against the 24 per cent. increase shown in the table, and if 20 per cent. co-insurance only is carried then the increase should be 300 or 400 per cent., as against 87½ per cent. in the table, while it is almost impossible to fix the rate for so small an amount as 10 per cent. co-insurance, as this is about the average total loss to be expected in fireproof buildings, and the increase of 200 per cent. shown in the table is absolutely absurd and would never begin to produce the necessary amount of premium. As a matter of fact in Ontario we do not favor the graded scale at all.

#### Fireproof Properties

"A little earlier I said that in Ontario every policy covering on fireproof property must carry co-insurance, but every decent rule has its exception, and this one has its exception in a kind of compromise. Instead of containing a Co-Insurance Clause certain policies can be made subject to a warranty that a certain fixed minimum amount of insurance will be carried, and you will notice that the object of such a clause is to ensure that the companies shall derive adequate premium from the risk, which, as I have just pointed out, is the true function of the Co-insurance Clause.

#### Penalties

"So much for the idea underlying co-insurance; but as regards the penalty part of the clause I must say I have never been able to understand where the difficulty comes in.

"It is true that the various legislatures, both here in Canada and across the line, have surrounded the clause with such a close network of solemn regulations that you are almost forced to think it must be a very dangerous element, but if you come to think of it, the real reason for putting a wire guard in front of the nursery fire is not to keep the fire in but to keep the children out. And 'the children' in this case is the poor dear assured, the public. In all business contracts except an insurance policy a man is supposed to read them before accepting them, and it is a cardinal first principle of any lawful contract that, if a consideration is granted by one party and accepted by the other, the special undertaking for which the consideration passed is not only absolutely binding on both parties, but is also thoroughly understood by both.

"An assured, however, is assumed by a paternal government to be congenitally incapable of understanding so abstruse a problem as an insurance policy, so, to protect him from the sharklike practices of the greedy companies, we are forced to use different colored inks and conspicuous rubber stamps all over our policies. Even the Judicial Committee of the Privy Council can't keep out of the game, but, like a good, kind great-grandfather, has to mumble a few words of warning.

## Money Is Worth More to You, Too

Lenders charge more interest on loans to-day. So why shouldn't you get more interest on your savings deposits?

You wouldn't refuse an increase in your wages, would you? Why, then, should your savings earn a less rate when you can get 4% for it?

The Union Trust Company will pay you interest at 4% per annum, compounded regularly. Come and open your account here. If you cannot conveniently call, open your account by registered mail. Deposits promptly acknowledged and withdrawals by mail accurately and safely dispatched.

Winnipeg, Man.; Regina, Sask.; Edmonton, Alta.

"Anyway, I am digressing, and my point is, that for a consideration the assured agrees to carry a certain percentage of insurance to insurable value of his property. If he is a wise man he immediately obtains the necessary cover in one or more regular insurance companies and when a loss occurs all he has got to do is to produce his policies and they will all contribute their share of the loss; if he is a fool, or a child, and willing to take a chance in the hope of saving a little premium, then he cannot grumble if he is asked to take the place of the insurance companies that might have had his risk, and is requested to contribute his pro rata share of any loss that may occur. It is really very simple, and the question for an assured to consider is not so much, 'How will the Co-insurance Clause affect me if I have a loss?' but 'Are the conditions of my business and my accountancy system such that I can readily arrive at the value of my property at any time and can thus be sure that I am carrying sufficient insurance?'"

#### Use and Occupancy

"I think that's enough about ordinary co-insurance, but we can pass easily on to Use and Occupancy if we remember that every properly drawn Use and Occupancy contract should have the principle of co-insurance implied in itself, although as you are well aware, the Co-insurance Clause, as such, is not expressed in so many words in a Use and Occupancy policy.

"And here let me sound a warning—there is no effect of co-insurance, either implied or otherwise, in any Use and Occupancy policy, however drawn, that omits the great equalizing factor, the limiting of the per diem recovery or indemnity to 1/300th (or 1/365th) of the full amount of the policy. I don't think I need enlarge upon this point, however, as it is one that is handled by every man that ever wrote upon the subject, and I want to be original in something.

#### A Recent Example

"There is a very interesting development of this principle, however, in a recent loss settlement in which only a few offices (and those chiefly in Montreal) were interested, and I should like to give you a short report on its chief items of interest. (It is not altogether a standard example, as the form of contract, while following closely the C. F. U. A. recommended form, contained a variation with regard to increased cost of working modelled on the English form.)

"The English form seeks to make it binding on the assured to use every means in their power to get back to full normal production again, either in the original premises, or in others found suitable, but as it is plain that such extra effort will entail possibly considerable extra expense, which it would be unfair to force the assured to carry themselves, the clause provides that: 'In this connection the companies undertake to pay to the assured their pro rata share of such sums as the assured shall necessarily pay for increase in cost of working.'

"After the fire occurred the experts employed by the companies and the assured decided that the factory and machinery could be put into running order in 130 days. The assured found, however, that they were able to rent and equip other premises which would put them in the position of carrying on their normal business immediately, and as a result the interruption of the assured's business actually only lasted a few days.

"The output of the new premises, however, was not as great as the original output of the destroyed factory. So far as the loss of net profits was concerned, however, the companies had to pay the reduction between the original normal and the new total in the new premises, which amounted to a reduction of 67 per cent. from the normal for twenty days, and a reduction of 18.35 per cent. from the normal for 110 days. The full normal daily profit prior to the fire was \$190.00, but the daily indemnity stated in the insurance policies was only \$80.00, so that the loss to the insurance companies was not total, but was 67 per cent. of the daily indemnity of \$80.00 for twenty days, and 18.35 per cent of the same figure for 110 days, and the assured was co-insurer for the difference."

## AN ADVERSE BALANCE OF SEVENTY-FIVE MILLIONS

### Twelve Months' Trade Figures Reflect This Result—Exports Down and Imports Up

TRADE figures for the twelve months ended February, 1921, indicate that Canada will close the fiscal year with an adverse balance, although the position in this regard will not be quite as anticipated some months ago. In recent months our trade has been maintained on a more equitable basis, but the tendencies which developed early in 1920 and continued right up until the crop moving season, resulting in the accumulation of a large excess of imports over exports, have not been largely offset.

#### Comparison With 1920

Over a period of a year, imports have increased about \$200,000,000, which advance is largely accounted for by larger purchases from the United Kingdom and the United States. In the case of the latter country, the increase in imports was accompanied by a similar increase in exports, but not so with the former. Britain's purchases from the Dominion have decreased by about \$185,000,000 in twelve months, but this was scarcely preventable in view of the discount of the pound sterling here.

Altogether exports have declined by about \$32,000,000. The United Kingdom and France show the most notable decreases, while the United States, Belgium, Italy and the Netherlands, chiefly, have become more valuable customers.

The following figures, prepared by the Dominion Bureau of Statistics, gives details of our trade with other countries, for the period mentioned, with comparisons:

## THE FINANCING OF PUBLIC UTILITIES\*

### Public Control a Stabilizing Factor—Reasons for Issue of Senior and Junior Securities—A Fair Apportionment of Capital

BY H. J. PRATT  
*Nesbitt, Thomson and Co., Montreal*

“THESE utilities, or as I prefer to call them, ‘servants of the public,’ are such an indispensable need of our daily life that it is impossible to conceive what fearful chaos and confusion would result if we were suddenly deprived of their service. In the past five years the treatment meted out to these services has been somewhat in the nature of that accorded to the mule whose nigger owner called him ‘Old Utility,’ because he had been kicked about from pillar to post, but still went on doing his ‘darnedest.’ It is hard to understand this attitude on the part of the public—an attitude, however, which I am glad to say is rapidly changing—for it is not the attitude of an individual to a tried and faithful servant whose welfare and interest we are ever ready to protect.

“It is true that in the past many abuses crept in with regard to the operation of public utility companies through over capitalization and inordinate profits, and the security holders’ interests seemed to be of more interest than the public’s. This condition of affairs brought into being regulatory commissions, which when they function properly, act as a balance wheel between the public and the companies—insuring a square deal for both—raising or lowering the rates in accordance with the cost of operation.

#### Control of Utilities

“This control taken in conjunction with the allowance of a fair return on the capital investment in the company’s property, not by any means in the amount of its securities, but rather in the replacement value of its property, brings about an ideal condition of affairs. It enables the company on account of the guarantee of a fair return on its invested capital, to go into the money markets of the world and borrow money freely for necessary extensions and improvements to its service, for nothing causes capital to be more timid than a feeling of instability about its investment. Under the above-mentioned regulations public utility securities should be second only to the basis of the securities issued by the municipality in which it operates.

“Regarding the financing of our public utility companies, and more particularly our water power developments, much has been done in the past by the issue of bonds which were a mortgage on the whole property. Just as a loan company will not lend more than, say 60 per cent. of the value of a piece of property, so it would seem to be the part of good financing to issue bonds up to, say 60 per cent., of the amount required, and to accomplish the balance by the sale of equal amounts of preferred and common stock which on the basis of \$1,000,000 capital would be \$200,000 each, of preferred and common. This places an equity of 40 per cent behind the bonds, and renders them more readily saleable, and at a better price than if this equity did not exist.

#### Bond Issues Necessary

“No doubt, financing by preferred and common stocks would be the ideal method of financing, as there are no sinking fund or maturing obligations to provide for, but as insurance companies, banks, and trust companies are not able legally to invest in these stocks, or in the case of preferred stocks till they have paid dividends for five years; and as they are large buyers of this class of security, it is necessary to issue bonds.

“These junior securities, on account of the extra risk involved, should be entitled to greater remuneration, and it is interesting to note that on a capitalization, say of one

million, allowed to earn 8 per cent., 60 bonds, 20 preferred and 20 common, after 6 per cent. on bonds and 7 per cent. on preferred, it would leave 15 per cent. for the common stock. As one authority has put it, it is only proper for a third security like common stock, with bonds and preferred ahead, to get a large return if the enterprise proves commercially feasible, because the common stock is the keystone of the arch. Unless common stock money can be obtained, and it cannot if the reward is not great enough for the risks involved, preferred stock money and bond money would be just that much harder to raise. Of course, the greater the equity behind the bonds the easier it would be to float a further bond issue, and at a better price.

“This method of financing has been successfully operated by several large companies in the United States through what is known as the customers’ owner ship campaign, whereby the users of light and power are induced to become stockholders, the idea of community ownership appealing strongly even to the most radical elements, as it approximates their ideas and principles, while it operates in the strongest way possible to disarm political interference, a burlgar which so many corporations have suffered from.

“It is hardly necessary for me to say that the development of our water powers is of paramount importance to the progress and economic development of our wonderful country and its wonderful resources. In every case where the harnessing of falling water has been accomplished, a beehive of industry and increased population results, and wealth and prosperity abound. It is a recognized fact that the progress of a city depends absolutely upon the supply of electrical power, and any obstacle placed in the way of retarding electrical development is a serious detriment to the interests of any community.”

## PUBLICATIONS RECEIVED

**A Study in Canadian Immigration.**—By W. G. Smith, associate professor of psychology, Toronto University. The Ryerson Press, Toronto, 406 pp., with index.

“At best, it is a chapter of tragedy and mismanagement,” is the concise remark of C. K. Clarke, regarding Canadian immigration, in a foreword to this book. This is in spite of the fact that \$6,779,832 was spent in a single decade in promoting and regulating the inflow of population. Professor Smith discusses the subject in an instructive and interesting way. After tracing the history of immigration into Canada, he goes fully into the immigration law of 1910 and the tide of the past decade. Then he proceeds to analyse the incoming population by racial groups and by defectiveness or criminal tendency. The book is well illustrated by tables.

**Moody’s Analyses of Investments—Governments and Municipals.**—Moody’s Investors Service, 35 Nassau St., New York, and Sun Life Bldg., Toronto; 1363 pp., \$15.

This volume, which is Part IV. of Moody’s Analyses of Investments, is uniform in size with the other parts, which are well known to Canadian dealers and investors; while the volume on governments and municipals is one of the newer branches of the work, it has already passed through several editions, the new one being revised and enlarged. It is divided into four sections, the first dealing with the United States government and its dependencies, the second with American states and municipalities, the third with the Dominion of Canada, its provinces and municipalities, and the fourth with foreign governments and municipalities. A complete index of all governments and municipalities analysed is included, and a system of rating similar to that adopted for other kinds of securities is used.

The Canadian section comprises 115 pages. Brief statistics of revenues, expenditures, debt and assets are given, but the feature which makes the book of special value to dealers and investors is the detailed list of securities, showing amount, rate of interest, maturity, where payable, rating, etc.

\*Part of an address before an Electrical Co-operative meeting in Montreal, March 23.

"With the crime wave that is now spreading over this continent we cannot take too many precautions to prevent the burglarizing of our vaults."

—Times.

## Robbed!

We never stop to consider the possibility of our own vault being robbed. We read about other vaults burglarized, money and valuable papers stolen and perhaps murder committed.

But, what would you think on opening your Bank or office in the morning to find burglars had broken into *your* vault during the night and stolen *your* money, notes, bonds and destroyed valuable papers.

With the crime wave at present spreading over the continent this might happen any night.

# Dillon

Burglar Proof  
VAULT LOCK

Defies every method of attack of the most experienced cracksmen. It automatically locks all the bolts on the door when the regular combination is destroyed. It stops the burglar at the vault door and guarantees absolute safety and protection for your valuables.

## MARCH FIRE LOSSES WERE HIGHER

Estimated at \$2,112,200, Compared With \$1,793,200 in March, 1920, and \$2,735,500 in February, 1921

**F**IRE losses in Canada in March are estimated by *The Monetary Times* at \$2,112,200, made up as follows:—

Fires exceeding \$10,000 .....	\$1,540,000
Small fires reported .....	72,200
Estimate of unreported fires .....	500,000
<b>Total</b> .....	<b>\$2,112,200</b>

This makes a total of \$7,085,600 for the first three months of 1921, compared with \$6,326,625 for the same period last year.

*The Monetary Times'* record for the past four years shows the following monthly losses:—

Month.	1918.	1919.	1920.	1921.
January ...	\$ 2,688,556	\$ 3,915,290	\$ 2,637,850	\$ 2,237,900
February ...	2,243,762	1,091,834	1,895,575	2,735,500
March .....	1,682,286	2,154,095	1,793,200	2,112,200
April .....	3,240,187	1,080,070	3,229,500	.....
May .....	3,570,014	1,785,130	2,001,819	.....
June .....	3,080,982	3,337,530	1,424,319	.....
July .....	3,369,684	1,118,377	1,426,850	.....
August .....	3,110,445	1,374,495	1,857,800	.....
September ..	917,286	1,940,272	2,480,485	.....
October .....	5,119,145	1,023,288	2,467,901	.....
November .....	1,059,580	2,339,870	2,769,800	.....
December .....	1,733,917	2,047,496	3,721,475	.....
<b>Totals ..</b>	<b>\$31,815,844</b>	<b>\$23,207,647</b>	<b>\$27,706,574</b>	<b>\$ 7,085,600</b>

## List of Large Fires

The following are the March fires causing damage of \$10,000 and over:—

London, Ont., March 1, business block, \$15,000.
Alexandria, Ont., March 3, business section, \$60,000.
Odessa, Sask., March 7, hotel, \$15,000.
Kitchener, Ont., March 9, business block, \$10,000.
Brandon, Man., March 10, business block, \$10,000.
Yarmouth, N.S., March 10, court house, \$20,000.
Winnipeg, Man., March 15, elevator, \$50,000.
Grande Prairie, Alta., March 18, store, \$100,000.
New Toronto, Ont., March 19, factory, \$15,000.
St. Scholastique, Que., March 19, buildings, \$18,000.
Brittania Beach, B.C., March 20, plant, \$750,000.
Cayuga, Ont., March 21, high school, \$30,000.
Blackie, Alta., March 23, business section, \$72,000.
Hamilton, Ont., March 25, warehouse, \$50,000.
Nanaimo, B.C., March 25, store, \$40,000.
Bathurst, N.B., March 26, hotel, \$25,000.
Ottawa, Ont., March 26, bake shops, \$100,000.
Coatsworth, Ont., March 27, store, \$20,000.
Capreol, Ont., March 28, business section, \$60,000.
Moncton, N.B., March 28, warehouse, \$80,000.

Among the causes reported were: Overheated stoves, 4; explosions, 2; spontaneous combustion, 2; sparks, 1; cigarette butt, 1; furnace, 1; lightning, 1; oil lamp, 1; hot ashes, 1; electrical origin, 1.

The following structures were destroyed or damaged: Residences, 19; buildings, 19; stores, 15; automobiles, 8; garages, 7; barns, 7; business blocks, 4; warehouses, 4; hotels, 3; post offices, 2; mills, 2; bakeries, 2; restaurants, 2; station, 1; theatre, 1; elevator, 1; court house, 1; farm building, 1; school, 1.

The following is a list of deaths from fires during March:—

Montreal, Que., March 2, clothing caught fire .....	1
Choisy, Que., March 15, clothing caught fire .....	1
Dundurn, Sask., March 16, burnt in building .....	1
Sault Ste. Marie, Ont., March 17, burnt in building .....	4

Toronto, Ont., March 19, clothing caught fire .....	1
London, Ont., March 26, burnt in bed .....	1
Clyde River, N.S., March 31, burnt in building .....	2

11

## Comparison of Deaths

The record of deaths from fire has been as follows:—

Month.	1914.	1915.	1916.	1917.	1918.	1919.	1920.	1921.
January .....	26	3	10	21	28	13	22	17
February .....	18	11	23	19	87	26	30	18
March .....	27	23	23	20	34	9	35	11
April .....	22	14	6	15	7	27	8	..

June .....	12	2	6	9	9	28	15	..
July .....	8	13	268	19	6	11	15	..
August .....	3	14	30	12	7	24	14	..
September .....	9	27	6	21	13	23	13	..
October .....	9	7	39	23	11	16	13	..
November .....	14	12	12	21	3	14	31	..
December .....	19	11	94	15	26	19	18	..
<b>Totals</b> .....	<b>175</b>	<b>142</b>	<b>531</b>	<b>207</b>	<b>241</b>	<b>225</b>	<b>227</b>	<b>46</b>

## GOVERNMENT CURRENCY

There was a further decline of some \$3,500,000 in Dominion government note circulation in February, 1921, as compared with the previous month. Since the peak was reached last November, there has been a decline of nearly \$37,000,000. At the same time there has been an increase in gold held against notes outstanding of more than \$3,000,000. In February the increase in gold over the previous month was about \$1,000,000. In February, 1920, the circulation was \$305,404,160, against which was held \$105,609,980 in gold, and \$151,064,375 in approved securities. Figures for the same month this year are as follows:

Provincial .....	\$ 27,743 25
Fractional .....	1,302,748 67
\$1 .....	16,356,001 50
\$2 .....	12,777,208 50
\$4 .....	37,825 00
\$5 .....	3,256,895 00
\$50 .....	3,800 00
\$100 .....	.....
\$500 .....	2,782,500 00
\$1,000 .....	5,066,000 00
\$500 Legal Tender Notes for Banks .....	70,000 00
\$1,000 " " " " .....	1,004,000 00
\$5,000 " " " " .....	204,440,000 00
\$50,000 " " " " .....	43,100,000 00
	<b>\$290,194,519 92</b>

## CONVEYANCE OF PROPERTY BY DEBTOR

## Right of Creditor to Lien on Property Not Affected When Transfer Made to Avoid Execution of Judgment

IN a recent appeal to the Saskatchewan Court of Appeal to set aside a transfer of land from husband to wife as a fraud upon creditors, the Court held that the conveyance from husband to wife of homestead property which, owing to its exempt character, is not immediately available in payment of a creditor's execution but which had it remained in the debtor's name would have entitled the creditor immediately to a lien thereon is a conveyance which, if the debtor has not sufficient property left wherewith to pay his debts, is a fraud upon creditors and will be set aside.

Justice Newlands gives the facts and his decision thereon in the following words:

## Judgment Entered Against Defendant

"This is an action to set aside a transfer from the defendant Phillip Bolley to his wife, Mary Bolley, of the N.E. 1/4-27-6-28-W2nd, as a fraud upon his creditors.

"The Advance Rumely Thresher Co. are execution creditors, having obtained judgment against the defendant Phillip Bolley on December 11, 1918, for the sum of \$3,850.99. The transfer in question was dated July 19, 1918, and was registered on the 20th. Two defences were set up: (1) that the transfer was made for valuable consideration, and (2), that the quarter section was the homestead of the defendant Phillip Bolley, and it being exempt from seizure the transfer of it was not a fraud upon creditors. The trial Judge found that the defence that the transfer was made for valuable consideration failed, and that there would therefore be a declaration that the transfer in question was a fraud upon creditors. He made no finding as to the land being the homestead of the defendant Phillip Bolley. The appellants do not on this appeal question the correctness of the Judge's finding as to the consideration; they rest their appeal entirely upon the fact that the land in question was the homestead of the defendant Phillip Bolley, and therefore the transfer of it to his wife was not a fraud upon his creditors.

"The execution of the plaintiffs when registered (under the Land Titles Act) would bind and form a lien and charge upon the land, but, while it remained Phillip Bolley's homestead, it could not be sold to satisfy such debt. Now in this case the land could not be sold under the plaintiffs' execution while it remained the homestead of the execution debtor; it is still his homestead, though standing in the name of his wife and it cannot be sold to pay such debt. Under these circumstances, is this transfer a fraud upon creditors?"

## Transfer Void as Regards Lien

"In *Roberts v. Hartley* (1902), 14 Man. L.R. 284, the same question was before the Court. In that province a certificate of judgment may be registered against a homestead and it would bind all his interest or estate in the same as though charged in writing under his hand and seal, but no proceedings could be taken to realize on the judgment debtor's homestead. The judgment debtor conveyed his homestead to his wife and the Court held that such conveyance should be set aside as a fraud upon creditors.

"In *Scheurman v. Scheurman*, the Supreme Court of Canada held, in effect, that a transfer by a debtor to his wife of exempt property was a fraud upon creditors because they refused to set aside such a transfer at the suit of the husband, because he had to set up that he conveyed the same to his wife to protect it against his creditors until a certain debt was paid.

"I have, therefore, come to the conclusion that the transfer in question is one that must be declared void as against the lien or charge that the plaintiffs have upon the land by virtue of their execution, and that the judgment should be amended accordingly. With this exception, the appeal should be dismissed with costs."

## PAYMENT ON NOTE TO BANK

In the Montreal courts a few days ago Beno Berman was condemned to pay the Bank of Nova Scotia \$3,607, with interest at the rate of 5 per cent. from August 6, 1920, and the costs of the action. Berman had refused to pay a note, alleging that after he signed it the words "add interest and exchange" were written as an interline on the document without his consent or knowledge, and that the note was obtained on false representation as to the quality of the wine bought, which made the basis of the note.

As to the second objection, Justice Mercier said that even supposing Berman's plea had any foundation it would be incumbent upon him not only to establish its truth, but he would have to do more before he could establish his defence. He would have to show that proper test had been made of the wine; that he served on the vendor his objection to the quality and inability to accept it, and having at the same time put the vendor in demeure to take it back and return to defendant (Berman) his note which he alleged he had obtained under false representations. With regard to the plea that material alteration had been made to the face of the note by writing the words "add interest and exchange" after defendant signed the instrument, Justice Mercier said this allegation was disproved by the evidence. Holding, therefore, that defendant had failed in each and every one of his pleadings, the court gave judgment for the bank for the amount claimed, and costs.

## EMPLOYMENT CONDITIONS IN CANADA

Dominion headquarters of the Employment Service of Canada, Department of Labor, reports that during the week ending March 5, 1921, there was a further decline in employment as reported by 5,345 firms who made returns showing that they had released 4,237 persons from their payrolls, a contraction of slightly less than one per cent. In 17 industrial groups there were increases in employment amounting to 1,013 workers, but in 16 groups there were declines aggregating 5,250 employees. These figures do not include loss of time due to industrial disputes. Firms in Nova Scotia, Prince Edward Island and British Columbia registered increased employment as compared with their returns for the preceding week, but in the other provinces there were substantial losses, the largest of which occurred in Ontario. For the following week increased activity was expected in British Columbia, while firms elsewhere anticipated that they would show further declines. There continued to be marked recessions from the employment level of the base week (January 17, 1920), the combined losses of 63,873 persons, or 13 per cent. in Ontario and Quebec again being the largest.

Since the preceding week there were general though rather slight increases in activity in saw mills, furniture, boot and shoe factories, in water transportation, and in the highway division of the construction group. The increases in the last named occurred almost entirely in Ontario, while the largest gains in water transportation were recorded in British Columbia. The most pronounced losses since the week of February 26, were registered by firms in logging, who had released 1,956 men from their camps, indicating that bush operations were practically completed. These reductions were widespread in application, but those in Ontario of 1,730 persons were especially noteworthy. On the other hand, there was some increase in activity in logging in British Columbia. Firms in the railway car, and crude, rolled and forged divisions of iron and steel, in the cordage, garment, and knit goods branches of textiles, in coal and nickel mining, railway transportation and construction, and wholesale trade registered marked reductions in staffs. While nearly all the provinces participated in these decreases, those in Ontario and Quebec were in most cases largest, except in coal mining, where practically all the losses occurred in Alberta.

## NEWS OF INDUSTRIAL DEVELOPMENT

**Steel Companies Awaiting Railway Orders—Canadian Car and Foundry Also Anticipating Business from this End—Nickel Plant at Deschenes Shut Down—Textile Mills are Closed**

CANADIAN railways are in need of equipment, but officials are disposed to move cautiously until trade takes a more definite turn. D. H. McDougall, president of the Nova Scotia Steel and Coal Company, in addressing the shareholders at the annual meeting, expressed his view on the subject. He said that there is no disposition on the part of the government to place orders for equipment, but the requirements of the railways are of such a character that any marked improvement in general business reflected upon transportation will, in all probability, cause the placing of substantial orders for track materials and rolling stock. Because of the reduced scale of steel manufacture there are substantial stocks of iron ore in the United States, in England and on the continent, and the immediate outlook for ore sales is not good. There are reasons to believe, however, that a market for Wabana ore will be found overseas at a not distant date.

Besides the steel companies, the Canadian Car and Foundry Company is anxiously awaiting the time when the railways will place orders for equipment. A substantial government order which the company has been expecting for some time has not yet materialized, and there is a need for new business, orders on hand being sufficient to keep the plants busy until May.

Every effort, however, is being made to secure export business, and, according to authoritative information, prospects in this respect are promising. W. W. Butler, president of the company, is at present in England, and negotiations for a large order of railway equipment are now in progress.

**Nickel Plant Closed**

The plant of the British America Nickel Company at Deschenes, Que., which, since it has been in operation during the last year and a half, has given employment to upwards of 500 residents of the district, has closed down. Intimation that the plant would likely close on or before the first of May was conveyed in a statement from the head offices of the company at Sudbury some time ago, and since then the Deschenes management has been gradually reducing the staff. By the close down about three hundred men are thrown out of employment. The company is retaining sufficient men at the plant to form the nucleus of an organization, as it is expected the mills will reopen just as soon as conditions on the nickel market warrant it doing so.

In this connection the company has issued a statement which says: "The present bad situation of the metal market has caused all the nickel manufacturing companies in Canada temporarily to considerably reduce their production or to shut down, but the refinancing scheme for British America Nickel Corporation, Ltd., which now has been adopted by the bondholders and the debenture stockholders, will place this company in a position to restart its operations as and when it may be found desirable. The company's mining properties, its different plants and refining processes have recently been reported upon most favorably by various groups of eminent, independent experts."

**Reduced Wages**

Commencing on April 4 last, the Gatineau Lumber Company brought into effect a wage reduction averaging about 15 per cent. to all Ottawa employees, some two hundred in number. The scale of wages will then be practically the same as in 1919, a general increase of from 15 to 20 per cent. having been given early in 1920. A prominent official of the Gatineau Company, Ltd., which includes both the W. C. Edwards Company and the Gilmour-Hughson Company, stated that the reduction in wages had been chosen in preference to the only alternative, viz., closing up both the yard and factory. Business throughout the winter, and particularly of late, had been

so slack that the company found itself unable to operate at the present scale of wages.

British Columbia pulp is being shipped to the Orient, and recently a shipment was made to Australia. All consumers are tied up with long-term contracts. The extension to Australia is interesting, because hitherto the mills have shipped only paper. No effort is being made to touch European markets.

Toronto meat packers, numbering about 1,600, went out on strike this week, protesting against a reduction of 12½ per cent. in wages. One of the officials, in commenting on the action of the employees, stated that in Chicago, the meat-packing centre of America, the men had signified their willingness to accept a reduction of eight cents an hour, and claimed that the reduction offered in Toronto did not exceed an average of seven cents an hour.

**Textile Mills Closed**

Two of the three branches of the Canadian Cottons, Ltd., at Cornwall, Ont., have closed down for a period of two weeks, trade conditions being given as the reason. These mills have been running four days a week for some time. The other local branch has been running full time all along, and will continue so while the other two are closed for the two weeks.

Announcement is also received from St. John, N.B., that the Cornwall and York Cotton Mills, Ltd., has closed down its plant, which has been running on a reduced scale of hours for some time. Some 550 employees are affected, and the shutdown will last for two weeks.

Victoria and Vancouver Island may shortly become the centre of the woollen industry on the Pacific Coast. The industrial committee of Victoria will at once take up with Edward Hodgson the matter of providing a site for a woollen mill here costing in the neighborhood of \$500,000. Mr. Hodgson wrote to the council, stating that he had instructions from one of the largest woollen manufacturers in Great Britain to find a factory site on the coast. "The people I represent," wrote Mr. Hodgson, "have their own sheep farms in Australia, and have very extensive business on the American continents. The proposed plant will cost about \$500,000. I am asked to get free site for the factory and exemption from taxation for a term of years."

**DOMINION GOVERNMENT SAVINGS BANKS**

Deposits in the Dominion Government Savings Banks in February, 1921, were only \$143,618, as compared with \$177,767 in the previous month. On the other hand, withdrawals decreased from \$534,832 in January, to \$109,059. The large withdrawals in January were the result of transfers to the Post Office Savings Banks. February details are as follows:—

## NEW INCORPORATIONS

Capital for Week Ended April 6 is \$13,095,900, Compared with \$14,850,800 Previous Week

Authorized capital of \$13,095,900 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended April 6, compared with \$14,850,800 for the previous week. A comparative summary by provinces is as follows:—

	Week ended March 30.	Week ended April 6.
Dominion . . . . .	\$ 1,950,000	\$ 3,365,000
Alberta . . . . .	665,000	.....
British Columbia . . . . .	1,113,000	3,940,000
Manitoba . . . . .	1,235,000	.....
New Brunswick . . . . .	4,900	.....
Ontario . . . . .	4,669,000	5,153,900
Prince Edward Island . . . . .	80,000	.....
Quebec . . . . .	4,984,900	637,000
Saskatchewan . . . . .	149,000	.....
Totals . . . . .	\$14,850,800	\$13,095,900

The following is a list of companies recently incorporated under Dominion charter, with head office and authorized capital:—

Somerville Paper Boxes, Ltd., London, \$500,000; International Toy Co., Ltd., Montreal, \$50,000; L. A. Ott Co., Ltd., Montreal, \$100,000; General Forgings and Stampings, Ltd., Merriton, \$900,000; Fix Shoe Co., Ltd., Montreal, \$90,000; Transcontinental Agencies, Ltd., Montreal, \$100,000; Hercules Truck Co., Ltd., Hamilton, \$100,000; St. George's Store, Ltd., Montreal, \$150,000; Canadian Evaporated Apples, Ltd., Toronto, \$150,000; Atlas Brick Co., Ltd., Toronto, \$315,000; Cook Power Co., Ltd., Toronto, \$200,000; Gulf Transportation Co., Ltd., Quebec, \$50,000; Marvel Shock Absorber Corporation, Ltd., Toronto, \$100,000; Ley and McAllan, Ltd., Montreal, \$10,000; York Oil and Gas Co., Ltd., Toronto, \$50,000; Beby and Aikins, Ltd., Ottawa, \$500,000.

## Provincial Charters

The following is a list of companies incorporated under provincial charter with head office and authorized capital:—

**British Columbia.**—Port Alexander Logging Co., Ltd., Vancouver, \$100,000; Coquitlam Athletic Club, Ltd., Port Coquitlam, \$5,000; Cranbrook Brewing Co., Ltd., Cranbrook, \$25,000; Globe Airless Tube Co., Ltd., Vancouver, \$200,000; Smith Mercantile Co., Ltd., Port Hammond, \$25,000; King's Cafe, Ltd., Vancouver, \$20,000; Edson Petroleum Co., Ltd., Vancouver, \$500,000; Korenaga Co., Ltd., Vancouver, \$10,000; Master Cement, Ltd., Vancouver, \$30,000; Collingwood Club, Ltd., Vancouver, \$10,000; Mount Bruce Mill Co., Ltd., Victoria, \$15,000; Lakeshore Mining Co., Ltd., Ainsworth, \$3,000,000.

**Ontario.**—Sterling Meat Co., Ltd., Hamilton, \$100,000; Edgewood, Ltd., Toronto, \$200,000; Inwood Farmers' Co-operative Elevator Co., Ltd., Inwood, \$14,900; Economic Ready-to-Wear Co., Ltd., Toronto, \$40,000; Northern Farmers' Co-operative Co., Ltd., Englehart, \$10,000; Mount Eagle Feldspar Co., Ltd., Toronto, \$1,000,000; Quaker Gasoline Co., Ltd., Toronto, \$500,000; Paddon Co., Ltd., Windsor, \$40,000; Cairncroft Dairy, Ltd., Brantford, \$40,000; E. Clavir and Sons, Ltd., Toronto, \$40,000; William Long, Ltd., Toronto, \$150,000; Keene Co-operative Shippers, Ltd., Keene, \$14,000; Honey Harbor Navigation Co., Ltd., Midland, \$40,000; Owen Sound Transportation Co., Ltd., Owen Sound, \$40,000; Brooke-Jarvis Estates, Ltd., Toronto, \$50,000; Canadian Chautauqua Institution, Ltd., Toronto, \$40,000; General Petroleum and Gas Co., Ltd., Toronto, \$500,000; Comfort-Kirkland Mines, Ltd., Toronto, \$1,500,000; Frontenac Paper Box Co., Ltd., Kingston, \$40,000; Union Star Cheese Factory, Ltd., Northcote, \$5,000; Oxford Farmers' Produce Co., Ltd., Woodstock, \$40,000; Lakefield Rink, Ltd., Lakefield,

\$40,000; Grimsby Arena, Ltd., Grimsby, \$50,000; Lake Erie Development Co., Ltd., Leamington, \$100,000; Merlin Farmers' Co-operative Co., Ltd., Merlin, \$10,000; Ardross, Ltd., Toronto, \$300,000; Clapperton's, Ltd., Toronto, \$250,000.

**Quebec.**—Noel et Cie, Ltd., Jonquiere, \$20,000; M. A. Bradshaw, Ltd., Montreal, \$49,000; La Construction Economique, Ltd., Quebec, \$75,000; Shur-Fit Costume, Inc., Montreal, \$99,000; Monroe Automobiles, Ltd., Montreal, \$275,000; Langley Langlois, Ltd., Mont-Joli, \$20,000; Le Promoteur d'Industrie, Ltd., Montreal, \$50,000; Ideal Pad, Ltd., Montreal, \$49,000.

## INSURANCE LICENSES AND AGENCY NOTES

A Dominion license has been issued to the National Union Fire Insurance Co. of Pittsburg, Pa., to transact the business of hail insurance, in addition to the classes for which it is already licensed.

Authorization has been granted to the Reliance Insurance Co. of Canada to transact in British Columbia the business of fire insurance. Chas. V. Wakely, special agent, Vancouver, is attorney for the company.

Calgary commissioners have amended their former sick and accident benefit recommendation for civic employees, by assuming the total risks for policemen and firemen, on account of their dangerous work. In tendering for this insurance, the various companies calculated on the basis of the city's payroll, which amounts to \$175,000. The lowest tender received, which is far below the next lowest tender, was from the National Benefit Assurance Co., which offered to furnish the policies at one per cent. of the above payroll, which would amount to \$17,500. The commissioners are recommending this company to the council. It was pointed out by one of the tenderers that the above offer was very low and that investigations had brought out the fact that in group insurance many companies tendered very low in order to land the deal, and they subsequently raised their rates within three or four months. A written agreement was given by the National Benefit Co. that no raises would be made unless in the case of a serious epidemic.

The group department of the Travellers Insurance Co. of Hartford, Conn., has been combined with the regular life and accident department. H. M. Jupp, special representative of the group department, is promoted to assistant manager of the life, accident and group department, for the Toronto branch.

C. A. Uren, after nearly ten years' service with the Metropolitan Life Insurance Co., in the (Toronto) Riverdale district, has been appointed inspector for the London Guarantee and Accident Co. He has been allotted the Toronto district east of the Don River.

Addition of four stories to the Great West Life Assurance Co. building on Lombard St., Winnipeg, is being considered by the board of directors. Increased business has caused congestion in the present building of four stories, according to E. C. Ferguson, the general manager.

A. G. Richardson, manager of the steamships department for Alloway and Champion, Winnipeg, has accepted a position with the fire and automobile department of the United Grain Growers.

Victor Archambault, formerly superintendent of agents of the La Sauvegarde Life Insurance Co., has been appointed Quebec City branch manager for the Imperial Life Assurance Co., and will start on his new duties immediately. The territory covered by Mr. Archambault in his new position will extend from the Maritime provinces to the limits of the Island of Montreal, which is under the control of E. J. L'Esperance, the Montreal manager. Mr. Archambault is well known in local insurance circles, having held the position of provincial manager for the Excelsior Life Insurance Co., among other responsible appointments.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to **\$11,500 for every working day** throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**Regina Had Revenue Deficit in 1920—Moose Jaw's Borrowing Power—Calgary Collections Improved Last Year—City Will Remit Arrears to New York Due on Treasury Bills—St. John Debenture Debt Increased—Melville Bondholders Reach Agreement**

**Melville, Sask.**—An agreement has been concluded between the representatives of the town and the committee of the town's bondholders, by which it is hoped the arrears and future payments of interest, etc., will be met. The \$54,000 arrears on interest, principal and sinking fund is to be funded and paid off in fifteen equal annual instalments. Various economies are promised by the town, and the whole settlement is to be submitted to the town council and to the bondholders for approval.

**St. John, N.B.**—There is an increase in debentures outstanding of \$596,894, according to the annual financial statement for 1920, the debenture debt at the end of the year being \$5,595,820. Against this there is a sinking fund of \$1,487,751, which shows an increase for the year of \$154,503.

Total capital assets of the city amount to \$8,544,984, and liabilities \$5,810,547, leaving a surplus of \$2,734,436, as compared with \$3,949,165 in the previous year.

The amount of money required under the total warrants sent to the assessors for 1920 was \$1,438,799. Tax collections both current and arrears, amounted to \$1,374,449, \$64,329 less than the money required, or a short collection of 4.47 per cent. The amount of debenture interest paid during the year was \$222,916. Interest on the debenture debt at December 31, 1920, stood at \$249,929.

**Regina, Sask.**—The city's revenue deficit for the year ending December 31, 1920, amounted to \$73,705, of which sum \$52,260 is attributable to losses on operation of the utilities, according to the annual report of the city auditors. The gross expenditures for the year in operating the civic machine totalled \$995,138, while the total tax levy available for general municipal government was \$921,433, the difference representing the deficit for 1920.

The expenditure column includes provision for the payment of \$25,301 as last year's proportion of an accumulation of old deficits, up to and including 1914, which the city is now providing for in annual instalments from the general tax levy. There is a balance still outstanding on this account of \$78,851.

Gross bonded debt at the end of December, 1920, stood at \$11,150,255, according to other figures made public by the city auditors. This means a per capita debt for every man, woman and child in Regina of \$278.75. The total amount which has been spent by the city on capital account for improvements, such as pavements, sidewalks, sewer and water, and municipal buildings, etc., is \$14,946,700. Against this the gross bonded debt amounts to \$11,150,255. The total value of all assets is \$16,787,819, while the capital liabilities amount to \$13,153,821, leaving a surplus amounting to \$3,633,997.

**Montreal, Que.**—In accordance with the bill passed by the legislature, the Administrative Commission has appointed seven aldermen and the city comptroller to be members of the Metropolitan Commission. These appointments will remain effective until the new city council, which is to be elected next autumn, appoints the permanent representatives of the city of Montreal for the ensuing two years. When the other municipalities appoint their representatives, and when the necessary organization for the enforcement of the law has been completed, the Metropolitan Commission will begin its important work of exercising financial control over the borrowing powers of the municipalities which are in this league or Montreal island cities.

The project for a Metropolitan Commission is one of the recommendations of the Montreal Charter Commission, which was assisted in the work by the representatives of Westmount and Outremont and other municipalities. This pro-

ject has no relation whatever with any annexations of municipalities to Montreal. But the Metropolitan Commission, according to the intention of those who promoted it and got it adopted by the legislature with amendments, will regulate the capital expenditure for which a loan is required, as any interested municipality must obtain the permission of the commission for such proposed expenditure.

**Moose Jaw, Sask.**—Interesting figures as to the borrowing powers of the city were presented to the city council last week by City Commissioner G. D. Mackie. The statement shows that the borrowing powers on March 15 totalled \$269,835. Under the provisions of the city act the city is entitled to borrow up to 20 per cent. of its taxable assessment, but for the purposes of arriving at the debt of the city the city is entitled to deduct from the gross debt at any time the following: Sinking fund, debentures issued under authority of the Secondary Education Act, debts incurred for local improvements, property owners' share.

In the case of the city of Moose Jaw the gross debt is \$6,092,901, less \$978,387 for sinking fund, \$141,760 for secondary education and \$779,883 for local improvements, owners' share or a total to be subtracted of \$1,900,032. This makes the net debt of the city \$4,192,869. The taxable assessment of the city on March 15 was \$22,663,522, and less 20 per cent., \$4,532,700, or a borrowing power of \$339,381.

It is explained by Mr. Mackie, however, that the city will acquire property this year to the assessed value of \$350,000, and as this property is not subject to taxation, it should really be deducted from the assessment in order to arrive at the absolute borrowing power of the city. When this is done the taxable assessment is reduced to \$22,313,522, 20 per cent. of this figure is \$4,462,704, and the borrowing power, therefore, is \$269,835.

**Calgary, Alta.**—An improvement of 1.27 per cent. in the total collections of arrears and current year's taxes in 1920, is shown over the same collections in 1919, according to Acting-City Treasurer F. S. Buchan. The collections for 1920 were: Arrears, \$793,500, and current year's taxes, including general special and business taxes, \$2,917,765. The 1919 figures were: Arrears, \$824,043; and current taxes, \$2,443,988.

The percentages of collections for 1920 were: Arrears, 18.84 per cent.; current taxes, 71.44 per cent.; total, 44.74 per cent. of collectible taxes. The corresponding percentages for 1919 were: Arrears, 20.60 per cent.; current, 69.49 per cent.; and total, 43.47 per cent., which gives the 1920 collections a gain of 1.27 per cent.

In spite of the high rate of exchange existing between Canada and the United States, the city finance committee has decided to forward \$100,000 of the \$360,000 due to Spitzer-Rorick and Co., on the \$1,500,000 treasury bill issue, to New York, as soon as their agent, J. R. Easton, has secured permission from New York to proceed in this matter in accordance with their previous offer to bear one-third of the rate of exchange. Arrangements will be made later for remitting the remaining \$260,000, which will probably be sent over in instalments every three or four months or so. The city had previously asked the Spitzer-Rorick company to allow it to keep the money in this country in trust during the current high rate of exchange, but Mr. Easton, who waited upon the committee, informed them that, as his company had practically all of the notes on its hands, they were desirous of getting their money as quickly as possible.

The above \$1,500,000 was loaned to the city against outstanding arrears of taxes amounting to \$3,250,000; and against those arrears collected up to the present time there is due to Spitzer-Rorick and Co. approximately \$360,000.

# Government and Municipal Bond Market

Ontario Sold Another \$4,000,000 of Treasury Bills—Victory Bonds Continue Fairly Active—Prices of Short-Term Maturities Improved, but Other Issues Moved Lower—A Good Number of Western Municipalities in the Market for Funds—Quebec Secured Its Loan on 6.12 Per Cent. Basis

THERE was a lull in activity in the government and municipal bond market during the past week for the first time since the beginning of the year. Ontario municipals are not making their appearance in such large numbers, although there are many western municipalities in the market for funds. Quebec City paid about 6.12 per cent. for its loan, which rate is consistent with recent prices secured by municipalities in the province. Last year the city made three loans, and in April received par for 6 per cent. bonds.

As far as the investment situation is concerned, the quick absorption of the \$10,000,000 issue of Ontario treasury bills is not very significant, for such notes will find a market where bonds maturing in years would not. It was considered that the plan of the provincial treasurer in issuing notes was a wise one. In the first place, the market may have improved sufficiently in six months to enable the province to make a gain on the whole proposition, although the treasurer is taking a chance on this score. The chief reason, however, is that so many Ontario bonds have been offered of late that the people are looking for a change. Consequently, it would take the dealers longer to distribute another issue just now, and would cost more, and the bond houses indicated this in their bidding.

Victory bonds continue fairly active, with prices of the short-term issues firmer. Prices for the long-term bonds moved lower, however. The following figures illustrate the recent trend of prices:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 . . . . .	98	98½	97%	98%	98
1927 . . . . .	97	97½	97	97%	97
1937 . . . . .	98	99%	98%	99½	98%
1923 . . . . .	98	97%	97	98½	97
1933 . . . . .	96½	98%	98%	98	97
1924 . . . . .	97	96%	96	96%	96
1934 . . . . .	93	95	94%	94%	94½

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Nokomis, Sask. . . . .	\$ 20,000	8	15-instal.	.....
Craik, S.D., Sask. . . . .	35,000	..	20-instal.	Apr. 9
Burlington, Ont. . . . .	48,403	6	30-years	Apr. 11
Aurora, Ont. . . . .	27,060	5½	20-instal.	Apr. 11
Kamsack, Sask. . . . .	13,400	7	15-instal.	Apr. 15
St.-Marie-de-Sayabec, Que. . . . .	11,600	..	20-years	Apr. 18
Vermillion, Alta. . . . .	27,000	6½ & 7	20-instal.	Apr. 18
St. Boniface, Man. . . . .	273,233	5 & 6	Various	Apr. 25
Rockwood R.M., Man. . . . .	70,000	6	30-instal.	Apr. 28
Peace River, Alta. . . . .	10,000	6	5-instal.	.....

**Burlington, Ont.**—Tenders will be received until April 11, 1921, for the purchase of \$48,403.77 6 per cent. 30-year debentures. J. S. Allen, town clerk.

**Aurora, Ont.**—Tenders will be received until April 11, 1921, for \$27,060 5½ per cent. 20-instalment debentures, the proceeds of which will be used for local improvements, good roads and sewers. C. A. Petch, town clerk.

**Peace River, Alta.**—The town is asking for offers on \$10,000 6 per cent. 5-instalment debentures. Proceeds of the

issue will be used for construction of sidewalks and bridges. No definite date is set. W. J. Doherty is secretary-treasurer.

**St. Boniface, Man.**—Tenders will be received until April 25, 1921, for the purchase of \$273,233 5 and 6 per cent. debentures maturing in 10, 15, 20 and 30 years. Principal and interest is payable in Canada and London, England, and the proceeds of the issue will be used for bridge and waterworks. (See advertisement elsewhere in this issue.)

## Debenture Notes

**Stouffville, Ont.**—Ratepayers have defeated a by-law to raise \$12,000 for a new municipal skating rink.

**Sarnia, Ont.**—The council has passed a by-law authorizing the raising of \$130,000 for the new collegiate and technical school.

**Stouffville, Ont.**—Citizens will be asked to vote on a by-law on April 4, authorizing the raising of \$12,000 for a municipal rink.

**Kamloops, B.C.**—The municipal department of the province has authorized the city to issue \$18,000 7 per cent. 15-year school debentures.

**Winnipeg, Man.**—Ratepayers have passed a by-law authorizing the Winnipeg School Board to raise \$2,000,000 for a two-year building program.

**Victoria, B.C.**—All tenders on the \$244,502 6 per cent. debentures of various maturities, were considered too low when opened on April 4, and the matter was postponed.

**Sandwich, Ont.**—Council has passed a by-law providing for the issue of debentures to the amount of \$5,900 for the purpose of purchasing a school site. E. R. North, clerk.

**Windsor, Ont.**—Council has passed a by-law providing for the issue of debentures to the amount of \$475,230 for the purpose of constructing a sixteen-room school building. M. A. Dickinson, clerk.

**Trail, B.C.**—A certificate of authorization has been issued to the city by the municipal department of the province for \$37,000 7 per cent. 20-year waterworks debentures. Another certificate for \$5,000 7 per cent. 20-year park improvement debentures has also been issued.

**Regina, Sask.**—Approximately \$60,000 will be required to provide for the proposed capital expenditures for the electric light and power department for this year, and a further \$40,000 to cover over-expenditures of last year. This will necessitate the issue of debentures for about \$100,000.

**Brantford, Ont.**—The city council has passed by-laws providing for the issue of debentures for the sum of \$80,000 for extension, improvements and addition to the Brantford Municipal Railway, and for the issue of debentures for an additional sum of \$40,000 for the construction of the St. Paul's Ave. subway.

**Taber, Alta.**—The Taber irrigation system has been taken over from the C.P.R. by the district, and the bonds, amounting to \$272,000, have been handed over to the company by the board. The Taber irrigation bonds are 6 per cent., and interest is payable annually on the first of August. The bonds can be obtained in \$1,000 lots, and local investors are given the opportunity to subscribe. Investments in the bonds can be arranged through the office of the board at Taber.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from March 19 to 26, 1921:—

**School Districts.**—Leross, \$5,000 8 per cent. 10-instalments; Loyal, \$4,700 8 per cent. 15-years annuity; Arborfield, \$1,500 8 per cent. 10-instalments; Penile, \$800 8 per

cent. 10-years annuity; Rexall, \$1,200 8 per cent. 10-years annuity; Landrose, \$4,000 8 per cent. 10-years annuity; Wolf Hill, \$800 8 per cent. 5-years annuity.

**Regina, Sask.**—The Local Government Board has declined to give the city sinking fund permission to purchase as an investment city cyclone repayment debentures totalling \$55,000. The by-law authorizing the issue of these debentures to provide for repayment to the government of the amount named was passed at a recent meeting of the city council. They were to be drawn, bearing interest at rate of 7 per cent. It was decided that the only course left was to place these debentures on the open market, and for this reason a motion was adopted calling for an amending by-law, making the interest rate 6½ per cent.

**Toronto Township, Ont.**—Tenders will be received until April 12, 1921, for the purchase of \$35,000 6 per cent. 30-year debentures. Chas. H. Gill, clerk, Dixie, Ont.

#### Bond Sales

**Meaford, Ont.**—The town has sold \$85,000 debentures to local people to yield 6½ per cent., J. S. Wilson, treasurer, tells *The Monetary Times*. The issue was for construction of good roads, and was oversubscribed in about ten days.

**Ontario.**—The province disposed of another \$4,000,000 of 6 per cent. treasury bills, maturing in six months, this week, to the same syndicate which purchased the \$6,000,000 issue, mentioned in these columns last week. The price was the same, namely, 99.53, which is on a 6.98 per cent. basis.

**East St. John School District, N.B.**—The following 6 per cent. serial bonds have been purchased by J. M. Robinson and Sons, being the balance of an issue of \$40,000 made last fall: \$1,600, due August 1, 1941; \$1,600, due August 1, 1942; \$1,600, due August 1, 1943; \$1,600, due August 1, 1944; \$1,600, due August 1, 1945.

**Chatham, Ont.**—In writing to *The Monetary Times* regarding the recent local issue of debentures, T. E. Cottier, city treasurer, says: "Early in March an issue of debentures for waterworks extensions, amounting to \$80,000, was offered for sale locally. These debentures were for a period of from one to fifteen years, bearing 6 per cent. interest, and were offered to the public at par. In addition to this issue, we also offered for sale \$10,500 6 per cent., ten-years, for extensions to McKeough School, and all of these debentures have now been disposed of without any cost to the city whatever in the way of commissions, advertising or brokers' fees." Chatham is one of the pioneers in selling bonds locally, and has always been particularly successful when making domestic loans.

**Saskatchewan.**—The following is a list of 8 per cent. debentures reported sold from March 19 to 26, 1921:—

**School Districts.**—Deer Valley, \$3,000 10-years, Natika, \$4,000, 10-years, Grainland, \$5,800, 15-years; Nay and James, Copeland, \$1,700, 10-years; Regina Public School Sinking Fund, Regina. Grand Coulee, \$7,000, 15-years; G. T. Smith, Regina. Arroya, \$1,000 10-years, Kempton, \$700 10-years; C. C. Cross and Co. Coteau Hill, \$3,000 15-years; H. J. Birkett and Co.

**Rural Telephones.**—Tetlock, \$3,500 15-years, Merrill, \$13,900 15-years; Harris, Read and Co. South Melfort, \$21,000 15-years; H. J. Birkett and Co.

**Joliette, Que.**—An issue of \$47,000 6 per cent. 10-year bonds has been disposed of to a local purchaser at 99 and interest, which is on about a 6.14 per cent. basis. Tenders received were as follows:—

Hanson Brothers .....	96.16
Nap. G. Kirouac .....	97.27
Crédit Anglo-Français, Ltée .....	97.34
A. E. Ames and Co. ....	97.577

A. E. Ames & Co. ....	98.29

#### REPORT ON ONTARIO INSURANCE

In the report of the Ontario superintendent of insurance, giving figures of the year 1919, which has just been submitted to the legislature, it is stated that some changes in the form of return obtained from companies is contemplated, with a view to more uniformity among the provinces. Reference is also made to the Masten report, and to the revision of the Ontario Insurance Act, on which the department is now working. The proposals regarding insurance commissions, and the subsequent negotiations with the companies and agents, are reviewed, and it is stated that at a meeting of the Canadian Fire Underwriters' Association held in Montreal on February 14, the proposals of the department for the regulation of commissions and for the reduction of rates were rejected.

#### TRAVELERS COMPANIES OF HARTFORD

A big year was experienced by the Travelers Insurance Co. and the Travelers Indemnity Co., of Hartford, Conn., in 1920. New life insurance paid for amounted to \$639,829,682, an increase of \$126,848,555 over the previous year. The life insurance in force now amounts to \$1,576,338,993, a gain of \$422,115,258.

The total cash income of the two companies, including all lines of business, and the income from investments, amounted to \$95,188,727, an increase of \$15,671,552 over 1919. The total premium income showed a gain of \$14,405,-839. Reserves for the protection of policyholders increased \$24,173,658 to \$184,721,450, while total payments to policyholders amounted to \$272,614,998, a gain of \$4,903,640.

Total assets of both companies amount to \$203,433,330, an increase for the year of \$26,972,149. When these figures are compared with years gone by, the enormous growth which has taken place will be seen. In 1870 there was no Travelers Indemnity Co., and the assets of the Travelers Insurance Co. amounted to \$1,588,588. In 1910 the assets of the two companies stood at \$76,954,520, and now they are at the figure given above.

The seventh annual meeting of the Toronto Bureau of Municipal Research was held on March 31. The balance sheet shows that for the year ended February 28, \$25,552 of the total revenue of \$33,222 came from the Federation for Community Service, while subscriptions amounted to only \$1,280. The expenditures totalled \$31,575 and \$1,156 was added to provision for contingencies, leaving a surplus of approximately \$490 for the year.

## CORPORATION SECURITIES MARKET

Canada Steamships Features Trading on Canadian Exchanges—Laurentide Power Company to Issue Bonds—British America Nickel Bondholders Approve New Financing

**B**UT for two factors, the Canadian stock markets during the past week led a dull and uninteresting existence. There was still that lack of news which influences the development of buying by the public, while on the other hand there was very little to excite the bearish element.

The lethargy of the market, however, was interrupted by a break in Canada Steamships, both preferred and common. Nobody cared to say with certainty the real reason for the decline, but undoubtedly the expected new financing was the foundation of it all. The opinion was expressed that the preferred dividend was in danger, but a statement from J. W. Norcross, president, set at rest any anxiety in this regard, and the sentiment towards these stocks greatly improved.

While this action on the part of Steamships spread to other sections of the market, an improved trend in some traction issues failed to be effective outside of that group. Duluth and Twin City were the most prominent, and substantial gains were made. Progress is being made with legislation in Minnesota which, it is claimed, will brighten the future of these two companies. A bill before the legislature leaving rates in the hands of the Railroad and Warehouse Commission, instead of a vote of the electors, is expected to become law shortly. Winnipeg Railway responded to the rates decision by the Manitoba Court of Appeal in favor of the company.

As regards Wall Street, the events there were hardly of the nature to inspire a different feeling here. Call money dropped to 5 per cent. on the exchange, but this did not mean a great deal, for the market is waiting for something in the way of actual events in general business to determine its opinion.

Trading for the week resulted in the turnover of listed stocks on the Montreal exchange of 29,927 shares, as compared with 25,300 in the four days previous, while in Toronto the figure was 14,974, as compared with 6,275. Bonds changed hands to the extent of \$1,124,200 in Montreal, as against \$860,810, while the turnover in Toronto was \$804,800, compared with \$740,600 previously.

Shareholders of Canadian Woollens, Ltd., have been advised of the passing of the quarterly dividend on common stock, which was at the rate of 5 per cent. per annum. Dividend on this stock began in September last, the company having been organized in 1919. In the circular to shareholders, it is stated:—"In view of the marked period of readjustment through which all textile industries are passing, with a considerable falling off in business and drop in values, it is considered in the best interests that the company's reserves during this period should be carefully conserved. They have, therefore, deemed it wise to discontinue payment of the dividend on the common stock for the time being. The company is in an excellent position both financially and physically, and with the return to normal trade the company should be able to look forward to a bright future."

## Laurentide Power Bond Issue

An issue of \$1,500,000 general mortgage bonds of the Laurentide Power Co., has been sold to the Sun Life Assurance Co. of Canada on a basis costing the power enterprise slightly under 7½ per cent. The securities, which bear interest at the rate of 7 per cent. per annum, mature in 1936, and are guaranteed as to interest and principal by the parent concern, the Laurentide Co., Ltd., which owns \$7,200,000 of the outstanding common stock of the power concern amounting to \$10,500,000.

The bond issue was made to provide for the installation of an additional 40,000 horse-power at the Grand Mere plant, which will bring the capacity of the plant up to 165,000 horse-power.

## Approve New Financing

Bond and debenture holders of the British America Nickel Corporation, Ltd., have endorsed a plan of reorganization and new financing. The new financing arrangements involve the issue of \$24,500,000 in income bonds of three classes: \$6,000,000, first income; \$6,000,000, "A" income, and \$12,500,000, "B" income. Of the first issue \$4,000,000 will be hypothecated for debts to Canadian and Norwegian banks, and the balance held in the treasury. The second \$6,000,000 will be exchanged for 15-year first mortgage bonds, and the \$12,500,000 issue will be exchanged for \$10,000,000 debenture stock, and the remaining \$2,478,000 will be issued to satisfy certain claims of Norwegians, who were prominent in the organization of the corporation.

Notice is given in accordance with the terms of the trust deed securing the bond issue of Wabasso Cotton Co., Ltd., in favor of the National Trust Co., Ltd., trustee, that \$10,000 bonds have been drawn by lot by the trustee for redemption on June 1st at a price of 105 and accrued interest. The bonds so drawn are as follows: \$1,000 each—Nos. 119, 190, 283, 365, 423, 517, 744. \$500 each—Nos. 757, 855, 899, 945, 1167, 1232. At the option of bondholders, redemption money may be made payable at London, Eng., provided the trustee is given at least two weeks' notice prior to the date of redemption.

Supplementary letters patent have been issued to the Western Quebec Power Co., Ltd., decreasing the capital stock from \$1,000,000 to \$400,000, by the cancelling of 6,000 unissued shares of the capital stock.

## Stock Offering

The Mack Furnace Co., Ltd., of Chatham, Ont., a newly incorporated company under the laws of the province of Ontario, is offering its stock for sale. The capital is \$250,000, divided into 2,500 shares of \$100 each, of which 1,250 are preferred and the same amount of common. The preferred shares will receive a guaranteed dividend of 8 per cent., participating with the common stock in the earnings of the company, to 10 per cent., payable annually or semi-annually, at the option of the company. No payments of dividends shall be payable on the common until all accrued dividends have been paid on preferred. Purchasers of preferred will be entitled to buy at par one share of common with every ten shares of preferred acquired. Common stock only shall have voting power at the shareholders' meetings.

A factory known as the Defiance Iron Works, has been decided upon as a suitable location, and improvements will be made to make the plant suitable for the company's present need. The factory will be purchased, with four acres of land adjoining, for \$45,000—\$30,000 of which will be paid in common stock. The company will pay a commission on the sale of the stock of the company not exceeding fifteen per cent., of the par value of the stock so sold.

Application has been made to the Montreal Stock Exchange by Price Brothers and Co., Ltd., for the listing of the stock of the new company, which recently took over the old organization as a going concern, by which shareholders received five shares in the new company for each one share of old company stock held. The application is for the listing of \$42,683,200 of an authorized issue of \$60,000,000 of common stock, consisting of 426,832 shares of a par value of \$100 per share, of which 357,972 shares have been issued, and are outstanding in the hands of the public. The balance of 68,860 shares are held to be exchanged for shares of the old company. All of this stock is fully paid up and non-assessable.

In their weekly comment on the unlisted market, A. J. Pattison, Jr., and Co. say that business opened with considerable activity after the Easter holiday. Now that several unfavorable conditions which have been overhanging the market for some time have been definitely decided, a general feeling of confidence and optimism is again quite apparent. The small investor continues to purchase securities to an extent not equalled in the last six months of last year. This in itself is as favorable an indication of conditions and of what may be expected in the near future as could be wished for.

RECENT FIRES

Grocery Store at Nanaimo, B.C., Suffered a Loss of \$40,000—Business Block at Altona, Man., and Large Building in Montreal Destroyed with Loss of \$35,000

Altona, Man.—April 2—The entire business block was destroyed by fire, causing a loss estimated at \$35,000. The loss is partially covered by insurance.

Bathurst, N.B.—March 26—The White House, the only remaining hotel in the town, was destroyed by fire. The loss is estimated at \$30,000, with insurance of \$18,000.

Cloverdale, N.B.—April 3—The home of Herbert Adair was destroyed by fire. There is very little insurance.

Cudworth, Sask.—April 1—Damage to the extent of \$16,000 was caused when fire destroyed two large barns on the farm of F. Danong. Insurance carried amounted to \$4,000.

Fredericton, N.B.—March 31—Fire, which caused damage to the amount of \$9,000, broke out in the garage of Chester A. Brewer at Friel's Bridge, North Devon.

Grvin, Sask.—March 25—The Methodist church was destroyed by fire. The loss is placed at \$5,000, with \$2,000 insurance. The fire is believed to have been of incendiary origin.

Glace Bay, N.S.—March 26—A dwelling on Maple Avenue, occupied by Henry Wilton, was destroyed by fire. The loss is estimated at \$800.

Halifax, N.S.—March 28—A building, now occupied by Dowell Bros. as a garage at the south end of Barrington Street, was damaged by fire.

Hamilton, Ont.—April 5—A house, the property of exc-Constable Carling, at the corner of Sanford Avenue and Barton Street, was destroyed by fire.

Milngrove, Ont.—March 30—Loss of \$4,000 was occasioned when the large bank barn and stables of Kenneth Cummins were destroyed by fire. The loss is partly covered by insurance.

Montreal, Que.—March 29—A fire broke out in the garage of M. Plante and spread to the Dominion Transport Co. stables and to the City Ice Co. icehouses at 1 and 3 Ste. Emelie Street.

April 2—The premises of the Imperial Knitting Co., 194-200 De La Roche Street was damaged by fire. The loss is estimated at \$35,000.

Nanaimo, B.C.—March 25—Msrs. Malpass and Wilson, grocers, sustained a loss of \$40,000 when their store at the corner of Haliburton and Needham Streets was destroyed by fire. The fire was of incendiary origin.

Pembroke, Ont.—March 29—A fire, originating in the furnace-room, destroyed the home of Fred P. Moffatt, McKay Street.

Portlock, Ont.—March 25—A barn on the farm of Andrew White was struck by lightning and completely destroyed. The loss is partly covered by insurance.

St. John, N.B.—March 31—A building at the north-west corner of Mill and Union Streets, owned by Jas. Morrison, Cliff Street, was destroyed by fire.

Sandwich, Ont.—March 30—The residence of Frank Bradshaw, 68 London Street, was damaged by fire. The loss is estimated at \$800.

Toronto, Ont.—March 31—A fire broke out in the Parliament Buildings. Most of the damage was done by smoke and water.

Vercheres, Que.—April 5—Two hundred rowboats were burnt in a fire which destroyed the boathouse and workshops of L. St. Pierre and Sons and the general grocery store of G. B. Dupre. The loss is estimated at \$20,000, with insurance of \$3,500.

Walkerville, Ont.—April 3—A fire broke out in the auto paintshop of L. G. Beveridge on Erie Street, doing \$20,000 damage.

Windsor, Ont.—March 29—A fire which started in the basement damaged the home of W. G. Lynch, 651 Ouellette Avenue.

Wolfville, N.S.—March 29—The barn belonging to E. C. Johnson was destroyed by fire. The loss is partly covered by insurance.

DEBENTURES FOR SALE

TOWN OF VERMILION, ALBERTA

# Corporation Finance

**Notwithstanding Many Adverse Factors, Steel Company of Canada Profits Show but Slight Shrinkage—St. Maurice Paper Company Report Reflects Large Growth—Bell Telephone Rates to be Increased Temporarily—Goodwins Profits Were Larger—Winnipeg Electric Railway Wins Case Against the City for Sustenance of Fare Rate**

**Porto Rico Railways Co.**—For the first two months of the current year gross earnings amounted to \$222,907, an increase of 8.20 per cent. over the previous year, while net earnings totalled \$94,501, an increase of \$17,856, or 20.68 per cent. over 1920.

**London Street Railway Co.**—The Ontario Railway and Municipal Board has formally arranged to hand back the London street railway system to the company on May 1, on which date the city will be confronted with wage and fare troubles, and a probable tie-up if an agreement cannot be negotiated in the meantime. Officers of the board state that after having operated the system for a year they have found that without higher fares the men cannot be given any higher wages than the present 48-cent scale, and if that is done none of the improvements sought by the citizens can be financed.

**Winnipeg Electric Railway Co.**—The Manitoba Court of Appeal has decided unanimously against the city of Winnipeg in its appeal to have set aside an order for higher fares by the company, made by P. A. Macdonald, public utilities commissioner for the province. All taxable costs, regardless of the statute of limitations, were ordered paid by the city. The court held that the utilities commissioner had been given by statute, authority to increase rates so as to make them just and reasonable, whether or not they were fixed by contract.

The order against which the city appealed went into effect some months ago. Under its provisions seven cents is paid for a single fare, and four tickets are sold for 25 cents, with transfer privileges.

**Western Grocers, Ltd.**—Sales of the company for 1920 showed a satisfactory increase over those of the previous year, but on account of the weak markets during the last three months of the year, net profits were not so good, being \$239,655, compared with \$324,118 in 1919. The sum of \$71,658 was credited to special reserve account, the same as in 1919, leaving a balance to be carried forward of \$181,772, as compared with \$201,564.

The balance sheet shows few significant changes. Fixed assets and investments amount to \$1,042,301, a decrease of \$193,036. Current assets are shown at \$3,874,846, an increase of \$195,629, while current liabilities are \$2,334,077, a decrease of \$223,563. All merchandise was taken at replacement values, but this account shows an increase of \$129,338 at \$1,792,635.

**Goodwins, Ltd.**—With gross profits amounting to \$495,212, as compared with \$444,942 in 1919 and \$336,948 in 1918, the company on February 2 last, concluded the best year in its history, from that standpoint. After charging off interest and depreciation, earnings available for dividends were \$301,960, against \$274,615 in 1919, \$164,894 in 1918, \$150,405 in 1917 and \$125,074 in 1916. These figures indicate the steady growth which earnings have shown during the past few years, the improvement in the two most recent years being most notable.

It was only in 1920 that the preferred dividends were resumed, the three quarterly payments from July 1 taking up \$73,500. This left a surplus for the year of \$228,461, which is equivalent to about 11.5 per cent. earned on the outstanding common stock of \$2,250,500. With the addition of surplus carried forward, this account is raised to \$1,188,191, as compared with \$959,730 at the end of 1919, and \$685,115 the previous year.

The balance sheet also reflects a comfortable financial position. Working capital is slightly less, surplus current

assets being \$1,135,297, as compared with \$1,205,428 at the end of 1919. This showing, however, is explained when it is seen that some \$225,000 has been added to buildings account, two new stories having been added, and the addition of \$89,000 to equipment account, all of which have been paid out of profits accumulated, thus increasing the equity of the shareholders to a considerable extent.

**Ames Holden Felt and Tire Companies, Ltd.**—The earnings statements of the Ames Holden Felt Co., Ltd., and of the Ames Holden Tire Co. Ltd., show a deficit on operations for the former of \$7,227 and for the latter of \$46,542. The felt company reported sales for the year amounting to \$151,194, and the tire company sales amounting to \$224,313, and in both cases the deficit is shown after providing for bond and other interest charges.

In his report to shareholders the president states that the felt plant was not in operation until August last although large orders had been on the books sufficient to keep the plant in full operation up to that time. In the meantime the wool market had collapsed, so that orders filled during the last months of the year, showed insufficient profit to provide for a surplus as stated. The report states that the mild winter was not conducive to good buying, but that the demand now was showing up well. The tire company suffered in sympathy with all tire manufacturing concerns during the slack business last year, but as the company had not been producing to any extent, losses were not heavy on actual sales, although the overhead charges were necessarily heavy.

The balance sheet of the felt company shows cash at \$2,042; accounts receivable, \$6,956; inventories, \$65,615; fixed assets, \$304,434; bills and accounts payable, \$73,438. The balance sheet of the tire company reports cash on hand at \$3,865; accounts receivable and due by associate companies, \$400,033; investments in war loans, etc., \$131,123; fixed assets, goodwill patents, etc., \$3,210,188. Bank loans are \$759,588 and bills payable \$78,064.

**Bell Telephone Co. of Canada, Ltd.**—An increase of 10 per cent. in exchange rates as a temporary measure, has been granted to the company by the Dominion Board of Railway Commissioners. The judgment states that the board will retain control of the case. The company is to continue filing the same monthly reports as at present. Such further special reports, if any, as the board may require will be called for. No exception is taken to the application of a monthly instead of a quarterly basis of payment as at present. Tariffs covering the increases allowed on long distance, service connection and exchange service may become effective on notice under the Railway Act, said notice to be not less than one week.

In the judgment, which covers 33 typewritten pages, the assistant chief commissioner, S. J. McLean, summarizes the application of the telephone company for an increase. The company had set out that the total telephone revenue was \$15,858,903; that the expenses covering operation, current maintenance, depreciation and taxes, were \$14,086,945, leaving a net telephone revenue of \$1,771,958 from which to make interest and dividends. The net telephone revenue amounted to 3.418 per cent. on the book value of the total telephone property in service. Depreciation was on the basis of 5.7 per cent., as provided under the board's 1919 award. The company showed an increase of 16.53 per cent. in prices of material on July 1, 1920, as compared with 1918 prices, quantities used represented a cost of \$2,628,067 in 1920, as against \$2,255,090 in 1918.

**DIVIDENDS AND NOTICES**

**DOMINION TEXTILE COMPANY, LIMITED**

**NOTICE OF DIVIDEND**

Total amount of bid to be expressed in Dollars and Cents. No tender necessarily accepted.

ERNEST GAGNON,  
City Clerk.

St. Boniface, Man., 2nd April, 1921.

520

The computation submitted by the company as to operating revenue and expenses, based on a projected year showed earnings which would be \$3,300,000 short of meeting interest and dividends after other necessary deductions had been made. The estimate of annual requirements showed that the company would fall short of earning 5.7 per cent. depreciation (the emergency rate fixed by the board) for the year 1920 by over \$1,500,000. It already had fallen behind for the period January 1 to July 31 by \$492,200.

The outstanding feature of the judgment is that the company will be allowed to earn its 8 per cent. dividend, plus a surplus of 2 per cent. or more annually, under certain circumstances.

**St. Maurice Paper Co., Ltd.**—From every standpoint the 1920 report of the company is indicative of the prosperity of the pulp and paper industry last year. Gross profits comprising operating earnings and income from miscellaneous sources, including that accruing through the existing high rates on New York funds, amounted to \$2,976,636, or more than double those of the preceding period, when the total reached \$1,418,804, the actual gain being \$1,557,832. After deductions, including depreciation allowance and the setting aside of the \$800,000 out of the year's profits as a reserve for contingencies and government taxation, against \$100,000 a year ago, the net profit for 1920 amounted to \$1,769,988, compared with \$563,924 in 1919, or more than treble. The year's net was equivalent to 22.68 per cent. on the increased capital stock outstanding, aggregating as at December 31 last \$7,899,900, against 11.27 per cent. in 1919 on a capital of \$5,000,000.

During the year there was distributed among the shareholders of the company a stock bonus of \$1,512,900, while two quarterly payments of 1¼ per cent. each and two of 2 per cent. each, as well as a special dividend of 5 per cent., were paid in cash in the twelve months. These distributions, aggregating \$2,301,677, figuring the stock bonus at parity, compared with \$187,500 in 1919, when the payments amounted to 3¼ per cent. on the outstanding capitalization. All requirements met, surplus account at the end of 1920 showed a balance of \$1,246,450, compared with \$1,788,139 a year ago.

The balance-sheet discloses a position of increased strength, net current assets at the end of 1920 being upward of \$3,300,000, against slightly under \$2,450,000 in last year's showing. Inventories and expenditures on logging operations totalled \$2,863,689, an increase of nearly \$400,000 over the 1920 figures, while bank loans, appearing at \$475,000 in the 1919 statement, find no counterpart in the 1920 figures. Properties, timber limits, equipment, etc., are shown in the statement under review at \$8,053,038, net additions during the twelve months involving an outlay of \$1,002,850. The capital stock of the company was, as already stated, increased from \$5,000,000 to \$7,899,900, the change in this respect being due to the distribution of the 30 per cent. stock dividend and the exchange of all but \$47,000 of the outstanding bonds, shown a year ago at \$1,440,000 into the common stock of the enterprise on a par for par basis during the year.

**Steel Co. of Canada.**—Increased freight rates, labor conditions and fuel trouble were three adverse factors which the company had to contend with in 1920, but notwithstanding, only a very slight shrinkage in profits is reported. After deducting charges for repairs, maintenance, improvements, and making provision for inventory, reserve and 1920 income tax, the results of the twelve months' operations amounted to \$3,924,401, as compared with \$4,000,940 in 1919, and \$5,367,120 in the preceding year.

From the 1920 gross figures were deducted an amount of \$652,255 as a provision for excess costs of construction due to the abnormal conditions existing during the year, as well as a generous allowance of \$712,683 for depreciation. These provisions, together with sinking fund requirements and fixed charges, left net earnings of \$1,855,404, against \$2,382,171 in 1919, the latter year's showing in this respect being enhanced by the fact that no allowance was made for the writing off of any allowance for excessive building costs.

After the payment of dividends on the preferred stock of the company there was left available for application to the common shares a balance of \$1,400,663, which, however, was reduced by \$50,000 transferred to the fire insurance reserve, leaving the net sum of \$1,350,663, representing an earning capacity of 11.7 per cent. on the junior securities, compared with 14.6 per cent. in 1919, 15.8 per cent. in 1918, and 19.5 per cent. in 1917. All deductions provided for, including 7 per cent. dividends on the common stock, there remained a surplus at the end of the year amounting to \$545,663 to add to the balance standing to the credit of profit and loss account, as at December 31, 1919, bringing this up to the highly substantial figure of \$8,740,965, or in excess of 48 per cent. of the company's combined preferred and common stocks.

Turning to the balance sheet portion of the report, discloses a good financial position. Net current assets are given at \$10,670,924, compared with \$11,199,595 in 1919, cash holdings being shown at \$669,434, against an excess of \$2,000,000 in 1919, the reduction in this respect being offset by a secured call loan of \$1,000,000 which had no counterpart in the figures of the previous year, and by an increase in accounts and bills payable of well over \$1,000,000, which stood at \$5,488,207 in the statement under review, compared with \$4,331,948 at the end of 1919. Inventories were reduced by almost \$700,000, falling from \$5,503,833 in 1919 to \$4,804,469 on December 31 last. Reserves, including depreciation account and sinking fund, aggregate \$9,880,008, with surplus, already referred to, amounting to \$8,740,965, the former having been increased by over \$900,000 in the year, and the latter by an excess of \$545,000.

#### ADDITIONAL INFORMATION CONCERNING FIRES

(For Recent Fires see page 41)

**Beamsville, Ont.**—March 10—The bakery of F. J. Brown and Co. was damaged by fire. The fire was caused by some lard used in frying, boiling over and catching fire. The total loss is \$900, with insurance of \$3,500 in the Wellington and Continental Fire insurance companies.

**Kitchener, Ont.**—March 9—The fire which damaged the Jazen Block was caused by a cigarette butt thrown in a pile of rubbish. The total loss is \$14,850, with insurance of \$116,000.

**Manitoba.**—The fire commissioner's statement for the month of February states that during the month there were 139 fires, with a loss of \$484,114. During the month there was one fatality. The following is the class of structure destroyed or damaged: Dwellings 59, stores 16, farm buildings 12, hotels 7, schools 5, warehouses 5, garages 5, apartment buildings 3.

**Ottawa, Ont.**—February 1—The roof on R. D. Baker's residence caught fire from sparks from the chimney doing \$450 damage.

**Paudash Lake, Ont.**—March 10—Two barns and a drive-shed belonging to Robert J. Wadsworth were destroyed by a fire which was caused by one insane. The loss is \$1,700, with insurance of \$565 in the Norwich Union Fire.

**St. John's, Nfld.**—February 19—The Roman Catholic Palace was destroyed by fire, with a loss of \$70,000 and insurance of \$17,000.

**Toronto, Ont.**—During the month of March there were 185 alarms, with an estimated loss of \$11,017. Chimneys caused 16 fires and stoves and furnaces 14.

**Wingham, Ont.**—March 14—The assembly room belonging to C. Lloyd and Son was damaged by fire. The loss is \$2,200, with insurance of \$700 in the Perth Mutual, Wellington, Waterloo, Economical and Merchant Fire insurance companies.

The assets of the Wilt Twist Drill Company of Canada, Ltd., Walkerville, Ont., will be sold by public auction on April 14 by the liquidator, E. M. McLean.

## Records Established by Insurance in 1920

Preliminary Figures of Insurance Department for Companies Operating Under Dominion License—Life Companies Business in Force \$2,657,037,219, and Net Premium Income \$90,212,934—Fire Business in Force \$5,971,330,272, Premiums \$50,565,856 and Losses \$22,931,129 — Casualty Lines Grew

PRELIMINARY figures just issued by the Department of Insurance, Ottawa, for all companies operating under Dominion license show that in 1920 new records were established in practically every line of insurance. The detailed figures are given elsewhere in this issue. The life results, in comparison with 1919, may be summarized as follows:—

	1919.	1920.
Net premium income . . . . .	\$ 74,708,509	\$ 90,212,934
New policies issued (number) . . . . .	641,251	655,176
New policies issued (net amount) . . . . .	\$ 517,863,639	\$ 630,110,900
Net amount in force . . . . .	2,187,837,317	2,657,037,219
Claims . . . . .	28,077,092	25,719,402

The net amount of life business in force was estimated by T. A. Dark, writing in *The Monetary Times* of January 7, 1921, at \$2,637,000,000. This, it will be observed, was very close to the actual amount as shown above. Mr. Dark expressed the view that mortality experience would be still more favorable; this is also borne out, the claims paid being substantially less in spite of the large increase in business in force.

The detailed figures also make possible a comparison of the relative progress made by the Canadian, British and Foreign companies. The Canadian companies increased their net business in force by \$370,975,561, or 21.7 per cent., the British companies by \$9,986,752, or 14.9 per cent., and the Foreign companies by \$157,496,107, or 28 per cent., the increase in the total (Canadian business only) being \$469,199,902, or 21.5 per cent.

The fire insurance results may be shown briefly as follows:—

	1919.	1920.
Net premiums . . . . .	\$ 40,031,474	\$ 50,565,856
Net amount at risk . . . . .	4,923,024,381	5,971,330,272
Net losses . . . . .	16,778,373	22,931,129

By provinces, the net premiums and losses were as follows:—

	Alta.	B.C.	Man.	N.B.	N.S.	Ont.	P.E.I.	Que.	Sask.	Yukon.	Totals.
	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$

British cos. . . . .	1,652,913	2,404,947	1,760,069	1,253,599	1,127,889	9,119,743	129,931	6,230,307	1,721,139	1,913	*25,479,181
Foreign cos. . . . .	1,363,454	2,170,204	1,494,526	1,078,751	1,212,974	4,885,576	66,005	3,851,880	1,345,577	3,173	17,472,120

Totals . . . . . 3,983,076 5,470,568 4,235,484 2,812,096 2,958,370 18,187,380 238,610 12,460,374 4,346,405 6,938 54,776,932

\*Including \$76,731 premiums which cannot be separated according to provinces.

	Alta.	B.C.	Man.	N.B.	N.S.	Ont.	P.E.I.	Que.	Sask.	Yukon.	Totals.
	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$
Net losses. . . . .	304,191	254,281	384,263	363,350	376,402	1,585,982	10,892	1,294,874	502,286	None	5,076,521
British cos. . . . .	606,798	677,731	711,593	847,639	741,271	3,491,062	32,813	3,418,379	676,675	24	11,261,279
Foreign cos. . . . .	463,461	723,659	640,119	651,814	943,985	1,922,233	40,586	2,384,909	607,055	5,259	8,383,080

Totals . . . . . 1,374,450 1,655,671 1,735,975 1,862,803 2,061,658 6,999,277 84,291 7,008,162 1,786,016 5,283 24,720,880

†\$57,294, including losses, which cannot be separated according to provinces.

Net losses are in the ratio of 45.3 per cent. to premiums. With the exception of 1919 this is the lowest ratio since 1906, the figure for recent years being as follows: 1919, 41.67; 1918, 53.84; 1917, 52.42; 1916, 54.40; 1915, 53.49; 1914, 55.81; 1913, 54.39; 1912, 52.25. The increase was not unexpected, as fire losses in 1920 were known to be well ahead of 1919. *The Monetary Times'* estimate for last year was \$27,371,000, compared with \$23,207,000 in 1919, and \$31,815,000 in 1918. These are of course estimates of the total fire loss in Canada, and are naturally well above the losses met by the insurance companies. The variation from year to year, however, closely follows the insurance experience.

The following is a summary of the casualty results:—

	Premiums for the year.	Losses Incurred During the year.	Claims Paid.	Reserve for Unsettled Claims
Accident . . . . .	\$2,340,732	\$ 905,033	\$ 949,711	\$245,868
Accident and sickness . . . . .	1,073,158	545,740	543,358	87,042

### ADVERTISING RATES UPON REQUEST.

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

### SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

## INSURANCE COMPANIES' POSITION IMPROVED

**O**PERATIONS in the Canadian field in 1920 materially strengthened the position of insurance companies. There were few which did not have some margin left after claims, reserves and the expenses of doing business were provided for. The life companies probably fared the best of all. The phenomenal increase in the volume of new business was the factor which contributed most to their success, as the large increase in the amount of business in force reduces the overhead expenses. Mortality experience, though not shown by the preliminary figures published, was very favorable, helping the companies to recuperate the excessive losses of the years 1915 to 1919. A third factor which operated favorably to the life companies was the investment situation. Never before had they such an opportunity to place their funds in long-term bonds at high yields, or in mortgages at high interest rates. While weakness in security prices and some difficulty in collecting on mortgages offset these advantages in 1920, the real benefits will accrue in years to come.

The fire insurance results were, on the whole, quite satisfactory, the loss ratio being only slightly above that of 1919. Among the various provinces there is a striking difference, however; the experience in the west was very favorable, but losses in the maritime provinces were so high as to cause some uneasiness, and a movement towards higher rates or better fire prevention measures. Critical business conditions brought some fires of incendiary origin, but not sufficient to materially affect the loss ratio. Here, as in the life field, depreciation in the value of the dollar during the past few years made itself felt in a substantial volume of business, enabling the higher expenses of conducting business to be met without difficulty.

These results in the fire and life insurance fields were pretty closely anticipated. The casualty lines show some

more striking changes. Many new forms have been introduced into Canada during the past decade, the methods of underwriting improved and new conveniences for the assured provided. Automobile insurance has now firmly established itself as the leader of the casualty lines, this being shown by the volume of business now in force; the loss ratio in this field was just slightly over 50 per cent. Hail insurance worked out very well also, with losses about 40 per cent. of premiums. Sickness and sprinkler leakage were in fact the only two lines to cause concern.

## OUR "GOOD" CANADIAN DOLLAR

**I**F all the statements made by responsible business men and financiers in explanation of the exchange situation were true, it would indeed be an incomprehensible situation. If Canadian dollars are as good as gold how can they be worth only 87 cents in New York? That is just what is meant by the statement that the Canadian dollar is as good as the American dollar, for the latter may be exchanged for gold at any time. Back of the issue of \$290,000,000 of Canadian government currency there is only \$99,000,000 of gold, and \$137,000,000 of securities which are certainly not worth their face value, leaving \$54,000,000 entirely uncovered. It is obvious that the Canadian government cannot under these circumstances make our currency convertible into gold. Just why Sir Henry Drayton should blame the depreciation on Canadian housewives who buy American goods is, however, not easily understood. Sir Henry is enough of a financier to know that it is inflation in the currency, and not a trade balance, which is the main reason for depreciation.

D'Arcy Scott, who addressed the Toronto Canadian Club on Monday, asserted that our dollars were as good as those across the line. Mr. Scott surely knows, however, that more can be purchased by one American dollar in the United States than can be obtained for one Canadian dollar here.

Jas. Murdock, who spoke on the same occasion, proved himself a sounder student of finance when he asserted that the Canadian dollar was worth only 87 cents in American currency, and that the same wages for railroad men in Canada meant less for them than it did in the United States.

Some evidence which proves that deflation has not proceeded as far in Canada as it has in the United States has just been published by *The Wall Street Journal*. The Canadian statistics are taken from the report of the Canadian department of labor, while those of the United States were compiled by the Federal reserve board. The Journal shows that wholesale prices in Canada declined 4 per cent. during February, while a decline of 6 per cent. was reported in the United States. The Journal continues,

"Index number for the United States reached the peak, 264, in May, 1920. Since that time it has declined to the present figure, 154, a decline of 110. Index number for Canada reached peak the same month it did in the United States. Peak was 263, just one point below that reached in this country. The decline in the Canadian index number has been 64 as compared with 110 in the United States. In both countries prices began to ease off gradually but a greatly accelerated decline occurred the last three months of 1920. Fall has been less rapid the first two months of third year and many bankers interpret this to mean that we are approaching a period of relative price stability."

#### RUBBER'S RISE AND FALL

GOODYEAR Tire and Rubber Co., of Akron, Ohio, is reducing its capital stock from \$100,000,000 to \$1,000,000. Goodyear Tire and Rubber Co. of Canada, Ltd., is reducing its common stock issue from \$5,332,000 to \$533,200. These reductions of 99 per cent. and 90 per cent. respectively, while being out of proportion to the change in the assets of the companies, indicate the extent to which industrial depression may require reorganization in company finance. Four and one-half million dollars of the Canadian company's preferred stock is in the hands of the public, and while their interests have been as well protected as conditions permit, yet they find that as a result of the reorganization \$3,800,000 at least of prior preferred stock will come in ahead of their securities.

The rubber industry was one of the many in Canada which rode on the crest of the wave of ill-considered expansion. Unwise extensions of the New Toronto plant of the Goodyear company, made at the instance of the American controlling company, are responsible for its present difficulties; the work was financed by the American company, but now that it is practically in the hands of its creditors, the latter are demanding better security from the Canadian company. The Dunlop Tire and Rubber Goods Co., Ltd., the other large producer in the Canadian field, controlled by powerful British interests, is also facing a difficult situation. There are a few other concerns which have been established for some time, such as the Ames-Holden Tire Co., and the Canadian Consolidated Rubber Co., which made remarkable progress during the war, but for whom the present outlook is not too good.

These established businesses will no doubt survive, and possibly their losses will be gradually recuperated. Among the new industrial ventures of the past few years there have, however, been several rubber companies which have not the advantage of existing plant and business connections. Among these are the Aero Cushion Inner Tire and Rubber Co. of Wintham, Ont.; the Liberty Tire and Rubber Co. of Canada, Ltd., Montreal; the Tiger Tire and Rubber Co., Ltd., Toronto and Belleville; the K. and S. Tire and Rubber Goods, Ltd., Toronto; the Oak Tire and Rubber Co., Ltd., Toronto; the Lion Tire and Rubber Co., Ltd., Toronto; the Rubber Co. of Canada, Ltd., Sherbrooke. The shares of these companies have all been publicly offered for sale, and many shareholders are scattered throughout Canada. They will be fortunate if they ever realize upon their investment.

#### LAND VALUES AND BUILDING ACTIVITY

SO long as building operations are light the market for urban land remains stagnant. True enough, the depreciation in the dollar applies to the price of property; in the case of improved property, for instance, it is reflected by a rise in values since 1915 amounting in some cases to 100 per cent. This influence has been offset, however, by the absence of any appreciable demand for vacant land, and by advancing tax rates which have put an end to speculative purchases. The present year cannot be expected to bring a revival in building operations, because costs, while slowly falling, are still too high to permit of many buildings being placed upon the market at current prices. Such a condition is in sight, however, and will probably be reached in 1922. Meanwhile the value of urban land is strengthening, after six years of firm or falling prices. There is hope for owners who have been paying heavy taxes during this period, though it may be a long time before they realize that appreciation in values anticipated when such speculative purchases were made.

Tariffs cannot operate effectively in the sphere of financial affairs. G. D. Finlayson, Dominion superintendent of insurance, has in mind a tax of 15 per cent. on premiums paid to insurance companies which are not licensed in Canada. As such contracts are made outside of Canada it is difficult to see how they can be taxed.

\* \* \* \* \*

Federal income tax returns for individuals must be filed not later than April 30, along with 25 per cent. of the tax. Responsibility for making the return is placed upon the citizen, notice not being given him. The department is trying to shift the burden of collection as well as of payment to the shoulders of the taxpayer.

\* \* \* \* \*

That Belgium is again becoming a factor in world trade is shown by a list of goods which she is in a position to export. The list, copies of which may be obtained from the Belgian consul-general, Ottawa, includes some raw materials, but is mainly composed of those manufactures, such as glassware, for which Belgium was noted before the war.

\* \* \* \* \*

From the age of 23 to 65 the average man is independent; from 40 to 58 he has more than enough to live on comfortably. During the former period he can, and during the latter period he should, make provision for the future by insurance and investments. The chart "Earning Capacity of the Average Man" shown elsewhere in this issue is an instructive sermon on saving.

\* \* \* \* \*

#### INTRICACIES OF EXCHANGE

While at Oxford, Lord Curzon, then Mr. George Curzon, achieved the reputation of being a most superior person. When he was acting in the capacity of Under Secretary for India the wittlings of the House used to call him "Mr. Curt'un"—so sharp, short and superior were his answers to questions. Generally he was as cool as a cucumber. But one day he was making a long and elaborate speech against a measure urged by the Opposition regarding that dependency, as certain to result in a loss to the government of many lakhs of rupees. Very emphatic and earnest was his tone; convincing his eloquence.

"Consider," exclaimed he, with a superb, rhetorical flourish, "not pounds, nor guineas, but lakhs of rupees."

"Exactly, but how much is a lakh of rupees?" shouted a brainy heckler on the Opposition benches.

The House rocked with laughter when Mr. Curzon, bewildered, opened his mouth, stammered, grew red and finally faltered:—

"I really don't know!"

This beautiful speech was evolved in vain, for he failed in his appeal.

## BANK BRANCH NOTES

The Dominion Bank has opened a branch at Long Branch, Ont., and also at Rosseau, Ont.

The branches of the Union Bank at Birch Hills, Sask., Carmel, Sask., and Winnifred, Alta., have been closed.

The McCurdy Building at the corner of Hollis and Prince Streets, Halifax, has been purchased by the Bank of Nova Scotia, which will proceed to transform the structure into a modern banking building.

The Bank of Toronto has moved from the building at the corner of George and Hunter Streets, Peterboro, to their new offices on Water St.

The Royal Bank of Canada has formed a separate supervisor's department for the province of Alberta, in Calgary, under the charge of S. L. Cork.

O. L. Carey, formerly manager of High River, Alta. branch of the Royal Bank, has assumed his new duties as manager of Medicine Hat branch. F. G. Depew, formerly manager of Saskatoon branch has been appointed manager of Hamilton, East End branch.

During the month of March there were twenty-four branches of Canadian banks opened. The following have not yet been mentioned in *The Monetary Times*: Asbestos, Que., Hochelaga; Bedford, Que., Hochelaga; Big Valley, Alta., Imperial; Coalmont, B.C., Union; Dufrost, Man., Hochelaga; Giroux, Man., Hochelaga; Gogama, Ont., Hochelaga; Lac-a-la-Croix, Que., Nationale; Lac Bouchette Sta., Que., Nationale; Mansonville, Que., Hochelaga; Montmagny, Que., Provinciale; Montreal, Que., Mont La Salle, Dandurant St., Hochelaga; Morin Heights, Que., Merchants; Oshawa, Ont., Oshawa South, Standard; Porquis Junction, Ont., Imperial; St. Elizabeth de Warwick, Que., Provinciale; St. Gabriel de Stratford, Que., Provinciale; St. Roch sur Richelieu, Que., Hochelaga.

The following branches were closed during the month: Arrowhead, B.C., Imperial; Arrowhead, B.C., Molsons; Clair, Sask., Royal; Edgely, Sask., Imperial; Hatchley, Ont., Royal; Madawaska, Ont., Sterling; Marquis, Sask., Royal; Phepston,

Ont., Sterling; Queensville, Ont., Toronto; Revenue, Sask., Royal; Swan River, Alta., Royal.

The branches opened were distributed among the banks as follows: Hochelaga, 8; Imperial, 3; Provinciale, 3; Nationale, 2; Royal, 2; Commerce, 2; Union, 1; Merchants, 1; Standard, 1; Dominion, 1.

## PERSONAL NOTES

J. C. CLARK, formerly of the Union Bank of Canada, Winnipeg, and who left there about a year ago to become manager of the accountant's department at Vancouver, B.C., has resigned and joined the service of the British-American Bond Corporation.

CAPT. WALTER R. CLARKE, M.C., who has been connected with the Fraser companies, Limited, for some time at Edmunston, N.B., has been appointed superintendent of the mill at Magaguadavic. Capt. Clarke was at one time the publicity commissioner of the Fredericton Board of Trade.

T. PALMER HOWARD, one of the directors of the Howard Smith Paper Mills, Limited, has been appointed comptroller of the company. The office is a new one, its creation having been made necessary by reason of the expansion in the scope and business of the company during the past few years. Mr. Howard is general manager of the Phoenix Bridge Company. He is also past president of the Montreal branch of the Canadian Manufacturers' Association.

CHARLES RIORDON, formerly president of the Riordon Company, Limited, has been made honorary president of the company and Carl Riordon, formerly vice-president, has been elected president. A new member of the board in the person of Frank P. Jones, general manager of the Canada Cement Company, will succeed Carl Riordon as vice-president, and it is understood, will take an active part in the administration of the company. Also three other new members have been added to the Riordon directorate: George M. McKee, general manager of the Donnacona Paper Co., Donnacona, Que.; F. T. Bronson, of the Bronson Company, Ottawa, and F. N. Southam, of the Southam Press, Montreal.

## UNION BANK'S MAIN VANCOUVER OFFICE

THE Union Bank's new Vancouver office at Hastings and Seymour Streets, recently opened to the public, was erected at a cost of about \$400,000. Designed by Somervell and Putnam, architects, it provides every modern facility for banking. Passing through the bronze doors at the main bank entrance on Hastings Street, one enters a vestibule executed in bronze and marble. This opens to the public space of the main banking room, which is floored with Verde-antique and Napoleon grey marble floor tiles. Fronting on this space is a crescent-shaped counter, one hundred feet long, while flanking the entrance on the right is located the foreign exchange department, and on the left the savings bank department, making a total of over 160 lineal feet of counter. At the extreme right is located the manager's office, and at the extreme left, a ladies' room is provided, fitted with every convenience for the lady patrons. The vaults are in the basement, and are accessible to the banking room by a hydraulic lift.

THE WEEK IN PARLIAMENT

Commons Discusses Estimates and Grand Trunk Proceedings—Railway Measures Progress in Both Houses

(Special to *The Monetary Times*.)

Ottawa, April 14, 1921.

Thursday, April 7

In the House of Commons:—(a) Resolution of Minister of Finance asking for \$71,499,703.70, one-sixth of main estimates for 1921-22, introduced, but Fielding objection to discussion then sustained.

In the Senate:—(a) Third reading bill incorporating Canadian Bar Association; (b) Discussion Canadian Railway situation, especially Grand Trunk arbitration proceedings.

Friday, April 8

In the House of Commons:—(a) Debate on Premier's motion to appoint special railway committee and Liberal Opposition leader's amendment for wider open inquiry, the latter being defeated by a majority of 17, and main motion accepted by majority of 38 after amendment according to suggestion of Progressive leader, Hon. T. A. Crearer; (b) Third readings of following bills: one respecting Canadian Pacific Railway, one incorporating Canadian Transit Co., and one respecting James MacLaren Co.

In Senate:—(a) Third readings of following bills: one asking extension of time for construction operations of Montreal, Ottawa and Georgian Bay Canal Co., one respecting Oshawa Railway Co., one respecting Quebec, Montreal and Southern Railway Co., one respecting the Thousand Islands Railway Co., one respecting Kettle Valley Railway Co., one respecting Manitoba and North Western Railway Co. of Canada, one respecting Quebec Central Railway Co., one respecting Essex Terminal Railway Co., and one respecting Ottawa Northern and Western Railway Co.; and (b) Second reading of Dominion Express Co. bill permitting company to increase capital stock from two to five million dollars, and to convey goods outside Canada as well as in it.

Monday, April 11

In the House of Commons:—(a) Appointment of select standing committee on railways and shipping; (b) Debate on Campbell resolution asking for extension of Hudson Bay Railway as soon as financial resources permit and motion withdrawn; (c) Hocken resolution asking Government assistance for house-building withdrawn; (d) Estimates for Marine Department, and debate lasting all day and night and the next day on the estimate for government shipbuilding program of eight million dollars, followed by decision to apply closure; (e) Debate resumed on motion for interim supply, and decision to apply closure.

Tuesday, April 12

In the Senate:—(a) First readings of following bills: one respecting Canadian Pacific Railway, one to incorporate Canadian Transit Co.

Wednesday, April 13

In the House of Commons:—(a) Fielding motion on going into supply asking that advantage be taken of the Reciprocity offer still standing in the United States tariff, and debate thereon; (b) First reading bill to extend time for construction of portion of Quebec and St. John Railway between Centreville and Andover, N.B.; (c) Second reading bill to amend and consolidate law relating to copyright.

In Senate:—(a) Senator Robertson, Minister of Labor, denied statement of Chief Commissioner of Board of Railway Commissioners, that McAdoo Award had been forced on Canadian Railway companies by international organizers from the United States.

Determined opposition by the Liberal minority in the House of Commons to the voting of interim supply of one-sixth of the main estimates, amounting to nearly eighty

million dollars, and to the spending of another eight million dollars to complete the government shipbuilding program, featured the last parliamentary week. The debating degenerated into a test of endurance, and the House sat on these few items from three o'clock Monday afternoon until after midnight Tuesday without a break except the two hours for dinner at night provided by law. The government then applied the closure. The Hon. W. S. Fielding brought 1911 politics right up to date on Wednesday by suggesting that the government should take advantage of the reciprocal clause in the United States tariff in view of the impending passing of the Fordney Tariff Bill. He claimed that otherwise Canada would suffer severe losses in trade by the new bill. There is as yet no definite intimation as to when the budget will come down, but it will not be before May.

FARMING OPERATIONS MAY BE CURTAILED

Westerners Not Pleased With Present Conditions—Building and Other Activity in Brandon and Regina

(Staff Correspondence.)

Brandon, April 14, 1921.

SEEDING has not commenced yet in the west, except in isolated instances. In the Brandon district good weather was experienced this week, and the ground is drying rapidly. In a week or ten days, seeding should be in full swing. Conditions in Brandon are quite satisfactory, and a good deal of building activity is likely to take place this year. The Imperial Oil will spend a quarter of a million dollars on buildings and development. Hospital extensions, which are badly needed, and which if gone ahead with, will cost four hundred thousand. Brandon College have a building program of approximately one hundred thousand; also new winter fair building will be erected, costing one hundred and fifty thousand. This, in addition to a housing program of probably one hundred thousand, will make Brandon quite active this summer.

Business throughout Manitoba continues quiet, with collections showing a slight improvement. One loan manager of a representative company, who have dealings over a wide area, termed them very satisfactory. In some quarters, the attitude of the banks in not giving greater financial assistance to the farmers, is being severely criticized, and actual development and acreage seeded is likely to be considerably curtailed on this account.

In the Regina district improving weather conditions give confidence to the farmer that seedings will be well away to a good start in ten days on the higher lands. Given a continuance of warm sunshine seeding may be possible even earlier. It is believed that there is little frost in the land after so mild a winter and that the recent inclement weather has been all to the good by increasing the moisture content. By the end of April seeding should be general. Business in Regina is showing improvement, and collections are reported better.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first period in April:—

	Canadian Pacific Railway.		
	1921.	1920.	Inc. or dec.
April 7	\$3,179,000	\$3,617,000	— \$ 438,000
	Canadian National Railway.		
April 7	\$2,103,435	\$1,834,118	+ \$ 269,317
	Grand Trunk Railway.		
April 7	\$1,802,346	\$1,982,648	— \$ 180,302

BUSINESS COLLECTIONS REPORTED GOOD

Dun's Bulletin of April 16 will say regarding trade conditions in the Montreal district: "Country roads are getting more settled, and collections as a whole may be classified as good. The 10th was a heavy day for payments in the dry goods trade, and comparatively few defaults are reported. Dry goods travellers now carrying full lines of fall samples find buyers a little shy in placing orders for such goods, but a good business is being done in a sorting way, the volume of mail orders being especially noticeable. City retailers report a fair distribution, but a good many shoppers appear to be deferring purchases in certain lines, anticipating lower prices. Further gradual improvement is noted in the boot and shoe trade. Orders are coming in more freely, and some of the larger factories, though not working at all to capacity, are turning out 2,500 pairs a day. In leather prices there is nothing new. The iron market still runs dull, but in general hardware there is a moderate distribution, principally countrywards. Structural material and lumber still move slowly."

Toronto district conditions are outlined as follows: "Once again the salesman comes into his own as merchants realize the existence of competition and the necessity of an energetic capable selling force to market their merchandise. Wholesale firms do a steady business which they agree could be added to considerably without danger of strain upon any department. Trade is very erratic, due in part to the confused state of mind of the average retailer regarding the stability of quotations. Hand to mouth purchasing while commendable as a precautionary measure may eventually become serious for those neglecting to place for later on as mills are not providing stock to be kept available for tardy purchasers, a proceeding usual in other years. The unemployed are being gradually absorbed and once this large number commence to earn, stimulation in many lines will be assured. Cotton price lists are expected about the first of May but the issuance may be deferred, this season, until a later date. An improvement is noted again this week in the sale of boots and shoes, and factories in Western Ontario keep fairly well engaged. Millinery wholesalers fail to appreciate alternating cold or fine days, although the season has been exceptionally good up to now. Travellers selling novelties, celluloid goods, etc., pick up some fair orders."

EMPLOYMENT CONDITIONS IN CANADA

Dominion headquarters of the Employment Service of Canada, Department of Labor, reports that during the week ending March 12, 5,358 firms made employment returns showing that they had contracted their payrolls by 4,167 persons since the preceding week, a decline of less than 1 per cent. Taking the volume of employment reported for the week of January 17, 1920, as a base equal to 100, employment for the week of March 12, 1921, stands at slightly over 87, as compared with a little more than 101, indicated by the firms making returns for the corresponding week of last year. This would show, therefore, that the employment afforded by the firms reporting for the week under review was about 14 points lower than during the week ending March 13, 1920. New Brunswick was the only province that registered a gain over the preceding week, while employment in this and every other province was considerably below the level of the corresponding week in 1920.

(A chart issued by the National City Co.)

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended April 14, 1921, compared with the corresponding week last year:—

	Week ended Apr. 14, '21.	Week ended Apr. 15, '20.	Changes.

## A Trip to VANCOUVER (British Columbia)

**Offers more interesting attractions than any other vacation trip that can be suggested**

Every reader expects to visit the Pacific Coast some day hopes to see Vancouver—Canada's Pacific outlet—the city about which so much is being said and written.

WHY NOT THIS SUMMER? YOU CAN MAKE THE TRIP IN A THREE WEEKS' VACATION

Although all the time you can spare can be spent with profit and without exhausting the thousand and one beauty spots about Vancouver.

Vancouver is unique as a Tourist City in the innumerable natural attractions located in immediate touch with the city's centre

Just think—English Bay and its famous bathing beaches—a dip in the Pacific—the famous Stanley Park—1,000 acres of magnificent Forest—Both reached by city carlines. The great Capilano Canyon—less than an hour's trip. Day and half-day trips by motor on land, by water on Howe Sound and Burrard Inlet—Hundreds of miles of scenic auto drives.

You can't beat Vancouver as a Tourist Resort.

SEND TO DAY FOR OUR ILLUSTRATED FOLDER.

Address Vancouver Publicity Bureau (J. R. Davison, Mgr.), Suite 50, 330 Seymour St., Vancouver, B.C.

# Will Investigate Finances of Municipalities

Subject Will be Fully Studied by British Columbia With View to Settlement at Next Session—Late Session Produced Little New Legislation—Province Must Still Borrow for Pacific Great Eastern

SEVENTY bills, out of a total of 85 introduced, were passed by the British Columbia legislative session which came to a close on April 2. Premier John Oliver announced that the next session will likely be held in October or November to solve municipal finance problems. In prodding the House, the Lieutenant-Governor said he considered that the Moderation Liquor Act met fairly the wishes of the electorate as expressed in last year's referendum. The Supply Bill, covering all sums voted during the last week for carrying on government for the ensuing year, amounted to \$20,626,000, the largest in the province's history.

Outside of the Liquor Act, there was little legislation of note. The government is, however, authorized to raise \$4,000,000 for the Pacific Great Eastern Railway, by the sale of 6 per cent. bonds or of treasury notes. The rates of interest authorized by the Loan Acts of 1916, 1917, 1919, and by the Department of Industries Act of 1919, are raised to 6 per cent.

Authority to lease for fishing purposes the public wharf at Prince Rupert, which was constructed by the department of public works, but which is not now required by it, is given to the government. A "Forest Act Amendment Act" introduces some important changes in the law regarding forests and the cutting of timber.

## Municipal Finances

While the question of municipal finance is to be fully considered later on this year, some changes were made at the session just closed. The "Richmond Municipality Bridge Debentures Cancellation Act" releases Richmond Township from the payment of the remaining 21 of the 40 debentures for \$1,400 each, given the province in 1901 as security for the cost of maintaining the bridge at Eburne. Port Coquitlam, finding itself unable to meet treasury certificates to the amount of \$92,000, maturing in 1921, 1924 and 1925, because of the fact that \$50,735 in taxes was outstanding on December 31, 1920, and lands representing \$200,000 in arrears of taxes had been acquired at tax sales, applied to the government for relief. It is now authorized to borrow \$100,000 at 7 per cent. for 20 years to meet these obligations.

The legislature passed an Act to validate the Burnaby Conservation of Assets by-law which was passed by the council of the municipality, in 1920. The by-law embodies principles in municipal finance which are unique in British Columbia, and possibly in the Dominion. The outstanding feature is the ear marking of certain assets, consisting of lands which reverted to the municipality at tax sales, for the purpose of the liquidation of the bonded debt of the municipality at a date earlier than the maturity of the various debenture issues. It is proposed to accomplish this by the creation of a fund from the proceeds of the sale of the lands in question, and from such fund to purchase outstanding debentures of the municipality which may be offered from time to time, or in the event of debentures not being available for purchase, to deposit the monies accruing from sales of lands, to the credit of the several sinking funds, in addition to the annual levy specified in the by-laws under which the debenture issues were authorized. The sinking funds of this corporation have not been allowed to fall into arrears, and they have to-day, the full amounts required, standing at their credit.

The "Unemployment Relief Loans Validation Act" confirms and validates all loans made to any municipality, to the amount of \$250,000, authorized by order-in-council, for relieving unemployment. Moreover, further advances may be made to any municipality to bring the total so borrowed by it up to \$250,000. These loans are to be repaid to the

province in five equal annual instalments with interest at 6 per cent. Acts to amend the Public Schools Act and the Water Act, 1914, also affect municipalities and their finances.

## Will Make Investigation

The government intends to revise the whole taxation system of British Columbia, and to make the proposed changes effective at the next session of the legislature, Premier Oliver informed a delegation representing the Union of British Columbia Municipalities on March 26. The government will continue its plan to allow the municipalities half of all liquor profits, but realizes that this revenue alone is not sufficient to cover the needs of the municipalities. An investigation into the present financial system as it affects the province and the municipalities will be made. This investigation will cover the existing relationship between municipal councils and schools. A \$5 tax on all adults half-yearly by municipalities was suggested by the government to aid the municipalities in the present financial crisis. The delegation asked for a greater share of taxes, and made some other recommendations along the line of a report recently prepared for Vancouver by Dr. H. L. Brittain.

Again on April 2 the question came up, in a discussion about additional taxing powers for Vancouver, and the premier pointed out that while the municipalities undoubtedly needed assistance, the municipal committee of the House had not been able to make one practical suggestion this year. A full inquiry should be made, therefore, and as 80 per cent. of the population resided in the municipalities, the province could not be expected to shift their burden, but might have it more equitably distributed.

Amendments were also made to the charters of Vancouver and Victoria, and the sessional indemnities of members of the house were increased.

## Pacific Great Eastern

By the end of March next year, when the line is expected to be in operation to Prince George, the province will have sunk no less than forty millions in the Pacific Great Eastern project, stated Premier Oliver, when explaining the necessity for the government bringing down another bill to permit borrowing an additional four millions for Pacific Great Eastern purposes for the coming year. Last year, the premier explained, four millions were borrowed for the purposes of the railway, and, it was then expected, that would prove sufficient to complete the line to Prince George. But in view of an increase of thirty per cent. in cost of construction, coupled with a sixty per cent. advance in cost of materials, together with the great amount of work which had to be done on the old grade, and the necessity for providing for deficits in operation, as well as increased cost of maintenance and the purchase of needed additional equipment, probably one-half of the four millions raised last year had to be diverted to purposes other than strictly new construction.

Numerous changes on which action was not taken were also urged upon the government. A rural credit system similar to that of Manitoba, where the government finance loans out of deposits of the people in its own savings banks, was urged upon the Agricultural Committee of the legislature on March 1 by the Board of Farmers' Institutes.

Last year 380,000 acres of timber, or 236,000,000 feet, valued at \$299,000, was destroyed by fire, according to the report tabled by the Minister of Lands in the legislature on March 8. Damage to young growth and range is placed at \$186,000, as the total damage to forests amounts to \$485,000, as compared with \$393,000 in 1919.

## RAILWAY OBLIGATIONS INVOLVE NEW BRUNSWICK

Finances of Valley Railway Discussed in Legislature—Fire Prevention Act Considered—Very Little New Legislation

AT the New Brunswick elections held last October, the Liberal government secured only 23 out of the 48 seats, the Conservatives and Farmers securing 14 and 11 respectively. In the session which commenced on March 17, however, the Liberals have thus far been able to carry on their business, as the Farmers vote with them on most measures. The Lieutenant-Governor's speech from the throne, dealt with the necessity for preserving provincial rights, hydro development at Musquash; returns from Crown timber lands, said to be the largest in history owing to increased stumpage rates; encouragement for flax industry, the Valley Railway deficit, and other points.

It was also stated that a measure would be introduced to fund the amounts already advanced to meet the interest upon the bonds issued in connection with the construction of the Valley Railway. The announcement followed a statement of conditions as they exist in relation to the Valley Railway in which it was frankly stated that "the estimated receipts have fallen far short of the requirements to pay the interest" and that "the province has, as a result of this, been called upon to pay large sums in interest for which no provision has been made." The government, it was also said, would ask the legislature to consider how best to make the necessary provision for meeting the interest charges from the Valley Railway in the future. Otherwise the program which the government offered to the legislature through the speech from the throne was unpretentious and exclusive almost entirely of contentious matters.

### The Valley Railway

In the debate on the speech, A. Chase Fawcett urged less "education" of the farmers, but more practical assistance in the form of rural credits and telephone extensions. J. B. M. Baxter, leader of the opposition, advocated that the Valley Railroad be taken over by the Dominion government. Referring to the financial position of the province, Mr. Baxter said that on October 31, 1917, after being in power several months, the total indebtedness of the province, omitting sinking fund, was \$16,797,050. In that amount some expenditures of the present government were included. On October 31 last, exclusive of sinking funds and Housing Act expenditure, the total indebtedness was \$22,063,694, an increase of \$5,266,643 in three years. The actual increase had been \$6,416,522. For the past year the estimated revenue had been \$2,829,463, and the estimated expenditure \$2,497,712, making an estimated surplus of \$331,771. The Valley Railway took \$252,351, leaving about \$79,000, which would have been a surplus clear of everything.

Premier W. E. Foster, on March 22, pointed out that the net cost of the Valley Railway was \$6,608,068, after a saving of \$445,591 had been made by refunding in London. Last session he had presented before the House the matter of obtaining running rights over the C.P.R., between Westfield and St. John, pointing out that the C.N.R. could procure those rights if the province could not. In spite of the expectation that the C.N.R. would secure those rights there was an absolute refusal and also refusal to pay the province any of the gross earnings until the province would undertake to pay for the running rights. The basis of operation was forty per cent. of the gross receipts which last year had amounted to \$93,911. The cost of running rights had been \$33,458, leaving \$59,553 for the province. The gross interest charge annually was \$311,000, an amount which would increase or decrease according to the earning power of the road. This would mean that the province was to raise annually the sum of \$250,000 to meet interest charges, a very heavy burden.

The annual report of the Crown Lands Department, submitted on March 22, referred to the increase in revenue from this source, due in part to the increase in stumpage rates last year. Territorial revenue totalled \$1,584,250. Referring to forest fires, the deputy minister said: "There is no more

destructive agent in New Brunswick, and I may say in the whole of the Dominion, than the forest fire. I think I am safe in saying that during the past quarter of a century no Crown Land report has been laid before the legislature without a reference to the ravages of forest fires. The spring of 1920 was the driest in fifteen years. The forest destruction was consequently great; there were in all 312 fires, causing an estimated damage of \$690,000 of which amount \$87,000 was Crown Lands. Sixty thousand acres of Crown Lands were burnt over, of this, however, one-fifth was old burns. Eighty per cent. of the fires occurred between the 16th of May and the 10th of June, a period of 25 days and during the whole of that time little or no rain fell."

### Loans For Public Works

On March 25 a government bill respecting the construction of highways with federal aid was discussed. The minister of public works explained that the purpose of the bill was merely to change the manner of procedure with respect to the borrowing of money for highway improvement. Under the old act it was set forth that money should be borrowed before July 1, and some had taken the ground that loans could not be made after that date. Under the amendment the borrowing power would date from and include the year 1919. It would not be necessary to borrow the whole \$350,000 in one year, but if that sum was not all borrowed it could be procured the following year, if necessary, to meet federal aid conditions. The amendment gave no additional borrowing power.

### Fire Prevention Act

A fire prevention act is also being considered. On March 1 a delegation from the New Brunswick Board of Fire Underwriters asked for such an act. The Fire Marshal's Act in Nova Scotia was suggested as a model that would largely meet the requirements. F. J. G. Knowlton and R. S. Ritchie, of St. John, who composed the delegation, pointed out to the government that the extent of fire losses in New Brunswick was out of proportion; the ratio had been larger than in any other province in 1919, and 1920 had even exceeded the previous year. Passage of an act such as suggested, which would give power to have all fires investigated, was said to be one means of reducing losses.

The Grand Falls Co., Ltd., is making application for an act providing that the time limited for the commencement of its work in the development of water power at Grand Falls, in the county of Victoria, be extended for a period of two years from May 1, 1921. Premier Foster recently gave out an opinion that the company's rights would expire in April, 1921, because of their failure to expend \$100,000 in actual bona fide development work at Grand Falls on or before January 10 last, or one year after the official stoppage of hostilities in the great war. The Grand Falls Co., Ltd., is controlled by the International Paper Co., and other pulp and paper interests have been known to be anxious to secure the power rights at Grand Falls. At the last session of the legislature a special act was passed empowering the provincial government to take over the power rights at Grand Falls under certain conditions. P. T. Dodge, president of the International Paper Co., presented the case for the bill on April 6. A delegation from Grand Falls, on the other hand, urged that the province take over the rights.

The house passed a resolution on April 7 urging that the federal government limit the West Indies preference duty to goods brought in through Canadian ports. In a discussion on the Crown lands, it was urged that the stumpage rate be increased up to \$7.

Other legislation introduced includes a bill to alter the tolls of the Southwest Miramichi Boom Co.; an increase in the registration fees for motor vehicles and trucks; a bill to authorize the municipality of Kent to make temporary loans; a bill to authorize Sackville to issue debentures and to bonus industries; a bill to enable Fredericton to issue debentures; and amendments to the charters of Milltown and St. Stephen. Westmoreland municipality was also enabled to make temporary loans.

**Condensed Advertisements**

"Positions Wanted," 3c per word; all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

**WANTED.**—A young man as Assistant Inspector for the Province of Nova Scotia. One with experience in inspecting and schedule rating of fire risks preferred. Apply stating qualifications and salary asked, to Editor, Box 407, *Monetary Times*, Toronto.

**SECRETARY-TREASURER.** age 30, of large company in British Columbia, desires change and wishes connection in similar capacity with well-established company anywhere in Canada or United States. First-class accountant, with excellent credentials; the more responsibility to be assumed, the better. Prepared to report immediately for interview for any legitimate proposition. Apply by wire or letter to H. Anscomb, 1921 Government St., Victoria, B.C.

517

## SECTION 88 OF THE BANK ACT

## Privileges and Powers of the Banks Discussed—Circulation and the Benefits Therefrom

By A. B. BARKER

IN a recent article on the Bankruptcy Act a leading assignee attacks the banks in respect of their privileges under section 88 of the Bank Act, and also in respect of their alleged profits from their circulation. Unfortunately, however, he reads a meaning into the section which is quite contrary to the text. The language of the section is plain, and the various legal decisions have made it clear that it is to be taken literally. He speaks of one merchant selling and delivering goods to another on the strength of the stock carried by the purchasing merchant and a few days later, when an assignment is made, discovering the shipment covered by lien to the bank under section 88. This could not possibly happen, as under the act this security does not apply to merchants. The act expressly states that "the bank may lend money to any wholesale purchaser or shipper of or dealer in products of agriculture, the forest, quarry and mine, or the sea, lakes and rivers, or to any wholesale purchaser or shipper of or dealer in livestock or dead stock or the products thereof, upon the security of such products or of such livestock or dead stock or the products thereof." This narrows down the class to which the act applies to practically those who deal in commodities commonly sold for cash.

The act further permits loans to wholesale manufacturers upon the security of the goods, wares and merchandise, manufactured by him or procured for such manufacture. This means upon his raw material and finished product.

## Limited to Wholesalers

It is to be noted that the act specifically restricts the operation of the section to wholesalers only. The underlying principle of the act is that the bank in making advances under this section creates its own security, and that the assets of the customer are increased to the value of the amount loaned. With the dealers enumerated this is clear. The products dealt in are practically cash commodities, and must be paid for on delivery, and without the assistance of the banks advancing in this way, trade in these commodities would be greatly hampered, and the turnover of the dealers much reduced. With manufacturers the raw material must be promptly paid for, and by a loan under this section the manufacturer is able to buy for cash, and so gets closer prices. He must pay wages and various manufacturing expenses in cash, and the advances obtained in this way, by enabling him to do this, increase his assets by the amount so loaned. Without such assistance the manufacturing industry throughout the country would be seriously handicapped.

In its actual working in practice the details of such security under the section are so exacting, that it can easily be seen why the advances under it are limited to wholesalers. With small advances the work of handling them is out of all proportion to any possible profit to be derived by the bank, and this security in such cases is not looked on with much favor by bankers.

Where the bank, however, creates its own security by its advances, it is surely entitled to the benefit of such security.

Mention is also made in the article of assignments of book debts, and here he is on stronger ground. In practice, however, book debts under the Canadian system of merchandizing are usually wretched security. The ordinary practice in selling is to draw on the purchaser and discount the draft. This is the usual course between wholesaler and retailer. Between retailer and consumer, of course, credit dealings are usually on open account. The bulk of people pay these accounts monthly, so that apart from the accounts arising from the previous month's sales, the accounts will consist of the slow-paying customers. With the wholesaler who draws on shipment, the accounts will consist of drafts

returned and charged back. Not a very satisfactory security on which to rely, and most bank rules expressly warn managers of the weakness of such security.

## Circulation

In the comments on the circulation, however, the writer of the article is quite at sea. He mentions the circulation as \$250,000,000, etates that the banks have free use of this without interest charge, and estimates the profit from this at about \$15,000,000 a year.

The facts are, however, that against this circulation, which at the end of December was \$228,758,000, the banks have deposited with the minister of finance gold and Dominion notes as a specific security \$113,352,000—so that only \$115,406,000 comes under the head of ordinary circulation. It can hardly be said that the amount covered by the gold reserve referred to, is free circulation. Before the war this ordinary circulation, permitted up to the amount of paid-up capital, was not taxed, but now it pays, a tax of 1 per cent. per annum. The value of circulation to the bank depends on the use which can be made of it. The bank cannot use the whole of it in loans—much as it would like to. A certain reserve in gold and legals must be held to retire any presented for redemption in the usual course of business, and the reserve so held is usually considered to be about 25 per cent. This will be about \$25,000,000, leaving \$90,000,000 which can be used in the bank's business in loans and discounts, the only definite charge against it being the 1 per cent. charged by the government on the circulation not covered by a deposit of gold and legals in the gold reserve.

Indirectly, however, the banks do give value for this privilege. Each day the banks take on deposit from their customers, and give credit therefor, cheques and notes on other banks, for which they do not receive settlement until the following day. It is assumed, of course, that these items will be paid on presentation, and therefore in the ordinary acceptance of the term, they are cash on hand. In reality, however, they are not, and the bank only realizes on them when they are paid. At the end of December last, the cheques in transit in this way amounted to \$149,969,929, and the notes of other banks \$53,501,062, making the total amount in transit \$200,000,000. This amount, not collected for at least one day, is in effect a free loan, and is therefore a fair offset to the \$90,000,000 of loanable funds received from the circulation.

Most of the current misunderstanding between banks and public comes from a misconception of the real functions of a bank. A bank is a trader in credit. It buys credit from its depositors, paying in interest and services, and sells to its borrowers. Its relations with its depositors are those of debtor and creditor. The depositor pays in cash and instruments for the transfer of debts, cheques, drafts, etc., and receives in exchange a credit on the bank's books. This credit he expects to be able to avail himself of at any time, and a bank must maintain sufficient cash on hand to satisfy the calls made on it by its depositors from day to day. For this reason it cannot use the whole of its deposits in loans, but must carry a certain percentage on hand in the shape of cash, and readily available assets. Cash in the vault yields no revenue, and as a rule, the more readily available an investment is the less it returns to the holder. If all depositors wanted their money at once, it is obvious no bank could continue in business, but experience has shown that only a certain percentage will be called for in the usual course, and by reserving this and a further amount for any sudden and unlooked for demand, the balance may be loaned to the business community. As, however, its liabilities are payable on demand, the bank's business investments must be of the class not likely to be of long duration.

The finance committee of the London, Ont., city council recommends that local bankers be requested to open for one hour Saturday evenings to receive deposits, the plan being to limit the field for operations of burglars and bandits.

# IMPERIAL Lubricants

*For Manufacturing,  
Mining and Milling*

**CYLINDER OILS**

- Imperial Valve Oil
- Imperial Cylinder Oil
- Imperial Capitol Cylinder Oil
- Imperial Beaver Cylinder Oil
- Imperial 20th Century Cylinder Oil

**ENGINE OILS**

- Imperial Solar Red Oil
- Imperial Atlantic Red Oil
- Imperial Junlor Red Oil
- Imperial Bayonne Engine Oil
- Imperial Renown Oil
- Imperial Gas Engine Oil
- Imperial Arlo Compressor Oil

## The Idea Behind Them

IMPERIAL Lubricants are more than good lubricants. They are graded to give exact, scientific lubrication—a particular grade for every type of service.

This insures the correct lubrication of every journal, bearing or other machinery part. Consequently friction is reduced and more power generated and utilized for the big job—production.

The regular use of Imperial Lubricants increases plant profits and reduces overhead expense—fuel, maintenance, depreciation. Even the cost of lubrication is reduced. Read these convincing testimonials from big users of Imperial Lubricants.

### Correct Lubrication Cuts Overhead.

*In buying lubricating oils from you we have been buying "Correct Lubrication" and correct lubrication means cutting down overhead expense. We wish to thank you for the splendid service you have rendered us.*

—Canadian Vegetable Parchment Co. Limited.

### Service and Quality O.K.

*We wish to convey to you our appreciation of the service rendered by your company in the handling of our orders. The quality of your products has always proven to be as represented and satisfactory to our use.*

—Swift Canadian Co. Limited.

Imperial Lubrication Engineers will gladly advise you on lubrication. Write to 56 Church St., Toronto.

## PRINCE EDWARD ISLAND SESSION

Power Company Plans Electrical Supply for Whole Province  
—Legislation is Light

FEW changes are expected at the present session of the Prince Edward Island Legislature, which opened on March 10. The 1920 session, the first under the Liberal administration, headed by J. H. Bell, brought new taxation, an extensive roads program and other legislation. It is expected that the revenue will now cover the expenditure of the province. In the speech from the throne on March 10 Lieutenant-Governor Murdoch McKinnon reviewed the activities of the government in the promotion of agriculture, improving education, launching a roads program and keeping expenditure within revenue. In the debate on the speech the opposition maintained that the special report on the finances of the province, prepared when the Liberals assumed office, had not been a true statement, and that the increase in revenue and reduction in debt claimed by the government was wrong on that account.

One of the most important items of business before the house is the application for incorporation of the Prince Edward Island Light, Heat and Power Co., Ltd., with \$1,000,000 capital. It plans to distribute electricity to all parts of the province, rural and urban. The incorporators include Henry A. Sanders, of London, Eng., capitalist and electrical engineer; Noah A. Timmens, of Montreal, capitalist; John A. Bennan, of Chicago, electrical engineer; William J. O'Leary, of Montreal, electrical engineer; and J. J. Hughes, ex-M.P. of Charlottetown and Souris.

Other companies to be incorporated are the Charlottetown Garage Co., Ltd., capital \$10,000, the Purdie-Ferguson Co., Ltd., and the Cardigan Milling Co., Ltd.

The public bills introduced include an Act to amend the Road Act, an Act respecting arrears of taxes, and an Act to amend an Act for the prevention and suppression of fires.

On March 24 a resolution was passed urging the Dominion government to widen the gauge of the Prince Edward Island Railway, and to construct a second car ferry steamer to ply between Port Borden, P.E.I., and Cape Tormentine, N.B.

## Telephone Service and Rates

An amendment to the charter of the Prince Edward Island Telephone Company provoked much discussion, especially as regards the taxes it should pay and its relation to rural lines. Clause 1 reads as follows:—"The telephone company shall have for a period of five years, from the 31st day of December, 1920, the exclusive right to conduct the telephone business for hire rental or tolls between any one point or points and any other point or points at which the company now has in operation a telephone line or lines within the Province of Prince Edward Island. If the company hereafter shall construct a telephone line or lines between any point or points not now served by it or from any point now served, to any point not now served, then for the term aforesaid, the company shall have the exclusive right to conduct a telephone business for hire rental or tolls between such points; provided, however, that a telephone company may from time to time relinquish its exclusive privileges with respect to districts which may be operated by rural telephone companies, the lines of which said companies are connected with the telephone company's system."

Application is also made for the incorporation of the Institute of Chartered Accountants of Prince Edward Island, and of the P.E.I. Potato Growers' Association.

The inspection staff of the Toronto branch of the Travelers Insurance Company, composed of senior inspector J. A. MacKenzie and inspectors J. F. Henry, E. A. Johnson and E. G. Prince, all of whom were former marine engineers, have been made honorary members of the National Association of Marine Engineers of Canada.

## NET DEBT HAS INCREASED IN MARCH

Dominion Government Closes Fiscal Year With That Result—  
Ordinary Receipts Greatly Exceed Disbursements

ORDINARY revenue of the Dominion government in March, 1921, was about \$2,500,000 below the previous month, while ordinary expenditure was about \$4,000,000 higher. As compared with a year ago the result was also less favorable. For the twelve months, however, there has been a handsome increase in revenue, while disbursements show only a moderate advance, leaving a surplus of close to \$100,000,000 as compared with only \$40,000,000 in 1919-20.

As regards the assets and liabilities the net debt shows an increase during the year of more than \$72,000,000. The gross debt has changed but slightly, but those accounts offsetting the gross have been subject to considerable change. The following figures give the details of receipts and expenditures and the public debt, together with comparisons:—

## POWER OF MANAGER TO CALL SHAREHOLDERS' MEETING

### Remuneration of Shareholder Undertaking Management—Important Points in Company Law Clarified

IN the case of Marks v. Roccaud Co., Ltd., recently before the Supreme Court of Ontario the court gave two decisions respecting company law: (1) The manager of a private company incorporated under the Ontario Companies Act has no authority, as manager, to call a meeting of shareholders, and where a meeting has been called by him as manager "to discuss matters of importance pertaining to the company's affairs," unless all the shareholders are present at the meeting, or are represented by proxy, after due notice of the business to be transacted, no resolution passed thereat can bind the shareholders. (2) No by-law of a company is necessary for the employment of a director in some other capacity, or for his remuneration for such additional services; and where the evidence shows that a shareholder definitely undertook by arrangement to manage the company's affairs, and that he expected to be remunerated for his services, and that this was recognized by nearly all the other shareholders, he is entitled to be paid for such services.

The facts and decision of Mr. Justice Orde are: The defendant company was incorporated on the 24th June, 1914, as a private company under the Ontario Companies Act with an authorized capital stock of \$100,000, with five provisional directors and head office at Hamilton. All the capital, consisting of 1,000 shares, was issued and fully paid up."

#### Company was in Difficulties

In 1917 and the early part of 1918 the company was in a bad way and was involved financially. At a meeting of shareholders, held on the 28th May, 1918, the plaintiff, who then held 100 shares, submitted a proposition to purchase 51 per cent of the stock and to advance certain moneys to the company. This proposition resulted in the plaintiff and Mr. H. N. Kittson, one of the original incorporators, and already a holder of 280 shares, together advancing certain moneys and acquiring certain additional shares, so that by the 12th June, 1918, the plaintiff had 260 shares and Kittson 387, making 647 in all out of the 1,000 issued shares, thereby giving the plaintiff and Kittson control.

The plaintiff and Kittson had for some time during the earlier part of 1918 been conferring as to the company's affairs and the possibility of improving its position. The plaintiff says that there was an arrangement made with Kittson whereby the plaintiff was to become general manager of the company, and that he and Kittson, as well as Baby, the secretary-treasurer, were to be remunerated for their services. The plaintiff says he wrote Kittson in July, 1918, stating that he (the plaintiff) was to draw \$200 per month as salary, and that Kittson was to receive \$50 per month for his services in looking after the business at Hamilton.

This letter was not produced, and the plaintiff says that his file containing the copy disappeared, so that the only evidence of its contents is that of the plaintiff himself.

The plaintiff says that he was appointed manager of the company in June, 1918, by Kittson and Baby. Kittson was then a director, and, according to the last recorded minutes of any directors' meeting prior to that time, also vice-president.

It is admitted that there was, at that time, no meeting of directors, formal or otherwise, at which the plaintiff was authorized to act as manager or in any other capacity, but there is no doubt about the fact that from about the middle of June, 1918, onwards, Marks looked after the business of the company from its Toronto office, Baby, the secretary-treasurer, being engaged at the plant at Erin.

It appears to have been taken for granted by the plaintiff and Kittson that, having control, they could practically undertake the complete management of the company.

On the 9th of September, 1918, a meeting of shareholders which is styled the "Annual General Meeting" was held. At a meeting of directors held immediately afterwards, Mr.

Kittson was elected president, the plaintiff vice-president, and Mr. Baby secretary-treasurer. As part of the business at this meeting, it was resolved that a salary of \$150 per month, dating from the 1st June, 1918, be paid to Baby. No mention is made of the plaintiff's position as manager or of any salary to him. The plaintiff continued, however, to perform the duties which he had entered upon in June, and Mr. Kittson admits that from that time he regarded the plaintiff as the "managing director" of the company. As he put it, the plaintiff was the director who managed the company.

#### Annual Meeting Called

The company's business was not improving and in October, 1918, Marks wrote Kittson asking him to call a shareholders meeting. This was not done, so Marks called the meeting, signing the notices as "manager."

There was some question as to the regularity of this meeting. The plaintiff had no authority, as manager, to call a meeting of shareholders. Nor did the president's failure or refusal to call a meeting justify the plaintiff in assuming the right to call it. A special general meeting of shareholders can be called only upon the authority of the directors; and, although the plaintiff held a sufficient number of shares to enable him to exercise his right to have a meeting called under sec. 46 of the Ontario Companies Act, he did not follow the requirements of that section. So that, unless all the shareholders were present at the meeting, or were represented by proxy after due notice of the business to be transacted, no resolution passed thereat could bind the shareholders.

I think that the evidence shows that in June, 1918, the plaintiff definitely undertook, by arrangement with Kittson and Baby (Kittson and the plaintiff together holding two-thirds of the stock), to manage the company's affairs at its Toronto office, and that the plaintiff expected to be remunerated for these services. These facts are recognized by almost all the shareholders. Under these circumstances, unless there is some technical reason for refusing the plaintiff relief, he ought to recover.

Under these circumstances, the plaintiff is, in my judgment, entitled to be paid for his services as upon a *quantum meruit*; and, as the value thereof has been practically determined by the shareholders themselves at \$1,200, there should be judgment for the plaintiff for that amount, with costs.

#### PRESCOTT BANKER'S COSTLY MISTAKE

At the assizes in Brockville, Ont., on March 31, Justice Lennox reserved judgment in an action for damages brought by Duncan McKay, Prescott, against the Merchants Bank, and J. C. Carruthers, G.T.R. ticket agent in that town. McKay last July purchased from Carruthers a ticket for Detroit, tendering in payment a cheque for \$15.50, the amount of the fare. When he called up the bank the accountant in mistake replied that "Dr." instead of "Mr." McKay did not have an account and told Carruthers he felt sorry for him. The latter immediately got out a warrant for McKay, who was taken off a train at Kingston, shackled, locked up and taken to Prescott where next day the case was dismissed, it being found that he had \$100 on deposit in the bank. McKay had accepted a position in Detroit at 55 cents an hour, and this he claims to have lost through the transaction.

Justice Gibsons rendered judgment in Quebec on April 3, in the case of the city of Levis against the "Prevoyants du Canada," an insurance company, which had claimed exemption from the business tax in the city on the ground that they were not carrying on a commercial business but were a mutual organization. His Lordship decided that the company were liable to pay the tax in future.

# News of Industrial Development in Canada

**Shawinigan Water and Power Company to Establish Steamship Line—Lumber Trade at the Coast is Picking Up—Cape Breton Pulp Companies Prepare for Big Season—Vickers Plant Has No More Orders—Three American Branch Plants to be Located in Ontario**

**P**LANS for the development of a new enterprise which will favorably affect the pulp and paper industry, and which will be particularly welcome to Quebec manufacturers, have been outlined generally by J. E. Aldred, president of the Shawinigan Water and Power Company. In the effort to facilitate the economical operation of the various plants along the St. Maurice River and to connect them directly with their export markets, Mr. Aldred stated that the establishment of a line of steamers to ply between Three Rivers and United States ports was in process of being carried out, and that the near future would probably see the plan definitely effected.

"The development," said Mr. Aldred, "is a logical one, and one which we have had in mind for some years past. With the phenomenal growth of the pulp and paper industry, the manufacture of chemicals and other products along the St. Maurice, the time seems favorable to the carrying out of our original plans, whereby the different industries will have direct connection by water with their markets across the border. The port of Three Rivers lends itself admirably to such a scheme, the harbor there possessing the essential natural facilities for handling the business emanating from the new paper mills there, together with that from up the St. Maurice."

## Manufacture Paper Machinery

Some time ago it was announced that the Port Arthur Shipbuilding Company would go into the pulp and paper machinery manufacturing business. A statement has been made by A. B. Conmee, secretary, outlining the intentions of the company. He says: "We plan to branch out into this new line of manufacture on as large and extensive a scale as possible, and expect soon to be making such equipment for the trade as digesters, grinders, chippers, slashers, barkers, pumps, screens, wet machines and board and paper machines.

"Our plant was largely designed for the building of ships, their engines and boilers, and, geographically located as it is, it was found necessary to make it almost a self-contained unit, in order to carry on the many and diversified forms of work entering into the construction of a complete ship. We, therefore, have available large fabricating shops and assembling floors which are served from such buildings as the pattern shop, forging, machine, boiler, pipe, copper-joined shops and the iron and brass foundries, all of which buildings are modern and equipped with up-to-date machinery and tools and overhead cranes, the entire plant being operated with the aid of electrical compressed air and hydraulic power. The facilities of these shops in the way of equipment are most favorable for the manufacture of the heavy and complicated types of machinery and equipment necessary for the successful manufacture of pulp and paper machinery. We also contemplate to install, in addition to our present foundry facilities, an electric steel furnace."

According to reports from the British Columbia coast, the number of orders received, both for home and export needs, during the past few weeks has made the lumber merchants quite optimistic. For some time now the trade has been very much depressed, with hardly any business, but a change is taking place. During the past three weeks between fifty and sixty mills and logging camps have opened up for the summer operations, and only a few hundred unemployed loggers now walk the streets of Vancouver. There has been a slight cut in the rate of pay, but not enough to make any appreciable difference to the individual. Now that the loggers have definitely broken away from the One Big Union, they are inclined to take a more reasonable view of the economic situation, and do not insist on sharing in the benefits of good times without also sharing in the pinch of occasional depressions.

Included among the orders on hand just now is one for eight million feet of ties for Egypt, to be shipped to Alexandria next month by the Canada Overseas Trading Company.

Cape Breton pulp companies are preparing for the biggest season's cut of many years, according to reports from Sydney, N.S. Cheaper water freight rates have created an American demand for Cape Breton pulp in preference to Quebec and New Brunswick pulp, which has to be handled by rail.

Clarke Brothers Paper Mills, Ltd., have opened their new plant, and word has been received that they have started making boxes at Glen Falls, just out of St. John, N.B. The plant will be used exclusively for the manufacture of fibre board, as well as corrugated and fibre board boxes, which will be made from the highest grade of Kraft pulp, to be supplied by Clarke Bros., Ltd., and shipped across the Bay of Fundy from the Bear River, N.S., plant. Their shipping facilities are good, being served by two railways, the Canadian Pacific and the Canadian National; they also have the advantage of the ocean port of St. John.

Following the launching of the "Idefjord," the first of the two steamers being built by Canadian Vickers, Ltd., for the Norwegian American Line, Christiania, at Montreal last week, a serious note was sounded by P. L. Miller, general manager of the company, with regard to shipbuilding. After remarking that Vickers had felt especially honored by receiving the contract for the Norwegian ships, owing to the strict requirements of Norwegian registry, he said that the company had no more building work on hand after these two ships were completed. The company could not continue to pay the same wages that were paid during the war. He thought that at a time like this half a loaf was better than no bread, but labor apparently did not agree, and in consequence the firm would probably be compelled to shut down for a year.

## Packers Go Back

Employees of the Chatham, Ont., plant of the Wilson Canadian Packing Co., who went on strike last week as a result of a twelve-and-a-half per cent. cut in wages decided to accept the new wage scale and return to work, according to a statement issued by the management of the plant. No settlement has yet been reached between Toronto packing companies and employees, however. The companies have not been affected to a very large degree, and report that they are able to get all the labor necessary to operate their plants.

Two new industries, the Fuller Brush Co., of Hartford, Conn., and the Coffield Washer Co., have decided to erect plants in Hamilton, according to C. W. Kirkpatrick, industrial commissioner. The Fuller Brush Co. employs 1,700 hands in its plant at Hartford, and had a turnover last year of \$5,000,000, it was stated. About 100 hands will be employed in the Hamilton plant, but it is expected that that number will be substantially increased in another year.

The Coffield Washer Co. will manufacture a new type of electric washing machine. It is supported by local capital and will commence operations in a few weeks. About 50 hands will be employed at the start.

President Rea, of the Woodstock, Ont., Board of Trade, has received word that the American Ironing Machine Co., of the United States, which recently considered Woodstock as a site for the location of its big Canadian plant, has decided to locate there and start manufacturing within a couple of weeks. The plant will be situated on Beale St. The Kirsch Manufacturing Co., a large American company, which has just decided to come to the city, is expected to establish there soon.

A new electric steel foundry plant has been opened at New Glasgow, N.S., by J. W. Cumming Manufacturing Co., Ltd.

Saskatchewan.—Saskatoon Producers Milk Co., Ltd., Saskatoon, \$200,000; Western Traders, Ltd., North Battleford, \$20,000; Standard Hardware Co., Ltd., Zelma, \$5,000.

## INSURANCE LICENSES AND AGENCY NOTES

License has been issued to the Sterling Fire Insurance Co. of Indiana, U.S.A., authorizing the transaction in Canada of hail and automobile insurance, in addition to the classes for which it is already licensed.

Two licenses have also been issued by the Dominion Insurance Department, authorizing two companies to transact life insurance as fraternal societies. These licenses have been given to the Supreme Lodge Knights of Pythias and the Western Mutual Life Association, and replace those issued in 1920.

Alex. Robertson, who has been with the Liverpool and London and Globe Insurance Co. at the head office for Canada, Montreal, for the past twelve years, has resigned his position with that company and has become associated with the fire branch of the Motor Union Insurance Co., Ltd., Toronto.

Hilary Watts has been appointed district manager of the North American Life Assurance Co., with headquarters at Brantford, Ont. He succeeds F. J. Reid, who has resigned from that position, but who will still continue to represent the company in Brantford. J. M. Coté has been appointed district manager of the company for Quebec City and vicinity, succeeding J. B. Morissette, who will still continue to represent the company in that city.

At the beginning of 1920 the Spanish River Pulp and Paper Co., Ltd., insured all of its employees with the Metropolitan Life Insurance Co. under the group plan. Since that time ten of the employees have died, and death claims totalling \$12,250 have been settled. Settlement of these claims took place within six to eight days after the necessary papers were submitted.

The Canada Life Assurance Co. has been awarded a group insurance contract by the city of Calgary, Alta. Civic employees will be required to pay 60 per cent. of the premiums. Firemen, policemen, and linemen of the electric light department will receive free accident and sickness insurance from the city owing to the dangerous nature of their position.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year a total of \$3,492,840. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions, so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**Aid to Defaulting Towns is Discussed by Provincial Governments—Saskatchewan and Quebec Are Opposed to Assumption of Obligations, While Alberta and Manitoba Favor Such Action—South Vancouver Ratepayers Will Once Again Have an Opportunity to Exercise Their Franchise—Toronto, Moose Jaw and Fort William Tax Rates are Higher**

**F**OLLOWING the announcement by the Saskatchewan government that "it will not be driven into assuming obligations for their liabilities," diverse opinions have been expressed as to the expediency of such action. On the one hand, there is the fact that the credit of the whole province may be affected by the defaulting of a few municipalities, while on the other there is the belief that the acceptance by the province of municipal obligations will establish a precedent which will lessen the responsibility of the municipalities.

The premier of the province of Quebec has introduced a new point, however, in refusing to comply with a suggestion that his government pay the interest on the bonds of three small municipalities on the Island of Montreal, that had gone back in the payment of their interest. He emphasized a fundamental principle of municipal government when he insisted that each municipality must carry its own debt, without aid from the province, otherwise the credit of the province itself would be adversely affected, and consequently the credit of all within the province.

He inferred that the very essence of government is responsibility—whether it be federal, provincial or municipal—and the tendency of smaller municipalities, located near industrial centres, or cities, to take undue chances in extensive improvements, is not only dangerous in itself, but absolutely against the idea of autonomous democracy. Such a policy is even dishonest inasmuch as municipal debts are incurred out of all proportion to the taxable value of the community, and the fact that most of these extravagant improvements are made at the request of local real estate owners and speculators, because of the enhanced and fictitious values such improvements give their holdings, does not excuse any council making them.

## Alberta Favors the Other Side

This substantiates the view taken by the province of Saskatchewan, but there are two provinces which are partial to the other side of the question. Hon. C. R. Mitchell, treasurer of Alberta, has introduced a bill in the provincial legislature, providing that the province could, after appointing an administrator, advance certain sums of money necessary to maintain the administration. This action, said the minister, would only be taken in extreme cases. Athabasca was taken as an example of an extreme case. It was stated to the government that in 1922 the "town would own the whole town." Premier Stewart supported the minister of finance, and stated that the small amount of money necessary for the purpose proposed would be nothing compared with that which would be lost if the general credit suffered. The government was not unanimous on this point, however. It was stated that such legislation was dangerous, and that the province would have a lot of the municipalities throwing up their hands and asking the province to step in. But the premier said that he did not think many municipalities would lay down, because they would find themselves under very stern administration. The province, he indicated, would be "almost merciless in the collection of taxes."

The province of Manitoba is also inclined to take this view. A Toronto bond house has received a letter from Winnipeg which states that there is absolutely no intention on the part of the present government to allow such conditions as prevail in certain defaulting municipalities to occur there. With particular reference to Transcona, the position of which town was outlined in these columns recently, the letter goes on to say: "The administrator, Mr. Campbell,

who has been the backbone of the town of late years, has been appointed under direct supervision of the municipal commissioner, E. M. Wood, and it is the intention of the government to see that outstanding liabilities of the town are paid promptly. This certainly applies as far as interest payments are concerned. In this connection there have been recent amendments proposed to the Treasury Act of Manitoba which will give the treasury department a fund of \$1,000,000 at their disposition, to be used for assisting over the stile any defaulting municipality."

**South Vancouver, B.C.**—After having been in the hands of the province for nearly three years, the municipality will shortly be governed by a reeve and a council, as formerly.

**Sarnia, Ont.**—The city council has fixed the tax rate at 39 mills on the dollar, as compared with 36 mills for 1920.

**Haileybury, Ont.**—The tax rate for 1921 will be 48 mills for public school supporters and 58 mills for separate school supporters.

**Preston, Ont.**—A tax rate of 39 mills on the dollar has been struck by the town council. This compares with 34 mills two years ago.

**Fort William, Ont.**—A tax rate of 39 mills has been adopted by the council for 1921. This compares with 36 mills in 1920.

**Camrose, Alta.**—A falling off in collections is reported by the municipality, the amount last year being only 75.2 per cent., of current taxes, as compared with 80.3 per cent., in the previous year.

**Moose Jaw, Sask.**—Public school supporters will have to pay a tax rate of 46 mills on the dollar this year, as compared with 41.60 mills in 1920, while separate school supporters will be required to pay 52 mills on the dollars, as compared with 49.30 last year.

**Guelph, Ont.**—According to figures submitted by the Ontario Hydro-Electric Commission, the city is the first municipality on the hydro system in Ontario to be entirely out of debt. The total investment and responsibility of the city is \$1,185,501. Guelph was one of the twelve "originals" in the hydro project.

Ontario to be entirely out of debt. The total investment and responsibility of the city is \$1,185,501. Guelph was one of the twelve "originals" in the hydro project.

**Toronto, Ont.**—A tax rate of 33 mills on the dollar, as compared with 30½ mills last year, has been struck by the council. Separate school supporters will have to pay a rate of 37 mills. The amount of taxes to be paid by public school supporters will be \$21,672,323 and by the separate school supporters \$2,832,209. In addition the city receives \$10,874,204 from revenue other than taxation.

**Edmonton, Alta.**—Revision of civic utility rates has been recommended by the city commissioners to the council and it is probable that the new tariff will be brought into force, with, perhaps, slight change from the original proposals. Street railway, telephones, lighting and water departments all come under this consideration. Commissioner Yorath stated that the proposed rates would average well up with what were in force in other western cities, and urged that the broader question of civic finances be looked at, and that cash revenue be considered as essential.

"Municipal and Real Estate Finance in Canada" is the title of a pamphlet just issued by the Commission of Conservation, Ottawa. The author is Thomas Adams, town planning adviser to the Commission.

# Government and Municipal Bond Market

Alberta is Calling for Tenders on Two Million Issue—Victory Loan Prices Were Firmer — Lethbridge Northern Bill is Favored by Provincial Legislature — Interest Rate May be Reduced—St. John Bonds Sold On 6.20 Per Cent. Basis

QUIETNESS was again in evidence in the government and municipal bond market during the past week. The lull is just a temporary one, however, for our provinces and municipalities still have large financial programs ahead of them. Alberta is calling for tenders on an issue of bonds, which are made payable in Canada only. The provincial legislature has also been asked to provide a sum of about \$9,000,000 for capital expenditure, which is to be devoted to construction of telephones and improvement of railways under provincial jurisdiction. The action of the provincial government with regard to the guaranteeing of bonds of organized irrigation and drainage districts, may likewise bring out a number of such issues.

The Lethbridge Northern bill has been introduced and has met with the favor of both government and opposition. The bill sets out chiefly that the province shall guarantee the principal and interest on the total issue of bonds amounting to \$5,400,000. It centralizes authority and power in the irrigation council of the government, which means that the government will have full control of selling the bonds, arranging the finances and making and carrying out the contracts. In this case an advantageous offer could be received for the securities if the interest rate was lowered to 6 per cent., from the original rate of 7 per cent. The trustees of the district are considering this, and in all probability a new by-law will have to be prepared and submitted to vote.

Announcement by the minister of finance that the government had disposed of \$19,719,250 of 1924 and 1934 Victory bonds since the special committee ceased operations last November, was a surprise to all those who had not participated, for the market had not registered such a movement. With the exception of 1923's and 1934's, Victory loans tended to firm up during this week. This is illustrated by the following figures:—

	Control price.	Last week.		This week.	
		High.	Low.	High.	Low.
1922 .....	98	98 $\frac{3}{8}$	98	98 $\frac{3}{8}$	98 $\frac{3}{8}$
1927 .....	97	97 $\frac{3}{4}$	97	98 $\frac{1}{8}$	97 $\frac{1}{2}$
1937 .....	98	99 $\frac{1}{2}$	98 $\frac{3}{4}$	99 $\frac{1}{2}$	99
1923 .....	98	98 $\frac{1}{8}$	97	98	96 $\frac{3}{4}$
1933 .....	96 $\frac{1}{2}$	98	97	98	97 $\frac{3}{8}$
1924 .....	97	96 $\frac{3}{8}$	96	96 $\frac{3}{4}$	96
1934 .....	93	94 $\frac{3}{8}$	94 $\frac{1}{4}$	94 $\frac{3}{8}$	94 $\frac{1}{4}$

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Nokomis, Sask. ....	\$ 20,000	8	15-instal.	.....
Whitmouth R.M., Man.	25,000	6	30-instal.	Apr. 16
Acton, Ont. ....	18,000	6 $\frac{1}{2}$	30-instal.	Apr. 16
Ste.-Marie-de-Sayabec, Que. ....	11,600	..	20-years	Apr. 18
Vermillion, Alta. ....	27,000	6 $\frac{1}{2}$ & 7	20-instal.	Apr. 18
Alberta .....	2,000,000	6	15-years	Apr. 18
Niagara Falls, Ont. .	250,000	5	30-instal.	Apr. 18
Minto Tp., Ont. ....	4,000	6	10-instal.	Apr. 18
Walkerville, Ont. ....	95,982.35	6	Various	Apr. 21
St. Boniface, Man. ....	273,233	5 & 6	Various	Apr. 25
Miniota R.M., Man. .	83,500	5 $\frac{1}{2}$	Various	Apr. 25
Regina, Sask. ....	154,010	6 & 6 $\frac{1}{2}$	Various	Apr. 25
Rockwood R.M., Man.	70,000	6	30-instal.	Apr. 28
Peace River, Alta. .	10,000	6	5-instal.	.....
Sturgeon Falls, Ont.	126,500	6	20 & 30-years	.....

Niagara Falls, Ont.—Tenders will be received until April 18, 1921, for the purchase of \$250,000 5 per cent. 30-instalment sewer debentures. W. J. McMurray, treasurer.

Minto Township, Ont.—Tenders will be received until April 18, 1921, for the purchase of \$4,000 6 per cent. 10-instalment school debentures. Robert Holtom, Clifford, Ont.

Sturgeon Falls, Ont.—The town is offering for sale \$35,000 6 per cent. 20-year sidewalk debentures and \$91,500 6 per cent. 30-year sewer debentures. L. R. Vannier, town treasurer.

Alberta.—Tenders will be received until April 18, 1921, for the purchase of \$2,000,000 6 per cent. 15-year bonds, payable in Canada only. (See advertisement elsewhere in this issue.)

Acton, Ont.—Tenders will be received until noon, April 16, 1921, for the purchase of \$18,000 6 $\frac{1}{2}$  per cent. 30-instalment waterworks debentures. Advertisement was given in these columns last week.

Regina, Sask.—Tenders will be received until April 25, 1921, for the purchase of \$154,010 6 and 6 $\frac{1}{2}$  per cent. debentures of various maturities. (See advertisement elsewhere in this issue.)

Walkerville, Ont.—Tenders will be received until April 21, 1921, for the purchase of \$60,982.35 6 per cent. 10-instalment debentures and \$35,000 6 per cent. 20-instalment debentures. (See advertisement elsewhere in this issue.)

Miniota R.M., Man.—Time for receiving tenders which formerly closed on April 15 has been extended to April 25, 1921. The securities for sale are: \$80,000 5 $\frac{1}{2}$  per cent. 30-instalment for good roads; \$3,500 5 $\frac{1}{2}$  per cent. 20-years for telephones. Principal and interest are guaranteed by the province of Manitoba. W. E. Warren, secretary-treasurer.

Whitmouth R.M., Man.—Tenders will be received until April 16, 1921, noon, for the purchase of \$25,000 6 per cent. 30-instalment debentures, the proceeds of which will be used for bridges, roads and culverts. The municipality has no previous debenture debt. Ches. Pound, secretary-treasurer, Whitmouth. This is the same issue which was offered in March, when all tenders were rejected.

## Debenture Notes

Glace Bay, N.S.—The school board desires to raise \$205,230.

Lethbridge, Alta.—Ratepayers have authorized the raising of \$160,483 for various local improvements.

Wolfville, N.S.—The municipality will apply for powers to borrow \$44,500 for schools and other local improvements.

Outremont, Que.—The city council is considering the issue of \$750,000 5 $\frac{1}{2}$  per cent. 30-year debentures, for various local improvements.

Southampton, Ont.—Ratepayers have authorized the guaranteeing of the bonds of Panels, Ltd., a local manufacturing company, to the extent of \$20,000.

Galt, Ont.—Ratepayers have authorized the borrowing of \$25,000 for purchase and equipment of stone quarries, and have defeated a by-law for the same amount for improvements to the city hall.

Saskatchewan.—The following is a list of debentures authorized by the Local Government Board from March 26 to April 2, 1921:—

Schools.—Gallinger, \$2,000 8 per cent. 10-instalment; Greystone, \$2,000 8 per cent. 10-years annuity; Stratford, \$2,500 8 per cent. 10-instalment; Orel, \$500 8 per cent. 10-years annuity; White Eagle, \$1,000 8 per cent. 10-instalment; North Melville, \$4,000 8 per cent. 15-years annuity; Abbey, \$2,000 8 per cent. 20-years annuity.

Village of Prelate, \$950 8 per cent. 7-instalment, for sidewalks.

### R. A. DALY & Co.

BANK OF TORONTO BUILDING  
TORONTO

**Regina, Sask.**—City commissioners have been authorized to call for bids on an issue of \$100,000 local improvement debentures.

**Toronto, Ont.**—The board of control has decided to recommend to the city council that a by-law be introduced and passed authorizing the issue of debentures for \$10,000,000 for street railway purposes.

**Kamloops, B.C.**—The municipal department of the province has issued a certificate of authorization to the municipality to raise \$35,000 for school purposes by 7 per cent. 20-year debentures.

**Verdun, Que.**—The Central Catholic School Board has refused the local commissioners authority to borrow \$175,000. It was pointed out that the school tax in Verdun was already much heavier than in Montreal, and would be further increased if this borrowing power were granted.

**Victoria, B.C.**—Two bids were received by the city for securities to mature in July, 1930. It will be remembered that tenders were called on \$244,501.81 6 per cent., treasury certificates, maturing from 1921-30 and from 1921-35. Houser, Wood and Co., of Toronto, agreed to purchase at 92.67 treasury certificates to the amount of \$200,000, with interest payable in semi-annual instalments by coupon. The Canada Bond Corp., and Harris, Read and Co., bid a fraction less on \$50,000 worth of the certificates, their price being 92.66.

#### Bond Sales

**Aurora, Ont.**—J. M. Walton, a local bond dealer, has bought the town's issue of \$27,060 5½ per cent. 20-instalment debentures at a price of 93.97, which is on about a 6.27 per cent. basis. The following tenders were received:—

J. M. Walton	93.97
Harris, Forbes & Co., Inc.	93.38
Turner, Spragge & Co.	93.37
Dymont, Anderson & Co.	92.78
Morrow & Jellett	92.78
A. E. Ames & Co.	92.33
United Financial Corp., Ltd.	92.37
R. C. Matthews & Co.	92.30
W. L. McKinnon & Co.	92.23
Imperial Bank of Canada	92.08
T. S. G. Pepler & Co.	92.04
Macneil, Graham & Co.	92.036
A. Jarvis & Co.	92.03
Wood, Gundy & Co.	91.37
McLeod, Young, Weir & Co.	91.26
R. Clapp & Co.	91.25

**Saskatchewan.**—The following is a list of sales reported by the Local Government Board from March 26 to April 2, 1921:—

8 per cent. 10-year Schools—Kochmstedt, \$700, Harptree, \$3,000, Nut Mountain, \$1,500; to Nay and James. Willowmoor, \$1,000, Lanville, \$1,000, Harvest, \$1,000, Proswita, \$1,500, Belleau Brook, \$2,000; to C. C. Cross and Co. Rockwood, \$3,200, Old Trail, \$2,000; to the Regina Public School Sinking Fund. Gibson Creek, \$2,000; to Waterman-Waterbury Co. Cupar, \$3,000; to Harris, Read and Co. An issue of \$600 Mountain Lake 8 per cent. 4-year debentures has been sold to J. S. Wien, Langham.

**Rural Telephones.**—8 per cent. 15-years—Bow Valley, \$2,500, Reford, \$1,450, Bonnie View, \$1,000, Torondal, \$2,000; C. C. Cross and Co. Northwood, \$12,200; Harris, Read and Co.

**Rural Municipalities.**—Fertile Valley, \$5,050 10-years 8 per cent., Sasman, \$5,250 20-years 8 per cent.; Harris, Read and Co.

**Town of Gravelbourg,** \$6,000 30-years 7 per cent.; C. N. McManus, Moose Jaw.

**St. John, N.B.**—A syndicate of four local dealers has purchased \$100,000 of city and county of St. John 6 per cent. bonds due January 1, 1931, at 98½ and accrued interest, which is on about a 6.20 per cent. basis. The bonds were issued for hospital purposes.

**Burlington, Ont.**—An issue of \$48,403.77 6 per cent. debentures, maturing in 15 and 30 instalments, has been

awarded to the United Financial Corp., Ltd., at 95.78, which is on about a 6.42 per cent. basis. The following tenders were received:—

United Financial Corp., Ltd.	95.78
Dominion Securities Corp.	94.938
R. C. Matthews & Co.	94.68
C. H. Burgess & Co.	94.62
A. E. Ames & Co.	94.29
Wood, Gundy & Co.	94.21
McLeod, Young, Weir & Co.	94.09
Zimmerman & Mallach	93.89

**Carleton County, Ont.**—R. C. Matthews and Co. have purchased \$235,000 6 per cent. debentures at a price of 97.937. The securities are payable as follows: \$100,000 twenty-instalments; \$85,000 twenty-instalments; \$50,000 five-instalments. At this rate the municipality pays about 6.30 per cent. for its money.

### INTRICACIES OF THE INCOME TAX

Government Now a Silent Partner in Industry—Accounts Must Show Results as Required for Assessment

**I**F PROOF were required of the difficulties met by taxpayers in calculating their obligations to the Dominion government, the number of pamphlets issued by institutions and individuals for the purpose of making clear the provisions of the Income Tax Act would be sufficient. Some of them, like that issued by the Royal Bank, are exhaustive, showing all the details required. A smaller one which deals rather with a few points on which taxpayers are liable to go wrong was recently issued for free distribution by David Cooper, C.A., of David Cooper & Co., Winnipeg and Brandon, will also be found useful. It shows the rates for 1917 to 1920 for corporations and for individuals, and under the heading "Things to Remember" sets forth the penalties, etc. In his comments Mr. Cooper says:—

"The new tax laws have caught business quite unprepared. This is due almost wholly to the difficulty experienced in properly interpreting these laws. That this difficulty is not confined to a few is evidenced by the following extract from a newspaper: 'Taxpayers need not feel chagrined because they cannot figure out their income tax. The men who formed and passed the laws are in the same fix; . . . they all need help in preparing their own tax returns.'

"The tax laws, formulated to provide the government with enough money to meet operating expenses, interest on the national debt, and help repay the principal borrowed for war purposes, are of necessity very complex, and to many, very confusing. In formulating these tax laws there were many conditions to bear in mind.

"In the first place the laws had to be as just as was possible, and in the second place they had to be simple and understandable. In order to have the laws fair and just, simplicity in some cases had to be sacrificed. The fact that the laws as they now exist are complex accounts for the very small percentage (not even five per cent.) of business men familiar with the operation of the acts, or the proper procedure to be followed. This is true even after the statutes have been given careful study.

"The government is now the silent partner in every business. Regulations have been laid down, and these must be obeyed to the letter. Many individuals and corporations have already been prosecuted for failure to comply with the provisions of the Income Tax Act, and from newspaper announcements many more prosecutions are pending. Penalties of thousands of dollars have already been imposed, and from now on the department of taxation will have little sympathy to waste on those who do not keep proper records and who fail to make accurate returns of their taxable income. Business and professional men are at last alive to the fact that their tax problems are not best handled by the usual spring rush, when the forms are available."

CORPORATION SECURITIES MARKET

Canadian Stocks Continue Uncertain Trend—Brompton Offering Will Be Made this Month—Laurentian Power Issue—New Windsor Hotel Stock Being Sold

FOR three months trading on the Canadian stock exchanges has been influenced by uncertain and apprehensive sentiment, which resulted from the condition of general business, and still the chances for a change seem as far away as ever. During the past week events which occurred both here and abroad were not particularly encouraging, although there were some points which were not altogether unfavorable.

The issuance of the annual report of the Consolidated Mining and Smelting Co.'s report merely confirmed anticipations, while the passing of the dividend was no more than expected. Such happenings, however, usually cast a slur upon the market. Consolidated Smelters is perhaps the only mining enterprise, in its class, in America to-day that has not followed its great associates in the United States in closing down its mines. It is still in operation, and from weekly reports from the company its properties are still shipping the usual weekly quota to the smelter.

Trading for the week resulted in the turnover of listed stocks on the Montreal exchange of 37,453 shares, as compared with 29,927 in the previous week, while in Toronto the figure was 13,061, compared with 14,974. Bonds changed hands to the extent of \$1,120,248 in Montreal, as against \$1,124,200, while the turnover in Toronto was \$862,600, compared with \$804,800 previously.

Towards the end of this month, Greenshields and Co. and Hanson Bros., will bring out an issue of Brompton Pulp and Paper Co.'s bonds. Full details are not yet available, but it is understood that the amount of the offering to the public will be \$1,500,000, for about \$1,000,000 of the \$2,500,000 authorized has been taken for investment by the directors.

Bond Issues

At an early date, J. C. Mackintosh and Co., Halifax, members of the Montreal Stock Exchange, will offer to the public the unsold balance of \$1,000,000 6 per cent., first refunding mortgage 20-year bonds of the Laurentian Power Co., Ltd., maturing January 1, 1936, at a price of 88½, to yield the investor 7¼ per cent. These securities are payable both as to principal and interest in New York or Canada, at the option of the holder. In view of this the premium arriving from payment of interest in New York funds would increase the yield to more than 8 per cent.

The Laurentian Power Co. is the chief supply of the Quebec Railway, Light and Power Co., on which the city of Quebec is dependent for its principal utilities.

An issue of \$50,000 of 8 per cent. bonds of the Canadian Apartment Co. is being made. The bonds are secured by a mortgage on the Westminster apartments on Morris Street, Halifax, N.S. The construction is of a solid character and provides 50 self-contained apartments. The prospectus says the building and equipment have cost \$230,000, which has been financed so far by a mortgage loan from the Eastern Trust Co. for \$90,000 and the sale of \$84,000 of stock at

par less commissions. The balance is to be paid from proceeds of the present issue of 8 per cent. bonds.

Holders of 6 per cent., debenture stock of the Canada Land and Irrigation Co., Ltd., unanimously consented to the creation of 300,000 7 per cent., prior lien debenture stock, and according to word received at the Medicine Hat office of the company, the issue has been successfully subscribed, and arrangements are being made to proceed with the construction program. The stock is to be redeemable in 1929 and 1933 at a premium of 100 per cent.

Windsor Hotel Stock Offering

B. N. Rosenbaum and Co., of New York and Montreal, is offering at Windsor, Ont., through the treasurer, E. L. Gauthier, preferred and common stock of the New Windsor Hotel Co., Ltd., Windsor, Ont. The capital consists of \$1,000,000 8 per cent., cumulative sinking fund preferred stock, shares of \$100 par value, and \$2,000,000 common stock, shares of \$10 par value. The preferred is offered at par with a bonus of one share of common, while the common is offered at \$7 per share.

The proceeds of the issue will be used for the construction of a ten-storey fire-proof 307 room hotel in the city. An agreement has been entered into between the company and Anglin-Norcross, Ltd., contracting engineers and builders, Montreal, for the erection of the hotel to begin about May 1 of this year, so that the hotel will be in operation about March 1, 1922, according to estimates.

Circulars have been received by the shareholders of the North American Pulp and Paper Co. Trust informing them that negotiations for the sale of the Trust's assets to a London syndicate have brought a request from the syndicate as to what number of shares will be delivered in case of purchase. Shareholders are therefore requested to deposit with the Guaranty Trust Co. of New York what shares they will dispose of for \$6 cash (New York funds) so that a reply may be made to the syndicate. Those not wishing to dispose of their holdings are given the opportunity of changing them for shares in the Saguenay Pulp and Paper Co. at the rate of ten shares of North American Pulp common for 22.5 shares of Saguenay preferred, and 8 shares of Saguenay common.

The Montreal Stock Exchange announces that on and after April 15th the shares of the Montreal Loan and Mortgage Co. and of the Montreal Telegraph Co. will be traded in on the basis of dollars per share and the commission to be charged will be 25 cents per share. The par value of the Montreal Loan and Mortgage stock is \$25, and of the Montreal Telegraph stock \$40. Up to the present the quotations for the two stocks have been by points on the par value of \$100 basis, the former stock being last quoted at 165 and the latter at 112. On the new basis the Loan stock would be quoted at 41¼, and the Telegraph stock at roughly 44¼. The Loan stock pays 12 per cent. with a bonus, and the Telegraph stock 8 per cent. with a bonus. In reference to the 25 cents per share to be charged as commission the change is from 10 cents per share up to that now charged on the Telegraph stock, and 6¼ cents on the Loan stock, the commission being formerly charged on the amount of investment rather than on the number of shares.

## NOVA SCOTIA INCREASES CORPORATION TAXES

**Necessity for More Revenue—the Reason—Commission to Investigate Local Taxes—Other Work of the Legislative Session**

LEGISLATION looking to the widening of the sources of revenue of the province, the further extension of the public health program and mothers' pensions, was forecast in the Speech from the Throne opening the 1921 legislative session of Nova Scotia on March 9. The curtailment of production in the coal, iron and steel industries was referred to and the hope expressed that, with wise counsel and full and frank understanding of prevailing conditions and with a friendly spirit of co-operation between employer and employee, any difficulties incident to the general industrial situation would be surmounted.

## Taxes on Corporations

On April 8 a bill to amend the Provincial Revenue Act was introduced by Hon. E. H. Armstrong, acting leader of the government. The present taxation, it is expected, will produce during the current fiscal year \$426,000. By the changes made the revenue will be increased by approximately \$115,000. The corporations affected by this act are banks, insurance companies, loan and trust companies, telegraph, telephone and cable companies, gas and electric companies, electric tramways, railways and incorporated companies with a paid-up capital of \$100,000 or more. The main alterations are in the taxation of banks, telegraph and cable companies, express companies and electric light companies. The methods of taxation have not been altered, though the amounts chargeable have been increased, with the exception of telegraph and express companies, which are expected hereafter to pay an additional tax based on their gross earnings, within the province. The provision of the act respecting the taxation of certain companies with a paid-up capital of \$500,000 or more, have been altered so as to increase the tax from one-twentieth to one-tenth of one per cent. on the paid-up capital employed in Nova Scotia, and to make it applicable to all companies having a paid-up capital of \$100,000, instead of \$500,000.

The measures thus far introduced include a bill to authorize the Governor-in-Council to raise by way of loan on the credit of the province the sum of \$500,000 for the public service. The sums realized from the sale or disposal of debentures or of Nova Scotia stock issued for the purpose of raising the said sum or any part thereof to be paid into the provincial treasury and be used and applied for the purpose of paying for extensions or additions to the buildings the Victoria General Hospital and for additional building for said hospital.

## A Taxation Commission

There is also a bill for the appointment of a Tax Commission, with the object of bringing the assessment system of Nova Scotia under a central body. In discussing the bill on April 6 Hon. E. H. Armstrong explained that it was felt the time had arrived for an improvement of the assessment law, and some remedies applied to overcome the prevailing irregularities under the present law. The bill which the government had introduced was based on a bill in force in Manitoba, which was adopted in that province to correct much the same conditions of affairs as prevailed in Nova Scotia. The bill provides for the establishment of a commission to be composed of three members, who shall be possessed of knowledge and training in the subjects of taxation and skill in such matters. The office shall be in Halifax, and regular meetings shall be held every month, and, when necessary, sittings may be held elsewhere in the province. The commissioners shall receive remuneration to be fixed by the Governor-in-Council.

The Commission shall study, investigate and report on the assessment and tax laws of this and other provinces of Canada and of other countries, to study the most equitable methods of assessing persons and property and of equaliz-

ing assessments, and to submit to the legislature recommendations for such legislation they may deem necessary to improve the existing laws of the province in that regard. The Commission is to have general supervision over the administration of the assessment laws of the province.

The first annual report of the Nova Scotia Power Commission has been handed down by Hon. E. H. Armstrong, the chairman. It reviews what the Commission did in the first year of their existence. The report includes a description of the St. Margaret's Bay development, and the investigations which have been made for development work in other parts of the province, specially Sheet Harbor, to furnish 25,000 horse-power to Pictou County industrial towns and country; and the Bear River resources to light the Annapolis Valley from Middleton to Digby. The Commission has been active in providing further development for Lunenburg County, and various parts of the Annapolis Valley.

## AUTOMOBILE INSURANCE NEXT TO FIRE

**Great Expansion in Business Brings it Second—Some Recent Developments—Taxation of Business in Vancouver**

(Special to *The Monetary Times*.)

Vancouver, April 8, 1921.

JOHN JENKINS, president of the Canadian Automobile Underwriters' Association has just been in Vancouver. Mr. Jenkins stated in an interview that automobile insurance in Canada had grown very materially of late and was now next in importance after fire insurance. He thought that the premium income of all companies for 1920 would reach \$5,000,000. He stated that in spite of the rapid growth of automobile insurance that it was in a sense still in its infancy and the companies were learning from experience. They were, however, in the rating system proceeding along more scientific lines and had arranged to have different makes of cars analyzed and their defects made known. Some cars were built in such a way that the fire hazard was greater than in other cars and until such a defect was remedied they would take a higher rate for fire.

The owners of course, would soon realize that they were handicapped in this connection and the manufacturers would be obliged to remedy the defects in their cars which would be an important consideration for everyone concerned. In the future rates would be more and more based on the merits of the make of car. There was also the tendency in the direction of a uniform rate throughout all the provinces varied of course, according to the traffic and other local conditions.

## Taxing the Agents

The attempt of the city Vancouver to obtain power under their charter from the provincial government to tax insurance companies and insurance agents as well as professional men and many other businesses not hitherto taxed, has apparently failed. A large deputation presented the case of the insurance men, real estate, loan and mortgage companies, while the professional men, banks, and amusement companies also sent delegations to Victoria to interview the private bills committee.

At the conclusion of the hearings the different delegations were asked if they were willing to consult with the committee regarding the limitation to be placed on the taxing powers of Vancouver. The delegations answered without exception that they would not be willing that they would only be satisfied if the Vancouver bill empowering that city to tax business and professional interest was thrown out altogether.

The government were incidentally informed that if Vancouver was allowed this power that every other municipality would ask for the same power and the provincial government would find that their sources of revenue would be materially impaired. At this writing, the government has taken no action and semi-official information has come through that no action will be taken at this session at least.

# Corporation Finance

**Consolidated Mining and Smelting Company Had Large Deficit—British Empire Steel Corporation is Approved—National Steel Car Corporation Has Changed Its Name—Net Earnings of Detroit Railway Were Lower Last Year—Goodyear Tire Company Applying for Reorganization Powers**

**Brazilian Traction, Light and Power Co., Ltd.**—Gross earnings of the company in February, 1921, were 11,941,000 milreis, an increase of 2,560,000 milreis over the same period in 1920. Net earnings amounted to 5,679,000 milreis, as compared with 4,984,000 milreis in February a year ago. For the two months of the current year net aggregated 11,896,000 milreis, an increase of 1,802,000 milreis as compared with 1920.

**Minneapolis, St. Paul and Sault Ste. Marie Railway.**—The company, which is controlled by the Canadian Pacific Railway, for the half-year ended February 28 last, showed an operating loss of \$556,045. Gross revenues in February were 12.22 per cent. under 1920, and in January 8.01 per cent. The company received freight rate increases of 35 per cent. last fall. Operating deficits for the last half of the period were as follows: December, \$490,943; January, \$974,515; February, \$827,806. For the previous three months operating income was as follows: September, \$597,607; October, \$739,029; November, \$410,583.

**Trinidad Electric Co., Ltd.**—Gross income of the company for 1920 amounted to \$423,610, as compared with \$327,486 in 1919. Operating expenses were considerably higher at \$294,735, as compared with \$262,185, while a sum of \$25,000 was set aside for reserve for replacement of machinery, but the good increase in gross enabled the company to show net earnings of \$66,451, as compared with \$26,301.

In his report to shareholders, Hon. W. B. Ross, K.C., president, remarks: "Since the close of the year there has been a great improvement in exchange and your directors have felt justified in announcing that a dividend of 1 per cent. will be paid for the quarter ending June 30, 1921."

**Demerara Electric Co., Ltd.**—After operating expenses and bond interest, net earnings of the company in 1920 amounted to \$13,432, as against \$25,008 for 1919. Gross earnings at \$237,150, were the best in the history of the company, but with operating expenses at 82.30 per cent., net made the poorest showing in the company's history. In 1911 the gross earnings were only \$139,112, but with operating expenses of only 52.66 per cent., net earnings before bond interest amounted to \$65,850, which compares with \$41,967 last year.

Hon. W. B. Ross, K.C., in his report states that the price of fuel and general supplies shows no sign of improvement. Some considerable expenditure will have to be made during the coming year to keep the plant of the company efficient. Since the close of the fiscal year there has been a substantial improvement in exchange which will materially help the company.

**Detroit United Railway.**—Gross earnings of the company of subsidiaries in 1920, amounted to \$28,986,227, as compared with \$24,683,037 in 1919. Operating expenses for the year aggregated \$25,025,164, leaving net earnings from operation of \$3,961,063. Other income for the year was \$676,117. The sum of \$400,000 was provided for depreciation or contingencies, and \$1,233,575 was transferred to surplus account. The report shows total capital expenditures on account of net additions to properties during 1920 of \$2,615,846. In presenting the report, President Brooks said:—

"The maintenance charges for the year amounted to \$6,309,786, which, together with a depreciation provision of \$619,200, represented a total charge against income of \$6,928,986 for maintenance, accruing renewals and depreciations. While the gross revenues for 1920 were considerably in excess of the gross revenues for 1919, there was a de-

crease in net income for the year before providing for depreciation or contingencies of \$935,909, as a result of increased wage rates and managerial costs. Wages paid motormen and conductors in 1920 amounted to \$8,832,183, an increase of \$2,442,529, as compared with 1919."

**British Empire Steel Corporation, Ltd.**—Dominion Steel and Nova Scotia Steel shareholders have ratified the agreement of the merger of the two companies and the Halifax Ship Yards, Ltd., as the British Empire Steel Corporation, Ltd. The holders of the common shares of Dominion Steel met in Sydney last week, with President R. M. Wolvin in the chair, and approved the agreement for the exchange of all their shares for cumulative 7 per cent. second preferred and common shares of the British Empire Steel Corporation, Ltd. The holders of the common shares of Nova Scotia Steel and Coal Co., Ltd., also met at New Glasgow and approved a similar agreement in respect to the exchange of their shares for shares of the British Empire Corporation.

These meetings virtually complete the consolidation of these companies and the Halifax Ship Yards, Ltd. The only remaining item of procedure of immediate interest to the shareholders is the actual exchange of the existing certificates for their shares in these companies for those of the British Empire Steel Corporation, and it is announced that the British Empire Steel Corporation will on April 16 deposit with National Trust Co., Ltd., Montreal, its fully paid cumulative 7 per cent. second preference and common shares to the amount of \$40,850,000 and \$17,200,000, respectively for the purpose of exchanging the same for \$43,000,000 of fully paid common shares of the Dominion Steel Corporation, Ltd. The shares of the British Empire Steel Corporation will be listed on the stock exchange in Montreal, Toronto and New York, and probably in London also. Details of the exchange of shares have already been given in *The Monetary Times*.

**Hamilton Car Co., Ltd.**—The company has been organized for the purpose of carrying on the business heretofore conducted under the name of the National Steel Car Corporation, Ltd. This is the second reorganization of this concern that has taken place within the past two years. Shareholders of the original company are requested by the management to send in their certificates to have them changed into Hamilton Car Co., Ltd., scrip.

The National Steel Car Corporation in December, 1919, took over the National Steel Car Co., assuming the entire indebtedness of the latter company and paying therefor 19,000 shares out of a total of 100,000 shares issued by the new company. In addition, one-half of the net profits realized upon liquidation of the old company's claims arising out of certain contracts with the French government were to be retained by the old company.

It is understood that the company has orders on its books aggregating \$14,000,000, and is operating at capacity in its rolling stock department, and is also busy in the manufacture of motor trucks.

**Goodyear Tire and Rubber Co. of Canada.**—A bill has been introduced into the Ontario legislature, providing for reorganization in order to prevent the company from going to the wall. The object of the reorganization is to provide a means of meeting liabilities. The common stock outstanding, which amounts to \$5,332,000, will be reduced from \$100 par to \$10.

The owners of the common stock are the Goodyear Tire and Rubber Co., the parent concern, located at Akron, Ohio, which has 76 per cent. and the management of the Canadian

**DEBENTURES FOR SALE**

WALKERVILLE, ONT.

**TENDERS FOR DEBENTURES**

Sealed tenders addressed to the undersigned and marked on the outside, "Tenders for Debentures," will be received up to 12 o'clock noon of Thursday, the 21st day of April, 1921, for the purchase of the following debentures and accrued interest:—

\$60,982.35 Local Improvement Debentures; 10-year, 6% instalment bonds, in \$1,000 and odd amounts.

\$35,000 Debentures; for extending the plant and equipment of the Hydro-Electric System; 20-year, 6% instalment bonds, in \$1,000 and odd amounts.

Tenders must be submitted for each block separately. Debentures will be delivered and must be settled for at the office of the town treasurer, Walkerville, Ont. All debentures are coupon bearer, and bear interest from the 14th day of December, 1920. Principal and interest payable at the Canadian Bank of Commerce, Walkerville, Ont., on the 14th day of December.

The highest or any tender not necessarily accepted. For further information address

A. E. COCK,  
Clerk and Treasurer.

Walkerville, Ont., April 14, 1921. 527

**CITY OF ST. BONIFACE**

**DEBENTURES**

Sealed tenders, addressed to the undersigned, and marked on the outside, "Tenders for Debentures," will be received up to Eight o'clock p.m. on Monday, the 25th day of April, 1921, for the purchase of the following debentures to pay for Local Improvements, Bridge and Waterworks:—

Date of Issue—2nd January, 1921

30-year Bridge, 5% .....	\$150,000.00
20-year Waterworks, 6% .....	50,000.00
15-year Pavement, 6% .....	70,548.00
10-year Pavement, 6% .....	2,685.00
	\$273,233.00

Principal payable at the end of the term.  
Coupons for interest attached.  
Interest payable half-yearly on July 2nd and January 2nd.  
Principal and Interest payable at:—

Banque d'Hochelega, St. Boniface and Winnipeg, Man., and Montreal. Que.

Canadian Bank of Commerce, Toronto, Ont.  
Clydesdale Bank, Limited, London, England.

Debenture and Coupons expressed in Sterling and Canadian currency and of denominations desired by purchaser. Purchaser to pay accrued interest, take delivery and make payment in St. Boniface or Winnipeg, in Manitoba, Canada. Total amount of bid to be expressed in Dollars and Cents. No tender necessarily accepted.

ERNEST GAGNON,  
City Clerk. 520

St. Boniface, Man., 2nd April, 1921.

A meeting of the creditors of the Lambton Knitting Mills, Petrolia, was held at the offices of Osler Wade, Toronto, on March 30, when the assignee was instructed to go ahead and wind up the business. The assets were placed at \$24,616, with liabilities of \$43,248.

company holds the remaining 24 per cent., so that the public is not affected by this drastic remedy. The Canadian company owes \$3,800,000 in the United States, of which \$2,600,000 is to the parent company, and the balance \$1,200,000, is in the shape of notes in the hands of the public across the line. The Canadian company now has the privilege of paying the American company by the issue of prior preferred stock, as soon as they liquidate their inventory. In addition, they have made arrangements for the payment of outstanding contracts for fabrics at high prices on a basis of 25 per cent. in prior preferred stock. Meanwhile the balance of the fabrics will be delivered only at the request of the company.

The immediate outlook of the company's business is more encouraging. It is anticipated that by the close of September next all liabilities will be paid off, with the exception of \$1,200,000 notes. These notes will be replaced by an issue, running for three, four and five years. At present the business of the company is showing good improvement, according to authoritative statements.

Notice of the company's application to parliament is given in an advertisement elsewhere in this issue.

**Consolidated Mining and Smelting Co. of Canada, Ltd.**—Net profits for the twelve months ended December 31 last, declined to \$291,349, against \$1,161,605 in the fifteen months covered by the previous statement and \$949,245 in the full fiscal 1918 period. After payment of bond interest and the disbursement of three quarterly dividends on the common stocks, together with provision for Federal and provincial tax requirements, the deficit for the year amounted to \$849,319, against an adverse showing of \$489,789 at the end of 1919, and \$212,152 in 1918.

This reflects the drastic demoralization of the metal markets last autumn, bringing with it the almost utter lack of demand for several of the company's principal products and involving the necessity of heavy writing off of inventories.

The balance sheet shows that expenditures on properties and plants during the twelve months amounted to in excess of \$1,850,000, these having been provided for by a special bank loan of \$1,750,000, which, it is designated in the statement, is for "accounts capital expenditure, 1920, in anticipation of funding arrangements." Other bank loans, overdraft, etc., at the end of one year were increased to \$3,601,204, compared with \$3,067,435 in the 1919 statement, while accounts payable grew from \$1,183,503 as at December 31, 1919, to \$1,777,463 at the end of 1920.

The value of ores, metals and smelter product on hand and in transit corrected to conform with prices prevailing at the end of the year, is given at \$3,336,463, as compared with slightly under \$3,000,000 in the previous statement. Other inventories are higher by upwards of \$200,000 than a year ago, standing at \$1,486,920. Accounts receivable, reflecting the slackness in the conditions prevailing at the end of the year were down nearly \$600,000, being shown in the 1920 statement at \$356,316.

In a survey of the conditions prevailing throughout 1920, President James J. Warren compares the prices of lead,

## RECENT FIRES

**Loss For Week Totals \$167,500, Compared With \$215,600 Last Week—Morin Building in Quebec is Heaviest Loss**

**Apsley, Ont.**—April 2—Home of R. McCauley. Cause, overheating of stove pipes.

**Barnston, Que.**—April 8—Home of Peter Decoteau. Cause, believed incendiary. Insurance, \$1,400. Loss, \$6,000.

**Blackville, N.B.**—April 4—General store of Thos. Dunn. Loss, \$2,000.

**Bridgeburg, Ont.**—April 7—Barn on Anthony farm. Cause, spark from train. Loss, \$3,500.

**Burlington, Ont.**—April 6—Frame building next to Coates and Sons planing mill. Cause, overheated furnace.

**Chatham, Ont.**—April 10—G.W.V.A. clubrooms.

**Clarkson, Ont.**—April 10—Town hall and church sheds destroyed. Church and six houses damaged.

**Cloverdale, B.C.**—April 7—Clayton Lumber Co.'s saw-mill on Pacific highway. Loss, \$20,000.

**Frelighsburg, Que.**—April 7—Barn of Mr. Harvey, partly insured.

**Hamilton, Ont.**—April 13—Universal Garage, 752 King St. East. Loss, \$4,000.

**Kerrisdale, B.C.**—April 3—Home of Mrs. J. E. Gilles, Marine Drive and Oak Street. Loss, \$2,000.

**Montreal, Que.**—April 10—Storehouse of Napoleon Senecal, 221 Prefontaine St. Home of George Dufort, Angus Park, Montreal North. Residence of A. Gagnon, 3470 Notre Dame St., Longue Pointe.

**Peterboro, Ont.**—April 11—Caretaker's house at Exhibition Park. Partly insured.

**Prelate, Sask.**—April 2—Home of E. Schroen. Started from cook stove. Insurance, \$5,000. Loss, \$8,000.

**Quebec, Que.**—April 10—Morin Building, 109-113 Mountain Hill. Loss, \$100,000.

**St. John, N.B.**—April 7—Bedford Construction Co.'s building in the Red Head Road.

**Taymouth, N.B.**—April 10—Home of John A. Young. Insurance, \$2,500. Loss, \$15,000.

**Thorold, Ont.**—April 12—Pile of pulp and scrap paper at the plant of the Beaverboard Co.

**Vernonville, Ont.**—April 7—Barn on Nathaniel Drumm's farm.

**Winnipeg, Man.**—April 10—Building at 50 Princess St., occupied by Lion Office Supply Co., Purdie and Co., and Fine Diamond Products Co. Loss, \$7,000.

zinc, copper and silver prevailing at the end of August last with those ruling at the end of the year, and states that given a reasonable monthly production at the August levels, the dividend of the company would have been fully earned in the year. Despite the collapse of the metal markets during the autumn, higher operating costs, including wages, fuel and freight charges, militated against the possibility of making a more satisfactory showing, several additional increases in costs being almost coincident with the decline in the demand for the metals produced by the company.

The result of sixteen months operations by the West Kootenay Power and Light Co., a subsidiary of Consolidated Mining and Smelting Co. of Canada, was, after common dividends had been paid, to reduce the surplus of the enterprise from \$479,294 to \$179,721 slightly above those for the year ended August, 1919, and for the sixteen months ended December, 1920, gross at \$794,101, compared with \$560,129 for the twelve months in 1919.

Interest earned decreased, expenses were much increased, as was depreciation, so that the balance left for preferred dividends amounted to only \$144,277, compared with \$224,345 for the twelve months' period. The increase in the common stock of the company necessitated larger dividends, which, when paid left a deficit of \$299,573, reducing the surplus account, as stated, to \$179,721.

Fixed assets and accessories increased in value by \$1,713,254 to \$5,613,822, cash on hand dropped \$53,000 to \$23,087, while accounts receivable rose \$42,000. The company's common stock issued is given at \$3,212,000, an increase of \$548,000.

**Bell Telephone Co. of Canada, Ltd.**—A further increase of 2 per cent. on rates and charges for exchange service has been allowed the company by the Dominion Board of Railway Commissioners, in a supplementary judgment to that issued on April 1. An error in computation, for which Assistant S. J. McLean, chief commissioner, takes responsibility, and expresses regret, is the reason given for the increase from ten to twelve per cent. Commissioner McLean states that by the original judgment it was found that there was a deficit in the necessary revenues of the Bell Telephone Co. amounting to some \$2,100,000. The sum of \$1,150,000 would accrue to the company from increased long-distance charges and service connection charges, leaving approximately \$1,000,000 to be obtained from exchange service charges.

After issuance of the original judgment, states Commissioner McLean, it was represented by the company that the necessary \$1,000,000 would not be produced by a 10 per cent. increase in exchange service charges. The equalization of rates, whereby Montreal was placed on the Toronto basis, resulted in a decrease in Montreal exchange revenue, and this was a contributing factor to the inadequacy of the return from increased rates. The company has submitted statements of the revenue obtained as on the basis of February, 1921, a month which, it is stated, is better than the average. On the computations submitted, the increase in earnings from the 10 per cent. allowed would fall short by approximately \$220,000 of the \$1,000,000 allowed.

The long-distance increases allowed will go into effect on April 21, and the exchange rate increase on the same date, or within two days afterwards.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended April 8th:—

O'Brien Mine, 64,000. The total since January 1 is 2,120,511 pounds or 1,060.2 tons.

## ADDITIONAL INFORMATION CONCERNING FIRES

**Blackie, Alta.**—March 23—Store belonging to O'Neil, McDonald and McDonald. Loss, \$29,000. Insurance of \$17,400 in the Atlas, North British Mercantile, Home, and Canada Security.

**Vancouver.**—The Fire Chief's report for the month of March states that during the month there were 87 alarms with a total loss of \$7,797. There were 30 fires caused from chimneys, carelessness with cigarettes caused three, and defective chimneys caused three.

**Vercheres, Que.**—April 5—Boathouse and workshops belonging to Z. St. Pierre. Loss, \$15,000, with insurance of \$1,500 in the Equitable Fire Insurance Co.

## PUBLIC LIABILITY INSURANCE

Separate application forms for various kinds of public liability insurance have been prepared by the Motor Union Insurance Co. They are for elevator liability, owners', landlords and tenants public liability, teams, contingent, manufacturers' and contractors', and golfers' public liability. In fixing rates for these forms the company is operating independently of the tariff associations.

## Stocks Depressed by Unfavorable Statements

No Sign That Bottom of Market Has Yet Been Reached—Nearly All Market Leaders Have Lower Profits—Range of Prices in 1920 and in 1921 to Date—A Comparison of New York and Canadian Prices

**B**EARISH influences have depressed stock prices to lower and lower levels during the past few months. The chief factor has been the unfavorable annual statements issued by leading companies for the year 1920, which although the year was half over before the turn of the business tide was really felt, show reduced profits in nearly all cases. Moreover, the necessity for reduction in inventories has reduced surpluses and in a few cases wiped them out entirely. This is shown by the following comparison of a few prominent Canadian companies' net profits and surpluses:—

Companies.	Net profits.		Surpluses.	
	1920.	1919.	1920.	1919.
Abitibi Power & Paper...	\$3,613,592	\$ 801,750	\$ 3,658,571	\$ 1,571,979

\*Including all reserves and surplus. \*\*Net loss. †Debit balance.

### Comparison of Prices

The Canadian stock markets are, of course, dominated by New York. The course of prices in New York has been steadily downward since early in 1920, following the first severe break in November, 1919, a recovery, and another break in February. The chart reproduced herewith, taken from *The Analyst*, illustrates the course of the New York market. The tendency of Canadian stocks during the past 15 months is also illustrated herewith in graphical form; the figures used are an average of price of 12 stocks at the end of the month calculated by Professor H. Michell, of McMaster University, Toronto, the following common stocks being used: Bank of Commerce, Canadian Pacific, Dominion Textile, Dominion Bridge, Consumers' Gas, Shawinigan Light and Power, Pennmans, Russell Motor, Bell Telephone, Canadian General Electric, Lake of the Woods Milling, and Canada Steamships. The average price of these has been as follows:—

1920. Jan.	129.5	1920. July	125.2	1921. Jan.	109.0
Feb.	122.9	Aug.	122.9	Feb.	112.3
Mar.	124.4	Sept.	116.6	Mar.	109.0
Apr.	126.0	Oct.	113.3		
May	123.5	Nov.	108.4		
June	122.5	Dec.	106.7		

A more detailed illustration of the course of prices of a representative list of stocks is given by the following comparison of high and low prices in 1920, and in 1921, up to the close of business on April 22:—

Companies.	1920.		1921 Jan.-Apr. 20.	
	High.	Low.	High.	Low.
Abitibi Power & Paper Co., Ltd.	355	248	57 <sup>3</sup> / <sub>4</sub>	33

Winnipeg Electric Railway	40	30	48	39

While the decline in average prices has been fairly steady, the movement of individual stocks has by no means been so. During the past week Riordon common stock has lost no less than 60 points, this constituting one of the most

AVERAGE PRICE OF 12 CANADIAN STOCKS

spectacular declines on the Canadian markets in recent years. The first in the present movement was the fall of 13 points in Atlantic Sugar on July 28 last, and the same stock went down 20 points on November 8. The paper stocks, which held up well during the early part of the movement, have lost much ground during the past few months. Canada Steamships stocks, both common and preferred, has also suffered a great deal.

The *Analyst's* chart of prices on the New York exchange is shown on page 6.

## AVERAGE PRICES OF NEW YORK STOCKS

The black line shows the closing average price of fifty stocks, half industrials and half railroads. The black area shows for each week the highest and lowest daily average price of the twenty-five industrials, and the white area the corresponding figures for twenty-five rails.

## WESTERN CITIES HAVE HIGH TAX RATES

Now Paying for Over Expansion—Progress of Seeding, and Prospects for the Year

(Staff Correspondence.)

Medicine Hat, Alta., April 21, 1921.

**SEEDING** is now in full swing in all parts of Western Canada and will be general by the end of this week. The seed is going in under the most favorable conditions, with plenty of moisture in the ground from the recent heavy snow storm. There is plenty of labor available to meet all demands in Moose Jaw and vicinity; ideal seeding weather prevailed and everywhere the farmers were on the land. In the city business was showing some improvement, and a good spirit of optimism was found among the business men at the present outlook. That spirit is always strong in the west in the spring time. Present conditions, however, are said to be very similar to 1915 when a record crop was grown. Another 1915 crop would mean a great deal to the west and in fact to all Canada.

Many whom I have spoken to look for dollar wheat this fall. The tax rate of some western points is interesting at the present time. Regina's mill rate for this year is 43, mills, Saskatoon 46.55, Moose Jaw 46, Melville, Sask., where some difficulties have been experienced with bondholders will have a mill rate of 57. In Medicine Hat the tax rate has been fixed at 34 mills. The agricultural outlook in the Medicine Hat district this spring is good, everyone is optimistic that this year is the cycle for plenty of moisture and good crops. In fact the district is not taking any chances, or have arrived at the desperation stage, for the citizens and farmers

in the community under the auspices of the United Agricultural Association are bringing in Charles M. Hatfield, from California, who has the reputation of being a successful rainmaker. If Mr. Hatfield can produce rain, Medicine Hat and Southern Alberta is the place for him. The Canada Land and Irrigation Co. are spending a large amount of money on an enlarged irrigation program this year. Irrigation, undoubtedly, is the only solution for agricultural development in this territory and in large areas of Southern Alberta. The industries of Medicine Hat, many of them, are working to full capacity, including at least two of the large milling companies, also the Alberta clay products plant. The milling business for domestic trade is good, large shipments going to the Pacific coast, wholesale houses report a fair business for this season of the year. Collections on the whole are slow.

## TRUSTEE CO. OF WINNIPEG

A slight falling off in estates under administration is reported by the Trustee Co. of Winnipeg for 1920, but guaranteed investments increased from \$566,768 to \$570,910. As was the experience with most other financial institutions, expenses increased largely, but notwithstanding, net profits amounted to \$10,481, compared with \$9,779 previously. The usual dividend was paid at the rate of 6 per cent., while \$2,000 was transferred to reserve.

A feature of the balance sheet is that real estate holdings were reduced from \$23,504 to \$4,586, thus increasing the interest bearing securities by a large amount. The paid-up capital is now \$141,096, as against \$134,166 in 1919, while the reserve is \$12,000.

# The Week in Parliament

Government Issues Ultimatum to Grand Trunk—Railway Matters Also Before Special Committee—Dominion Advances to Great Britain—More Railways Seek Incorporation—Government Ships to be Used on Inland Waters

(Special to *The Monetary Times*.)

Ottawa, April 21, 1921.

Thursday, April 14

In House of Commons:—(a) Bill to amend Winding-up Act, requiring liquidator of business to prepare statement of assets and liabilities, and the sending of statement, with detailed information, to Statistical Branch at Ottawa, read first time; (b) Bill to ratify protocol accepting statute for Permanent Court of International Justice, read first time; (c) Third reading of Interim Supply Bill, granting one-sixth of estimates; (d) Post Office Act amending bill read second time; (e) French trade agreement read second time; (f) Resolution to wind up Wheat Board passed, time being granted for purpose, and bill based on it read first time; (g) Mines branch estimates passed.

In Senate:—(a) Act incorporating Canadian Transit Company read second time.

Friday, April 15

In House of Commons:—(a) Report of Parliamentary Committee on Agriculture that tentative agreement had been come to with manufacturers of agricultural implements as to standardization of parts of agricultural machinery; (b) Archambault bill amending Criminal Code to prevent publication of defamatory material added or presented at trials without evidence of extenuating circumstances or arguments as well, read first time; (c) French trade agreement read third time; (d) Second and third readings of following bills: One to authorize extension of time for completion of St. John and Quebec Railway, between Centreville and Andover, N.B., one to amend Winding-up Act, and one to extend time of Canadian Wheat Board to wind up its affairs; (e) Royal assent to bills to amend Exchequer Court Act, to incorporate Canadian Bar Association, respecting Montreal, Ottawa and Georgian Bay Canal Co., respecting Oshawa Railway Co., the Thousand Islands Railway Co., the Kettle Valley Railway Co., the Manitoba and North-Western Railway Co. of Canada, the Quebec Central Railway Co., the Essex Terminal Railway Co., the Ottawa, Northern and Western Railway Co.; (f) First reading of Currency Act amendment bill, giving authority to make nickel coins in Canada; (g) Second reading bill respecting Quebec, Montreal and Southern Railway Co.; (h) Estimates voted for Geological Survey branch, Indian Affairs Department, Civil Government, Lighthouse and Coast Service, Scientific Institutions, Steamboat Inspection, Fisheries.

In Senate:—(a) First reading bill concerning James MacLaren Co.; (b) Three readings and Royal Assent to Interim Supply Bill; (c) Maritime Coal, Railway and Power Co. bill, first reading; (d) Second reading Canadian Pacific Railway bill; (e) Third reading Dominion Life Assurance Co. bill.

Monday, April 18

In House of Commons:—(a) Fertilizer Act amendment bill to provide for better marking of fertilizers as to contents read second time.

Tuesday, April 19

In House of Commons:—(a) Appointment of commissioners to enquire into and report upon the subject of handling of grain in Canada; (b) Bill respecting Grand Trunk Arbitration read first time; (c) Canada-West Indies Agreement bill read third time; (d) Opium and Narcotic Drug Act amendment bill read first time; (e) Second and third readings Currency Act amendment bill introducing nickels into Canadian coinage; and (f) Various Militia and Defence estimates.

In Senate:—(a) First readings of following bills: One respecting Montreal Central Terminal Co., the French Trade Agreement bill, one authorizing extension of time for completion of St. John and Quebec Railway, one amending Winding-up Act, one concerning Canadian Wheat Board, one respecting London and Lake Erie Railway and Transportation Co.; (b) Third reading bill to amend Act incorporating Gilmour and Hughson, Ltd.; (c) Bill respecting James MacLaren Co., Ltd.

Wednesday, April 20

In Senate:—(a) Farnight's postponement of Senator Lynch-Staunton's bill to amend Gold and Silver Marking Act because of considerable opposition of jewellers to provision asking marking of gold contents on unrolled gold jewellery.

On Tuesday, April 19, Premier Meighen introduced a bill which virtually issues an ultimatum to the shareholders of the Grand Trunk Company and the directors to hand over for operation the entire system to the Dominion Government. The government is given power by the new bill to discharge the present directors and management and substitute its own choice, and the arbitration of the common and preference shares will proceed if this is granted by May 16.

Great interest has also attached during the past week to the proceedings of the special parliamentary committee on railways and transportation. President Hanna and A. J. Mitchell, financial comptroller of the Canadian National lines, appeared before the committee on Wednesday and submitted various comparative statements so that expenditures of the road can be properly scrutinized.

The possibility of the inclusion of a French-Canadian member in the Meighen Government also occupied the attention of parliamentarians this week. Deputy Speaker Boivin occupies a very mysterious position, the Liberals declaring he will not leave them and the government saying that he has pledged himself to do so, while Mr. Boivin himself would say only that he had come to no decision.

## Advances to Great Britain

Total advances of \$949,638,368 were made to Great Britain by Canada up to the time of the signing of the armistice, according to a return tabled in the Canadian House of Commons on April 11. As against that total on October 31, 1918, repayments, contra-borrowing and refunds reduced the indebtedness to \$295,105,916. Of the amount advanced by Canada, \$190,635,073 was used for the purchase of agricultural products here, and \$759,003,294 for other purposes, which included purchase of munitions and other manufactured products, payments of shipment charges, etc. No advances were made to other allied powers, it was stated, previous to that date. From October 31, 1918 to February 28, 1921, the total advances to Great Britain were \$343,848,623, which, by repayments, contra-borrowings and refunds were reduced to \$151,252,146 indebtedness. Total advances to the allied powers during this same period were \$41,325,139. The manner in which these advances were expended was: Great Britain, agricultural products, \$197,862,655; other purposes, \$145,985,968. Allied powers, agricultural products, \$15,307,411; other purposes, \$26,017,727.

## Defeat Reciprocity Motion

The House of Commons on April 13, by a vote of 100 to 79, defeated a motion of W. S. Fielding recommending the adoption of the reciprocity agreement between Canada and the United States which was signed in Washington on

January 21, 1911. The resolution, submitted as the House went into the committee of the whole and seconded by W. L. Mackenzie King, read: "In the opinion of the House, the government should bring in a measure to approve, ratify and confirm the agreement respecting reciprocal trade between the United States and Canada signed at Washington on January 21, 1911, by the Hon. P. C. Knox on the part of the United States, and by W. S. Fielding and the late William Patterson on the part of Canada, which agreement remains on the statute book of the United States."

#### Northern Alberta Railways

Three railway companies are seeking authority to penetrate the oil regions of north-west Canada, and one has already a charter to do so. Two of these companies, the Slave River Co., with Calgary capitalists behind it, and the Fort Smith Railway Co., supposed to be backed by the Hudson's Bay Co., desire a charter for the purpose of building a line across the portage from Smith Landing to Fort Smith on the Slave River, in order to overcome the rapids and shoal at this point of the river. The railway committee has asked these two companies to get together and make some arrangement for asking for the building of one line instead of two in exactly the same territory for the same purpose.

The other line seeking entrance is the Edmonton and Mackenzie River Railway, which wants to build a line from Fort McMurray on the Athabasca River at the end of the Alberta and Great Waterways Railway to the junction of the Jackfish and Peace Rivers, and from there to the point where the Hay River empties into Great Slave Lake.

It is interesting to note that British capitalists last year secured a charter to build a line to connect Great Slave Lake with the Thelon River and the Chesterfield Inlet and thence into Hudson Bay at a point 1,000 miles north of Port Nelson and Fort Churchill. The north is coming into its own. All of these lines are supplementary to the natural water routes.

The department of trade and commerce has received notification from Port of Spain, Trinidad, that the new tariff bill has been passed, giving Canada a preferential tariff of 50 per cent.

#### A New Nickel Coin

On April 15 Sir Henry Drayton introduced a resolution providing for issuing a five-cent nickel coin in Canada. He explained that it was proposed to make the coin exactly the same size as the five-cent piece issued in the United States. The Canadian coin, would, however, be 100 per cent. nickel as distinguished from the United States coin, which was 75 per cent. copper and 25 per cent. nickel. A tender of money in the new coins would be legal tender for payment of an amount not exceeding \$5. The resolution also contained a provision prohibiting persons from melting down, breaking up, or using otherwise than as currency, Canadian gold coins of current issue. The resolution was reported and a bill based on it given first reading.

#### Grand Trunk Guarantees

The Dominion is paying interest amounting to about \$246,000 this month on the 4 per cent. debentures guaranteed under the agreement with the Grand Trunk Railway Co. The total amount of the 4 per cent. Grand Trunk debenture stocks is \$24,624,455, and it is on part of this amount that the interest falls due this month. Sir Henry Drayton, when asked on April 15 if this were the same amount as that which the government refused to pay at the beginning of April, replied in the negative, saying that the government was meeting all its obligations under the agreement and would continue to do so. The government did not consider that it was liable for the former amount.

#### Use Vessels on Inland Waters

On account of the rise in freight rates on the Great Lakes for the season just about to commence there is a growing pressure on the government to bring some of the

smaller vessels of the Canadian Government merchant marine into the inland lake service for the season. Shippers had been anticipating lower freight rates on the lakes this year in view of the lower ocean freight and the need of business to have every encouragement to ship by lake routes. They were greatly surprised, however, to find that the Canada Steamship Lines, Limited, is announcing higher rates. Hence the demand on the government. It has been practically decided to bring some of the government ships up to the Great Lakes. How many has not yet been decided.

#### MERCHANTS BANK MAKES FOREIGN CONNECTION

The Merchants Bank has become affiliated with and is to be the Canadian representative of the New International Acceptance Bank, which has been organized in New York with a capital and surplus of \$15,000,000. The new Acceptance Bank opened its doors at 31 Pine Street, New York, on the 19th instant, and its organization provides for the financing of foreign trade.

#### BANK OF HAMILTON MEETING

At the annual meeting of the Bank of Hamilton, held on April 18, last year's directors were re-elected as follows: Sir John Hendrie, president; Cyrus A. Birge, vice-president; H. S. Ambrose, W. E. Phinn, J. Turnbull, C. C. Dalton, I. Pitblado, K.C., W. A. Wood, Robert Hobson, W. P. Riley and A. V. Young. Following the meeting of the shareholders there was unveiled in the head office of the bank a bronze memorial tablet commemorating the names of the institution employees who made the supreme sacrifice in the great war. Major-General Hon. S. C. Mewburn, the ex-Minister of Militia, officiated and was assisted by Lieut.-Col. Hooper, D.S.O., M.C., who severed the cord, which held a giant Union Jack in front of the tablet.

The annual statement, recently reviewed in these columns, showed profits of \$888,018 up until February 28. The reserve fund totalled \$4,849,110, including \$649,110 placed to its credit during the year. The bank's assets have reached a total of \$85,348,503.

#### NOVA SCOTIA TRUST CO.

A good increase in business is reported by the Nova Scotia Trust Co. for 1920. Estates, trusts and agencies under administration are shown at \$3,198,125, as compared with \$1,010,708. Net profits, however, show but about \$1,000 increase at \$27,725, after allowing for expenses of management, directors' fees, etc.

The usual dividend of 7 per cent. was paid, but nothing was transferred to reserve. There was a balance of \$6,559 carried forward, as compared with \$912 in 1919.

Among the principal changes in the capital account, accounts receivable is the most prominent, the figure being \$156,675 as compared with \$80,394 previously, while investments are given at \$92,374, as against \$179,427 in 1919. The subscribed capital of \$240,000 is now fully paid up, while the reserve fund stands at \$40,000, which is the same as previously reported.

An action of the Royal Bank against Rice and Whaley, Ltd., was dismissed by Judge Prudhomme in Winnipeg on April 4. The defendants guaranteed the account of Thomas Beddome, a cattle buyer, with the Royal Bank, at Saitcoats, to the "net amount of two cars of stock." The bank paid the checks of Beddome, drawn in payment of the cattle purchased, and drew on Rice and Whaley for the amount. When the stock was sold the proceeds amounted to less than the draft, and the smaller amount was paid to the bank, which sued for the balance of \$273.80.

### DOMINION INSURANCE ACT AMENDMENTS

DISCUSSIONS of proposed changes in the Insurance Act of Canada which have been taking place for some time past have been crystallized in a draft amendment now under consideration. All branches of insurance are affected. Some of the proposals, including that to permit life companies to write fire and casualty business, and vice versa, and that to require all agents to be approved by the superintendent of insurance, have been discussed in these columns. Another which has aroused keen opposition in industrial circles is the clause proposing to levy a fifteen per cent. tax on premiums paid to unlicensed insurance companies. The draft amendment is as follows:—

1. That section eight be repealed, and in lieu thereof it be enacted that the license authorizing a company to carry on business may authorize the transaction of such class or classes of insurance as the Minister may deem proper; but, subject to the renewal of licenses previously granted, separate and distinct funds must be maintained by a company receiving a license for life insurance in combination with any other class of insurance.
2. That any Canadian life insurance company, and any other life insurance company licensed under the Act, whose charter authorizes it, may issue life policies, including in the same policy insurance against disability caused by accident or sickness, but that provision be made to limit the amount of such disability insurance.
3. That section nine of the said Act, relating to the granting of licenses where the charter of the company authorizes an excess number or variety of classes, and section ten, relating to excess deposits, be repealed.
4. That section thirteen be repealed, and in lieu thereof it be enacted that a contract of life insurance shall not be combined is one policy with a contract for any other class of insurance.

5. That in every annual statement required to be filed by sections thirty, thirty-one and thirty-two of the Act, the bonds, debentures, stocks and other securities shall be taken into account at the market values applicable to the said securities at the rate of the statement; but that provision be made for temporary depression of the market values by reason of serious disorganization of security markets.

6. That section sixty be amended to provide that no loans of its funds may be made by a life insurance company to any director or officer thereof, or to any agent or other employee thereof whose remuneration is in excess of five thousand dollars per annum, or to any member of the family of such director, officer, agent or employee.

7. That section seventy-seven, respecting the enlargement of the license of the authority of the Treasury Board, be amended by making fuller provisions respecting separate and distinct funds to be maintained in respect of the class or classes of insurance, and the liquidation or winding-up thereof under the said Act or the Winding-up Act.

8. That provision be made for the approval of agents or brokers by the Superintendent before any commission or remuneration is paid to them for soliciting for, or obtaining applications or proposals for insurance, or for collecting premiums from policyholders, and that notice of disapproval by the Superintendent be given in writing to the company affected after an investigation by a Board of Inquiry, with right of appeal from the disapproval of the Superintendent to the Treasury Board.

9. That sub-section two of section one hundred and twenty-nine, relating to annual returns of insurance in unlicensed fire insurance companies, be amended by adding the provision that in the case of any insurance against fire on property situated in Canada effected in any unlicensed company, the person effecting such insurance shall pay to the Minister of Finance for Consolidated Revenue Fund a sum equal to fifteen per cent. of the total net cost of such insurance so effected, but not to exceed in any case fifteen cents for each one hundred dollars of insurance for one year or a proportionate sum for any longer or shorter period.

### INTERNATIONAL DEFAULTS HAVE BEEN COMMON

SOME years ago Canadian bond dealers could boast that not a dollar invested in our government or municipal bonds had been lost. There were, in fact, few cases of municipal defaults until last year, but now the list is increasing almost every month, and there are numerous cases of delay in meeting payments. Thus far, however, the credit of the Dominion and provincial governments have not been injured by failure to meet their obligations promptly, although the present experience of holders of western municipals is bound to affect the credit of Canada as a whole.

There is no basis in history for assuming that because a security is a public one it is perfectly safe. Municipalities in other countries have sometimes failed to meet their debts, and there are a few cases where governments have done likewise. A report just issued by the British Council of Foreign Bondholders states that English holders have lost \$9,000,000,000 in this way. This council is composed of British bankers and financiers, and has existed for over fifty years for the purpose of forcing defaulting states to meet their indebtedness. Foremost among defaulting states stands Russia, which owes England \$8,250,000,000, plus \$1,200,000,000 for arrears of interest. Mexico has defaulted to the extent of \$275,000,000 principal, plus \$85,500,000 interest. Third in the list are southern States of the United States of America, owing England \$6,000,000, plus \$144,000,000 arrears of interest, accumulated during periods varying from forty to seventy years. The defaulting States are Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi and North and South Carolina. In addition, there is still outstanding \$12,500,000, plus interest, advanced to the Confederate States in 1863 as a 7 per cent. cotton loan. Last September final arrangements were made with West Virginia for the settlement of her debt to British bondholders after twenty-two years' negotiations.

Other States that have defaulted to British bondholders include Argentina, Ecuador and Honduras. The council praises the Nicaraguan Government for carrying out its obligations ahead of the time they matured.

### THE STOCK MARKETS AND BUSINESS

THAT Riordon common stock, which only last Friday was worth 107, should be selling at about 40, will come as a shock to holders of this and other stocks. Last July the stock was worth 226, since when it has fallen off by 85 per cent. On the days of greatest decline there has sometimes been a spread of several points between consecutive sales, indicating that there is more than the usual bearish influence back of the movement.

This decline, while it is the most spectacular which has taken place on the Canadian exchanges in recent years, is nevertheless no more than an exaggeration of the movement of the market as a whole. The trend of stock prices in Canada, following the leadership of New York, has been steadily downward for the past seventeen months, with occasional recoveries. Speculators have found their margins wiped out over night, while investors have found the market values of their holdings reduced to lower and lower levels, accompanied frequently by loss of dividends and in a few cases by refinancing which placed their stocks in an inferior position. A comparison of the industrial and the investment fields would, however, indicate that the latter is not faring any worse than the former. Always more sensitive in anticipating a change in business conditions, stock prices commenced to slip back at the end of 1919, fully six months before any falling off in the volume of business was noticed. What was discounted by the stock market proved to be true in the industrial field, and the continued downward movement leads to the conclusion that the business depression will be both long and severe.

A reference to the average prices of Canadian stocks on page 5 of this issue will show that during the past three months there has been a firmer tendency. The decline in New York has also been easing off. Whether this is the beginning of a more stable period in the stock markets and in industry, or whether it is a temporary halt in the process of deflation, cannot be definitely stated.

### A GAMBLE ON THE WEATHER

THE United Agricultural Association of Medicine Hat district has entered into a contract with "Rainmaker" Hatfield, under which, if four inches of rain shall fall between May 1 and August 1, 1921, Hatfield is to be paid \$8,000. He is to be given credit for one-half of the precipitation at \$4,000 per inch up to a maximum of four inches; in other words, if four inches of rain falls, Hatfield gets credit for two inches and receives \$8,000, while Providence is to get credit for the other two inches. In order to carry out his part of the contract "Rainmaker" Hatfield is to "construct and build a rain precipitation and attraction plant" at a suitable location, also rain gauges.

Prof. E. S. Hopkins, of the School of Agriculture, Olds, Alta., speaking at the Soil Fertility Conference of the Commission of Conservation at Winnipeg in July last, showed from records of 36 years duration that during this long period the average precipitation at Medicine Hat for what is known as the growing season, May, June and July (the period covered by the Hatfield contract) was 6.14 inches. This average includes the three dry years, 1917, 1918 and 1919. *Water-Powers of Manitoba, Saskatchewan and Alberta*, published by the Commission of Conservation, in 1916, states that the average precipitation for the same three months for a period of 29 years preceding 1914, was 6.35 inches.

Hatfield, in securing such a contract from the Medicine Hat farmers, is therefore gambling on fifty per cent. better than an even chance.

British capitalists are reported as being behind new railway ventures for the northwest. Considering their past experience with Canadian railways it would seem that in the investment as in other fields the English do not know when they are beaten. \* \* \* \* \*

The Dominion government's holdings of gold decreased more in March than did the notes outstanding. Some of that gold which is supposed to be embarrassing Washington would not embarrass Ottawa. \* \* \* \* \*

New Brunswick's plan of playing safe in new financing is the only one which will tide it through a difficult period. Considering their handicaps the record of the maritime provinces and municipalities is distinctly better than that of the west. \* \* \* \* \*

### THE INCOME TAX EXPLAINED

Two sweet young things at the movies last night didn't seem to care for the picture, for they spent the entire time in conversation. One of them was inclined to complain about everything and everybody. The other was one of the "explainers," who can interrupt everything. Here's a sample of her marvelous intellect:—

"I can't see why we have to pay these extra pennies every time we go to a movie," number one complained.

"Oh, you see, the government is responsible for that," number two explained. "You've heard of the income tax, haven't you?"

Number one admitted that she knew there was such a thing.

"Well, that's it. Every time we come in a picture show we have to pay an income tax."

## Over 530 Branches

THIS Bank has 525 branches in Canada and Newfoundland as well as those in London, England, Mexico City, Havana, Cuba, Kingston, Jamaica, Port of Spain, Trinidad, San Francisco, Seattle, Portland, Ore., and the New York Agency.

We can offer you, therefore, excellent service in collecting your Canadian and foreign accounts.

## PERSONAL NOTES

G. R. MARNOCH, president of the Lethbridge Board of Trade for the past seven and one-half years, has resigned.

W. J. DOHERTY, formerly of Graham, Sanson and Company, and more recently connected with McConnell and Ferguson, advertising agents, Toronto, has joined the Canadian Debentures Corporation, Toronto, as advertising manager.

W. STURGIS MACOMBER, who for several years has been interested in the placing of Canadian securities in the United States, has become associated with the firm of Carruthers, Pell and Company, of 15 Broad Street, New York. Mr. Macomber will have full charge of the Canadian department of the above named firm.

KENNETH THOM has been appointed assistant fire manager of the Employers' Liability Assurance Corporation, Limited. Mr. Thom has had a long and wide experience in fire insurance in Canada having been for over 20 years with the Union Assurance Society rising to the position of Ontario inspector which position he resigned to go into partnership with D. C. Edwards, of Toronto, as a fire adjuster under the name of "Edwards and Thom."

J. P. DOUGHERTY has been gazetted

inspector of insurance for the province of British Columbia. Leo Dougherty, son of the newly appointed official, will in future have charge of the insurance firm of Dougherty, Limited, in the London Building, Vancouver. Before coming to British Columbia Mr. Dougherty lived at Hamilton, Ontario, where he occupied a high place in the business world. He is regarded as an expert in insurance, and news of his appointment has been favorably commented upon by leading underwriters. He was a

member of the executive of the Vancouver Fire Agents' Association.

FRED W. FIELD, British government trade commissioner in the province of Ontario, who left at the beginning of last October to confer with the Department of Overseas Trade in London and manufacturers and merchants throughout the British Isles, has returned to Canada. Mr. Field was interviewed by five hundred and twenty-eight manufacturers in twenty-seven towns and cities, and he paid a visit to over fifty plants and also to a number of shipping companies and docks in order to ascertain conditions in shipping to and from Canada.

J. H. HODGINS, manager of the statistical department of the Union Bank of Canada, at Toronto, has been transferred to the head office of the bank at Winnipeg to direct the new publicity department. Fifteen years' newspaper training, including specializing in financial journalism, particularly fitted Mr. Hodgins for his work with the Union Bank of Canada. Mr. Hodgins joined the bank five years ago when the New York agency was first established. Following his

work in New York City he was transferred to Toronto where the statistical work for Canada was carried on.

GAVIN N. HOUSTON, at present acting commissioner of irrigation with the Dominion government reclamation service at Calgary, has been appointed a member of the Alberta irrigation council under the new act passed at this session of the legislature. Mr. Houston will be named as secretary of the council and will devote his entire time to that work. An office will be opened in Lethbridge, where Mr. Houston will have his headquarters, within the next month, as soon as Mr. Houston can wind up his present duties. L. C. Charlesworth, the present chairman of the irrigation council, who has been appointed deputy minister of railways and telephones for the province, will still continue as chairman of the irrigation council.

## OBITUARY

F. S. FARRIS, provincial manager of the Excelsior Life Assurance Company for New Brunswick since 1908, died at St. John, last week.

## BANK BRANCH NOTES

The Canadian Bank of Commerce has opened a branch at the corner of Queen St. and University Ave., Toronto.

The Molsons Bank has opened a branch at New Germany, Ont.

The Imperial Bank of Canada announces the opening of a branch at Harding, Man.

The Merchants Bank of Canada have purchased the premises on Dundas St., London, Ont., now occupied by the London Advertiser office.

The Imperial Bank have moved into their new quarters at Amherstburg, Ont.

C. G. Walker, manager of the Bank of Nova Scotia at Petrolia, Ont., has been appointed manager at Sudbury.

The Union Bank of Canada announces the following staff changes and appointments as managers: J. Mitchell, at McNutt, Sask.; N. Baxter, McNutt, at Jansen, Sask.; T. R. Griffiths, of Milestone, at Weyburn; W. A. Tripp, of Morse, at Milestone, Sask.; W. R. Edwards, of Sceptre, at Morse, Sask.; Geo. Branston, of Hazenmore, at Sceptre, Sask.; H. S. Richardson, of Shaunavon, at Hazenmore, Sask.; C. P. Old, of Loverna, at Roblin, Man.; J. R. Rowley, of Calgary, at Acadia Valley, Alta.; A. E. F. MacLean, of Kindersley, at Estevan, Sask.; N. C. Hunter, of Pense, at Kindersley, Sask.; S. M. Simons, of Sinaluta, at Pense, Sask.; R. F. Stewart, of Swift Current, at Sinaluta, Sask.; Wm. Michie, of Outlook, at Loverna, Sask.; A. H. O'Keefe, of Webb, at Outlook, Sask. A. G. Ross, formerly inspector for Manitoba branches of the Union Bank of Canada, has been appointed assistant to the superintendent of western branches for the southern Manitoba division. G. M. Proud, inspector, Edmonton, has been appointed assistant to the western superintendent. A. F. S. Tatum, inspector, Calgary, has been appointed an assistant to the superintendent of western branches, for southern Alberta division. E. J. Roycroft, formerly an assistant to the western superintendent, has been appointed inspector at Calgary.

The Union Bank of Canada wish to announce the following: F. M. Upham, former eastern inspector, has been appointed manager of the branch at Brampton, Ont. A. P. Nasmith, assistant manager of the main office in Winnipeg, has been appointed manager at Medicine Hat, Alta. A. A. Walcot has been appointed assistant manager at Winnipeg. E. H. Floyd, audit officer of the Manitoba Division, has been appointed acting manager of the Melita, Man. branch. A. B. Dargavel has been appointed manager of the branch at Ogema, Sask.

# Short and Long Term Rural Credits\*

Former are Supplied by Banks, While Loan Companies and Mortgage Loan Associations Finance Permanent Improvements—Bank Act Revision in Light of Changing Requirements

By J. L. CLARKE,

Manager, Rural Service Department, Merchants Bank of Canada

IN dealing with the subject of rural credits it must be borne in mind that credit is divided into two distinct classifications, viz.:

**First.**—Short-term credit, being money required for temporary agricultural purposes such as, paying the cost of the season's farm operations, which includes a purchase of seed grain, wages, the breaking and clearing of land, harvest and threshing expenses; the purchase of machinery, repairs and replacements; to pay fire, life or hail insurance premiums; the purchase of feed for live stock; loans for the purchase of feeding cattle, hogs or sheep to be fattened for market; the purchase of pure bred sires and breeding live stock.

Loans for the foregoing purposes are available from the Canadian Chartered Banks, provided the applicant for the credit can show his ability to repay the bank within a short time, usually within one year, and his statement of assets and liabilities prove that he is entitled to the loan.

**Second.**—Long-term credit. Money borrowed for capital expenditure, such as the purchase of land, building of houses, barns, silos and other improvements of a permanent nature on the farm.

Loans for the foregoing purposes are obtainable from mortgage, trust, and investment companies and from the farm loans associations. Repayment of such loans to be made annually covering a term of years, security being given to the lending companies by a mortgage on the farm.

Farmers should apply their own capital for the original purchase of the farm equipment, such as work horses and the necessary machinery.

## The Bank Act as Regards Agriculture

The Canadian Chartered Banks are operating under Federal authority, known as "The Bank Act of 1913," which, as far as agricultural interests and the livestock industry are concerned, provide for the financing of production and the handling of farm products, particularly defined in the Bank Act as:—"Products of the soil, such as hay, grain, roots, vegetables, fruits and other crops, includes milk, cream, butter, cheese, poultry, eggs, hides, skins and wool, and dried, canned and preserved vegetables and fruits." (Grain is defined as "wheat, oats, barley, rye, and flax.")

The Bank Act stipulates that—"The bank may lend money to any dealer in products of agriculture or to any wholesale purchaser or shipper of or dealer in live stock or dead stock, or the products thereof, upon the security of such products, or of such live stock or dead stock or the products thereof." "The bank may lend money to a farmer upon the security of his threshed grain grown upon the farm."

In applying to a bank for a loan the farmer should confine his requests for financial assistance along the lines defined; any loan necessary to assist in production is considered legitimate as set out in the first classification which is considered to be within the meaning of the Bank Act.

Under the act the banks are authorized to—"Deal in, discount and lend money and make advances upon the security of, and take as collateral security for any loan made by it, bills of exchange, promissory notes and other negotiable instruments, or the stock, bonds, debentures and obligations of municipal and other corporations, whether secured by mortgage or otherwise, or Dominion, provincial, British, foreign and other public securities." "Engage in and carry

on such business generally as appertains to the business of banking."

## What the Banks Cannot Do

"Except as authorized by the act, the bank shall not directly or indirectly—deal in the buying or selling of goods, or engage in any trade of business whatever; lend money or make advances upon the security of lands, tenements or immovable property."

A bank may hold property for its own use and occupation. It may take a mortgage on real estate or personal property by way of additional security for a debt already contracted. No bank, however, is allowed to hold such property for a longer period than twelve years. Power is given the banks to advance money on warehouse receipts and bills of lading.

The chartered banks have been a mighty force in assisting in the development of western Canada and in extending national prosperity. They have become the "silent partners" in the agricultural life of the country.

## Loanable Funds; Bank Reserves

The banks accept money on deposit from the public. Their duty is to loan and invest these funds safely for productive purpose and to keep these funds in such shape that any demands coming from the depositors may be readily and promptly met without causing undue hardship upon the borrower. Thus short-term loans must comprise the bulk of their investments. In their own interests they maintain certain reserves in order to meet promptly such demands. In Canada the banks are permitted to use their own judgment as to the amount of legal money which they shall hold by way of reserve in their vaults. Lending banks in other countries are obliged by law to adopt the principle of compulsory reserves. The only regulation laid down in the Bank Act which is compulsory is that 40% of the reserves that each bank's self-interest requires it to keep, shall be in Dominion notes. The Canadian system of voluntary reserves has worked out well. Legal minimum reserves impede, instead of helping, a bank's operations in times of a crisis or monetary stringency. When it is found that loans can be secured on good collateral, confidence is soon restored and the banks can gradually replenish their reserves as business conditions become easier. The good judgment of the banker, and the holding of sound, short-term paper, will provide a steady stream of payments to the bank, which are worth more than reserves of legal money. The fact that the banks are not allowed under the act to loan money against real estate naturally has a tendency to keep its assets in readily accessible form.

In the usual course of business with farmers part of the bank's assets become "tied-up" or "frozen," due, usually, to unforeseen uncontrollable conditions—caused by borrowers failing to keep to the terms of their contract as to the time of repayment. Money advanced for the season's operations are intended to be repaid as soon as the crop is threshed and marketed. Occasionally, the borrower thinks that he can make money by holding his grain over until the following June, and sometimes he is determined to do so. The original terms of the loan called for repayment "in the fall after the freeze-up," and the banker planned his business to receive payment at the time specified, not "until wheat goes to \$2.50 a bushel" (which the farmer is advised by different parties wheat will be worth that price in May or June, if he

(Continued on page 44)

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended April 15, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920
Apr. 15	15	15	4	1	3	2	3	0	0	43	18
Apr. 8	19	10	0	3	7	0	0	2	0	41	10
Apr. 1	9	17	1	1	3	0	5	0	0	36	9
Mar. 25	9	13	0	0	4	5	2	2	0	35	13

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended April 15:—

La Rose Mine, 125,886. The total since January 1 is 2,246,397 pounds or 1,123.1 tons.

## SPRING BUSINESS IS APATHETIC

R. G. Dun and Co.'s *Review* of April 23 will say, regarding business in the Montreal district: With the first arrival of a regular ocean liner on Friday, the 22nd, the opening of navigation has been formally established, and it is hoped will have the usual effect of giving some impetus to business. First incoming steamers are not bringing very full cargoes, it is said, but a fair amount of outward freight is offering, including a considerable number of cattle, and some revival is looked for in that line, which in years gone by was a prominent feature of the export trade from this port. In general trade conditions there is little variation since a week ago. Dry goods travellers report customers apathetic with regard to fall lines, preparing to await future price developments, but business in sorting lines is fairly active. The moderately improved conditions recently noted in the boot and shoe trade are maintained, and there is consequently a little more doing in leather. Conditions in the fur trade are somewhat discouraging, and travellers who have completed the first trip of the year, carrying samples of heavy goods such as men's coats, robes, cloth caps, mittens, etc., report generally that orders are very short of an average. It is hoped that next trip with the finer lines of ladies' goods will prove more encouraging. Groceries are moving fairly in moderate lots, and revised quotations are rare. Refiners' prices for standard granulated sugar remain at 11 cents. Stocks of rice are said to be large, and there is some disposition to shade quotations. All standard makes of soaps are again reduced this week.

Toronto conditions are outlined as follows: The referendum was responsible for a temporary dislocation of business in the early part of the week but prospects of fine weather stimulated retail trade and merchandise such as dry goods, boots, shoes and men's wear moved satisfactorily. Wholesalers, since buying in quantity has ceased, promptly feel the effects of public purchasing as a rush of small orders follow every flurry. Jobbers watch the cotton market closely and in some instances are dubious about the advisability of placing orders without some reasonable understanding regarding maintenance of price. Clothing manufacturers absorbed a fair amount of woollens recently. One authority states that a foreign maker found demand so good that allotment was found necessary and also intimated that prices on these goods very nearly approached 1915 figures. English weavers have certainly modified their views regarding values and some criticism of quality is to be heard occasionally. The metal trades are still quiet. Building is more active and the city architect's department experienced the busiest day on record last week. Mid month permits totalled in value \$1,432,000. A couple of branch banks, 235 brick dwellings, 287 garages and 20 stores formed the bulk of the work.

## EXCHANGE QUOTATIONS

Quotations of exchange on European countries and the United States as at April 21, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

	Can., Apr. 14.	Can., Apr. 21.	N.Y., Apr. 21.
London, cheque	441.50	442.00	392.50
France	8.01	8.28	7.33
Germany	1.83	1.76	1.52
Belgium	8.38	8.45	7.45
United States	12 <sup>1</sup> / <sub>16</sub> p.	12 <sup>1</sup> / <sub>32</sub> p.	...

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the period ending April 14:—

	Canadian Pacific Railway.		Inc. or dec.
	1921.	1920.	
April 7	\$3,179,000	\$3,617,000	— \$ 438,000

**The First Step**

towards effective Fire Prevention in the store, factory or home, is the removal of hazardous conditions.

Two out of every three fires occur in dwellings, and are caused principally by carelessness and indifference.

With the high cost of building material, how can our increasing population be taken care of if more than half the number of houses that are built annually are destroyed by Fire?

Remove accumulations of rubbish, litter, paper boxes and old furniture from attics, cellars and back yards.

During the first week of May boys and girls of the province are going to inspect our homes.

Help them to PREVENT FIRES BY REMOVING THE CAUSE.

Popular literature, "Conservation of Life, and Property from Fire," "Lightning, its Origin and Control," free on request.

**A Trust Company's Charges**

CONTRARY to popular belief, a trust company receives no more remuneration for its services than does a private executor or trustee. The amount is based on a percentage of the funds handled and is fixed by the Courts when the accounts are audited.

Consider the following advantages which a trust company offers you:

It is financially responsible.

It is always available.

Its officers have wide experience in the management of estates and trusts.

It maintains an up-to-date accounting system ensuring accuracy.

It furnishes statements to beneficiaries at regular intervals.

It keeps all papers and documents in Safety Deposit Vaults.

These and many other advantages can be secured at no greater cost than private trusteeship. You can readily see, therefore, that trust company service is the more efficient and less expensive for you in the end.

*We solicit your business.*

## NEW BRUNSWICK WILL PRACTISE ECONOMY

Estimates Lower Than Expenditure For Previous Year—No New Enterprises to be Undertaken

**A**N estimated revenue of \$2,895,856, as compared with actual receipts of \$3,100,548 last year, and an estimated expenditure of \$2,886,526, as compared with an expenditure that reached \$3,004,200 last year, was forecasted for the province of New Brunswick by Hon. J. E. Hetherington, who recently became provincial secretary treasurer, in his budget speech delivered in the legislature on March 30. He was thus able to predict a surplus at the end of the coming year's operations of \$9,330, but he told the House that the government was faced with a situation which would necessitate the most stringent economy in expenditures and the most thorough collection of revenues in order that the province might "break even."

"Economy will be the watchword of the government," declared Hon. Dr. Hetherington, following up Premier Foster's recent announcement that the policy of the government would be not to embark upon any new enterprises for the next few years. He referred to the stringency of the times and the unfavorable condition of the lumber market and said that under the circumstances the government had decided the time was inopportune to put into effect any new taxes which would mean placing new and additional burdens upon any of the industries of the province. On the other hand, he said, the government would foster industries which would be productive of employment.

### Reduced Territorial Revenue

The anticipated decrease in the revenue was accounted for by an expected reduction of \$270,000 in the territorial revenue. This was due, it was explained, to the conditions of the lumbering industry which had brought about a much smaller cut of logs on the Crown Lands which would have precipitated such a reduction in the territorial revenue that the province would be faced by a huge deficit if it had not been that the increased stumpage rates, now \$5 per thousand, were effective during the cutting season of the past winter.

In connection with the forest revenue a table was presented showing that New Brunswick, with an increase of 100 per cent. as compared with 1919, had made a bigger advance than any other province in this particular, British Columbia's advance being 20 per cent., while Quebec showed 28 per cent., and Ontario 50 per cent.; while it was shown that New Brunswick's loss from forest fires on Crown Lands had been approximately \$90,000 as compared with \$390,000 in British Columbia, \$350,000 in Quebec, and \$290,000 in Ontario.

Special mention was also made of the growth in the motor vehicle tax receipts, which amounted to only \$15,000 in 1915, and from which source \$200,000 was received last year and the estimated receipts for this year are \$275,000.

The increase in the provincial debt during the past year was declared to have been \$1,499,931, the chief items of which were \$100,000 for St. John Valley Railway, \$500,000 for permanent bridges, and \$780,000 for permanent roads under Federal aid.

### Reductions Explained

The territorial revenue estimated for 1921 is \$1,320,500 as compared with \$1,589,539 actual receipts last year, the stumpage being estimated at \$1,000,000 while big game hunting licenses are expected to produce \$45,000. Taxes from incorporated companies are estimated at \$162,150 as compared with \$164,386, the actual receipts of last year. Prohibition produced \$79,500 in receipts last year, but for this year the estimate, for some reason, is only \$60,000, while succession duties are expected to produce \$100,000, as compared with \$90,340 last year. On the expenditure side the government expect to reduce the provincial appropriation for agriculture from \$83,240 to \$66,033, while the amount in the

estimates for bonuses to officials is \$4,825, as compared with \$10,700 last year, indicating that the government will not pay more than the first half-year's bonus this year which has already been paid to the provincial civil servants. Education is going to get more than last year, the estimate for this year being \$361,200, as compared with \$318,697 paid out last year. There is to be a reduction from \$175,347 to \$150,000 in the expenditures for forest service, but interest charges will advance from \$648,040 paid out last year to \$744,000 in 1921. The maintenance of the Provincial Hospital at Fairville is expected to be reduced from \$172,433 paid last year to \$160,000 this year. The biggest cut of all will come in public works where the estimate for last year was \$487,000, but the actual expenditure was \$811,810; this year the estimates call for an expenditure of \$562,294, and the House was told that the amount will not be exceeded. Sinking funds will cost more, an advance from \$37,580, expended for this purpose last year to \$83,950 this year being estimated. The expenditures chargeable to the motor vehicle fund last year amounted to \$142,959, but this year from the same source it is expected the expenditure will be \$192,970.

Exclusive of the St. John Valley Railway interest payments, the provincial secretary declared the province had a surplus of almost \$100,000 on its ordinary revenue account last year.

### PAYROLLS STILL SHOW CONTRACTIONS

Dominion Headquarters of the Employment Service of Canada, Department of Labor, reports that during the week ending March 19, 5,151 firms made employment returns showing that they had contracted their payrolls by 2,825 persons, or less than one-half of one per cent., since the preceding week. Taking the volume of employment reported for the week of January 17, 1920, as a base equal to 100, employment for the week of March 19, 1921, stood at 86.6 as compared with 101.2 indicated by the firms making returns for the corresponding week in last year. This would show, therefore, that the employment afforded by the firms reporting for the week under review was about 14.5 points lower than during the week ending March 20, 1920. Prince Edward Island and Alberta registered nominal gains over the preceding week, while of the declines reported elsewhere those in Quebec of 1,429 persons were the largest. In every province employment was considerably below the level of the corresponding week of last year. As compared with the returns for March 12, there were increases in seventeen industrial groups totalling 1,749 persons, but in fifteen groups there were shrinkages aggregating 4,574 workers. As during the preceding week, the majority of these employees were released from logging camps, on account of the closing of the active season for cutting operations.

The largest increases occurred in sawmills, cloth, garment, carpet and knit goods factories, in the musical instruments, coal mines and retail trade. With the exception of the expansion in coal mining, which took place in Alberta, practically all these gains were reported in Quebec and Ontario. As mentioned above, the shrinkages in logging were very decided, totalling 1,762 persons or nearly 15 per cent., the greater part of whom were let out in Quebec and Ontario. In addition, considerable inactivity was reported in the railway car and shipbuilding branches of iron and steel, in pulp and paper factories, in iron ores and asbestos mining, railway and water transportation and railway construction. While most of these losses were widespread in application, those in Quebec and Ontario were usually the largest. For the following week, a further but somewhat smaller decline on the whole, was anticipated. As compared with the corresponding week of last year employment in almost every industry was substantially lower, the contractions in the manufacturing group being especially noteworthy. There were, moreover, large shrinkages in the mining group, in railway transportation and building and railway construction.

## Is Your Property Still Unsold—Still To Let

We will sell or rent it for you.  
 We can do it for you, because we are doing it every day for others. Collection of Rents, Efficient Management of Apartment Houses, Stores, Offices and Factory Buildings—we do these things exceptionally well.

## ALBERTA MUNICIPAL ASSESSMENTS TOO HIGH

Provincial Board, For Purposes of Provincial Taxation,  
Values Property Far Below Figures Set by  
Local Authorities

**E**QUALIZED assessed values of lands in cities in Alberta for the purposes of provincial taxation all show big reductions as compared to the municipal assessments in the report of the new provincial board of equalization which was laid on the table of the legislature this session by Hon. C. R. Mitchell, provincial treasurer. The comparative lists of the equalized assessed values made by the new board, and the municipal assessed values of land in the various cities are as follows:—

	Total local municipal assessed land values.	Total equalized assessed land values.
Calgary ...	\$52,576,694	\$45,000,000
Edmonton ..	61,891,965	45,000,000
Lethbridge ..	6,463,185	5,100,000
Medicine Hat	9,213,395	5,300,000
Red Deer ...	2,237,060	725,000
Wetaskiwin .	1,207,922	720,000

These equalized assessments made by the provincial board are not for the purpose of municipal assessors in making their city assessments but for the province in levying provincial taxation, and making the burden equal throughout cities, towns, villages and rural districts.

For the six cities above the total municipal assessments on land values were \$133,590,221, whereas the provincial board of equalization has fixed its figure of totals for these six cities at \$101,855,000, a reduction of \$31,735,221.

There are 255,288 square miles in the province, and the board's report says this embraces an acreage of 163,384,300 acres, the total surveyed land at the end of 1919 being 85,147,816 acres. Of this amount, the Dominion government issued timber licenses on 1,353,100 acres, grazing leases on 2,902,400 acres, forest reserves and parks 16,754,700 acres, reserves for forestry purposes 1,677,500 acres, road allowances 1,276,000 acres, land covered by water 2,285,050 acres, leaving available land for settlement at 58,898,566 acres.

In the rural districts of Alberta the board's report says that there are 38,207,343 acres of taxable unsubdivided lands with an equalized assessed value of \$591,928,499, and in addition there are 410,584 acres in subdivided land which is valued at \$6,086,770.

## Much Assessable Land

Altogether the board found that in the municipal districts of the province there are 28,691,221 acres of assessable land. In the improvement districts, the board found 9,516,121 acres of assessable land. This gives the total of 38,207,343 acres cited above on which an assessed value has been worked out for levying of taxes.

The total area occupied by the cities is 70,802 acres, by towns 62,279 acres, by villages 33,870 acres, and by hamlets in municipal districts 61,700 acres, while improvement districts contain hamlets with 19,160 acres.

## Taxes on Acreage

The board has fixed on \$15.49 an acre as the average assessable value of land assessed as acreage. Capitalized at 8 per cent. the report says this would require an average income of \$1.24 per acre or \$199.40 a quarter section of 160 acres from every acre of assessable land in the province.

Possible returns fluctuate above and below this figure and the report goes into great detail concerning the care with which the figure was worked out from the immense mass of statistics gathered.

In referring to the work of the board in equalizing assessed values in cities, the report says: "The work of equalization in urban municipalities was very difficult. In determining the total assessed value of lands and other

property in such municipalities it has been the common practice to take the population as the basis. But the board was confronted with the fact that many municipalities with a small population had a very large area, while others with a larger population had a smaller area. It is well known that there has been a tendency to surround urban communities with as much subdivided land as possible to place on the market, and in many cases to subdivide out of all proportion to the requirements of the present or even remote future.

## Borrowings Limited

"Moreover, in the days of the boom in real estate the values placed on land were high enough to enable the authorities to levy a comparatively low rate and produce the amount of money desired. There has been a tendency to maintain just as high a valuation as possible on all lots, for the reason that the borrowings of the municipality have been limited to a certain percentage of the total assessed value of the lands within their bounds, and in addition there has been a very great effort to maintain a high assessed valuation in order to obtain a low rate, rather than to have a normal valuation and allow the interest rate to be fixed altogether by the amount of money required.

"Further, the values placed upon lands in some of the urban centres have been greatly modified in view of values placed upon improvements, and of taxes levied upon business. For these reasons, the board could not be guided in any satisfactory way by the values which were placed upon lands by local authorities.

"The board has taken in consideration the population, the area, the business transacted within the limits of the municipality, the contiguous territory as related to the business so transacted, and many other factors which go to determine the value at which business property and residential property should be so placed, and has arrived at its conclusions after much careful comparison."

## Review of Figures

A review of the equalized figures given in the report for the six cities, discloses that the city of Lethbridge was virtually the only one where the board did not find it necessary to put its figures away below those of the municipal authorities. Among other interesting points in the report are the following:—

Fifty-two towns in the province have local assessed valuations totaling \$24,566,026, whereas, the board's valuation of the same lands is \$10,523,000. One hundred and twenty villages in the province have local assessed valuations totalling \$7,415,515, but the equalization board's total for the same lands embraced within their borders is \$4,964,877. Perhaps the most striking difference on the list is the case of the town of Beverly, near Edmonton, where local land assessments total \$1,013,895, but which the board values at only \$101,500. In the same class is Bassano not far from Calgary, where the local assessments totalled \$1,302,000, and the equalization board's total for the same lands was \$188,700. In the same manner, the local municipal assessment of Redcliff, near Medicine Hat, which totalled \$3,306,980, under the board's method of valuating, totals only \$328,500.

The members of the equalization board are: Chairman, J. H. Lamb, deputy minister of municipal affairs; A. J. H. Donahoe, Foremost; W. J. Jackman, Cloverbar; W. D. Spence, Calgary; and S. E. Ferris, Edmonton. It was created on an order-in-council, in April, 1920, following legislation passed by the house on the initiative of the late Hon. A. G. MacKay, former minister of municipal affairs. Since its first meeting, the board held almost continuous sessions up to the time of the completion of the report. The members, after a preliminary survey of the province, visited every municipality, urban or rural, as a whole, or by members deputed specially for the work. The report says that the board received the fullest co-operation from the various municipal and local authorities and expresses gratification at the assistance given.

## PRINCE EDWARD ISLAND HAS SMALL SURPLUS

Public Accounts for 1920 Show Greatly Increased Expenditure and Revenue

**P**UBLIC accounts of Prince Edward Island for the year ended December 31, 1920, recently tabled in the legislature, show receipts of \$748,659, and expenditure of \$745,406, leaving a surplus of \$3,253. Included in the receipts is \$69,816 of taxes and tax arrears held over from 1919.

The larger expenditures in 1920 were as follows:—

Administration of justice .....	\$ 28,605
Department of agriculture .....	22,483
Department of education .....	211,547
Department of public works .....	135,157
Department of provincial sec.-treas. ....	20,227
Falconwood hospital and infirmary .....	120,166
Interest .....	56,497
Legislation .....	22,338
Miscellaneous grants, etc. ....	12,216
Provincial building .....	6,591
Registry offices .....	6,858

Total ordinary expenditure .....	\$659,516
Capital or permanent expenditure.....	5,390
Highways improvements .....	61,140

Sinking fund (appropriation) .....	\$726,047
Interest .....	10,470
	8,889
	<hr/>
	\$745,406

The chief receipts were as follows:—

Dominion subsidy .....	\$372,181
Falconwood hospital fees .....	10,178
Amusement tax .....	5,225
Fire insurance companies .....	9,900
Fire insurance companies .....	3,150
Banks .....	16,285
Real estate (or land tax) personal property income tax under Taxation Act .....	\$141,029
Income tax, 1919 .....	\$40,288.80
Income tax arrears.....	1,683.71
Land tax arrears.....	5,589.58
Fox tax arrears .....	47,562
Succession duties .....	188,591
Prohibition commission .....	22,254
	7,936
	50,100

Total ordinary receipts .....	\$706,476
Highway improvements .....	33,293

	<hr/>
	\$739,770
Interest on sinking fund investments.....	8,889
	<hr/>
	\$748,659

## ALBERTA ACREAGE LIKELY SMALLER

It is not going to be an early spring in Alberta, but every indication points to a good average season for farming operations. That is a fair summing up of the reports that have come thus far to the provincial department of agriculture from all parts of the province. A small amount of spring work has already been done, it is stated, but only by individual farmers in favored spots, as a time-saving measure. The department has no information of seeding having actually been done as yet.

It is the opinion of government officials that a smaller acreage will be cultivated this year in Alberta. A cut of about 10 per cent. on last year's acreage is estimated. The 1920 figures were 7,955,940 acres in grain and 11,662,167 acres under cultivation of all kinds.

## PRINCE EDWARD ISLAND BUDGET SPEECH

Surplus Now Reported—Estimates Provide \$265,400 for Education and \$769,129 for Public Works

**P**RINCE Edward Island's finances in relation to its problems of government were discussed by Premier Bell in his budget speech on April 4. Referring to the surplus for 1920, he claimed that the late government had incurred a deficit of \$253,000 as certified to by the provincial auditor. The Liberal party thus could boast that they had turned the deficit of \$253,000 to a surplus. The late government, he said, had done nothing to provide for the increase of teachers' salaries, whereas this government had increased these salaries by \$86,000.

He referred to the federal appropriation of 20 million dollars, of which the share of this province was \$600,000. This grant was originally intended for permanent inter-provincial roads. He spoke at some length of the negotiations between the provincial and federal governments before an agreement favorable to the province was arrived at. This was finally accomplished and the work was proceeded with until 60 miles had been finished at a cost of \$100,000. Of this amount \$40,000 was paid by the federal government, the remainder secured from auto fees \$30,000, and \$30,000 which the government had on hand, and so they paid the \$100,000. He intimated that it was the intention of the government to build 800 miles of road, provided they retained the people's confidence long enough. The roads, he said, were not for the benefit of automobile owners but of the farmers.

The estimates for 1921, tabled on April 5, provide for the following:—

Administration of justice .....	\$ 28,290
Agriculture .....	33,050
Education .....	265,400
Hospital and infirmary .....	120,200
Interest .....	56,500
Legislation .....	21,950
Secretary-treasurer .....	13,900
Public works—ordinary .....	736,329
Public works—capital .....	32,800

## INTERNATIONAL LOAN CO.

In Winnipeg recently, the annual meeting of the International Loan Co. was held. That the directors of the company look forward to the development of a very large western mortgage corporation under this name is indicated by the fact that the chief business of the meeting was the consideration of details in connection with the issuance to the company of a new Dominion charter with an authorized capital of \$20,000,000, which was granted at the last session of the Dominion parliament. The company was first formed under a provincial charter in 1912 with a capital authorized of \$500,000. This was increased later to \$2,000,000, and when this sum had been fully subscribed, it was decided to place the capitalization at a figure to provide for full future expansion. Up to the present there has been subscribed \$3,200,000. The subscriptions are made on long terms of payment, and the accruing interest is used to reduce the amount of deferred payments. The subscribers and borrowers are chiefly Manitoba farmers, and the object has been to make the organization as largely as possible a farmers' company.

The paid capital of the company was reported at \$450,000, which has been invested in first mortgages with a few municipal bonds. The gross income of the company was \$45,400, from which there was paid the usual dividend on the paid capital at the rate of 6 per cent. per annum. The company has no outstanding bonds or obligations of any kind to the public.

H. M. Ross, of Winnipeg, is president, while G. W. Argue, also of Winnipeg, is managing director.

**DIVIDENDS AND NOTICES**

**DETROIT RIVER TUNNEL COMPANY**

Detroit, Mich., April 5, 1921.

**BUILDING PERMITS INCREASED IN FEBRUARY**

The Advance Over Previous Month Was Thirty-Five Per Cent.—As Compared With a Year Ago a Big Decline Is Recorded

**B**UILDING permits issued in 56 cities, showed an increase during February as compared with the preceding month, the total value rising from \$2,378,937 in January to \$3,216,055, an advance of \$837,148, or over 35 per cent., according to figures of the Department of Labor. Nova Scotia, Quebec, Saskatchewan, Alberta and British Columbia registered increases in the value of the permits issued, while in New Brunswick, Ontario and Manitoba there were declines. Of the increases, that of \$676,615, or nearly 164 per cent. in Quebec, was the largest. As compared with the figures for the corresponding month in 1920 there was a decrease of \$2,606,182, or almost 45 per cent., the value for February, 1920, having been \$5,822,267.

**GOVERNMENT CURRENCY**

Dominion note circulation showed another reduction in March of \$12,311,635, bringing the total decline since the peak of November last to nearly fifty millions. Unlike preceding months of reduction, however, there was also a drop in gold held against outstanding notes of \$19,575,049. As already indicated, since the height of the crop moving season last fall there has been a steady decline in the demand for currency, which was accentuated by the decline in commodity prices. This movement was accompanied by an increase in gold held by the government for the redemption of notes, of about \$3,000,000.

Last month's result, however, brought this improvement to an abrupt finish. But the Dominion's position in regard to currency is still better than it was last autumn. At the end of November, 1920, notes outstanding totalled \$326,839,592, against which there was held gold to the amount of \$96,021,001, and securities of \$173,689,025. The figures at the end of March, 1921, were as follows:—

Provincial.....	\$ 27,743 25
Fractional.....	1,293,282 67
\$1.....	18,456,101 50
\$2.....	12,819,010 50
\$3.....	37,567 00
\$5.....	3,659,880 00
\$10.....	5,800 00
\$50.....	2,683,500 00
\$100.....	5,050,700 00
\$500 Legal Tender Notes for Banks.....	70,000 00
\$1,000.....	962,000 00
\$5,000.....	191,980,000 00
\$50,000.....	42,800,000 00
	\$277,882,884 92

**PROVINCIAL NOTES.**

## DAMAGES WHEN GOODS LOST BY CARRIERS

## Supreme Court Holds that Market Value at Time and Place of Consignment be Basis of Valuation

THE damages caused by the loss of a consignment of goods under a bill of lading containing the following clause: "The amount of loss or damage for which a carrier is liable shall be computed on the basis of the value of the goods at the time and place of shipment" must be calculated at the market value of the consignment at the time and place of shipment, and not at the cost price to the owner at the place of purchase, plus freight charges.

This decision was given in the case of Montreal Cotton and Wool Waste Co. vs. the Canada Steamship Lines before the Supreme Court of Canada, and in his judgment Chief Justice Davies says:—

"At the close of the argument the court was unanimously of the opinion that the appeal should be allowed and the judgment of the trial judge restored on the ground that the contract or bill of lading for the carriage of the goods fixed and determined the damages for which the defendant might become liable, namely, on the basis of the value of the goods at the time and place of shipment.

## Proper Basis of Liability

"The defendant company did not dispute its liability for damages, the goods having been destroyed by its negligence during their transit. The sole question was as to the proper test by which its liability for damages should be determined. The defendant's contention was that its liability should be determined from the cost to the plaintiff of these goods under its contract with the Dominion Textile Co., Ltd., by which it agreed to purchase the entire output of the mills at four cents per pound for one year. That price so agreed to be paid was the value, it contended, of the goods in Quebec on which its liability should be based and determined.

"The trial judge held that the true value of the goods to the plaintiff under the contract of carriage was not the cost of price at which it purchased them from the mills, but what they would fetch in the open market at the time and place of shipment, and assessed the damages on that basis at eight cents per pound, or \$2,010.

"The Court of King's Bench reversed this finding, holding that the purchase price at which the plaintiff bought from the mills was the test of value of the goods under the contract of carriage to it for the loss of which only it could recover, and accordingly reduced the damages by half, or to \$1,005.

"I am of opinion that the Court of King's Bench erred in the test they accepted as to the value of the goods at the time and place of shipment. That value, I think, was not the price which under a yearly contract for the entire output of the textile company's mills it had bought the goods for, but the market value of those goods to it at the time and place of shipment of the goods. Its contract for the purchase of the entire output of the mills may or may not have been a good one; it may or may not have been improvident. It is not evidence of the market value of the goods at the time and place of shipment, which was proved independently as very nearly double the cost to it from the mills. The carrier had nothing to do with that price. If it had paid double the market value, it certainly could not recover such value from the carrier, nor can the fact of its having purchased at less than the market price at the time of shipment avail against the market value. An ordinary purchase in open market would be very different."

Formation of a Winnipeg Produce Exchange, along the lines of the Grain Exchange, to handle butter, cheese, cream and poultry has been completed by the produce section of the Winnipeg Board of Trade. A. P. McLean, of the Canadian Packing Co., is president of the exchange, and it is expected to commence operation by April 15.

## COLLECTING INTEREST IN NEW YORK FUNDS

Right of Canadian Holders to Do So is Established—  
Decision in Case of Montreal North

CANADIAN holders of securities, the interest on which is payable in New York as well as in Canada, a feature to which little importance was previously attached, have found themselves able to reap an unexpected profit since New York exchange went to a premium. The large amount of bonds recently sold in the United States have also had this feature, but among the government war loans there is only one issue, the 5's due 1937, so payable. The right of the Canadian holder to demand payment in New York funds has been unquestioned by most debtors, but the Dominion finance department last year made an effort to prevent Canadian holders of the 1937 bonds from so doing.

Once in a while, however, a dispute will arise on this point. On April 1, the Quebec courts maintained five actions against the municipality of Pointe-aux-Trembles, which was condemned in each instance to pay to the claimant the amount found to be due on the interest coupons of the town's debentures. In two instances, the Court upheld the principle that a claimant who has the option of collecting the debt in the United States may on exercising that option demand payment to the equivalent of the face value of the interest coupon in the currency of the country where the amount is collectable.

This option was reserved to Achille Raymond and Emile Vaillancourt. Their respective claims were for \$240 and \$660, and as they exercised their right to collect the interest at the National Park Bank, New York City, they demanded ten per cent. additional, for exchange. The municipality contested the demand and pleaded that in any event the plaintiff could claim only the amount due on the coupons in Canadian currency. Judge Archer found against this plea, and judgment therefore went against the municipality for \$264 in the case of Raymond and \$660 in the case of Vaillancourt, with interest as from the date the coupons matured on November 1 last, and the costs of the action.

## FIRE INSURANCE CASE

An interesting question under insurance law was decided on April 1, in Montreal, by Mr. Justice Maclellan dismissing an action instituted by Adelaar Lefebvre against the Compagnie d'Assurance Mont Royal, seeking to compel the defendant to issue to him a fire insurance policy in which the risk insured on the goods and effects in premises at 106 Hadley St. should be placed at \$1,600.

Plaintiff stated that he applied to defendant for a policy of insurance in September, 1919, when the amount of risk was fixed at \$1,600, and an interim receipt covering insurance for this amount was issued to him. On November 29 following he was surprised to receive a policy insuring his effects to the extent of \$1,200 only, this policy being received by him after he had notified the company of a fire which took place on the insured premises. The policy was accompanied by a schedule dividing the \$1,200 between certain classes of plaintiff's effects, a condition and limitation for which he said he never applied. Consequently, he alleged that he was prevented from exercising his proper rights under the insurance.

Defendant pleaded that after the fire it was found that the value of the goods and effects in the plaintiff's premises was not more than \$1,200, and it was then and there agreed between plaintiff and defendant's agent that the interim receipt should be corrected in order to make it concur with the value of the insured goods.

Justice Maclellan, after examining the proof and documents produced, reached the conclusion that the company defendant never agreed or undertook to insure plaintiff for the sum of \$1,600, or to issue him a policy for that amount.

Plaintiff's action, therefore, was dismissed with costs.

**Pulp and Paper Companies are Faced with Labour Troubles—Kipawa Plant of Riordon Company Closed—Whalen Organization is Exporting to Japan—Flour Trade is Slack—Demand From Abroad Poor—Steel Industry Preparing for improvement**

At the present time the pulp and paper industry both here and in the United States, is in a troubled condition with regard to labor. On May 11, the agreement between the companies and the unions expires, and unless some arrangements are made in the meantime there will in all probability be a strike. In the face of a proposed 30 per cent. wage reduction by the newsprint manufacturers, the workers are asking increases of five to ten per cent. They received a twenty per cent. increase last May. In addition the manufacturers are insisting upon abolition of extra pay for overtime and a basic nine-hour day, instead of eight hours, for the "outside" or unskilled workers, who are members of the pulp, sulphite and paper mill workers.

The mills represented in the dispute are: Abitibi Paper Co., J. R. Booth Co., Cliff Paper Co., De Grass Paper Co., Eddie Paper Co., Fort Frances Pulp and Paper Co., Grand Lake Bag Co., Hannah Lake Bag Co., Hannah Paper Co., Hoboken Paper Co., International Paper Co., Itasca Paper Co., Minnesota and Ontario Paper Co., Parker-Young Paper Co., Pejebscot Paper Co., St. Maurice Paper Co., St. Regis Paper Co., Schroon River Paper Co., Sherman Paper Co., Spanish River Pulp and Paper Co., and the Union Bag and Paper Corporation.

C. H. L. Jones, manager of the Spanish River mills in discussing the situation, said that a readjustment of wages was necessary if the mills were to continue in operation. The present state of the paper-making industry was not as bright as it had been pictured, he stated, and only by a considerable lowering of the costs of production could the mills be kept running on full time and continue to produce paper at the prices prevalent. He said that for some time past the company had been making paper for stock in order to keep the plant going even several days a week.

In New Brunswick, the Fraser Companies, Ltd., are facing labor trouble which has arisen from the demand of the local Timber Workers union that the proposal for the return to the ten-hour day be abolished. A nine-hour day is demanded.

## Riordon's Situation

In reference to reports published to the effect that the Kipawa mill of the Riordon Co., Ltd., located in the Temiskaming district, had closed down, the management at Montreal stated that the early reports of the closing have been exaggerated. Instead of 2,500 men being out of employment only 250 have been laid off. The mill will be closed down for about two weeks, and during that time some repairs will be effected. This is the first time the mill has been able to close since it started operations about eighteen months ago. It was stated that this was a logical time for the company to make a temporary closing of the mill inasmuch as the market for pulp is dull at the moment, but is not expected to continue so for long. It is understood that the company has a large amount of pulp on hand for which there is no market. By closing down for two or three weeks it is expected that this surplus will be absorbed to a large extent, and then the plant will be opened up again.

According to T. W. McGarry, president of the Whalen Pulp and Paper Co., all three mills of the company in British Columbia are operating at full capacity under contracts made last fall. The larger portion of the sulphite produced is being shipped to Japan. The monthly output is approximately 5,000 tons of sulphite. Both sawmills of the company are also operating to capacity of 250,000 feet per day, and one of the two shingle mills is operating. Contracts for sulphite will keep the pulp plants running for some time yet.

Flour mills in the west are running on a half-time basis, and it is likely that this condition will continue until the

time when the 1921 crop begins to enter the elevators. An authority in the industry states that the reason for the slackness that has existed for some time is, of course, the entire absence of any export trade. Great Britain has been under the direction of a royal commission insofar as her grain and milling business is concerned, and one of the large outlets for the Canadian mills was thus done away with. This outlet is returning now, however. Decontrol took place in Great Britain on April 1, with the result that a few orders have been sent out to the mills in this country. These orders are not great and it is difficult for the millers themselves to judge whether or not any considerable increase may be expected for some time. The importers in Great Britain are not in a position to know exactly what they may be able to handle, and buying is extremely cautious.

## The Steel Trade

No marked increase in buying has yet resulted from the cut in prices by the United States Steel Corporation, but as other mills bring their rates more into line with the levels set there should be an improvement as it is lack of stabilization in prices of steel products that has made for dullness generally in this field of industry.

The nine months' report of the Algoma Steel Corporation, covering the period ended March 31 last, shows that there has been a falling off in shipments since October, 1920. It is a notable fact, however, that the output of the various products during the nine months was greater than the same period in 1919-20. Tons of pig-iron produced from July to March were 292,083, compared with 199,558 tons, while tons of steel ingots produced were 251,629, as compared with 223,832 tons previously.

Unfilled orders for iron and steel at the end of March were, approximately, 20,000 tons. The rail mill was closed on March 19, after completing two contracts, but mills were in operation at the end of the month, making rail fastenings, merchant bars and small shapes.

Operations of Canadian coal companies have been greatly reduced, particularly in Nova Scotia. With the opening of navigation and a more normal situation in the steel trade, the demand for products of coal companies will increase.

The Algoma Steel Corporation in a circular to shareholders states that negotiations with the Canadian railways for the purchase of rails have been in progress for some time, and directors expect to close contracts shortly for satisfactory tonnages.

It is understood that Armstrong, Whitworth of Canada, Ltd., are contemplating closing down entirely their works at Longueuil, Quebec. Recently only their small tool shop has been operating and they have built up a large stock of all kinds of standard tools, such as, twist drills, milling cutters, and reamers. Their stock includes a quantity of their famous brands of high speed and carbon tool steels, in all the usual sizes.

On behalf of the management it is stated that owing to the failure of the Dominion government to give them any tariff protection on the manufacture of locomotive steel tyres they closed down their tyre mill some twelve months ago, and will not reopen their mills again, until such protection is given. Most of the raw materials they require have to be brought from the United States and are dutiable. No protection, however, is afforded them under the Dominion tariff for their finished product. This tyre mill is the only one in Canada.

Dominion Bridge Co., emphatically denies the rumor of closing down. It declares that it has orders enough to keep busy for six months. Its mills are working with sixty-five

per cent. of the pre-war normal staff, which has been reduced by rearrangements of the plant during the war. The few members of the office staff who have been released were men engaged specially for war work.

The Hewetson Co., of Brampton, Ont., manufacturing children's shoes, is opening a new factory at Acton, Ont.

One of the largest wholesale hardware and plumbers' supplies firms in Canada has purchased a site in London, Ont., and will erect a large modern warehouse as soon as the plans are drawn up, according to an announcement by the chamber of commerce. The warehouse will be located on the property 298-306 York St., and in all probability will cost in the neighborhood of \$200,000. The company is Crane, Ltd., of Montreal, who also have large branch warehouses at Toronto, Winnipeg and Vancouver.

### NEW INCORPORATIONS

Capital for Week Ended April 20 is \$14,427,100, Compared with \$24,490,000 Previous Week

Authorized capital of \$14,427,100 is represented by companies whose incorporation was reported to *The Monetary Times* during the week ended April 20, compared with \$24,490,000 for the previous week. A comparative summary by provinces is as follows:—

	Week ended April 13.	Week ended April 20.
Dominion	\$11,670,000	\$ 6,565,000
Alberta	1,808,000	.....
British Columbia	165,000	3,620,000
Manitoba	2,650,000	905,000
New Brunswick	233,000	59,000
Ontario	6,880,000	2,842,500
Prince Edward Island	20,000	.....
Quebec	839,000	425,600
Saskatchewan	225,000	.....
Totals	\$24,490,000	\$14,427,100

I. Pouliot, Ltd., Quebec, \$80,000; Hotel Central, Ltd., Henryville, \$20,000.

### INSURANCE LICENSES AND AGENCY NOTES

The Springfield Fire and Marine Insurance Co. has been authorized to transact in Canada the business of hail insurance, in addition to the classes for which it is already licensed.

Certificate of registration has been granted to the Preferred Accident Insurance Co. of New York to transact the business of accident, sickness and automobile insurance in the province of Manitoba. G. K. W. Watson is chief agent for the province.

The Toronto Casualty and Marine Insurance Co., with a capitalization of \$1,000,000, and head office in Toronto, is to be incorporated under the Ontario Insurance Act, which will permit them to write the following lines of insurance: Casualty, automobile, fidelity and surety, property and marine. The principal officers are as follows: President and general manager, A. J. Walker-Greig, Toronto; marine manager, T. M. Murdoch, Toronto; chief medical director, D. Forbes Godfrey, M.P.P., Mimico, Ontario.

R. de Grandpré has been appointed superintendent of the newly opened Quebec department of the Continental, Fidelity Phenix and Fidelity Fire Underwriters.

The Motor Union Insurance Co. announces the appointment of Herbert Freeman as fire surveyor to be attached to chief office, Toronto. Mr. Freeman, who is well known in the Ontario field, will render expert service to the Motor Union agents in connection with its general fire business.

A company under the name of the Prince Rupert Insurance Agencies, Ltd., has been formed to take over the business conducted by Peck, Moore and Co., Prince Rupert, B.C. At the present the company is confining its operations to a general insurance business only.

Gordon F. Rennie, who has been general agent in British Columbia for the Insurance Co. of North America and the Alliance of Philadelphia for the past two years, has been appointed second assistant manager of the Pacific Coast department of the North America and allied companies, with headquarters at San Francisco. Mr. Rennie has been located at the department office since the first of the year, occupying the desk of the assistant manager, McKee Sherrard, who has been confined to his home by illness.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only “making good,” it is “making better,” for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**Vancouver Report Shows Revenue Deficit, but Treasury Notes Were Paid in Advance of Maturity—Calgary Had Surplus—Utilities Showed Small Loss—Hamilton Hydro Commission is Making Good Financial Progress—Galt Tax Rate is Lower, While New Westminster Strikes Same as in 1920**

**New Westminster, B.C.**—A tax rate of 36 mills has been struck by the same as in 1920.

**Galt, Ont.**—The city council has fixed the tax rate for 1921 at 38 mills, which is a mill less than for 1920.

**Lethbridge, Alta.**—Assessment valuation for 1921 is \$12,556,215, according to the report of Commissioner Meech. This sum is made up of land, \$6,383,710; buildings, \$4,117,130; personal, \$1,909,580; super, \$145,795. The assessment is a little more than that of 1920, which was \$12,468,930 for all purposes, with land, \$6,464,095; buildings, \$4,001,880; personal, \$1,853,290; super, \$149,665. For school purposes the total assessment stands at \$13,306,620; public schools, \$12,536,200; separate schools, \$770,420, as against \$13,211,150 in 1920; public schools, \$12,465,110; separate schools, \$746,040.

The tentative tax struck by the city council last week gives a mill rate all round for public school taxpayers of 44.68, as compared with 42 in 1920, an increase of 2.68. With the government tax, the rate stands at 46.18 mills, as against 43 mills in 1920, an increase of 3.18 mills. In the case of separate school taxpayers the total, excluding the government tax, stands at 45.68 mills, as against 48.65 mills in 1920, or with the government tax, 47.18 mills, as against 49.65 mills in 1920.

**Hamilton, Ont.**—A profit of \$16,975 is shown in the annual statement for 1920 of the local Hydro commission. This total was compiled after paying the surcharge of approximately \$25,000 to the Ontario commission on account of under-payment of power cost throughout the year. The total reserve capital now amounts to \$640,275. The total plant investment in Hamilton amounts to \$1,485,000, against which is still outstanding \$1,002,834 of debentures issued by the city of Hamilton on the Hydro account. The accumulated sinking fund for payment of these debentures amounts to \$176,935, in addition to \$17,161 reserve for payments on serial debentures.

These reserves are further supplemented by a depreciation reserve of \$303,187. This account is used for replacing plant and accessories as necessary when the equipment wears out or becomes obsolete. The gross surplus accumulated since the beginning of operations in 1912 now totals \$640,275.

In addition to this the local Hydro commission has accumulated and paid for \$38,422 on account of the local commissions share or equity in the general transmission system of the Ontario commission. With all the reserves taken into consideration, the statement shows that two-thirds of the commission's total indebtedness to the city is now provided for.

**Calgary, Alta.**—According to the annual report of the city auditor, general revenue of the city shows a surplus of \$13,959. Losses in the two main utilities, as the outcome of the year's operations, are shown as follows: Street railway, \$11,635; waterworks, \$18,623; total loss, \$30,259. However, the electric light and power department shows a profit of \$27,399, which subtracted from the total losses of the two former utilities, gives a reduced loss in the three main utilities of only \$2,860.

In connection with these utilities, states the report, a condition has arisen, which, in the auditors' opinion, calls for the careful consideration for both the city council and taxpayers. They refer to the necessity all three utilities are under for providing capital assets out of current revenue. For several months past the respective superintendents have been representing to the council that the proper conduct of the utilities called for minor capital extensions which amount to a substantial value in the aggregate, points out the report.

Owing to debenture funds being exhausted, by-laws were submitted to the ratepayers for approval last December for both the street railway and waterworks, but both failed to pass. Pending the submission of these by-laws, authority was

granted to the council to charge the cost of the needed equipment to net revenue, which account has proved inadequate to sustain the added burden. In this connection the report points out that the ratepayers were not made acquainted with the actual situation, otherwise they would not have voted against these by-laws. Had they authorized by-laws the cost would have been automatically spread over a period of years, which is the correct way of providing the cost of capital assets, whereas, the rejection of the by-laws forced the city to provide the cost out of the revenues of a very limited period, thus incurring a very real risk of an all round increase of utility rates, which could probably be avoided if authority were granted for the capitalization of the necessary extensions. In the event of the by-law being re-submitted, the auditors would suggest that full publicity be given to the real nature of the financial issues the taxpayers will be asked to vote upon.

The sinking fund shortage is shown to be \$3,018,612, the figures being: Present value of sinking fund, being the amount which the fund, including its earnings, should have on hand at December 31, 1920, \$5,902,406; amount of sinking fund, \$2,883,793; difference equals the above shortage.

**Vancouver, B.C.**—Expenditures exceeded revenue by \$65,728 in 1920, according to the annual report of A. J. Pilkington, city comptroller. Actually, however, the city operated within its revenues, as on January 1, 1920, it redeemed outstanding treasury notes totalling \$900,000, and payable in New York, at a cost of \$76,154 in exchange. Of these notes \$600,000 were retired in advance of maturity 'the due dates being January, 1921, and January, 1922.

Of a total income from general revenue of \$6,473,451, there was a deficit of \$103,950, but a surplus in waterworks revenue of \$38,221 transferred to general revenue reduced the deficit to \$65,728. The gross revenue from the waterworks department was \$706,953, and the net revenue after discounts and allowances had been deducted was \$515,874, the discounts totalling \$191,079. Expenditures in the department totalled \$478,065, operations and maintenance costing \$213,054, sinking fund and interest \$245,010, and reserve for replacements and renewals \$20,000.

Capital assets of the city totalled \$46,510,906, allowing a surplus of \$10,684,080 over capital liabilities. Current assets total \$52,739,977. The city has now acquired title to the properties which fell to it at the 1919 tax sale, the total cost, including taxes to the end of 1919, being \$330,647 (subject to some small adjustments still pending). At the 1920 tax sale properties with an upset price of \$193,077 fell to the city, subject to the usual right of redemption by the owners.

Tax arrears, which at the first of the year stood at \$5,216,455 (including approximately \$300,000 of interest in consolidated arrears), have been reduced to \$3,817,632 (including approximately \$165,000 interest on consolidated arrears), or approximately \$3,652,632 net, as against a maximum arrearage of \$5,456,453 at the end of 1918—a reduction of about \$1,805,000. Of this approximately \$430,988 is represented by property falling to the city at tax sales, the balance of approximately \$1,371,000 having been collected in cash.

At the close of 1919 the following treasury notes were outstanding: 1917 issue, \$415,000; 1919 issue, \$2,541,000. Total, \$2,956,000. Against these the city had funds in hand for redemption amounting to \$1,042,167. On January 1, 1920, \$900,000 of the 1919 issue were retired, as already mentioned, and the 1917 issue were also retired before March, 1920, by the firm who floated the 1919 issue. The total notes now outstanding amount to \$1,700,000, against which the city had on deposit in trust at December 31, 1920, \$754,201 available for their redemption as soon as conditions of exchange warrant.

**Austrian Exchange Strong**

Recent strength in Austrian Exchange, which has carried  
 cheques on Vienna up to around .003, has revived interest in the  
 possibility of a loan to that country, probably by London insti-  
 tutions. Austrian exchange has advanced sharply in London,  
 and the rise in the New York market has been in sympathy with  
 that movement. Dutch bankers have already been aiding  
 Austria financially and negotiations with London bankers are  
 reported to be in progress.

Fundamentally the situation seems to have passed its worst  
 stages, and now, as economic measures at home are applied,  
 and the disposition to render assistance from the outside becomes  
 more apparent, the speculative assurances of Vienna exchange  
 are materially improved.

# Government and Municipal Bond Market

Prices Have Slipped Back Slightly in the Past Few Weeks—  
 Alberta Securities are Offered to Yield 6.25 Per Cent.—  
 Several Municipalities Make Loans During Past Week

INDICATIONS are that the government and municipal bond market has slipped back slightly in the past few weeks. This is not surprising in view of the great activity which has prevailed since the beginning of the year. In January the province of Alberta floated a loan of \$2,000,000, maturing in fifteen years, and had to pay 6.39 per cent. for its money. The bonds were offered to the public to yield 6.20 per cent. This week the province made a similar loan on a 6.37 per cent. basis, and these securities are offered to yield 6.25 per cent. There have been no provincial bond sales recently, but the above comparison serves to show that there has been a weakening in prices.

The trend of Victory loan prices since the beginning of March also reveals a weakening in all issues with the exception of 1922's and 1927's. The following figures illustrate:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close Apr. 13.	Close Apr. 20.
1922	98	98¾	98¼	98¾	98¾
1927	97	98	97½	98¼	98¾
1937	98	99¾	99¾	99¼	99¼
1923	98	98¾	98	97½	97¼
1933	96½	98	98¾	98	97¼
1924	97	96¾	96¾	96¾	96¾
1934	93	95¼	95¾	94¾	93¾

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
St. Boniface, Man. . . .	\$ 273,233	5 & 6	Various	Apr. 25
Miniota R.M., Man. . .	83,500	5½	Various	Apr. 25
Regina, Sask. . . . .	154,010	6 & 6½	Various	Apr. 25
Danville, Que. . . . .	33,000	6	Various	Apr. 25
Essex Border Utilities	38,209.60	6½	27-instal.	Apr. 26
Rockwood R.M., Man.	70,000	6	30-instal.	Apr. 28
Brockville, Ont. . . . .	30,000	6	10-instal.	Apr. 28
Havelock, Ont. . . . .	23,420	6	20-years	May 2
Ford City, Ont. . . . .	75,000	6½	25-years	May 3

Essex Border Utilities, Ont.—Tenders will be received until April 26, 1921, for the purchase of \$38,209.60 6½ per cent. 27 instalment debentures.

Brockville, Ont.—Tenders will be received until April 28, 1921, for the purchase of \$30,000 6 per cent. 10-instalment sewer debentures. C. A. McLean, treasurer.

Ford City, Ont.—Tenders will be received until 5 p.m., May 3, 1921, for \$75,000 6½ per cent. 25-year public school debentures. (See advertisement elsewhere in this issue.)

Havelock, Ont.—The village is asking for bids up to May 2, 1921, for \$23,420 6 per cent. debentures, maturing from 1927-40, and dated November 1, 1920. T. P. Lancaster, treasurer.

Danville, Que.—Tenders will be received up till April 25, 1921, for the purchase of \$18,000 6 per cent. debentures maturing May 1, 1940. Offers are also invited for \$15,000 6 per cent. debentures maturing November 1, 1957. These are the same issues which were advertised in March, but which were not sold. C. C. Brown, secretary-treasurer.

## Debenture Notes

Belleville, Ont.—The city will have an issue of debentures for sale shortly.

Halifax, N.S.—The city will seek legislation to borrow \$500,000 for sewer and water extension work.

Long Branch, Ont.—The Etobicoke council has authorized an issue of debentures for school purposes to the extent of \$65,000.

Manitoba.—The province will require \$5,870,000 for expenditures on capital account during the present year, according to Hon. Edward Brown, provincial treasurer.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from April 2 to 10, 1921:—

School Districts.—8 per cent. 10-instalments—Antonio, \$1,000; Glengriff, \$1,050; Kelvingrove, \$2,400. 8 per cent. 10-years annuity—Brindle, \$4,000; Formby, \$4,600. Langham, \$33,000 8 per cent. 20-years annuity.

Rural Telephone.—Wartzburg, \$300 8 per cent. 10-years annuity.

## Bond Sales

Stettler, Alta.—An issue of \$12,000 7 per cent. 10-year electric light debentures has been sold to local purchasers at par.

Pipestone R.M., Man.—Harris, Read and Co. have bought \$80,000 5½ per cent. 30-year good roads debentures at a price of 90.25.

Sault Ste. Marie, Ont.—Versailles-Vidricaire-Boulais, Ltd., have purchased \$85,000 6 per cent. bonds of the Separate School Trustees, and are offering the securities at a price to yield 6.25 per cent.

Cap de la Madeline, Que.—Versailles-Vidricaire-Boulais, Ltd., have purchased an issue of \$40,000 6 per cent. bonds of the town, maturing from 1921 to 1950, at 96.07, which is on about a 6.39 per cent. basis.

Craik S.D., Sask.—The municipality was unable to receive any tenders for its \$33,500 20-instalment debentures. The securities, which bear interest at 7½ per cent., were sold to the Regina Sinking Fund at par.

Sudbury, Ont.—Dymont, Anderson and Co., and Turner, Spragge and Co., have purchased \$54,000 6 per cent. 20-instalment debentures at a price of 91.213, which is on about a 7.14 per cent. basis. A. E. Ames and Co., and C. H. Burgess and Co. bid 90.41, while Wood, Gundy and Co. offered 90.06.

Alberta.—The Alberta legislature has passed amendments to the act respecting saving certificates. These amendments permit the issuance of such certificates up to five million dollars at a rate not to exceed 5 per cent. These certificates are issued against outstanding revenue of the province, and the issue is limited at present to three million dollars. Provincial Treasurer Mitchell told the house there is \$3,637,000 in revenue outstanding, and that the total number of certificates issued is \$2,840,000. Under the machinery of the amendments it was intended to call in the money loaned out at 5 per cent. interest over three years and to take instead ten-year bonds bearing 6 per cent. interest.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from April 2 to 10, 1921:—

School Districts.—St. Joseph de Dauphinas, \$16,000 8 per cent. 20-years; Harris, Read and Co. Fairwell Creek, \$3,500 8 per cent. 15-years; Nay and James. Parkbg, \$1,400 8 per cent. 10-years; A. E. Martin, Moose Jaw. Belle Plaine, \$15,000 8 per cent. 20-years; Regina Public School Sinking Fund. Perdue, \$1,500 8 per cent. 20-years; C. C. Cross and Co.

Minto Township, Ont.—Dymont, Anderson and Co. have purchased \$4,000 6 per cent. 10-instalment debentures at a price of 97.32, which is on about a 6.56 per cent. basis. Tenders received were as follows:—

Dymont, Anderson & Co. ....	97.42
Bell, Gounilock & Co. ....	97.17
R. C. Matthews & Co. ....	95.10
C. H. Burgess & Co. ....	96.07
C. R. Clapp & Co. ....	95.29

Niagara Falls Ont.—Wood, Gundy and Co. have been awarded \$250,000 5 per cent. 30-instalment debentures at a price of 84.59, which is on about a 6.54 per cent. basis. The following tenders were received:—

Wood, Gundy & Co. ....	84.59
McLeod, Young, Weir & Co. ....	84.53
Harris, Forbes & Co., Inc. ....	84.47
A. E. Ames & Co. ....	84.46
R. C. Matthews & Co. ....	83.75

Ontario.—Hon. Peter Smith, provincial treasurer of Ontario, is inviting bids for \$5,000,000 6 per cent. securities. Alternative tenders are requested, the issues being as follows: Treasury bills, dated May 2, 1921, and payable in six months from date; bonds dated May 2, 1921, and maturing May 2, 1936. The securities are to be payable in Canada only, and will be in denominations of \$1,000 or larger.

## GOLD AND SILVER PRODUCTION

PRELIMINARY returns of the world's output of precious metals in 1920 show a further decline in gold and a slight increase in the amount of silver, which is offset, however, by a decline in its value. Some charts prepared by the Canadian Bank of Commerce showing this are reproduced herewith. The British Empire is becoming more and more a source of supply of gold for the world, the Transvaal mines alone yielding 50 per cent. of the world's production. This change is due not to any increased output on the part of British mines but to the sharp fall in that of mines in other countries during the last five years. The United States, for example, with an output of 4,868,000 fine ounces in 1915, valued at \$101,035,700, produced in 1920 only 2,395,000 fine ounces, valued at \$49,509,400. Canada has, on the other hand, with a comparatively small output, maintained her figures fairly steadily during the period in question and in the course of the last two years has actually increased her output, producing in 1920 gold to the value of \$15,853,000, as compared with \$15,580,000 in 1919 and \$14,464,000 in the previous year. All other parts of the British Empire, and

the majority of foreign countries, show considerable declines during the last two years.

The outstanding feature of the silver situation is the uncertainty as to the demand for this metal during the current year. The phenomenal decline in price during the last six months is not expected to be followed by a sharp reaction

or even a gradual rise. China has retired from the silver market for everything but speculative buying, and India is now the only country which is able and willing to absorb this metal on a large scale. India is also exporting large amounts of gold, which will increase the holdings of western countries.

## CORPORATION SECURITIES MARKET

Drastic Slump in Riordon Common on Canadian Exchanges  
This Week—Steamships Also Move Down—New  
Offering by Confectionery Co.

THERE was another upheaval in the Canadian stock market this week, and just at the time when sentiment was becoming a little more cheerful, and when it seemed that the markets had settled down from their extended period of bearish tactics. The disturbance resulted from a sharp decline in Riordon common, and a drop in Canada Steamships, the former figuring more prominently in the situation.

A fall of seventy-four points in less than a week, such as in the case of Riordon is a rare event, and fortunately, there have been few such incidents during the progress of liquidation on the Canadian exchanges, which has been fairly steady. The Riordon Company's position at the present time has not been definitely ascertained although the talk of new financing and the closing of the Kipawa plant has led to the supposition that the company is in difficulties, which will mean considerable to common stockholders. It has been stated that the new financing will be \$4,000,000 8 per cent. 5-year notes, which will add another \$320,000 to the already heavy interest charges. The object of the note issue is to replace the working capital, which had been depleted through the large building and expansion program of the company and in connection with the acquisition of large pine limits and other properties last year. But the change has apparently taken place at a rather unfortunate time. As one broker put it: "There was an untimeliness in the break in paper which caught the papermakers of Canada between seasons. They had laudably put a great deal of money into perfecting and extending their mills, when they had lots of money, and then ran into depression and are, unfortunately, short of cash. The paper industry is fundamental in Canada, and cannot but come out all right in the end."

As far as Steamships is concerned, the definite factors are yet to be learned. That the management has been in England to raise capital, appears to be the chief thorn in the side of the market, while it is also understood that recently acquired properties have entailed heavy liabilities, which burden, the company desires to dispose of. It is reported that a committee of shareholders has been formed to go into matters relating to the recent acquisition of additional properties; about which little is known by shareholders, and if possible to pursue some line of action which will help rehabilitate the market value of the company's securities.

Viewing the markets from other angles revealed the same tendencies of weeks gone past. There was little if any outside influence. Traders in Wall Street still lack initiative, corresponding with the hesitant nature of general business. Continued improvement in the reserve position of the banks and the lower money rate has failed to inspire a different feeling.

Trading for the week resulted in a turnover of listed stocks on the Montreal exchange of 50,518 shares, as compared with 37,453 in the previous week, while in Toronto the

figure was 20,090, compared with 13,061. Bonds changed hands to the extent of \$1,302,450 in Montreal, as against \$1,120,248, while the turnover in Toronto was \$871,600, compared with \$862,600 previously.

The board of directors of the St. Lawrence Four Mills, Ltd., have declared the dividend on the common and preferred stock for the quarter ending April 30th. Only the regular distributions were declared, and the usual bonus was omitted for common stockholders. For some time, shareholders had been receiving the equivalent of 10 per cent. on the common stock, 6 per cent. on dividends, together bonus payments. For the current quarter the shareholders will receive only 1½ per cent. or at the rate of 6 per cent. per annum.

Additional stock of the Bell Telephone Co. of Canada, to the amount of \$100,000 has been listed on the Toronto Exchange. In July last the company made an allotment of \$300,000 new stock to trustees for purchase plans for employees.

## William Paterson Stock Offering

Stewart, McNair, Reid and Co., Toronto, are offering \$200,000 8 per cent. cumulative participating preferred shares of William Paterson, Ltd., Brantford, manufacturers of biscuits and confectionery, at par with a bonus of 30 per cent. in common stock.

The company, which has been in business for fifty-seven years, has a capital as follows: 6 per cent. 20-year sinking fund bonds, \$125,000; 8 per cent. cumulative redeemable participating preferred shares, \$200,000; common shares, \$200,000. It owns its own factory, and its products consist of fancy and plain biscuits and confectionery.

According to the prospectus, the company is now doing a business of more than \$1,000,000 per year, all confined to trade in Canada. The average earnings available for dividends for the last three years were \$43,710, which, after paying bond interest, are equal to over twice the amount required for the preferred dividends, and equal to 10 per cent. on the common stock.

The last financial statement shows real estate, buildings, plant, machinery and equipment at \$459,397; inventories at \$143,186; accounts receivable and cash, \$154,391. Against these were: Bank loans, \$229,872 and bonds, \$125,000, leaving total net assets of \$403,118.

Directors of Eastern Theatres, Ltd., have declared a dividend of 3½ per cent. on Pantages, Toronto, this being the arrears due on preferred for the last half of 1920. The next dividend on preferred will be due on July 1, and it is the view of the directors that this will be declared in the usual course. In the first seven months of the operations of this theatre, earnings were 15 per cent. on the common stock, according to information available after the meeting last week. There was a feeling that it would not be long before a dividend would be paid on common. Pantages common now sells at about 16, par being \$25. The preferred stock outstanding is \$700,000, and common \$1,000,000.

A "Record of Investments" in pamphlet form has been issued by H. B. Robinson and Co., Montreal.

## CORPORATION FINANCE

**British Columbia Telephone Company is Seeking Increased Rates—Grand Trunk Deficit Reduced—Canadian Cottons Dividends Exempt from Income Tax**

**Grand Trunk Railway.**—While the company had a deficit in January, there was a surplus over expenditure in February which offset to considerable degree the poor showing of the first month. The following figures show the results:—

Month of February—	1921.	Increase.
Gross receipts .....	£1,177,900	£220,200
Expenses .....	1,097,800	37,600
Net .....	£ 80,100	£182,600
Aggregate for two months—		
Gross receipts .....	£2,493,500	£497,300
Expenses .....	2,525,000	259,200
Net .....	Dr. £ 31,500	*£238,100

\*Reduction in deficit by this amount.

**Canadian Cottons, Ltd.**—Shareholders have been advised that the dividends paid during the current year of 1920 are exempt from income tax. In making the announcement the company says: "This decision affects your income tax return which is now due. In making up your return you should enter as revenue such dividends of Canadian Cottons, Ltd., as you may have received during the calendar year 1920, but you should not extend the amount into the outer column. On the opposite page you should claim as a deduction the dividends in question, stating that such dividends have been paid out of the unimpaired surplus on hand on the 31st March, 1916, but do not extend the claim."

**British Columbia Telephone Company.**—The company is seeking for increased rates sufficient to give 10 per cent. on investment. Application for this commenced before the Dominion Board of Railway Commissioners at Vancouver last week. According to evidence submitted by the company, last year's profit averaged 3.46 per cent. of plant value, which has been placed by experts at \$6,000,000. It was pointed out that on such a showing the company would not be able to borrow money which was needed for development.

G. H. Halse, general manager, stated that the company owed the bank \$150,000. All its fund for depreciation reserve was put into the plant extension last year, and the company had not a dollar with which to carry out replacement or extension of plant. He denied that there had been any exploitation of the telephone company. They had invested their surplus in plant instead of borrowing at big interest for this purpose. Shareholders had got from 6 to 8 per cent. dividends, which, he thought, was reasonable. Greater revenues for the replacement of the reserve fund was urged.

**Canada Steamship Lines, Ltd.**—Directors were in session this week discussing the position of the company. The chief proposal under consideration was the additional financing which the company was arranging for in London, England. During the visit of J. W. Norcross, the president, and F. S. Isard, general comptroller, an offer was received from London bankers for additional financing to an amount of £1,000,000 sterling. It is this proposal that is now being considered by the board of directors. At the moment, it is not known if this additional financing will be arranged at the present time, or whether temporary arrangements will be made in Canada to look after any financing which the company may have for the next few months.

As regards the sudden and drastic decline in Steamships preferred, interests close to the company maintain that there is nothing in the affairs of the company or in the general business outlook which could in any way explain the decline that has occurred. It is claimed that this is a market development entirely, and has no relation to the company's position and its ability to earn the preferred dividend. On the other hand, it is steadfastly maintained by interests in the company that advance bookings would indicate a very good year for the company.

## NOVA SCOTIA'S REVENUE AND EXPENDITURE

**Accounts for the Year 1920 Show Small Deficit—Both Revenue and Expenditure Have Increased**

**PUBLIC** accounts of Nova Scotia for the year ended September 30, 1920, brought down in the legislature on April 1, show a deficit of \$92,708. In the preceding year there was a surplus of \$29,507. The expenditure for 1920 was \$3,893,724, an increase of \$658,830 over 1919, and revenue was \$3,801,016, an increase of \$657,831.

Receipts and expenditures by services were as follows:—

	Expenditures.	Receipts.
Agriculture .....	\$ 118,162	\$ 28,040
Attorney-general .....	95,332	85,969
Education .....	543,848	106,645
Provincial secretary .....	106,154	788,611
Provincial treasurer .....	813,047	1,256,617
Public works and mines ...	184,427	703,836
Public charities .....	767,402	504,624
Public service .....	294,096	3,155
Highways .....	971,252	324,515
Totals .....	\$3,893,720	\$3,801,016

The balance sheet of the province shows assets and liabilities as follows:—

LIABILITIES	
Capital (debentures and inscribed stock) .....	\$17,202,646
Current liabilities .....	572,147
Special funds .....	36,535
Indirect liabilities .....	130,541
Total .....	\$17,941,871
ASSETS	
Capital—	
Dominion debt account .....	\$ 1,055,929
Railway investments .....	4,447,000
Sinking fund investments .....	930,127
Current—	
Cash and bank balances .....	48,514
Accounts receivable .....	273,427
Cash advances .....	349,460
Inventory .....	10,737
Deferred assets .....	106,520
Balance .....	10,720,514
Total .....	\$17,941,871

## OSHAWA BOARD OF TRADE

At the annual meeting of the Oshawa, Ont., Board of Trade, held on April 12, the following officers were elected: President, F. J. Bailes; first vice-president, E. A. Lovett; second vice-president, W. R. Gheikie; secretary, J. A. McGibbon; treasurer, F. L. Henry. The executive was also re-elected. Sixty-two applications for membership were received.

Horace L. Brittain addressed the meeting on the need for more interest on the part of the average ratepayers in municipal affairs; some of the functions of a community, in which the board of trade could co-operate; the protection of life and property, the advancement of education, better highways, social welfare, recreation, public health and sanitation. The speaker thought that the best method of enlightening the ratepayers on these matters was through the medium of publicity publication of reports, etc. The interests of the community were the interests of the board of trade, he said. There must be publicity, and it must be done in a manner that people can understand. He had seen reports from auditors and treasurers that a chartered accountant could not unravel.

**QUEBEC'S REVENUE AND EXPENDITURES**

Details for Last Financial Year—Cash on Hand Has Increased—Net Funded Debt is \$38,531,751

QUEBEC province had a surplus of nearly one million dollars during the fiscal year ended June 30, 1920, according to a statement made by Hon. W. T. Mitchell, treasurer, in January. The accounts have now been published in detail and show the following chief items of revenue: Balance on hand, \$879,233; Dominion of Canada, \$2,028,162; lands and forests, \$3,033,587; colonization, mines and fisheries, \$681,852; justice, \$619,995; licenses, \$1,554,079; taxes on corporations, \$1,581,759; succession duties, \$1,786,930; tax on transfer of shares, bonds, etc., \$132,583; Motor Vehicle Act, \$1,180,725; lunatic asylums, \$324,338; casual revenue, \$309,873; trust funds, \$445,983; temporary loans, \$5,000,000; loan under 10 Geo. V., cap. 3, \$6,524,700. The total receipts were \$27,409,004. The principal expenditures were: Public debt, \$2,029,721; legislation, \$562,986; civil government, \$809,097; justice, \$1,360,978; public instruction, \$1,673,561; lunatic asylums, \$1,017,946; reformatory schools, \$226,500; health, \$119,694; public works and labor, \$807,057; agriculture, \$887,400; roads, \$1,336,366; lands and forests, \$566,000; colonization, mines and fisheries, \$895,646; charities, \$73,745; revenue charges, \$618,665; miscellaneous services, \$530,451; Good Roads Act, \$3,413,108; trust funds, \$408,904; repayment of temporary loan, \$1,000,000; redemption of debt, \$6,000,000. The balance forward is \$1,783,842.

The province's funded debt on June 30 last was \$38,531,751. Temporary loans, deposits, etc., totalled \$5,778,661; this included a loan of \$5,000,000 from the Bank of Montreal at 6 per cent. The total of bond issues outstanding are \$44,153,713, but of these bonds \$3,445,599 have been redeemed and \$2,176,362 are held in sinking funds. The first one to mature will be the loan of March, 1920, due March 1, 1925.

**NEW MERCHANTS BANK DIRECTORS**

At the meeting of directors of the Merchants Bank, held 8th inst., three new directors were elected—Messrs. John Baillie, Norman J. Dawes and Ross H. McMaster—all of Montreal, the board of the bank thus being brought back to full strength. Ross H. McMaster is vice-president and local manager of the Steel Co. of Canada; Norman J. Dawes is president of National Breweries, Ltd., and a director of the Windsor Hotel Co., Dominion Bridge, Wayagamack Pulp and Paper and others; John Baillie is managing director of the Dominion Oil Cloth Co., president Canada Linseed Oil Mills and a director of Dominion Textile and Penmans'.

**Condensed Advertisements**

"Positions Wanted," 3c per word; all other condensed advertisements 5c per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

**WANTED.**—A young man as Assistant Inspector for the Province of Nova Scotia. One with experience in inspecting and schedule rating of fire risks preferred. Apply stating qualifications and salary asked, to Editor, Box 407, *Monetary Times*, Toronto.

**SECRETARY-TREASURER**, age 30, of large company in British Columbia, desires connection in similar capacity with well-established business anywhere in Canada or the United States. First-class accountant, with excellent credentials. The more responsibility to be assumed, the better. Prepared to proceed at once for interview for any legitimate proposition. Apply by wire or letter to H. Anscomb, 1921 Government Street, Victoria, B.C.

**Bureau of Canadian Information**

THE Canadian Pacific Railway, through its Bureau of Canadian Information, will furnish

you with the latest reliable information on every phase of industrial and agricultural development in Canada. In the Reference Libraries maintained at Chicago, New York and Montreal are complete data on natural resources, climate, labor, transportation, business openings, etc., in Canada. Additional data is constantly being added.

No charge or obligation attaches to this service. Business organizations are invited to make use of it.

## SHORT AND LONG TERM RURAL CREDITS

(Continued from page 14)

can only hold on). At the time of the original investment the time of repayment was agreed to "in the fall," not the following June, thus the Banker's ratio of reserve to deposits were inadvertently upset—which is disappointing to say the least. The fact, however, that the farmer has the wheat to sell is a favorable factor in the situation. On the other hand, when crops are a total failure, due to drought, hail, frost, insects, etc., or due to soil-drifting, the farmer borrower is unable to pay and the situation is more serious, his "ability to pay" has received a severe set-back, and the bank's funds have become "tied-up." Such a situation usually calls for real estate and chattel mortgage security, which should be given promptly and willingly as the money involved is depositor's money handled in trust by the bank, upon the loan being thus secured the farmer is carried over for another year. It is apparent that several crop failures in succession will tend to put a grain grower out of business. Such loans become long-term loans and are forced on the banks. They are usually called funds "tied-up" or "frozen," thus other things besides crops are sometimes frozen in western Canada.

## Bank Charters

The chartered banks are subject entirely to federal legislation for their business rights. Their charters are renewed by parliament every ten years. At this period the Bank Act is carefully reviewed and any necessary changes are embodied in the act. Economic conditions change in our country from time to time and the act is periodically revised to meet these conditions. The next revision is due in July, 1923, and as that time draws near it is expected that considerable discussion will appear in the press, by different economic organizations and finally by parliament itself. In considering any proposed changes in the banking laws, parliament consider the interest of the nation as a whole. To pass legislation in the interests of any particular class at the expense of another is to invite national disaster. In such legislation the interests of the farmer, the merchant, the manufacturer, the lumber interests, the fishing industry and all interests engaged directly or indirectly in developing the natural resources of the country are considered. All are interdependent upon each other and each must be reasonably supported within their legitimate requirements. After more than fifty years of banking experience in Canada the present Bank Act is said to function satisfactorily. All the legislation in the world will not guarantee the successful administration of the finances of the country. The responsibility for success rests upon the sane, careful management by the executive officers of the banks. They are experienced men of the highest possible standing, men who have won their positions through hard work and application to the study of banking, trade and commerce, and they are well posted in Canadian conditions as well as being posted on the economic situation of the world, and the public is safe in leaving the banking business of the country in their capable keeping.

## RECENT FIRES

Loss for Week Totals \$1,275,500, Compared with \$167,500 Last Week—Church of the Nativity, Montreal, is Heaviest Loss

\$5,000,000.00 PROVINCE OF ONTARIO 15-YEAR  
6% BONDS

The Government of the Province of Ontario will receive alternative tenders up to 12 o'clock noon, on Tuesday, April 26th, 1921, for the following:

1st. \$5,000,000 Province of Ontario 6% Bonds, dated 2nd May, 1921, due 2nd May, 1936, bearing interest at the rate of 6% per annum, payable half-yearly on the 2nd days of May and November, principal and interest payable in gold coin of lawful money of Canada, at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, at the holder's option, or

2nd. \$5,000,000 Province of Ontario 6% six months Treasury Bills, with interest, dated 2nd May, 1921, payable six months therefrom on the 2nd day of November, 1921, principal and interest payable at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, at holder's option.

Bonds to be in the denomination of \$1,000 each, with coupons attached, and may be registered as to principal only. If Treasury Bills are issued, they will be in the denomination of \$1,000 or larger. Payment for Bonds or Treasury Bills and issue thereof to be made at the office of the Treasurer of Ontario, Parliament Buildings, Toronto, on or before the 13th May, 1921, less the amount of the deposit. If Bonds are sold interim debentures will be supplied on payment of money, to be exchanged for definitive bonds on completion by the engravers.

Scaled tenders, endorsed tenders for Province of Ontario debentures, should be addressed to the Honorable P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto.

Tenders must be for the whole amount offered and must be accompanied by marked cheque for \$50,000, to be applied in the case of the successful tenderer as part payment for Bonds or Treasury Bills. The highest or any tender not necessarily accepted.

P. SMITH,

Treasurer of Ontario.

Toronto, 22nd April, 1921.

## Should Cost of Imperial Navy Be Shared In?

A Comparison of the Present Financial Burden in Great Britain and Canada—Our Transcontinental Railways Are a Contribution Towards Imperial Defence—Britain's Position Necessitates a Navy, While That of Canada Requires Railways

By W. G. CATES, B.A.

CANADA has gone to the limit in the matter of national expenditure. Indeed, it would seem that she has shouldered more than she can conveniently carry. Supremely confident of the future, she has assumed responsibility after responsibility until now it is only beginning to be realized what she is up against. Unless our legislators at once put the breaks on expenditure, Canada, insofar as the average person is concerned, will cease to be the land of opportunity that it has rightly been considered.

The time has arrived when Canada must consider new commitments strictly from the standpoint of her ability to pay. There are no regrets for her war debt, large though it is, this having been incurred during one of those momentous struggles that come during the lifetime of nations. It was, indeed, more than that; it was a crisis in the history of civilization itself, when to have remained a mere spectator would have incurred lasting disgrace. But the war is only partially responsible for the burden that this country is carrying.

How far Canada has gone in assuming commitments is not realized by most Canadians, let alone by those of other countries. It is time that the facts were laid bare. The present rate of per capita expenditure, which is over twice that per capita in the United States, which has nearly twenty times Canada's national wealth, cannot be maintained without incurring the risk of a financial crisis. If it is escaped, the burden of taxation will, at least, be so heavy as seriously to discourage immigration, on which rests the chief hope for the lightening of the load.

### Proposed Naval Expenditure

This subject is the more important just now because of the evident attempt that is being made in some quarters to stampede Canada into making a direct contribution for the maintenance of the British Navy. A cable reports Mr. Lloyd George as having recently said in the British House of Commons—"It was too much to ask of these small islands that they undertake the burden of the defence of a gigantic empire in every sea, and that at the forthcoming conference of Prime Ministers of the Dominions in London the whole problem of imperial defence must be considered." At Vancouver recently Mr. Gordon C. Jackson, secretary of the Dominion Navy League, is reported to have said that England was paying \$17.50 a head for the maintenance of the navy, and that it was time that Canada stepped into the breach and assumed her share of the burden. Both of these statements quite ignore what Canada has done, because in considering the matter of imperial defence, they fail to take into account anything but the British Navy.

It will readily be admitted that the British Navy is essential to the continued existence of the British Empire, but it would be quite incorrect to say, that, from the stand-

point of offensive and defensive strength, the navy is the only part of the Empire's organization of value. There are other factors of hardly less importance, and this was strikingly demonstrated during the war. One of these is rail transportation, which acting as a connection link between distant portions of the Empire, is quite as important as were the military railways behind the western front. In building three transcontinental lines of railway Canada has done quite as valuable work for the British Empire as any other part of it. She has done it because her geographical position, acting as a link between Asia and Europe, has made possible the converting of her great railway systems, built at great cost for industrial purposes, into strategic railways of the first importance.

### The Transcontinental Railways

Thirty years ago, when Canada had but one transcontinental, the C.P.R., Sir Charles Tupper pointed out its importance to Britain and the Empire in the following:—

"We have therefore not only provided the means of inter-communication, the means of carrying on our trade and business, but have also established a great Imperial Highway which England might to-morrow find almost essential for the maintenance of her power in the East. Not only has Canada furnished a highway across the continent, but it has brought Yokohama three weeks nearer to London than it is by the Suez Canal. I give that as an illustration that there are other means, which, in my judgment, may contribute much more to the increased strength and maintenance of the Empire than any contribution that could be levied on any of the colonies."

What would Sir Charles say of three transcontinentals, were he living to-day and had before him the evidence of their value as disclosed by the great war?

It is impossible to estimate the value of the three transcontinentals to Great Britain and the Allies during the great struggle with Germany. When 50,000 Chinese coolies were wanted to work behind the lines in France, how were they transported? By vessels across the Pacific to Vancouver, thence by rail to Montreal, and across the Atlantic. This great body of laborers who rendered service of inestimable value could not have made the trip, had it not been for the short cut by rail across this country. The Allies could not have supplied the shipping to carry them via the long sea route, but Canada's railways solved the problem and thus made possible the releasing of 50,000 Europeans for active military duties.

Thousands of other troops from the Orient also made their way to Britain and France over these highways of steel. British Columbia, Alberta and Saskatchewan supplied 135,000 men for the Canadian Expeditionary Force, but these could not have been moved had it not been for Canada's three

transcontinentals. To have sent them to Europe via the Pacific and the Suez would have been impossible. Think of the large numbers of American troops handled by the Canadian railways. By means of the C.P.R. over \$250,000,000 in gold was transferred from Russia to the vaults of the Department of Finance, at Ottawa, to enable the making of settlements for the British Government.

#### Carrying of Food and Supplies

Food was a vital factor during this great struggle and Canada's three transcontinentals made possible the laying down in Britain and in the Allied countries generally, the huge wheat crops from the prairies, without which, it is no exaggeration to say, the war could hardly have been won. This continuous stream of wheat flowing across the Atlantic prevented the dread spectre of starvation from stalking through Britain, France and Italy as it stalked through Germany and Austria-Hungary. Not only that, but very large quantities of wheat from the United States were moved over these lines. So one might go on to speak of the millions of tons of munitions moved; of the millions of feet of spruce for the manufacture of airplanes that were hurried across Canada from the Queen Charlotte Islands, and on which the airplane factories in England depended very largely for supplies. All this was made possible because Canada had, through the expenditure of some hundreds of millions, to say nothing of equal sums guaranteed, built three transcontinentals. The congestion on the railroads of the United States was bad enough during the war; but it would have been infinitely worse had it not been for the extensive Canadian lines that eased the pressure.

#### Railways Built for Industry

It is true that the Canadian Pacific, the Canadian Northern, and the Grand Trunk Pacific, with the National Transcontinental, were built not primarily for the purpose of imperial defence, but to promote the industrial development of the Dominion. But the war demonstrated that while in building these railways Canadians were thinking only of internal development, they were really building strategic highways of the utmost military importance. They built better than they knew—they built for the British Empire and civilization. It is now recognized that for ordinary purposes Canada does not yet require three transcontinentals; indeed, some say that the traffic offering could really be handled by one. But when the great war was at its height the three, operating at the maximum, were not too many. Unwittingly Canada built these roads to help win the war. For her own purposes she will not need the three of them for some years. At present the tearing up of a considerable rail mileage is seriously advocated. Only one of these, the C.P.R. is paying, or will pay, for some years.

It cost Canada a huge sum to build her three transcontinentals. How much, comparatively, few Canadians really know, to say nothing of those living in other portions of the British Empire. Official records, show, that from Confederation to March 31st, 1920, the direct expenditure, by the Dominion Government, on railways, was \$951,000,000. Add to that the deficit on the roads operated by the government last year, including all fixed charges and capital expenditure for the current year and the total expenditure is brought up to approximately \$1,100,000,000. This does not include the cost of the C.P.R. but only such cash grants as were made to it. Add to the foregoing 44,000,000 acres of the best land in the West, than which there is no better in the world, and for which another half billion dollars should be allowed, and the total is brought up to \$1,600,000,000.

#### Cost Nearly Three Billions

Large as this sum is, it is only a portion of the total cost. A reliable authority places the total capital liability on the roads that either have been, or are about to be taken over by the government, at over \$2,275,000,000, and the figures have not been disputed. Add to this the value of the land grants, \$600,000,000, and the total is thus \$2,875,-

000,000. And the end is not in sight. Nor will this year's vote of \$168,000,000 stop the heavy drain, for if total fixed charges are included, it is difficult to see how the deficit can be brought below \$50,000,000 for several years.

Canada's direct war expenditure is costing Canadians fully \$14 per capita per annum, while the deficits on her railways, which so materially helped to shorten the war, are costing her not less than \$10 per capita per annum. Is this no contribution to imperial defence? Britain, by putting vessels out of commission, and by curtailing her building program, may materially reduce her naval expenditure; but Canada cannot cut her railway deficits so easily, for having guaranteed the bonds for hundreds of millions, she is liable for the resulting principal and interest.

No complaint is made over the burden resulting from the cost of the war, or of the other expenditures that have been of such benefit to the Empire; but when it is seriously contended that Canada is not doing enough and should take on more, it is only natural that her ability to do so should be contracted with that of the Mother Country.

#### Great Britain and Canada Compared

1914 Britain's foreign investments were valued at approximately \$20,000,000,000; during the war period she disposed of \$5,000,000,000 of these, but it is estimated that there remains \$15,000,000,000, which makes probably still the world's most important national money lender. In fact her investments abroad are equal to more than Canada's total wealth. The income from these investments may be put roughly at \$750,000,000, a year. And to this another \$1,000,000,000 from the returns on her shipping, also another \$250,000,000 in the form of insurance and returns from other sources, and her annual revenue from the outside world will not be less than \$2,000,000,000. And it will undoubtedly increase rapidly, for Britain is fast getting back her trade. Moreover her area is small, and her industries are so highly developed, that but a small proportion of her newly acquired wealth is required each year to finance home operations.

Compare this with Canada's position. Instead of being a creditor, she is a heavy debtor country, and to a far greater extent than the average person realizes. Indeed the best estimates of foreign investments in this country place their total at not far from \$4,000,000,000, of which over \$3,000,000,000 is in the form of bonds and other securities. This borrowed money is costing Canada over \$200,000,000 a year, while another \$80,000,000 is going out in the form of other charges, bringing the total annual payment on this account up to over \$280,000,000. Heavy as this is, the burden is growing. Last year her borrowings in the United States amounted to \$230,000,000 and it would not be surprising were they \$200,000,000 this year. Nor is there much prospect of a slackening in the demand for outside money. Capital, and much of it, Canada must have, and so the borrowing must go on for some years.

#### External Debt

Some make much of Great Britain's debt to the United States, and they dwell upon the heavy resulting drain. True the debt is heavy, approximately \$4,200,000,000; but in comparison with what Canada owes to other countries is anything but heavy. As has already been pointed out, the value of foreign investments in Canada is placed at \$4,000,000,000, of which fully \$3,000,000,000 is in the form of bonds and other securities, over \$1,200,000,000 of the latter being held by American investors. But while Britain owes the United States over four billion dollars, other nations owe her nearly twice as much. On the other hand the balance due Canada by other countries probably does not exceed \$300,000,000. Of course not all of the debts due to Britain will be paid, but if fifty per cent. of them were wiped off, there would still be almost enough to square the United States. Besides, anything she may collect from Germany will be to the good.

On her debt to the United States, Britain pays about \$210,000,000 a year. On her debt to outsiders Canada pays almost, if not quite, as much, about one-half of it going to the great Republic. Besides, in the matter of interest rates

the British Government is getting off a great deal more easily than either the Dominion Government or Canadians generally are. The former pays five per cent., whereas Canada, it is understood, is now paying as much as 7½. Moreover Britain's borrowing in the United States is at an end; Canada's must continue. Last year Canada borrowed in the United States \$80,000,000 for railways. Britain, last year, paid off \$250,000,000 of the money she borrowed from the United States during the war. The \$168,000,000 in railway loans that parliament is asked to authorize this year, will have to be borrowed in the Republic.

#### Per Capita Expenditure

When it comes to the subject of annual expenditure, Britain, with five times the wealth of Canada, should be able to pay possibly five times the per capita taxation. This with certain qualifications, would be considered a reasonable assumption. But what are the facts? Great Britain's expenditure this year is approximately \$100 per capita, whereas Canada's is approximately \$81, the latter figure including federal and provincial expenditure which should always be lumped when comparing it with Britain's. The Mother Country spends this amount on an imperial administration that covers one-quarter of the earth's surface and includes 450,000,000 people; Canada's expenditure is for but 9,000,000 people. So possibly, in so far as expenditure is concerned, Great Britain is not the only weary Titan in the world.

Touching on the subject of revenue, that of Great Britain for the fiscal year just closed was approximately \$7,130,000,000; Canada's was about \$450,000,000. In other words, the per capita revenue of the former was about \$158; Canada's was approximately \$50. During the present year Britain will materially reduce her taxation; but Canada must materially increase hers, so as to raise at least another \$100,000,000. Moreover Britain had a surplus of over \$1,100,000,000 last year. But some one may say, "is not the income tax much heavier in Britain than it is in this country?" Quite true, and it is probable that some other taxes are. But this is explained not by the fact that the load in Britain is heavier per capita in proportion to the per capita wealth, but rather to the fact that Britain, having stopped borrowing, is paying a considerable portion of her debt out of current revenue. Canada so far from doing this, is still borrowing, for in guaranteeing the bonds on her railways, a portion of which money will go to pay deficits, she is really borrowing herself.

#### Navy and Railways

There is no desire to minimize the cost to the people of Great Britain of maintaining her navy. But at \$400,000,000 for the year, this is equal to no more than a charge of 2½ per cent. on the value of her foreign trade, all of which is sea-borne. Canada's trade last year was valued at about \$2,500,000,000, of which \$1,500,000,000 was with the United States and could have been done entirely by rail, so that even from the standpoint of defence of her overseas commerce, it is obviously impossible to expect her to do more than support whatever naval establishment she considers necessary in her home waters. The Mother Country is so situated that she probably needs a great navy more than anything else, Canada possibly needs railways more than anything else. And the Empire needs Canada's railways, but Canada is not asking the Empire to share any portion of their cost.

While the cost of the navy to the British taxpayer last year may have been \$17.50 per capita last year, the naval estimates for this year show that the per capita cost will not be \$10 this year. This may appear to be large, but it is no more than the public of Canada will have to pay in order to make good the total deficits on the national railways.

Those who make light of what Canada has done and is doing for the Empire, shut their eyes, to the responsibilities which she, a country of but 9,000,000, has assumed in developing a veritable empire within her own boundaries. Canada may be a potentially wealthy country, but she is anything but wealthy in the sense that Britain is, that is

in liquid assets. To meet her railway deficits this year she must borrow in New York, and in so doing will probably add \$9,000,000 a year to her annual interest payment. If Canada did contribute a sum worth while to the maintenance of the British Navy she would first have to borrow it, which is out of the question. Canada has never failed to do her share in the past, but the time has come when she must for the present say "enough".

#### SEEDING NOW GENERAL IN ALBERTA

Farmers Consider Season Much Better than in 1920—May be a Slight Decrease in Acreage

(Staff Correspondence.)

Calgary, Alta., April 28, 1921.

SEEDING throughout Alberta is now general with good conditions prevailing. There is plenty of moisture to start germination and the majority of farmers consider the season much more favorable than 1920. Indications point to the fact that there will be a slight decrease in acreage, more particularly in Southern Alberta; reports from this portion of the province indicate a 25 per cent. decrease. The present estimate for the south country is one million seven hundred thousand acres as against two million last year.

Conditions for the crop are considered the best for many years. Wheat seeding is fifteen to forty per cent. finished. Labor conditions indicate that men can be obtained at any where from forty to sixty dollars per month as compared to seventy-five to a hundred dollars one year ago. In Lethbridge an optimistic feeling was found to prevail, the present spring outlook being considered most encouraging. Travellers are booking better orders the last few weeks, but business on the whole is, however, quiet. Some slight improvement may be said to exist regarding collections. Very little building is contemplated in Lethbridge this season, but it is expected that actual work on the Lethbridge Northern Irrigation project will be pushed vigorously this summer. The provincial government has guaranteed the bonds of this important project and will shortly be calling for tenders.

Edmund Taylor, of Lougheed and Taylor, Calgary, in discussing present conditions with *The Monetary Times*, said while not being over-optimistic of general conditions, he was inclined to take an encouraging view of things. He stated that inquiries from the east indicated that there was no lack of confidence in the development of the west, that, he thought, was a healthy sign. Another satisfactory indication, he said, was to be found in the repayment of loans to Canada by the Old Country on a monthly instalment plan. This undoubtedly would have a tendency to ease matters with the banks. "As a result of the publicity given to government expenditures during the war, the public have become so accustomed to discussing financial matters in terms of millions, and in some cases billions, that they are inclined to be some what careless and fail to appreciate the true significance of the enormous sums involved in the undertakings of the Dominion and provincial governments, banks, public utility, companies and industrial concerns."

The building program in Calgary will not be large this season as cost of materials and labor are too high here, as elsewhere for any great extensions to be undertaken. The city of Calgary are paring down in every possible way on their estimates, but even by so doing their tax rate has been struck at 49 mills.

Livestock in Alberta has come through the winter in excellent shape.

The second annual convention of the Purchasing Agents' Association of Canada will be held in Toronto on May 14. Matters vital to every industrial company and purchasing agent will be discussed.

## THE WEEK IN PARLIAMENT

Railway Problem Still Occupied Foreground at Ottawa—  
Shaughnessy Proposal Chief Topic of Discussion

(Special to *The Monetary Times*.)

Ottawa, April 28, 1921.

Thursday, April 21, 1921

In House of Commons:—(a) Banking and Commerce Committee reported to House that act to incorporate North American Trust Co. of Canada should have title changed to "Act to Incorporate Metropolitan Trust Co. of Canada"; (b) Debate on Canadian Representation in United States and passing of estimate of \$60,000 for Minister Plenipotentiary; (c) Passing of Estimates for External Affairs Departments, High Commissioner's office in London, Paris Agency, and Militia and Defence estimates, including \$213,300 to extend work in Dominion Arsenal, Lindsay, and \$428,300 in Dominion Arsenal at Quebec.

In Senate:—(a) Debate on advisability of appointing commercial agents to United States; (b) First readings of following bills: One to approve Canada-West Indies agreement, and one to amend Currency Act so as to provide for use of nickel five-cent pieces; (c) Second readings of following bills: One to amend the Judges' Act, one to extend time for completion of section of St. John and Quebec Railway between Centreville and Andover, one to amend the Winding-up Act, one arranging for winding-up of Canadian Wheat Board, and one respecting the Montreal Central Terminal Company, extending time for completion of work.

Friday, April 22

In House of Commons:—(a) Lake of the Woods Control Board Bill read third time; (b) Grand Trunk Arbitration Bill debated and read second time; (c) Third readings of following bills: One respecting Western Dominion Railway Co., one respecting Credit Foncier Franco-Canadien, one incorporating Metropolitan Trust Co. of Canada; (d) Debate on Grand Trunk Arbitration Bill; (e) First reading bill providing for retirement of members of public service above sixty years old who have had ten years' service, or are between 45 and 60 and have had twenty years' service, at least with annual retiring allowance equal to one-sixtieth of average salary during his last three years of service for every year of his total service.

In Senate:—(a) Concurrence in House of Commons amendments to Lake of the Woods Control Board Bill; (b) Third readings of following bills: One giving Dominion Express Company power to extend its carriage of goods outside Canada, one to incorporate Mayo Valley Railway, Ltd., one respecting Canadian Pacific Railway Company, and one to incorporate Canadian Transit Company; (c) Second reading of bill respecting Lake Erie Railway and Transportation Company, and giving it power to dispose of its property.

Monday, April 25

In House of Commons:—(a) Debate on J. A. Campbell's resolution asking Dominion to transfer to Prairie Provinces their natural resources, and Doherty amendment asking for transfer after agreement reached with all other provinces as to equitable basis accepted; (b) Third reading Canada Shipping Act amendment bill (Public Harbors); (c) Acceptance of Dr. Beland's resolution to amend Maple Products Act so as to prevent sale of any adulterated maple sugar product unless proportion of maple sugar is shown on package; (d) Grand Trunk Arbitration Bill read third time and passed on division.

Tuesday, April 26

In House of Commons:—(a) First readings bill to amend the Research Council Act and to establish a National Research Institute, and bill respecting Dominion Express Company; (b) Immigration Department estimates.

In Senate:—(a) First readings of following bills: One to amend Canada Shipping Act (Public Harbors), the Grand Trunk Arbitration bill, one incorporating Metropolitan Trust

Co. of Canada, one respecting Credit Foncier Franco-Canadien, one respecting Western Dominion Railway Co., an Act to incorporate the Commonwealth Bank of Canada, proposed by Senator Blain.

Wednesday, April 27

In House of Commons:—(a) Maple Products Bill introduced; (b) Government bill to amend Bankruptcy Act introduced without explanation; (c) Discussion on Empire Premier's Conference agenda at June meeting in London.

In Senate:—(a) Second reading Canada-West Indies treaty.

#### Railway Problem Still Unsolved

The railway question still occupied the foreground of interest at Ottawa in consequence of the publication of the letter of Lord Shaughnessy to Premier Meighen, suggesting that the best method of solving Canada's railway problem would be to engage the Canadian Pacific Railway Co. as manager of the Canadian National and government-owned lines, to consolidate the C.P.R. Canadian lines with these systems, and to run all as a unit. His advice that the Grand Trunk Railway should be handed back to the shareholders after the government took over the Grand Trunk Pacific obligations, and that the Grand Trunk Pacific should be included in the plan, seems only partly likely to be realized as the government had its Grand Trunk Arbitration bill passed through the Commons as a preliminary measure to an agreement with the Grand Trunk Company for the latter to surrender control. Lord Shaughnessy's proposal that the government should assure dividends to the various classes of shareholders, and that the management should be in perpetuity "free from political control," seems to be the chief ground of debate here although a good deal of reference is also made to the proposal that the lands, U.S. railroads and ocean steamships should be segregated before this arrangement is made.

#### NEW MONTREAL BOND HOUSE

A new Montreal financial house is being formed, to be known as the Sterling Bond Corporation, Ltd., with an authorized capitalization of \$200,000. Offices are being opened in the Yorkshire Building, 136 St. James St. The active direction of the company's affairs is being entrusted to the following officers: President, Howard M. Banks, comptroller of the Ogdensburg Coal and Towing Co., Ltd., and associated companies and senior partner of Banks, Haig and Lindears, chartered accountants, of New York City; vice-president and sales manager, C. T. Fillan recently of H. B. Robinson and Co., investment bankers; secretary-treas., A. W. DeWolf, at present of the inspection department of the Royal Bank of Canada.

#### CANADIAN NATIONAL EXPORT CLUB

A new organization, whose object is to develop Canada's export trade, was inaugurated on April 27th, at a dinner meeting at the King Edward Hotel, Toronto, of general managers and export managers of prominent manufacturing enterprises in Toronto and vicinity and central Ontario. The new body is to be known as the Canadian National Export Club, and it is to be devoted to the working out of sound export principles and to the exchange of reliable information relating to export trade.

The meeting also approved of the formation of export clubs in all such localities as may offer scope for their successful operation. It was decided that a business meeting would be held at the King Edward Hotel at 2.15 on May 10, at which a local club will be formed and a committee was struck off to decide on a list of officers to be nominated.

The officers were elected as follows: President, R. E. Jamieson, Montreal; 1st vice-president, Thomas Morton, Toronto; 2nd vice-president, J. J. Foot, London; secretary-treasurer, Alex. Marshall.

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

**SUBSCRIBERS PLEASE NOTE:**

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

**A LOSS FOR THE SHAREHOLDERS**

HOW little of a company's receipts may find their way into productive assets, and how quickly those assets may disappear has been demonstrated in the case of the Oakcol Co. of Canada, Toronto, a concern organized about two years ago under a provincial charter, but which later obtained a Dominion charter. Total cash received by the company was \$285,341, of which \$201,690 came from shareholders in the form of subscriptions, \$5,000 advanced by a bank, \$12,204 in loans from shareholders, and \$41,213 from the sale of briquettes. This amount was disbursed as follows: Promotion, \$72,858, or 26 per cent.; erection and equipment of plant, \$120,069, or 42 per cent.; office rents, salaries and expenses, \$16,898, or 6 per cent.; coal dust on hand and used in manufacture of briquettes, including wages for same and pitch, \$74,978, or 26 per cent.

The direct liabilities are given as \$82,852, and the preferred liabilities as \$5,455. The assets are given as: real estate, leasehold and buildings, \$30,816; machinery, plant, equipment, supplies, raw material, etc., \$72,884; cash on hand and in bank, \$38; accounts receivable, \$1,500; 5 shares Toronto Realty Investments, Ltd., \$500; shareholders' unpaid balances, \$63,840; patent rights, Ontario, \$16,875; Quebec, \$80,000. Total of \$169,579. The nominal surplus is placed at \$81,271. Shareholders' investment of \$455,610 was divided as follows: Preferred, \$223,880; common, \$231,730.

This concern was organized by promoters who felt that they were operating on sound business lines. The promotion expenses were high, but not such as to destroy the company's chances of success. The need which the product was to fill was a temporary one, however, as the acute coal shortage has long since passed away. It is proposed that an effort be made to reorganize the company by issuing some bonds, but the shareholders would be ill advised to send good money after bad.

**MUNICIPAL RAILWAYS AND PROVINCIAL CONTROL**

ONTARIO cities which in the past have insisted on public control of street railway fares are now maintaining the absolute right of a city to fix its own fares where the street railway is publicly owned. The powers of the Ontario Railway and Municipal Board have hitherto been restricted by reason of the special agreements between municipalities and street railways operating in them. This difficulty was to be overcome by an amendment introduced at the present session of the legislature, the principal clause of which reads as follows: "Notwithstanding anything to the contrary contained in any agreement with a municipal or other corporation or person or in any special act, the fare to be taken by a company on a railway operated by electricity shall first be approved of by the board, and no fare shall be charged upon such railway which has not been so approved."

This measure has been hailed as one for the protection of the corporations, and Toronto, Hamilton, Guelph, Sarnia, Peterboro, Woodstock and other municipalities have opposed it vigorously. The necessity for a public body to stand between a monopolistic corporation and those whom it served, with a view to equitable treatment for both sides, became apparent soon after such corporations came into being.

But a street railway or other public utility enterprise is just as much a monopoly when operated by a city as when operated by a corporation and some of the most glaring injustices in public utility rates have been practiced by cities. Usually rates have been too low, cheating the taxpayer for the benefit of those who use the service, but on the other hand there are instances where a public enterprise has been used as a taxation machine. To prevent such injustices, self imposed as they may be, an outside regulating body is required.

## HOW SHOULD BUSINESS BE TAXED?

WITH business interests so strongly ranged against him it is not likely that the finance minister will renew the business profits tax for the year 1921. On the other hand he must consider the necessity for national revenue. Our fixed charges are high, and current expenditures seem very difficult to reduce, but some of the chief sources of revenue, notably the customs tariff, are showing a tendency towards lower productiveness. What the minister must decide, in fact, is whether to risk the possibility of a deficit or to continue the burden which the business profits tax has unquestionably placed on industry.

It is not to be assumed that there are some taxes which are not a burden to someone. But a tax which falls on some producers of a certain commodity but not on others is distinctly inequitable, and is therefore unduly burdensome. And this is just what the business profits tax does, for, carrying out its original intent of reaching large corporations, it exempted those firms with capital of less than \$50,000 during the first three years of its operation, 1915 to 1917, and has exempted all those with capital below \$25,000 since then. In other words, the shareholder in the large corporation had to pay the tax, while the small business, owned by one or a few people and perhaps making a very high profit on the capital invested, escaped. The business profits tax is inequitable because it is progressive on corporations, whereas the principle of progression is intended to be applied to personal income.

In the income tax on corporations the government will still have a productive means of raising revenue, and one which is much more equitable. Here the tax is proportional to the profits of a business, but the large corporation making a large profit is not required to pay more per dollar of capital invested than is the small concern making the same profit per dollar of capital. The income tax on persons and corporations has now become one of the main sources of national revenue in Great Britain, the United States and Canada, and should be retained as such.

## REALTY FINANCING BY BOND ISSUES

IN the United States the bond and the first mortgage on real estate have been combined in a form which has proved eminently suited to the financing of office buildings, hotels, and apartment houses. These realty or real estate bonds are issued in the same way as are ordinary corporation bonds, representing a mortgage deposited with a trustee and secured by the issuing company's assets. They appeal not only to bond buyers but also to those who prefer mortgages, as the latter are able to obtain an investment on the security of real estate without the inconvenience attaching to the small mortgage. In contrast to ordinary corporation bonds, however, these realty bonds, bearing from 6 to 7 per cent. interest and running for periods up to ten years, are sold at par. Numerous firms make a specialty of this business, combining it with the purchase and sale of small first and second mortgages.

In Canada the field has been too small to permit of the development of such a specialized business. There are, however, a few examples of bonds of this kind. The bonds recently sold by the King Edward Hotel Co., Toronto, the Mount Royal Hotel, Co., Montreal, and the Drummond Apartments, Montreal, are instances. One of the large Canadian banks also owns its premises through a subsidiary company which has issued securities of a similar nature. As a general rule, however, loans on large real estate properties have been obtained direct from some of the loan and trust companies lending money on mortgage. In the revival of building construction which is bound to come within the next few years there should be an excellent opportunity for financing of this kind.

## WHEAT TOUCHES DOLLAR MARK

IN former days dollar wheat represented the utmost in farm commodity prices. Only a few days ago, however, when it touched the dollar level in the Kansas market, the event was regarded as well-nigh disastrous to the farmer. It is not many months since farmers in the United States were holding their 1920 crop for a high figure, three dollars per bushel being regarded as a possibility. The Canadian farmer, through lack of sufficient funds, was obliged to sell his crop in the fall and winter, and it was fortunate for him that he did so.

This action nevertheless had the effect of retarding the fall in the price of wheat. Now, however, it is certain that those who held on will lose heavily. The new United States winter wheat crop is only four months off and it promises to be a good one. Foreign markets are taking only what they must have and millers are not in the market. Canadian holders have recently been offering their wheat a little lower, in view of the heavy and persistent declines, and they may have to take much less before July.

Building permits in 56 cities in February were just a little over half what they were in February, 1920. Builders last year learned that houses cannot be profitably erected until costs are substantially lowered.

\* \* \* \* \*

A banking syndicate, headed by Guaranty Trust Co., National City Bank, and the Royal Bank of Canada, has underwritten an acceptance credit to be granted to the Sugar Financing Export Co., a Cuban company, formed to assist Cuban growers and manufacturers of sugar.

\* \* \* \* \*

Reports from Cuba admit of the leading position of the Royal Bank among the financial institutions there. It is safe to say that this is not due to Canadian genius or aptitude for foreign business, but to a banking system which makes possible the free movement of reserves in critical times.

\* \* \* \* \*

"Abnormal conditions of the past few years have forced many excellent securities of the public utility group to prices far below their potential value," says J. C. Mackintosh and Co., Halifax, in a pamphlet entitled "Things You Should Know About Public Utilities." Certainly there is relief in sight for the shareholders, either in the form of adequate rates or municipal purchase.

\* \* \* \* \*

Calgary voters turned down by-laws for capital expenditures on utilities, and the revenue from these does not leave anything for even the smaller improvements which the superintendents maintain are necessary. This dilemma is a result of inadequate rates, which, while not necessarily including an allowance for new extensions, should at least cover expenses and fixed charges in such a way that citizens will not be afraid to make a further investment in them.

\* \* \* \* \*

## THE PREFERRED CREDITOR

A man who had been running a dubious business failed, and at a meeting of his creditors all but one agreed to accept his four-months' note for ten cents on the dollar. The debtor took this man aside and by promising to make him a preferred creditor he won him over.

When the others had departed, the man said: "Well, now, I should like what's coming to me."

"Oh," replied the debtor, "you won't get anything, any more than the others."

"But I thought I was a preferred creditor."

"So you are. These notes won't be paid when they fall due, but it will take the others four months to find it out—you know it now, so you see you are preferred."

## PERSONAL NOTES

AENILIUS JARVIS has returned to Toronto after a seven months' cruise in southern waters on his yacht, "The Haswell."

R. B. MORLEY, general manager of the Ontario Safety League for seven years, has been appointed secretary-treasurer of the Industrial Accident Prevention Association, an organization formed under the Workmen's Compensation Act.

M. W. WILSON, superintendent of branches, and S. R. NOBLE, general inspector of the head office of the Royal Bank of Canada, left Montreal last week for England and the continent. Whilst on the other side they will visit the bank's offices in London, Paris and Barcelona.

WM. F. SANGSTER has been appointed branch manager of the General Accident Assurance Company of Canada for

the province of British Columbia, with offices in the Yorkshire Building, Vancouver. Mr. Sangster was born in Glasgow, Scotland, and came to this country about twelve years ago. He acted as inspector for the London and Lancashire Guarantee and Accident Company for a number of years, and the many friends he made throughout the province of Ontario in that capacity will be glad to hear of his promotion. In 1918 he removed to Vancouver, where,

before being appointed to his present position, Mr. Sangster was insurance manager of the Northern Securities, Limited, and later was resident inspector of the Queensland Insurance Company.

J. E. TROTTIER, manager of the Bon Secours branch of the Royal Bank of Canada, left for New York this week, and on May 4, he will sail for Martinique, one of the French West Indian Islands, where he will assume charge of the Fort de France branch of the bank. G. Lamonthé will be Mr. Trottier's successor.

J. A. WOODS, western superintendent of the Bank of Toronto, has severed his connection with that bank and will leave Winnipeg about May 10, to join the National City Bank of New York. Mr. Woods had been connected with the Bank of Toronto in Winnipeg since 1907. His new duties will take him to Cuba at first, but his permanent headquarters will be in New York.

H. B. Robinson and Co., 151 St. James St., Montreal, Que., have moved into new and larger offices in the Bank of Toronto Building, 260 St. James St., of that city.

The Canadian schooner "Edgewood" was totally destroyed by fire at Port Antonio, Jamaica, on April 18. The vessel had recently been ashore while on the way from St. Thomas, D.W.I., for Mobile. Insurance for \$120,000 was carried on the "Edgewood" in Canada and the United States.

## FARMING OUTLOOK IN THE WEST

The first of this season's crop reports issued by the Saskatchewan Department of Agriculture shows that seeding has commenced in some districts of the province. With the snow practically all gone, with the exception of a little in the bluffy country of the east central (Yorkton) district and in the north, work has started on the land. Heavy frosts at night have delayed work somewhat until the afternoons, but wheat seeding has started in several places and will become general shortly. There appears to be sufficient seed and feed, according to the reports received, and the labor question is being largely supplied by local recruits, with wages ranging from \$50 to \$60 a month.

The Calgary *Herald's* first survey of agricultural conditions for 1921, compiled from reports telegraphed from its correspondents in various sections of the province, shows that conditions are almost ideal for spring operations. The heavy snows of the late winter supplied moisture in the districts that suffered from drought in the last few years, and the farmers in these areas are already seeding industriously. Seeding is general in the south except where the moisture has been so plentiful that the land cannot yet be worked over, but a continuation of the warm weather will see all South and Central Alberta farmers seeding, discing and ploughing. In spite of the low prices of grain, the majority of the *Herald's* correspondents report an increase in the acreage seeded. On W. T. Rudd's farm at Rockyford, the biggest individual enterprise of its kind in the province, nineteen drills are seeding 450 acres a day. 1,500 acres have already been seeded, and 5,000 acres will be seeded altogether. On his son's farm five drills are busy.

## FARMERS ARE HIT BY COAL MINING SITUATION

After spending a few weeks in the west, primarily on a visit to the mines, but also to interview the farming community, J. M. Mackie, president of the Hillcrest Collieries, Ltd., has returned with the statement that, from the farmer's point of view, the situation is becoming desperate, as the high freight rates have so reduced the price of his products that he is not receiving for them what he considers he is warranted to receive in view of the tremendous price of everything he buys. The farmer, according to Mr. Mackie's informants, is struck particularly heavily by the excessive freight rates, and at the same time realizes that if the railroads are to be of benefit to the country they must earn more than their operating expenses, so that if lower freights are to come they must in turn be preceded by reduced wages. Mr. Mackie speaks from a mine-owner's point of view, but states that he has been particularly struck by the reasoning of the farmer, and does not doubt that before long this influence will be a dominating factor.

"It is little wonder that the Farmers' Party movement in the west has grown so rapidly," said Mr. Mackie, "and it is bound to be an offset to the domination of trade unionism. High freight rates, due largely to high wages, hits the western farmer in two ways: His net return on farm products shipped out is reduced by the high freight rates, and the cost of goods he purchases is increased also by the abnormal rates. What the farmer cannot understand is how such a readjustment could take place in the products of his farm without a corresponding readjustment in the item of labor, especially as the government have practically control of railway rates through the Railroad Board, and they have direct control over all coal operations whereby they virtually fix the cost of labor and coal.

S. C. R. Crocker, chief agent for Canada of the Glens Falls Insurance Co., of Glens Falls, N.Y., who has been located in the offices of the general agents for Canada at 24 Toronto St., will open a separate office at 511 Excelsior Life Building, Toronto.

## FINANCIAL BUSINESS DULL IN CAPITAL

Little Market for Securities, and Mortgage Situation is Quiet  
—Government Payroll Keeps Retail Business  
Steady, However

(Staff Special.)

Ottawa, April 27, 1921.

WHILE a dull session of the House may prevent local business from thriving, yet Ottawa merchants have to acknowledge the steady influence of the immense sum of money disbursed twice a month to the civil servants on Parliament Hill. "Sacrifice" sales such as have been featured in other cities are not in evidence here, and business seems to have a better tone than elsewhere. What has caused the severest blow to the district has been the slump in the lumber industry. Most of the large plants here and farther up the Ottawa valley are in operation, but the crucial problem is now marketing rather than production. It has been found necessary to release a small proportion of the employees, and if stocks continue to accumulate, still further action towards smaller staffs or shorter hours must be taken.

Another business of which Ottawa has a monopoly in this country, the production of steel engraved stamps, paper money, and stock and bond certificates, is also feeling the reaction in business. The larger plant, that of the American Bank Note Company, does most of the work of this kind in Canada, including the government's stamp and note issues, and notes for some of the banks. J. A. Machado, the general manager, stated that the full staff is being maintained, although the customary working week of forty-four hours is reduced to forty by closing on Saturdays. The other plant, that of the British American Bank Note Company, is also fairly busy on bank notes and securities, said G. H. Burland, the secretary. Postage and inland revenue stamps are always required by the government, the banks must have new notes to replace those torn or otherwise defaced, and, even if new security issues are few in number, there are at least some reorganizations which bring work of this kind.

#### Government's Banking Business

Several bankers, including C. S. Smith and P. C. Stevenson, local managers for the Bank of Nova Scotia and Bank of Commerce, respectively, were interviewed this week by *The Monetary Times'* representative, and described business as the duller in years. A similar opinion was given by A. G. Parker and D. W. Oliver, manager and assistant manager of the Bank of Montreal here, although the work done by this branch in connection with the government means that a staff of sixty to seventy must always be employed. Last year, said Mr. Parker, no less than 5,000,000 cheques, notes and other claims on the government were handled. The government's account is divided into about 150 divisions, corresponding to departments of administration, and, as claims reduce the balances in the respective accounts, new amounts are credited to them from funds provided by the minister of finance. In this way the estimates for the year are periodically placed at the disposal of the different branches to meet the expenditures continually required. Not only has the bank to maintain separate accounts for the different branches of administration, but for each branch there is a "pay-roll" and an ordinary account, not only for the current fiscal year, but also for several years back, as old cheques are continually coming through.

#### Investments in Poor Demand

Local branches of Montreal and Toronto brokerage and underwriting firms report that the public is not buying very freely, although the number of callers watching the quotation boards indicates some interest in stocks. Quite a few speculators were nipped in the Riordon and other declines in recent months. Ottawa residents of bond houses are doing a small but steady business. Heffernan and Co., a local house, report some speculative buying of foreign exchange, and are also bringing out a stock issue of the Ottawa Nukol Company. F. Clarkson Wright, another local dealer, stated that there was some interest in oil and gold stocks.

## TRUST COMPANY NOTES

British Empire Steel Business Divided—Sir Frank Baillie's  
Estate of \$2,200,000 in Hands of National Trust Co.

AMONG the new business acquired by trust companies in Canada during the past few weeks the most notable item is the appointment by the British Empire Steel Corporation of the Toronto General Trusts Corporation as registrar, and of the National Trust Company as transfer agent. As the British Empire Steel is expected to have capital of over \$100,000,000, and assets of over \$160,000,000, and the exchange of a large amount of securities is involved, this should be an important addition to the business of the trust companies.

Other business recently secured by the Toronto General Trusts includes the administration of the estate of the late J. H. Paterson, president of the Toronto Hardware Co., amounting to \$557,950; the estate of the late Charles W. Kerr, barrister, Toronto, amounting to \$40,918; and the estate of the late Thomas Hunter, contractor, Toronto, amounting to \$51,370.

The National Trust Company has applied for probate of the will of the late Sir Frank W. Baillie, who died in Toronto on January 2. The estate amounts to \$2,216,583, consisting of:—Cash on hand and in the bank, \$76,144; life insurance, \$116,277; real estate, \$86,425; stocks, \$933,322; bonds, \$925,483; book debts and promissory notes, \$12,484; household furniture and effects, \$12,635; miscellaneous, \$53,811.

The National Trust Co. also has the administration of the estate of the late Justice B. M. Britton, who died on November 20 in Toronto. It amounts to \$3,369,234, and consists of:—Cash, \$147,394; mortgages \$919,345; real estate, \$94,183; household goods and personal effects, \$3,500; book debts, \$31,136; life insurance, \$85,539; bonds, \$1,859,852; stocks, \$228,282.

The Royal Trust Co. has been appointed transfer agents and the Montreal Trust Co. registrars for the Bell Telephone Co. in Toronto.

The Imperial Trust Co. and Wm. D. Hall have been granted probate of the will and three codicils which William Hall, who died in Stouffville, Ont., January 21, bequeathed his estate, amounting to \$65,544.

The estate of the late J. L. Englehart, former chairman of the T. and N. O. Railway, will exceed \$2,000,000. The estate will be administered by a London trust company, and consists largely of real estate in Petrolea and shares in the Imperial Oil Co.

An estate, all personal, of a total value of \$23,395, was left by the late Right Hon. Susan Agnes Macdonald, known as the Baroness Macdonald, of Earncliffe, widow of the Right Hon. Sir John Alexander Macdonald, Prime Minister of Canada, and one of the Fathers of Confederation. Baroness Macdonald died in England on September 5, 1920, and the will, which was made in England on June 12, 1914, has been filed for probate in Ottawa. The petitioners were the Royal Trust Co., who are also appointed executors of the estate.

#### Toronto General's Vancouver Building

The Toronto General Trusts Co. recently moved into its new quarters at the corner of Pender and Seymour Streets, Vancouver, after making extensive alterations to the building costing considerably in excess of \$50,000, and for the whole property, an investment of over \$150,000. The property the Toronto General acquired extends 32 feet on Pender Street by 120 feet on Seymour Street. The quarters of the Trust Co., however, occupies the Pender frontage of 52 feet by 60 feet on Seymour Street. The outside is faced with white stone and the entrance is at the juncture of the two streets. Coincident with the moving of the company from the Bank of Nova Scotia Building to new quarters was the appointment of Ewart W. Hards as secretary of the British Columbia branch. Mr. Hards joined the late Frank M. Pratt in opening the branch of the Toronto General in the city on January 1, 1916.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station, in pounds, for the week ended April 22:—

O'Brien Mine, 64,000; Coniagas Mine, 131,275. Total, 195,275. The total since January 1 is 2,441,672 pounds, or 1,220.8 tons.

## CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended April 22, 1921, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Ala.	Sask.	B. C.	N. S.	N. B.	P. E. I.	Total.	1920.
Apr. 22	15	20	0	4	5	1	1	3	0	49	8
Apr. 15	15	15	4	3	3	2	3	0	0	43	18
Apr. 8	19	10	0	3	7	0	0	2	0	41	10
Apr. 1	9	17	1	1	3	0	5	0	0	36	9

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the period ending April 21st:—

Canadian Pacific Railway.			Inc. or dec.
	1921.	1920.	
April 7	\$3,179,000	\$3,617,000	— \$ 438,000
April 14	3,083,000	3,635,000	— 552,000
April 21	3,085,000	3,624,000	— 539,000

## Canadian National Railway.

April 7	\$2,103,435	\$1,834,118	+ \$ 269,317
April 14	1,874,815	1,818,934	+ 55,881
April 21	1,762,206	1,805,785	— 43,579

## Grand Trunk Railway.

April 7	\$1,802,346	\$1,982,648	— \$ 180,302
April 14	1,670,960	1,459,147	+ 211,813

## NAVIGATION IS NOW IN FULL SWING

Navigation, ocean and inland, is now in full swing, and the harbor is fast assuming its wonted summer aspect of bustle and activity. This is the opinion of R. G. Dun and Co., in their report on conditions in Montreal and district. Upper lake boats are arriving, and first outgoing grain cargoes are now being taken on. General business conditions remain pretty much as last noted, though there is some increased movement in certain lines of heavy merchandise as water borne freight. Western collections are poor, but in the eastern provinces payments are fair to good, except in coastal districts where large stocks of pickled and cured fish are held, for which little sale can be found. A certain amount of seeding is already reported in the southern sections of Quebec province. The weekly failure is a light one, seven district insolvencies being reported, with liabilities of \$101,000.

As regards Toronto and the surrounding district, prevalence of unemployment has a tendency to restrict retail trade within narrower bounds than usual for the time of the year, but outdoor work will soon provide employment for a great number, and the balance should find positions in their regular line. It is evident that many seeking work in Toronto come from other cities and towns where factories were forced to close and have not yet reopened. Lake traffic by freight is fair, but the shipments are in small lots and carload consignments a rarity. There was a marked improvement in payments lately, despite the fact that renewals are still considered too frequent.

## BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Blairmore, Alta.	Home Bank of Canada
Toronto, Ont. (Davenport Rd.)	Dominion Bank of Canada

## A Trust Company's Charges

CONTRARY to popular belief, a trust company receives no more remuneration for its services than does a private executor or trustee. The amount is based on a percentage of the funds handled and is fixed by the Courts when the accounts are audited.

Consider the following advantages which a trust company offers you:

- It is financially responsible.
- It is always available.
- Its officers have wide experience in the management of estates and trusts.
- It maintains an up-to-date accounting system ensuring accuracy.
- It furnishes statements to beneficiaries at regular intervals.
- It keeps all papers and documents in Safety Deposit Vaults.

These and many other advantages can be secured at no greater cost than private trusteeship. You can readily see, therefore, that trust company service is the more efficient and less expensive for you in the end.

*We solicit your business.*

*Interviewers and correspondents invited.*

## WHAT WILL THE 1921 CENSUS REVEAL?

## Growth of 1901 to 1911 Decade Has Scarcely Been Repeated in Last Ten Years—Relative Growth of Provinces, and of City and Country

(Contributed.)

IN June of this year the sixth decennial census of the Dominion will be taken, and already there is considerable speculation as to the number of our population then to be revealed. Various estimates have been published, ranging from eight to nine millions, but if we except such intimations as have been given out by the statistical authorities at Ottawa, most other calculations may be set down as mere guesses. The results of previous decennial enumerations are of record, and so far as the prairie provinces are concerned, we have some more recent tabulations. Salient facts revealed by the census of 1911 were:—

1. The unexampled growth of population during the immediately previous decade as compared with the three preceding decades. Our gains had been—from an initial population of 3,689,257 in 1871—635,553 in 1881, 508,429 in 1891, 538,076 in 1901, and 1,833,523 in 1911. Thus the gain during the ten years, 1901-1911, considerably exceeded the gain of the thirty years, 1871-1901.

2. The rapid growth of Quebec and Ontario, and especially of the four western provinces of Alberta, British Columbia, Manitoba and Saskatchewan, as compared with the eastern provinces of Nova Scotia, New Brunswick and Prince Edward Island. In the decade 1901-11 the maritime group had made a gain of about 5 per cent., while Quebec had gained about 21½ per cent., Ontario 15½ per cent., and the western group 186¾ per cent.

## Rural and Urban Growth

3. The slow growth of the rural population in central and eastern Canada, compared with the rapid growth of the urban population. Between 1901 and 1911 the rural population of Canada had gained but 574,878, as against a gain of 1,258,645 in the urban districts. Many rural districts showed an actual decrease of people during this prosperous and growing decade. Four of the nine provinces showed a diminished rural population as compared with 1901. Out of 85 census districts in Ontario 57 showed a decrease of rural population, while 28 out of 64 districts in Quebec, were in the same category. Nova Scotia lost 24,000, Prince Edward lost 19,000, and New Brunswick lost 1,500, a total of 35,500 of their rural population between 1901 and 1911.

4. The comparatively rapid growth of Quebec as affecting the unit of parliamentary representation. As Quebec has a fixed representation of 65 members in the House of Commons, and other provinces are limited to a like proportion of representation to population, this has an important political significance. The unit of representation as determined by Quebec's growing population was 18,331 in 1871 and had increased to 30,817 in 1911. Most persons believe that Quebec has grown more rapidly during the past decade than any other of the older provinces, and may now have a total of 2,500,000 souls. If that should prove to be true, the unit of representation will be pushed up to 37,000, or practically double the figures of 50 years ago, and reduced representation in the House of Commons must follow for Ontario, Nova Scotia, and New Brunswick. Prince Edward Island some years ago secured for all time to come an irreducible minimum of four members in the House of Commons, together with the adoption of the principle that the representation of no province shall hereafter be less than the number of its senators. New Brunswick is obviously pretty close to this minimum.

## Recent Growth Not so Rapid

Reverting to what is stated in the opening paragraph of this article as to the probable population of Canada to be shown by the coming census, it may be observed that the actual gain in numbers between 1901 and 1911 was 1,833,523,

or 34.13 per cent. A like gain in actual numbers between 1911 and 1921 would give something over 9,000,000, while a like gain per cent. would give over 9,500,000. There are several strong reasons for believing that the smaller of these estimated totals is considerably too large. We must remember that during some five years of the decade, immigration was cut off; a deadly epidemic of influenza at home added to our heavy death list abroad during the war; a decreased birthrate necessarily followed the absence of so many thousands of our vigorous married or marriageable young men; not by any means all of our soldiers who survived the war returned to Canada (migration from other provinces to the prairies makes no increase); and there is reason to believe that the exodus from Canada to the United States was larger than many persons suppose. For all these reasons I am led to conclude that an increase of 20 per cent. during the passing decade will be the most that can be reasonably hoped for. This would give a population of 8,645,805. A safer estimate would, in my opinion, be somewhere between eight and eight and a half millions.

And again reverting to what is above stated in regard to rural and urban population, there seems little doubt that the coming census will show that the latter is now considerably the greater of the two, a fact which must have an important bearing upon the coming redistribution of seats in the House of Commons. And this in turn will not be without its effect upon the rising fortunes of the United Farmers.

## INSURANCE LICENSES AND AGENCY NOTES

Within the past two weeks numerous licenses have been issued to insurance companies by the Dominion Government. In every case, however, the authorization given was merely the extension of scope. The following is a list of companies so authorized and the class of business which they are allowed to transact:—

Springfield Fire and Marine Insurance Company; hail.  
Canadian Surety Company; insurance against loss or damage by robbery.

Fidelity and Casualty Company, of New York; insurance against loss or damage by robbery.

Travelers Indemnity Company; insurance against loss or damage by robbery.

Dominion of Canada Guarantee and Accident Insurance Company; insurance against loss or damage by robbery.

Maryland Casualty Company; insurance against loss or damage by robbery.

Employers' Liability Assurance Corporation, Limited; insurance against loss or damage by robbery.

In addition to the above, several provincial licenses have also been issued. In Manitoba, the Preferred Accident Insurance Company, of New York, has been registered to transact accident, sickness and automobile insurance. G. K. W. Watson is chief agent for the province.

The Union Assurance Society, Ltd., has been authorized to transact automobile insurance in British Columbia. The head office for the province is at Victoria, and Chas. R. Bishop is chief agent.

The British Traders Insurance Company, Ltd., has been registered to transact in the province of Quebec the business of inland marine and ocean marine insurance. Joseph Rowat, 17 St. John Street, Montreal, is chief agent for the province.

License was recently issued to the Motor Union Insurance Company, Ltd., to transact fire, accident and automobile insurance in the province of Manitoba, and arrangements are now being made to commence operations in that province. The company will operate as a member of the Western Canada Fire Underwriters' Association and the Grain Insurance Association.

J. H. O. P. Boire, who has been with the Guardian Assurance Company for a number of years, has been appointed inspector of the company for the province of Quebec, to replace J. A. Malo, who has resigned after many years' work in that position.

## THE FUTURE OF CROWN LANDS

Should be Asset Preserved for Benefit of People as a Whole—  
Past Policy Not Satisfactory

BY ANDREW T. DRUMMOND

IN connection with their natural resources, the great problem which the provinces of Ontario and Quebec have to confront to-day is how to so conserve the vast Laurentian and Huronian areas lying to the north of the more settled sections that these areas may be, in the future, sources of permanent annual revenue for their governments, and of permanent supply of valuable timber, mineral, fur and food products for the country and for export. Both the governments and the press have recently taken some increased interest in forest protection and in reforestation, and this seems to open the way for discussing its other phases as well.

The suggestions made, more especially early this year, to the government of Ontario, and, subsequently, to those of the other provinces interested in forests, included various proposals—all feasible—looking primarily to a more discriminating management and care of the Crown lands and their associated interests; the rehabilitation of the vast burned and cut over areas within them; and the gradual reinstatement of the whole as a great national asset for the future. The objects sought were—to put them concisely: increased protection of the timber from forest fires and from ruthless cutting; reforestation, naturally and artificially, of the burned and cut over areas; protection, breeding and increase of the fur bearing animals; protection of the wild birds and the stocking of the lakes with fish; and, generally, permanent timber, pulpwood, fur, hide, food, and other supplies for the country and, at the same time, permanent annual revenue for the governments. It must be remembered that these are all associated interests, for the forests and streams are largely the shelter and home of the fur bearing animals, and the innumerable lakes the resorts of the fish, and that wherever, as has been, in the past, over such immense areas, these forests have been depleted or actually destroyed by ruthless lumbering or by fire, there has been similar extensive destruction among the fur bearing animals and the birds, whilst contamination of the waters of the rivers and lakes by lumber waste and mill chemicals play havoc with the fish.

The problem is pressing. The pocket book of the public has been severely drawn on. Lumber has become scarce and has gone up hugely in price, paper of all kinds has increased to four times its former value, newspapers have had to increase their subscription rates, the beautiful furs of former days are only now within the reach of the rich, fish, which in this country of vast lakes and rivers, should be on every table, are scarce and expensive, whilst wild game from our forests and marshes has become almost a luxury of the past. As Dr. Baker, of the American Paper and Pulp Association, forcibly puts it: "Are we to continue a vandal program of destroying wherever possible, and building up nothing in return?"

### Care in Cutting Timber

In carrying out the suggestions made to the government, the proposal was that, on every limit leased, and on every forest reserve, there should be trained forest engineers, with wide powers, to direct the cutting of the timber on recognized forestry principles; to establish special measures for fire protection in addition to those employed by the government; to carry out reforestation by not only facilitating the work of nature, but by establishing nurseries, and engaging in systematic replanting of desirable species; to protect the fur bearing animals and the birds from sportsmen, hunters, campers, local employees and settlers; and to guard the lakes and rivers from pollution.

Some extra expense to the limit holders will, doubtless, result from the carrying out of these suggestions, but who

will not say that the thoughtless policy of governments of past decades in permitting the lumbermen to operate on the Crown lands in such way as best suited their personal interests, and without the slightest regard for fire protection and to future lumber supplies, has found its disastrous Nemesis in vast districts of burned and cut over lands which have been, and are continuing to be, reforested, not by the noble white pine, which in the early days of Ontario was such a conspicuous feature of especially the valley of the Ottawa, and even of the south western peninsula, but, so generally, with less desirable and less useful trees. The time has come when the Crown lands must be regarded by the governments as a trust for the people of the future, as well as of the present, and, when leased, to be treated fairly by the leaseholder during his term, and not, at its end, thrown back on the government, shorn by fire and severe cutting, of all of its value for fifty to one hundred years, even with the best of care in reforestation.

### Reforestation

Reforestation cannot be left entirely to nature. Man and nature must co-operate. The white pine, the most important tree in the immediate north country, is slow in naturally reproducing itself, and the red pine may be of like habit. All over this north country there are many thousands of square miles of burned and cut over lands awaiting replanting with more desirable trees than aspen and birch, and the remaining uncut timber limits still available are diminishing fast. Three or four pulp and paper companies seem, thus far in Canada, to be the only limit holders that have voluntarily taken up replanting in earnest. The governments, in the interests of their own future revenue and of the country's home and export business, must awake from the lethargy of the past. Fire protection, it is to be hoped, has been permanently taken hold of by them in a more vigorous way. Replanting should follow at once, as a pine will require, under any circumstances, about seventy-five years to attain a commercial size for the lumber mill.

But another problem has come to the front. The manufacturer of dimension timber, deals and boards requires at least a certain size of tree: the paper pulp manufacturer seeks one of much smaller diameter. So large has become the demand for pulpwood lands, that the governments must at once face the question whether, if, in a given district, all of the suitable trees of the smaller sizes are cut for pulpwood, there will be much timber left, which, in course of years, would increase in size, and become ready for the purposes of the manufacturers of dimension timber deals and boards. If, as the recent advertisements of the Ontario Department of Lands and Forests imply, pulpwood and pine timber are to be cut simultaneously on the same tract, the possibility of future supplies of large timber from that tract will be very meagre for seventy-five to one hundred years. What seems suggestive is that the pulp mill owners should be relegated to suitable localities in the more northern districts where the trees do not grow to sizes sufficient for construction purposes, and that the central and more southern districts should be reserved for the larger timber.

### LA SAUVEGARDE LIFE INSURANCE COMPANY

The 1920 statement of La Sauvegarde Life Insurance Company, Montreal, shows receipts of \$289,112 from premiums and \$84,709 from interest, rents, etc., making a total of \$373,821. Payments to policyholders totalled \$68,988, commissions \$61,569, general expenses \$47,936, and taxes \$6,114, making a total expenditure of \$184,608.

Assets now total \$1,949,528, or nearly double what they were in 1914. They are composed as follows: Building in Montreal, \$479,134; bonds, \$1,249,458; loans on policies, \$134,892; cash, \$13,313; premiums due from agents, \$42,090; interest, due and accrued, \$21,419; miscellaneous, \$3,990; furniture, etc., \$5,230. The reserve is \$1,422,997, and the surplus, after providing for all other liabilities, \$103,892. Business in force now totals \$9,652,821.

# Unfavorable Trade Balance of \$51,000,000

Figures for the Fiscal Year Show a Substantial Excess of Imports Over Exports—Our Purchases Increased by About Twenty-One Millions in March. While Our Sales Abroad Advanced Only Slightly—Result of Our Export Trade in Agricultural Products and Wood and Paper for the Year Was Very Favorable

**A**LTHOUGH the total value of Canada's trade for the fiscal year ending March 31 last, was \$99,378,297 greater than for the previous year, figures covering the month of March alone show a decided drop in the trade of the Dominion.

A glance at the figures shows that the major part of the reduction is due to a falling off in the value of imports. In March, 1920, Canada imported goods to the value of \$142,497,365. Last month the total value of imports was only \$92,566,829. This is a decrease amounting to \$49,930,536. The decrease in value of domestic exports during the month, as compared with March, 1920, totals \$25,040,431. In March, 1920, domestic goods to the value of \$93,193,859 were exported

from the Dominion, while in March, 1921, the value of domestic exports was only \$68,092,428.

The increase in imports last month was rather surprising in view of the tendency which has prevailed of late. As compared with February the advance was about \$21,000,000, which was largely the result of a greater volume of purchases of agricultural and vegetable products, fibres and textiles, and iron and steel. Exports increased only \$3,000,000 over the previous month, due principally to larger sales of wood and paper abroad. Details of the statement for March and the twelve months, with comparisons, are as follows:—

## IMPORTS ENTERED FOR HOME CONSUMPTION

	Month of March				Twelve months ending March			
	1920		1921		1920		1921

# CROP REPORTS

FROM information collected through its network of Branches across Canada, the Bank of Montreal compiles periodical reports covering crop conditions in every part of the Dominion. These reports are transmitted over private telegraph lines to central cities, from which they are mailed free to persons desiring the information they contain.

If you wish your name to be placed on the mailing list, notify the nearest branch, or the Head Office in Montreal.

## BANK OF MONTREAL

ESTABLISHED OVER 100 YEARS

*A Complete Banking Service*

### A "CROP" OF BUSINESS FAILURES

A STRIKING example of how Canada has been affected by the world-wide slump in business, is given in the quarterly summary of failures by R. G. Dun and Co. The number is not as large as in the early years of the war, but the amount of assets and liabilities involved is by far the greatest recorded for any similar period. This would seem to indicate that many large companies have gone under.

It will be seen from the table given below that 566 companies went into insolvency during the first three months of this year, which is very much in excess of the figure for the same period of 1920, and which is more than half of the total for the whole of last year.

For the twelve months of 1920 the total number of failures was 1,078, with assets of \$18,569,516 and liabilities of \$26,194,301. By comparing these results with the following, the situation is clearly apparent:—

Provinces.	No.	Total commercial.		No.	Manufacturing.		No.	Trading.		No.	Other commercial.		No.	Banking.	
		Assets.	Liabilities.		Liabilities.	Liabilities.		Liabilities.	Liabilities.		Liabilities.

## MARCH INDEX NUMBER AGAIN DECLINED

Wholesale Prices of Some Commodities Showed Tendency to Become Firmer, However, Particularly in Foodstuffs

COLLECTIVELY, wholesale prices again moved downward in March, 1920, the index number for 262 commodities being 263.1, compared with 270.1 in the preceding month and 349.0 in March, 1920.

The downward trend last month was not regular, however, prices of foodstuffs, particularly, showing a tendency to become firmer. Increases were especially noticeable in meats, fruits and vegetables. Dairy products declined. Most of the other commodities were lower, the most important decreases being in textiles, leather and boots and shoes, metals and implements, building materials, and drugs and chemicals.

Details of the March index numbers, as compiled by the Department of Labor, compare as follows:

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	INDEX NUMBERS

Norman Sommerville and Company is the name of a legal firm which has just commenced practice in Toronto, giving special attention to corporation, commercial and taxation law.

# BRANDRAM-HENDERSON LIMITED

## Annual Report of Board of Directors

To the Shareholders,

Your Directors herewith submit their Fourteenth Annual Report, with Statement of Assets and Liabilities, and Abstract of Profit and Loss Account, for the year ending December 31st, 1920.

The net profits amounted to \$120,835.51, which, with the surplus arising from re-valuation of properties, \$449,544.33, along with the balance of \$639,027.11 carried forward from the previous year, makes the sum of \$1,209,406.95. Out of this sum has been paid the dividend on the Preferred Stock of \$35,000.00 at the rate of seven per cent., and the dividend on the Common Stock of \$48,500.00 at the rate of five per cent., and also the interest on the issues of First and Consolidated Bonds, respectively, including a reserve provided on both issues for the months of October, November and December, amounting to \$59,934.99. The sum of \$7,500.00 has been provided for a reserve for depreciation, also \$20,965.23 for the fifth year's war tax, and the sum of \$140,000.00 as a reserve for stocks of Merchandise. The total at the credit of Profit and Loss Account after the deduction of these provisions is \$897,506.73.

The cost of upkeep and renewals incurred during the year at all the Company's plants has been charged to operating expense.

Messrs. P. S. Ross & Sons, as in the past, have audited the books and accounts, and their report is herewith submitted.

### RE-VALUATION OF PROPERTIES

The re-valuation of the Company's properties, decided upon a year ago because of the greatly increased value of much of its real estate and the very favorable basis on which Toronto and other properties had been acquired, was conducted by appraisal houses of the highest standing, and following our conservative practice, only "depreciated values" on plant and equipment have been employed. The extensions undertaken during the year as referred to in the last report, have been included in the re-valuation.

Both from the home and the export fields, during the early part of the year 1920, we were flooded with orders, and although operating difficulties resulting from the attitude of labor kept profits below what they should have been, results were eminently satisfactory for the first six months. Concurrently with the rapid decline in metals and flax seed, which developed in August and continued uninterrupted to the end of the year, we experienced a succession of overseas cancellations, due to these same conditions, and also a great shrinkage in the home demand, both of which considerations accentuated our inventory losses.

### RESERVE FOR MERCHANDISE

A radical policy by way of protecting the year 1921 has been adopted in establishing a reserve for merchandise of \$140,000.00. The Company is in an excellent position to compete for business, which is now showing distinct signs of revival after the long depression.

Your subsidiary, The Alberta Linseed Oil Company, Limited, continues to prove, both directly and indirectly, of value to the parent Company.

The direction of the sales policy and general conduct of The Pacific White Lead Company, Limited, continues in the hands of your Company, and it has been decided to link up the two companies in a still closer association.

Your Directors consider the position of the Company warrants their recommendation of a continuance of the present dividend of seven per cent. on the Preferred and five per cent. on the Common Stocks, payable quarterly to shareholders of record one month prior to dates of quarterly payments.

In conclusion your Directors wish to take advantage of the opportunity to express their appreciation of the faithful and efficient services of the officers and employees of the Company.

All of which is respectfully submitted on behalf of the Directors.

GEORGE HENDERSON,

Halifax, April 28, 1921. President and General Manager

## MORTGAGE ON LAND EXTINGUISHED BY TAX SALE

Decision of Alberta Supreme Court Based on Clause in Edmonton Charter—Does Not Prevent Suit on Personal Covenant, However

IN a case stated in an action on a mortgage, the Alberta Supreme Court held that under sec. 63 of the Edmonton charter, where a mortgagee allows the mortgaged property to be sold for taxes and becomes the owner at the tax sale, the mortgage so far as it is a charge against the land is extinguished, but the Court may give effect to 10 Geo. V. 1920, ch. 3, sec. 1(16a) and allow the plaintiff to proceed upon the personal covenant in the mortgage and issue execution thereon.

The case was that of Western Canada Mortgage Co. vs. O'Farrell and the facts and judgment per Justice Simmons are: "The plaintiff sues upon the covenant of the defendant in a certain mortgage given by the defendant to the plaintiff, September 15, 1911, which was varied as to the dates of payment by an agreement between the mortgagor and mortgagee on October 2, 1914, whereby the defendant covenants to pay the sum of \$8,000 with interest from October 1, 1914.

### Land Sold for Taxes

"The defendant in the mortgage covenants that he pay all taxes levied against the said lands and in default of his doing so the mortgagee might pay all taxes and same, with interest, should become a part of the money secured under the mortgage. The mortgagor did not pay the taxes and the lands in question were sold by the city of Edmonton for arrears of taxes, amounting to \$2,219. At the sale by the city of these lands, for arrears of taxes, the mortgagee purchased the lands for the said sum of \$2,219 and became the registered owner thereof and has since paid the taxes assessed against the said lands.

"The (chief) questions submitted on the stated case are: Has the plaintiff a right to sue the defendant upon the personal covenant contained in the said mortgage and extension agreement, or is the plaintiff precluded from suing on the said covenant? If successful in obtaining judgment on the said covenant is the plaintiff entitled to issue execution? Is it necessary for the plaintiff to foreclose the said mortgage and to exhaust its remedies against the said lands before suing on the said covenant and is the defendant entitled to have the value of the said lands deducted from the amount claimed by the plaintiff herein?

### Mortgage Extinguished by Sale

"Counsel for the plaintiff mortgagee claims under sub-sec. 16(a) of sec. 1, 10 Geo. V. 1920, ch. 3, that the Court should order that the mortgagee may proceed with his action upon the covenant without his instituting or carrying on proceedings by way of foreclosure or otherwise for the sale of the lands under the directions of the Court, in view of the fact that the lands have now become vested, so far as the legal ownership is concerned, in the plaintiff mortgagee who is ready, and willing and able to transfer the same to the defendant if the debt secured by the mortgage is paid off under the plaintiff's proceedings by way of execution or otherwise. In my view sec. 63 of the Edmonton Charter must be considered, as such section provides that such a transfer under tax sale as occurred in this instance shall not only vest in the purchaser or his assigns all rights of property which the original holder had therein, but shall also purge and disencumber such land from all payments, charges, liens, mortgages and encumbrances of whatever nature and kind other than existing liens of the city or Crown. I am unable to give any other effect to that section than the declared intention thereof which seems to be this, that the mortgage, so far as it is a charge against the land, is extinguished and that any attempt to bring the land itself into the proceedings would manifestly be destroyed by the effect of said sec. 63.

"I am of the opinion that sub-sec. 16(a) of sec. 1, 10 Geo. V. 1920, ch. 3, should be given effect to in the present instance by allowing the mortgagee to proceed upon the covenant and to issue execution thereon."

## REGISTRATION OF GENERAL TRADEMARK

Proprietors of "Cutex" Goods Permitted to Register the Brand in Canada—Limitations Regarding Specified Lines

IN a recent petition by the Northam Warren Corporation to the Exchequer Court of Canada, in regard to the registration of the word "Cutex" as a general trademark, Justice Audette held that a general trademark may be registered with a limitation to exclude certain classes of goods for which a specific trademark not absolutely similar has been registered.

In explanation, His Lordship says: "This is an application to register as a general trademark the word "Cutex" to be used more especially in connection with manœuvre and toilet preparations, which are manufactured and sold by the petitioners.

"This application for registration was refused by the Minister of Trade and Commerce by reason of the existence on the register of a certain trademark consisting of the words "Randolph Cuties" registered October 29, 1914 in favor of J. W. Landenberger and Co. of Philadelphia, Pa., as a specific trademark applied to hosiery and underwear and by reason of a further registration of the words "Cute Brand" registered August 20, 1914, in favor of J. S. Todd and Son, of Victoria, B.C., as a specific trademark applied to canned salmon.

### Consent Secured

"There is further record of a consent by Landenberger and Co. that if hosiery and underwear are excluded that the word "Cutex" may be registered as a general trademark in favor of the petitioners. Furthermore, there is also filed a general consent by J. S. Todd and Son to the registration of the petitioners' trademark as prayed.

"In the present application to register the word "Cutex" it may be said that the words "Randolph Cuties" and the words "Cute Brand" bear some distant resemblance to the word "Cutex" but they are not the very same words and they are not likely to deceive uncautious purchasers because the other words resembling the word "Cutex" are in both the other trademarks associated and accompanied by another word when used.

"Therefore I have come to the conclusion to allow the petitioners to register in their name the word "Cutex" as their general trademark, limited, however, by excluding therefrom the use of the said word "Cutex" as applied to hosieries and underwear as well as to canned salmon."

## MINIOTA FARMERS' MUTUAL FIRE

Notwithstanding the fact that the Miniota Farmers' Mutual Fire Insurance Company did nearly \$10,000,000 more business in 1920 than in 1919, losses increased by only \$2,000. The thirty-fourth annual statement shows that the company's assets increased by \$162,357 to \$731,906, while growth in business is also illustrated by the following comparisons:—

	1920.	1919.
Business in force .....	\$40,122,540	\$30,870,421
Amount of business written .....	18,980,028	13,771,169
Increase in amount at risk .....	9,252,119	5,358,903
Losses paid .....	54,911	52,970
Total assets .....	731,906	569,548
Surplus held for members .....	716,254	549,748

# News of Industrial Development in Canada

**Many United Kingdom Firms Have Under Consideration the Establishment of Branch Works Here States Trade Commissioner—Canada's Paper Industry is Meeting With Strong Competition in the United States—Big Lumber Drives Are Held Up By Strike of New Brunswick Timber Workers—Packers Strike in Toronto Has Terminated**

"GREAT BRITAIN will soon be in the world's markets again, with machinery and merchandise of excellent quality and at a competitive price," said F. W. Field, British Government Trade Commissioner in Ontario, to a representative of *The Monetary Times* this week. Mr. Field has just returned to his post at Toronto from a six months' visit overseas where he conferred with many hundreds of manufacturers and merchant firms with regard to the prospects of doing business in Canada. Among the centres visited by him were Glasgow, Edinburgh, Birmingham, Sheffield, Coventry, Leicester, Nottingham, London and Manchester.

"British manufacturers have had to overcome a number of serious obstacles in their efforts to return to normal manufacturing conditions," continued Mr. Field. These problems are the result of the great efforts made by the Old Land during the war. Many have been solved and the industrial machine of Great Britain is returning to its accustomed work. Another strong impression I have received is the great care taken in the production of goods, and their excellent quality. This feature has always appealed strongly to buyers in overseas markets. After visiting works in the United Kingdom, it may be asserted with confidence that well-made and durable articles are still the pride of our manufacturers.

"A noticeable extension of laboratory work on the part of United Kingdom manufacturers was observed. Many of the laboratories seen were of the best and latest type. The ample tests made by the majority of the United Kingdom manufacturers in industries requiring tests, are one of the reasons for the excellent material and workmanship, and, in the case of machinery, effective operation.

"Several manufacturers expressed the opinion that their costs of production would probably decrease during 1921. This is an important consideration for the overseas buyer, who for the past two years has received many foreign quotations considerably lower than those of United Kingdom firms. With reduced production costs in 1921, the United Kingdom is likely to secure a larger volume of Canadian trade.

"The use of American labor saving machinery appears to have been adopted more extensively in our works. In some cases American foremen have been engaged for a certain period to teach the English machinists to operate the machinery. Frequently the English mechanics later have made valuable improvements to the American equipment. Mass production is being carried on extensively in some works as a result.

"Many United Kingdom firms informed me that they have under consideration the establishment of branch works in Canada. In certain lines where the competition in Canada is too keen, it is probable that United Kingdom firms will establish branch works in the Dominion. In the majority of lines, however, the British manufacturer will probably decide to continue production at home, exporting to the Dominions and foreign markets. When the present worldwide depressing conditions disappear, Great Britain will be found a stronger industrial nation than before the war."

## Europe Entering U.S. Market

Canada's paper industry is facing ever-increasing competition from European countries in the United States market. This is shown by figures issued by the United States Department of Commerce. During February last, Canadian mills sent to the United States a total of 97,788,183 pounds of print paper, valued at \$6,077,320. This was a decline of three-quarters of a million dollars in busi-

ness, as compared with the previous month, the figures for January being 107,843,677 pounds, valued at \$6,814,216. On the other hand, the paper manufacturers of several European countries are credited with a big increase of business in February over the first month of the year. Germany has become an active factor in the competition for the United States market. In February, Germany sold the United States 11,284,570 pounds of print paper valued at \$661,145, as against 8,122,390 pounds, valued at \$515,431 in January. Belgian mills are also beginning to send paper to this market. During 1920 not a pound of Belgian paper was received, but in January United States publishers received 325,820 pounds from Belgium, and in February 48,740 pounds. Imports from other countries in February, according to the Department of Commerce figures, were: From Finland, 634,290 pounds, valued at \$54,483; from Norway, 5,715,370 pounds, valued at \$382,909; from Sweden, 1,386,002 pounds, valued at \$88,077; from England, 78,781 pounds valued at \$4,727, and from Newfoundland and Labrador 648,812 pounds, valued at \$30,724.

Bucke Township Council has ratified the agreement with H. S. Hennessy, lumberman, of Haileybury, Ont., acting on behalf of the company which proposes the erection of a pulp mill north of there, and will submit a by-law to the ratepayers on May 16. The company agrees to pay on a \$1,500 assessment for the first two years, and after that, when the plant is erected, \$40,000 assessment. The buildings are to be completed by August, 1923, and the agreement will run for ten years.

Employees in the Kenogami and Jonquieres mills of Price Bros., Ltd., are on strike, and according to available information, there would appear to be little hope of a quick settlement. Some 1,200 men are involved, and the strike has arisen from a dispute over wages.

Operations at the plant of the Fort William Paper Co. have commenced.

As a result of the strike by the local Timber Workers' Unions of New Brunswick, lumber companies are leaving their drives in the streams, thus leaving mills without supplies. Millions of feet of lumber are involved, and the principal companies to take action are the Miramichi Lumber Co., and the Fraser Companies, Ltd. The Dominion Pulp mill on the Miramichi River, which was recently taken over by the Fraser Companies, and which has been closed down for some time owing to strike by employees, will remain closed, even if the workmen accept the terms offered, because of the condition of the market.

## Some Hope for Shipbuilding

In the view of Hon. C. C. Ballantyne, minister of marine and fisheries, there are two hopes for the shipbuilding industry. The first is that the great shipbuilding plants of Canadian Vickers, Ltd., at Maisonneuve, Que., might be able to tender successfully for the construction of the new icebreaker, and here the minister hinted that much would depend on the men's willingness to accept wages of a reasonable character. The second hope is that the rates of exchange might improve in the near future in such a way as to make it possible for foreign governments or other interests to pass orders to Canada for the building of ships, in which case Canadian shipyards would be able to avail themselves of the special provision made by legislation last year for obtaining loans from the government.

The blast furnace, owned by the Atikokan Iron Co. and others, Port Arthur, Ont., has been sold to outside interests. The city, which is a shareholder in the furnace and property, has ratified a resolution to dispose of the

plant for \$1,000,000. Two hundred thousand dollars is to be paid by the purchasers within four years and the remaining \$800,000 at the expiration of the four-year term. Two months ago the Atikokan Iron Co.'s mine, said to be one of the biggest producers in the district, was disposed of to Duluth interests. It is understood that the furnace at Port Arthur will be operated in connection with the mine.

The packers' strike in Toronto is over and the men who had been out for two weeks and a half have returned to their respective plants. Separate agreements are being made between the employers of the respective plants and their employees, the only substantial change being a reduction of 12½ per cent. in wages.

A new universal plate mill, representing an investment of \$1,500,000, has been installed at the plant of the Dominion Foundries and Steel, Ltd., Hamilton, Ont., and operations have commenced. Hitherto, large steel plates were imported by Ontario.

The new \$100,000 plant of the Milton Worsted Yarn Mills, Milton, Ont., for the manufacture of worsted yarn, has commenced operations. The property, which was originally occupied by the Canadian Carpet Co., has been rebuilt and renovated. Several additions have been made and a new heating plant and power plant installed. In addition to the manufacture of worsted yarn a modern dye-house has been built and equipped with the latest machinery for the dyeing of yarn and cloth.

Slackness in trade has resulted in the closing at Gananoque, Ont., of the shovel plant of the Ontario Steel Products' Co., for a month. It is expected that work will be resumed about May 23.

#### NEW INCORPORATIONS

Capital for Week Ended April 27 is \$13,676,000, Compared with \$14,417,100 Previous Week

Authorized capital of \$13,676,000 is represented by companies whose incorporations were reported to *The Monetary Times* during the week ended April 27, compared with \$14,417,100 for the previous week. A comparative summary by provinces is as follows:

	Week ended April 20	Week ended April 27
Dominion . . . . .	\$ 6,565,000	\$ 4,372,500
Alberta . . . . .	.....	1,342,000

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to **\$11,500 for every working day** throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**Two More Saskatchewan Municipalities Are in Default—Peterborough's Net Debt Increased Largely in 1920—Report of Fernie Reflects an Improvement in the Position of that City—Edmonton Utilities Show Surplus for First Quarter of this Year—Tax Rates of Three Saskatchewan Cities—Agreements Between Melville and Bondholders Imposes Severe Conditions**

**S**EVERE conditions will be imposed upon the town of Melville, Saskatchewan, by an agreement with the bondholders. There has been very little expression of opinion by the ratepayers as yet, and until a public meeting is held the approval or disapproval of the agreement will not be known. It is understood that the town council has the privilege of making changes in the agreement submitting same to the bondholders for approval, and it is altogether likely that several changes will be submitted for the bondholders' approval. The main points in the agreement are as follows:—

On or before the first day of July, 1921, the town shall issue its debentures to amount covering principal, interest in arrears, with interest on such arrears to the said first day of July, 1921. The said debentures shall be dated as of the first day of July, 1921, bearing interest at 6 per cent., payable in fifteen equal annual instalments of principal and interest on the first day of July in each of the years 1922 to 1936, inclusive.

Between the first day of July, 1921, and the thirty-first day of December, 1921, the town shall issue debentures to take care of principal and interest falling due in said period. The said debentures shall be severally issued and dated as of the date on which the said instalments of principal and interest severally become due, shall bear interest at 6 per cent., payable in fifteen equal annual instalments of principal and interest on the first day of July, in each of the years, 1922 to 1936.

The debentures of the town to be from time to time issued pursuant to this agreement, shall be exchanged for and accepted in full satisfaction of the unpaid debentures and coupons maturing on or before the thirty-first day of December, 1921. The exchange of the said debentures in satisfaction for debentures in arrears or maturing before the thirty-first day of December, 1921, as aforesaid, is conditional upon the town carrying out the following terms and conditions.

## Fifty-Five Mill Rate

The town will impose and levy in the year 1921, a tax rate of at least fifty-five mills and will impose a sanitation tax of five dollars (\$5) per annum on every householder with a proportionately higher sanitation tax in respect of hotels or other premises larger than domestic residences. Subsequent to the year 1921, the town will impose and levy a tax sufficient to provide funds necessary to pay all debts of the town whether for operation, running expenses, principal or interest falling due within the year after making due allowance for the cost of collection for the abatement of taxes and for taxes that may not be collected, make the hospital in the town self-supporting, or dispose of wagons other than chemical engine used for fire protection purposes and discharge teamster now employed, limit the fire protection apparatus to a chemical fire engine to be operated by the janitor of the town hall, increase the rates of domestic users of electric light and power to twenty cents per kilowatt hour, reasonably increase the rates for electric power, provided that if the town is able to make any substantial reduction in the cost of operating its power plant, it may proportionally reduce the rates for electric light and power, close and cease to operate the town skating rink, unless the same can be made self-sustaining, cancel real estate subdivisions on which taxes are in arrears, and apply for special legislation to enable it to sell such lands. All moneys collected from taxes imposed after the first day of January, 1922, in respect of debenture principal, interest or sinking fund, shall be set aside and held in a special debenture trust account, and shall not be used for any purpose other than the pay-

ment of principal, sinking fund, or interest on the town's debenture.

## Comparative Tax Rates

Commissioner George D. Mackie, of Moose Jaw, has prepared an interesting table showing the tax rates of the three principal Saskatchewan cities for 1921 and 1920, and the tax rate per head, basing the latter figure upon a population for Regina of 40,000, a population for Saskatoon of 28,000 and a population of Moose Jaw of 23,000. The statistics which Mr. Mackie has compiled can be summarized as follows:—

	Levy for 1921.	Levy for 1920.
Regina .....	\$1,992,469	\$1,740,783
Saskatoon .....	1,411,281	1,318,168
Moose Jaw .....	1,096,859	1,017,806

	Mill rate.	Tax per head.
	1921.	1920.
Regina .....	43.00	37.00
Saskatoon .....	46.55	40.40
Moose Jaw .....	46.00	41.60

**Nanaimo, B.C.**—A three-mill increase is shown in the 48-mill tax rate for 1920.

**St. Mary's, Ont.**—The tax rate for 1921 has been fixed at 39½ mills on the dollar.

**Walkerville, Ont.**—At the same level as in 1920, the tax rate has been struck at 32 mills on the dollar.

**Melville, Sask.**—The tax rate has been set at 57 mills on the dollar, as compared with 53 mills previously.

**Calgary, Alta.**—A tax rate of 49.90 mills on the dollar has been set by the city commissioners, as compared with 45.75 mills last year.

**Oak Bay, B.C.**—A tax rate of 31.25 mills has been struck, as against 25 mills last year. The taxable land within the municipality last year was \$5,138,087, while this year the assessment is \$4,183,531.

**Windsor, Ont.**—Total assessment is \$45,000,000 for ordinary purposes and \$47,000,000 for school support. This year one mill raises \$45,000, as compared with \$32,000 last year. The total amount of money which will be raised this year is \$1,284,000, as compared with \$1,124,000 in 1920.

**Winnipeg, Man.**—Realty has arrears outstanding April 1, amounting to \$3,598,519, according to a comparative statement issued by H. R. Pattinson, city tax collector. The arrears are comprised of: \$560,502 for 1918 or prior; \$194,325 for 1919; and \$2,090 for 1920. Payments from the first of the year to March 31 amounted to \$729,397, reducing the total of \$4,327,917 outstanding January 1 to \$3,598,519.

At January 1, 1920, there was \$4,486,559 outstanding, of which \$892,488 was paid during the first three months, leaving \$3,594,070 outstanding April 1, 1920.

**Edmonton, Alta.**—Reports on the quarterly operation of the utilities show that all departments, with the exception of the street railway had surpluses. The net loss in the radial branch was \$12,386, and \$10,000 of that amount was accounted for by damage claims. Utility surpluses for the three months were as follows: Electric light, \$49,212; telephone, \$16,483; waterworks, \$4,489; power plant, \$26,441, making a net surplus of \$84,240, as compared with \$25,919 in 1920.

The reason for the increase in revenues, states Commissioner Yorath, is that higher rates were in effect for the first three months this year as compared with last year. Another point to be remembered is that expenditures have been reduced this year.

**R. M. HEFFERNAN & CO., Ltd.**  
 Jackson Building, Ottawa

Saskatchewan.—It was reported last week that the North Battleford School District and the Wilkie School District, both in Saskatchewan, are in default in coupon payments on their bonds. As in other instances of a similar character recently noted, the difficulties arise out of the inability of the municipalities in question to collect the taxes outstanding.

Wilkie, with a population of 1,000, has debentures outstanding amounting to \$66,700, a bank debt of \$8,000, and an expenditure last year on school account of \$31,882. The town owes the school district \$41,423, which is composed largely of uncollected taxes. The town's debenture debt totals \$92,031, against which it has capital assets of \$105,610, and uncollected taxes aggregating \$59,552.

North Battleford school district has a debenture debt of \$151,836, and a bank debt of \$37,000. As against these obligations the schools have an equity in lands in lieu of taxes, of \$21,183, and taxes due amounting to \$75,281.

Fernie, B.C.—An improvement in the city's finances is shown in the 1920 statement, which has just been issued. The debenture debt has been reduced from \$419,747 to \$398,054.

Sinking funds were deposited to the amount of \$11,384, bringing the fund up to \$113,972, which is \$3,515 in excess of the required amount. At the end of 1919 there was a sinking fund surplus of \$4,937.

At the close of 1919 the corporation showed an overdraft at the Home Bank of Canada of \$26,212 and unrepresented cheques of \$3,390, making a total of \$29,602, and the close of 1920, the corporation had a credit balance of \$14,716.

Revenue exceeded expenditure by the sum of \$19,314, after providing for a reduction of \$8,430 over expenditures on debenture construction account. The school department kept within its estimates, and showed a surplus of \$2,718, compared with a deficit of \$3,289 in 1919, which was provided for in 1920. Electric light and water departments both show a surplus of \$4,365 and \$8,560, respectively, after providing for fixed charges.

Arrears of taxes and interest were reduced from \$24,465 as at December 31, 1919, to \$14,690 at December 31, 1920, and a decided improvement on previous years.

## Government and Municipal Bond Market

British Columbia Sells Securities Payable in the United States—Victory Bonds Weaker—Ontario Loan Postponed for a Week—Edmonton Will Consolidate Unsold Debentures Turned Back From Portland in New Issues

THE government and municipal bond market continues active, with prospects for busier times ahead. Prices have fallen off slightly, however. The principal event of the week was the sale of British Columbia bonds, for disposal in the United States. At a price of 100.01, the province paid a shade under 6 per cent. for its money, compared with 5.15 per cent., for a similar loan made in January.

It is understood that the Alberta bonds have been fairly well distributed on a 6.25 per cent. basis, and interest is now being centered upon the postponed Ontario offering. Victory bonds continue on the weak side, and during the past week fractional declines were recorded by most of the issues. The following figures illustrate the trend of prices:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close Apr. 20.	Close Apr. 27.
1922 .....	.98	98¾	98¼	98½	98¼
1927 .....	.97	98	97½	98¾	97½
1937 .....	.98	99¾	99¾	99¼	98½
1923 .....	.98	98¾	98	97¼	97¾
1933 .....	.96½	98	98½	97¼	96¾
1924 .....	.97	96¾	96¾	96¾	96¾
1934 .....	.93	95¼	95¾	95¾	93¾

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Dufferin R.M., Man.	\$ 60,000	6	30-instal.	Apr. 30
Havelock, Ont. ....	23,420	6	20-years	May 2
York Tp., Ont. ....	24,130	6	20-instal.	May 2
Ford City, Ont. ....	75,000	6½	25-years	May 3
Ontario Province ...	5,000,000	6	Optional	May 3
Windsor S.S., Ont. ...	225,000	6½	30-instal.	May 9
Grand 'Mere, Que. ...	100,000	6	30-yr. ser.	May 9
Walkerville, Ont. ...	95,982.35	6	Various	May 19
Shawinigan Falls, Q.	138,400	5½	Optional	May 11
Saskatoon, Sask. ....	204,000	5 & 6	Various	May 23

York Township, Ont.—Tenders will be received until May 2, 1921, for the purchase of \$24,130 6 per cent. 20-instalment public school debentures.

Grand 'Mere, Que.—Tenders will be received until May 9, 1921, for \$100,000 6 per cent. 30-year serial bonds of the school municipality of Grand 'Mere. A. Desilets, secretary-treasurer.

Walkerville, Ont.—Tenders will be received until May 10, 1921, for the purchase of \$60,982.35 6 per cent. 10-instalment debentures and \$35,000 6 per cent. 20-instalment debentures. (See advertisement elsewhere in this issue.)

Ontario.—The province has extended the date for which tenders are to be received on \$5,000,000 securities, until May 3. Details will be found in an advertisement elsewhere in this issue.

Windsor, Ont.—Tenders will be received until May 9, 1921, for the purchase of \$225,000 6½ per cent. 30-instalment debentures of the Roman Catholic Separate School Board. D. Gourd, secretary-treasurer, 616 Pierre Ave., Windsor.

Dufferin R.M., Man.—Tenders will be received up till noon April 30, 1921, for the purchase of \$60,000 6 per cent. 30-instalment good roads debentures, which are guaranteed by the province both as to principal and interest. The original date, which was April 15, was extended.

Shawinigan Falls, Que.—Tenders will be received until 4 p.m., May 11, 1921, for the purchase of \$138,400 5½ per cent. debentures. The tenders should mention two prices: One for 30-year serial debentures, and the other for 5-year straight-term debentures. A. J. Meunier, secretary-treasurer.

Saskatoon, Sask.—Tenders will be received until May 23, 1921, for the purchase of \$204,000 5 and 6 per cent. debentures, payable in 15, 20 and 30 years. The 6 per cent. debentures are dated July 1, 1921, and the 5 per cent. debentures are dated April 1, 1917. (See advertisement elsewhere in this issue.)

### Debenture Notes

Woodstock, Ont.—Ratepayers have carried a \$65,000 hospital by-law.

Peterborough, Ont.—The city has \$230,000 bridge debentures and \$7,000 local improvement debentures for sale.

St. Boniface, Man.—No bids were received by the municipality for \$273,233 5 and 6 per cent. debentures of various maturities, and payable in Canada and London, England.

Capreol, Ont.—The *Monetary Times* is advised that within the next two or three weeks the town will be putting on the market an issue of \$32,000 20-years 6 per cent. debentures,

## Compound Your Victory Bond Interest

On May 1st more than \$30,000,000 in interest will be paid to holders of Victory Bonds. We suggest that the recipients put this money to good advantage by promptly reinvesting it in further Victory Bonds, or in other high-grade Government and Municipal Bonds. We offer a selection of these bonds, with a wide choice of maturities, and possessing the same facilities for prompt and convenient interest collection as do Victory Bonds. The yield ranges from 6% to 6.80%.

for public school purposes. Also another issue of \$15,500 20-years 6 per cent., for local improvements.

**Edmonton, Alta.**—Canadian bond houses will be ready to take up the consolidated issue of debentures which the city will shortly offer. Representatives of financial houses have met the city commissioners and clearly indicated that there should be no difficulties towards a syndicate in Canada handling the issue. The present plan is to make a consolidated issue covering the unsold debentures turned back by the trustees of Morris Bros., and what is necessary for capital expenditures this year. Speaking of the proposal to offer Edmonton bonds on the Canadian market, Commissioner Yorath stated it was unquestionably the right course to pursue.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from April 9 to 16, 1921:—

Schools, 8 per cent.—Duff, \$12,500 20-years annuity; Cravon, \$14,000 20-years annuity; Moosomin, \$6,600 10-years annuity; Stone Cliff, \$3,500 15-years annuity; Froude, \$1,500 10-years annuity; Bayard, \$3,500 15-years annuity; Holbeck, \$1,500 15-years annuity; Balioi, \$1,500 10-years annuity; Belleville, \$800 10-years annuity; Kingslyn, \$3,800 10-years annuity; Wilton, \$4,525 10-years annuity; Dixon, \$600 6-years annuity; Prelate, \$2,000 5-years annuity; Osland, \$3,500 15-years annuity.

Towns—Saltcoats, \$7,000 7 per cent. 15-years annuity, for concrete sidewalks; Unity, \$5,000 7½ per cent. 15-years annuity, for electric lights; Milestone, \$12,000 7 per cent. 15-years annuity, for town hall.

#### Bond Sales

**Kamloops, B.C.**—The city recently sold an issue of \$18,000 school debentures, bearing interest at 7 per cent. and maturing in 1936, to local buyers. During the month of July there will be an offering, probably in the open market, of a further issue of \$35,000 20-year 7 per cent. bonds for the same purpose.

**Essex Border Utilities, Ont.**—A. E. Ames and Co. have purchased \$38,209 6½ per cent. 27-instalment debentures at 94.76.

**British Columbia.**—A syndicate, headed by the British-American Bond Corporation, purchased this week \$3,000,000 6 per cent. 5-year bonds, payable in the United States, at 100.01. The securities are being sold across the line at 93.84 to yield 7½ per cent.

**Miniota R.M., Man.**—Edward Brown and Co. have been awarded \$83,500 5½ per cent. 20 and 30-instalment debentures, which are guaranteed by the province, at a price of 89.50. Other tenders were: R. C. Matthews and Co., 89.04, and A. E. Ames and Co., 88.89.

**Regina, Sask.**—The city has awarded \$154,010 6 and 6½ per cent. debentures of various maturities to A. E. Ames and Co. at 97.14, at which price the city pays about 6.65 per cent. for its money. R. C. Matthews and Co. bid 94.75, while Wood, Gundy and Co. bid 93.28.

**Gloucester Bay, N.S.**—A block of central school bonds amounting to \$25,000 has been disposed of to the A. E. Ames Co., at 83 and accrued interest. This company has asked a three weeks option on the remaining block of \$65,000 at 83 but suggests that the town sell the bonds for 82½ if they cannot obtain a quick sale at 83.

**Saskatchewan.**—The following is a list of sales reported by the Local Government Board from April 9 to 16, 1921:—

Schools—Pleasant Ridge, \$1,000 10-years 7½ per cent. Nichol, \$2,400 10-years 7½ per cent.; Western Canada Bond Corp., Winnipeg, Crocus, \$5,600 15-years 8 per cent.; Harris, Read and Co., Regina, Armlay, \$3,000 15-years 8 per cent.; H. J. Birkett and Co., Toronto, Midhurst, \$5,000 15-years 8 per cent., Doddsland, \$2,150 20-years 8 per cent.; C. C. Cross and Co., Regina.

Rural Telephones—West Osage, \$1,250 15-years 8 per cent.; C. C. Cross and Co., Regina, Lakeview, \$950 15-years 8 per cent.; R. McLeod, Regina.

**Ontario.**—An issue of \$1,340,000 Ontario Hydro-Electric Power bonds, guaranteed by the province of Ontario, are being offered by a syndicate headed by Wood, Gundy and

Co., associated with A. E. Ames and Co., Dominion Securities Corporation and R. C. Matthews and Co. The bonds were issued a year ago for the purpose of acquiring at that time the radial lines of Sandwich, Windsor and Amherstburg Railway, and the Windsor and Tecumseh Electric Railway, connecting up Windsor with adjoining municipalities. The bonds are due April 1, 1960, and thus have thirty-nine years to run. They bear 4½ per cent., and are being offered at 76.89 and accrued interest to yield 6.05 per cent.

#### INCREASE IN INSURANCE WOULD HELP EXCHANGE

Speaking before the Life Underwriters' Association at a luncheon in the Mossop Hotel, Toronto, on April 28, J. H. Gundy, of Wood, Gundy and Co., in outlining the present financial situation, said that this country's present unfavorable financial condition was caused by too much money in proportion to her wealth. "If you have a certain amount of wealth, a certain amount of money, and the money is suddenly increased without a corresponding increase in wealth, then someone has money which the wealth of the country does not entitle him to have," he said, and explained that this condition creates extravagant buying and easy, and, consequently, unnecessary borrowing.

The purchase by the public of unnecessary articles, either Canadian or foreign-made, was deprecated by the speaker. On the question of easy loans, he pointed out that in the United States, a relatively richer country, the interest on borrowing was greater than here. He instanced the Ontario Government's project to build a \$1,000,000 cement plant as an example of an unnecessary enterprise resulting from easy borrowing. "This country at present is capable of producing more cement than it uses."

Coming to the question of saving, Mr. Gundy compared the banks with insurance companies. There were banks on every corner waiting for someone to come and make deposits. People could place money in their account to-day and draw it out to-morrow, which was very often the extent to which they saved. Insurance had the advantage in so far as it encouraged systematic saving. "Not many people will save systematically in banks by making regular deposits, whether convenient or not," he declared. "The insurance companies, by collecting in small denominations and investing these aggregated sums, afforded advantages of investments to thousands of people throughout the country. If we could double or treble insurance to-morrow, we would have gone a long way in making the Canadian dollar worth a dollar in gold," he concluded.

#### DOMINION MORTGAGE AND INVESTMENTS ASSOCIATION

Among the addresses which have been arranged for the annual meeting of the Dominion Mortgage and Investments Association, to be held in Winnipeg May 12 and 13, are the following: "Subordination of Mortgage Securities by Provincial Legislatures," by G. H. Davis, Winnipeg; "Land Titles Systems in the West," by D. J. Thom, K.C., Regina; "Rural Credits in the United States," by E. D. Chassell, secretary of the Farm Mortgage Bankers' Association of America, Chicago; "Rural Credits in the United States," by A. E. Parker, Winnipeg; "The Manitoba Farm Loans Association," by W. D. Glendinning, Winnipeg; "Basis of Operations of Lending Institutions," by V. Evan Gray, Toronto; "Citizen Co-operation in Government," by Dr. H. L. Brittain.

Senator Blain has introduced a bill in the Senate to incorporate the Commonwealth Bank of Canada, with headquarters at Toronto. The capital stock is placed at \$10,000,000, and the provisional directors are the following: Charles Grant Anderson, lumberman, Toronto; Joseph Cleophas Lamothe, attorney, Montreal; John Jacob Arnold, banker, Boston, Mass.; William Long Baker, banker, Toronto; and William Hislop Gibson, fruit grower, Newcastle, Ont.

# Corporation Finance

**Brandram-Henderson Had Lower Profits—Consolidated Rubber Company Experienced Favorable Year—Nipissing Results Were Disappointing—Monarch Knitting Company Suffered a Drop in Net Earnings—No Bonus Was Paid—Canadian Fairbanks-Morse Did Not Escape the Effects of Depression**

**Canadian Fairbanks-Morse Co., Ltd.**—Operations of the company in 1920, resulted in profits of \$279,562, as against \$625,149 a year ago, and \$1,310,597 two years ago. In 1919 profits fell 52.3 per cent. from the previous year's high record total, and the 1920 profits are 55.3 per cent. lower than 1919. After all deductions net earnings on the common stock were \$89,347, or equal to \$1.06 on the 84,327 no-par-value common shares, against \$442,069 in 1919, or equal to 27.63 per cent. on the 16,000 par value \$100 shares then outstanding.

The balance sheet reflected the changed position through two years of declining profits; bank loans were increased about \$1,000,000 to \$1,550,000, accounts payable by over \$300,000 to \$1,696,594, while the cash item is lower by about \$320,000 to \$78,379, investments in government and municipal bonds, etc., which amounted to \$818,389 in 1919, were reduced to \$39,917 last year, and inventories were increased by \$1,200,000 to \$3,880,484. In property and equipment account, land and buildings are valued at \$1,255,965, against \$991,872 in 1919. Total assets increased about \$1,300,000 to \$9,455,059.

**Nipissing Mines Co., Ltd.**—The total net profit for the year was \$1,279,091, compared with \$2,717,312 in 1919, which was the largest in the history of the company. There was paid to stockholders \$1,800,000, unchanged from the previous two years, and the surplus is now \$3,817,043, compared with \$4,372,952 at the end of the previous year.

E. P. Earle, the president of the company, in his report to the shareholders, said that by comparison with those of recent years, the results of operation were disappointing. "The year's exploration and development work was, unfortunately, not productive of satisfactory results," adds Mr. Earle, "and in consequence the reserves now stand at 3,568,000 ounces as against 6,354,000 ounces a year ago.

"It is of course evident that unless future prospecting develops additional ores and the price of silver improves, the earnings of your operating company will continue comparatively unsatisfactory. Your management, having these facts in mind, is constantly seeking properties that appear to have value, and with this policy in view, it is gratifying that it has been possible to build up the large surplus now on hand."

Detailed statements show that the Nipissing Mines Co., the holding corporation, received a total revenue of \$1,845,158, almost entirely from the operating company, and disbursed \$1,800,000 in dividends, leaving, after administrative expenses, a balance of \$10,218. Dividends from the formation of the original company in 1906 to the end of 1920, have reached the immense total of 379 per cent., or \$22,740,000. Total shipments since 1904 have reached the value of \$38,349,499.

**Monarch Knitting Co., Ltd.**—A big drop in net profits is reported by the company for 1920. The usual dividends were paid, but the bonus of 2 per cent., disbursed in the previous year, did not follow. Earnings applicable to common stock were 10.2 per cent., against 25.8. The balance carried forward is \$79,905, compared with \$253,311.

President F. R. Lalor and general manager J. A. Burns point out that "the conservative policy adopted by your board of directors some years ago in building up substantial reserves which they at that time felt were necessary for future success has enabled us to maintain our strong financial position and to have increased our reserves to over \$1,000,000, after making our usual charges for depreciation, and valuing our inventories at prevailing market prices. The period of readjustment through which we are passing has demonstrated the necessity for some reasonable tariff regulations which will protect the textile and knit-goods industry in Canada against the dumping of distressed merchandise from other countries in times of business depression. We are looking forward with confidence to the future."

The following table gives several important items from the financial statement, with comparisons:—

	1920.	1919.
Net profits .....	\$ 183,405	\$ 386,686
Paid on common .....	51,000	76,500
Balance profit and loss .....	1,005,123	925,217
Inventories .....	1,154,026	459,121
Bank loans .....	606,000	9,617
Current assets .....	1,717,165	1,251,214
Current liabilities .....	1,074,364	433,937

The company's American subsidiary, the Monarch Knitting Co., Ltd., of New York, reports a net loss for the year of \$86,279, compared with a net profit of \$50,248 in 1919.

**Canadian Consolidated Rubber Co.**—At the annual meeting of the company in Montreal this week, the financial statement for 1920 was presented and approved. The statement is a good one, covering as it does a year in which business depression has been prominent. Net sales during the year amounted to \$26,675,513, a large increase, and comparing with \$22,162,978 in 1919 and \$18,785,640 in 1918. After deducting all expenses, including cost of goods, selling and general depreciation, interest and provision for debts, etc., operating income amounted to \$1,287,167, as compared with last year's \$1,751,507 and \$1,604,851 in 1918. Taking off preferred dividends, surplus remained at \$1,077,167, against \$1,541,512 in 1919 and \$1,394,862 in 1918, and with addition of previous balance at this account profit and loss

\$5,000,000.00 PROVINCE OF ONTARIO 15-YEAR  
6% BONDS

The Government of the Province of Ontario will receive alternative tenders up to 12 o'clock noon, on Tuesday, May 3rd, 1921, for the following:

1st. \$5,000,000 Province of Ontario 6% Bonds, dated 2nd May, 1921, due 2nd May, 1936, bearing interest at the rate of 6% per annum, payable half-yearly on the 2nd days of May and November, principal and interest payable in gold coin of lawful money of Canada, at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, at the holder's option, or

2nd. \$5,000,000 Province of Ontario 6% six months Treasury Bills, with interest, dated 2nd May, 1921, payable six months therefrom on the 2nd day of November, 1921, principal and interest payable at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, at holder's option.

Bonds to be in the denomination of \$1,000 each, with coupons attached, and may be registered as to principal only. If Treasury Bills are issued, they will be in the denomination of \$1,000 or larger. Payment for Bonds or Treasury Bills and issue thereof to be made at the office of the Treasurer of Ontario, Parliament Buildings, Toronto, on or before the 13th May, 1921, less the amount of the deposit. If Bonds are sold interim debentures will be supplied on payment of money, to be exchanged for definitive bonds on completion by the engravers.

Sealed tenders, endorsed tenders for Province of Ontario debentures, should be addressed to the Honorable P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto.

Tenders must be for the whole amount offered and must be accompanied by marked cheque for \$50,000, to be applied in the case of the successful tenderer as part payment for Bonds or Treasury Bills. The highest or any tender not necessarily accepted.

P. SMITH,  
Treasurer of Ontario.

Toronto, 22nd April, 1921.

## CORPORATION FINANCE

(Continued from page 38)

carry-forward totalled \$8,319,475, against \$7,242,308 in 1919 and \$5,700,796 in 1918.

The president in his report states that net sales were 20 per cent. above a year ago and higher than any previous year. Inventories of manufactured goods and materials have been taken at cost where cost was below the market and at market where market was below cost. Expenditures on plant practically complete the new construction which was laid out in 1920, and it is felt there will be no necessity for additional expansion of fixed properties for some time to come. There has been a reduced demand for the products during the past few months, due to general business conditions. The company is in excellent condition, and results for 1921 should be satisfactory.

Working capital position of the company shows further betterment, net working capital at the end of the year amounting to \$9,590,706, up from \$9,518,379 in 1919. Current assets were \$16,427,205, against \$12,870,225, and current liabilities \$6,866,498, against \$3,351,846. The increase in current liabilities was due largely to loans of \$3,883,175, and an increase in bills payable, which were only partially offset by a lower total of accounts payable.

**Brandram-Henderson, Ltd.**—The annual report of the company for the fiscal year to December 31, 1920, is the first one of the larger paint companies to make its appearance. Along with all other lines of industry, the paint companies had to contend with most difficult conditions during the last half of the year 1920. In view of these conditions it will be particularly gratifying to the shareholders of the company to learn that the board of directors consider the position of the company warrants their recommendation of a continuance of the present dividend of 7 per cent. on the preferred and 5 per cent. on the common stock, payable quarterly during the year.

Dealing with the special conditions that prevailed during 1920, George Henderson, president and general manager, in his report on behalf of the board of directors, states that both from home and the export fields during the early part of 1920, the company was flooded with orders, and although operating difficulties resulting from the attitude of labor, kept profits below what they should have been, results were eminently satisfactory for the first six months. Concurrently with the rapid decline in metals and flax seed, which developed in August and continued without interruption throughout the balance of the fiscal period, the company experienced a succession of overseas cancellations, due to the same conditions; and also a marked shrinkage in the home demand.

The company has adopted a policy by way of protecting the year 1921 in establishing a reserve for merchandise of \$140,000, and should therefore be in an excellent position to compete for business, which, after the long depression, is now showing distinct signs of revival.

The directors' report also contains reference to the fact that early in the year 1920 a revaluation of the company's properties had been decided upon, because of the greatly increased value of much of its real estate and the very favorable basis on which Toronto and other properties had been acquired.

The profit and loss account shows that the net profits for the year amounted to \$120,835, compared with \$299,736 in 1919. With the surplus arising from the revaluation of properties of \$449,544, together with the balance of \$639,027, the total amount at credit of profit and loss account is \$1,209,407. Out of this sum have been paid dividends on the preferred stock, \$35,000, and on the common stock \$48,500, and interest on the first and consolidated bonds of \$59,935. Total amount to be carried forward to profit and loss account was \$897,566, as against \$639,027 at the end of the previous year.

## DEBENTURES FOR SALE

WALKERVILLE, ONT.

## TENDERS FOR DEBENTURES

Sealed tenders addressed to the undersigned and marked on the outside, "Tenders for Debentures," will be received up to 12 o'clock noon of Tuesday, the 10th day of May, 1921, for the purchase of the following debentures and accrued interest:—

\$60,982.35 Local Improvement Debentures; 10-year, 6% instalment bonds, in \$1,000 and odd amounts.

\$35,000 Debentures; for extending the plant and equipment of the Hydro-Electric System; 20-year, 6% instalment bonds, in \$1,000 and odd amounts.

Tenders must be submitted for each block separately. Debentures will be delivered and must be settled for at the office of the town treasurer, Walkerville, Ont. All debentures are coupon bearer, and bear interest from the 14th day of December, 1920. Principal and interest payable at the Canadian Bank of Commerce, Walkerville, Ont., on the 14th day of December.

The highest or any tender not necessarily accepted. For further information address

A. E. COCK,  
Clerk and Treasurer.

Walkerville, Ont., April 14, 1921.

539

## CITY OF SASKATOON

Debenture Issue—\$201,000

Sealed tenders will be received up to 12 o'clock noon, Monday, May 23rd, 1921, for the purchase of the following sinking fund debentures of the City of Saskatoon, viz.:—

\$ 92,000	30 years, 6%
13,700	30 years, 5%
71,000	20 years, 6%
27,300	15 years, 6%

\$204,000

The 6% debentures are dated July 1st, 1921, and the 5% debentures are dated April 1st, 1917.

Principal and interest are payable in Canada only.

Tenders to be addressed to the City Commissioners and marked on the outside of envelope, "Tender for debentures."

The highest or any tender not necessarily accepted. Further particulars on application.

A. MacG. YOUNG, Mayor.

ANDREW LESLIE, City Commissioner.

Saskatoon, Sask.

543

## Condensed Advertisements

"Positions Wanted." 3c. per word; all other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 65c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

SECRETARY-TREASURER, age 30, of large company in British Columbia, desires connection in similar capacity with well-established business anywhere in Canada or United States. First-class accountant with excellent credentials, the more responsibility to be assumed the better. Prepared to proceed for interview immediately for any legitimate proposition. Apply by wire or letter to H. Anscomb, 1921 Government St., Victoria, B.C.

534

## CORPORATION SECURITIES MARKET

Prices of Stocks on Canadian Exchanges Continue Reactionary—Papers Especially Weak—Canadian General Electric Company to Increase Common Shares

THERE was very little encouragement in the movement of stock prices on the Canadian exchanges this week. In some sections of the markets there was a tendency towards firmness, but on the whole the trend was not smooth. A better tone in Wall Street found little if any reflection here, local conditions being so unsettled as to offset any favorable influence from outside.

Obscurity of the exact position of the Riordon Co. and the cutting of the Brompton dividend, resulted in weakness in the papers. Riordon's fall has presented a problem which the street has failed to solve, and an explanation is being earnestly sought, for it is apparent that there is something more behind such a drastic movement than new financing. It is understood that a statement will be forthcoming in a few days.

The cutting of the dividend by Brompton is merely the reflection of the position of the pulp and paper industry. F. N. McCrea, president of the company, states that earnings have been sufficient to pay the usual dividend, but it was considered, in view of general business conditions, in the best interests of the shareholders to conserve the company's earnings. Paper companies are disposed to move cautiously now, for the depression which has overtaken the industry, following so closely after a period of rapid expansion, has created a delicate situation.

Trading for the week resulted in a turnover of listed stocks on the Montreal exchange of 57,973 shares, as compared with 50,518 in the previous week, while in Toronto the figure was 17,291, compared with 20,090. Bonds changed hands to the extent of \$1,207,710 in Montreal, as against \$1,302,450, while the turnover in Toronto was \$826,580, compared with \$871,600 previously.

## Would Increase Common Stock

A special general meeting of the shareholders of the Canadian General Electric Co., Ltd., is called for June 15, in a circular issued by the company. The purpose of the meeting is to secure the approval of shareholders to increasing the capital stock of the company to \$20,000,000, this being an addition of \$8,000,000 to the present capital stock. At the present time there is authorized \$12,000,000, of which there is now issued \$2,000,000 of preferred and \$8,800,000 of common, leaving a balance of \$1,200,000 of common stock still unissued. All of the increased capital will be in common stock, and will bring the total of this stock authorized to \$18,000,000.

The circular points out that as stated in the annual report it is proposed to pay a stock dividend of 20 per cent. on the common stock. As the remaining unissued shares are not sufficient to cover the disbursement, it is necessary to increase the authorization. Two-thirds of the stock issued must be represented at the coming special meeting, but owing to the wide distribution of the present stock it is becoming increasingly difficult to secure such representation. It has, therefore, been decided to increase the capital at this time, and thus avoid having to call another special meeting for the purpose for some years. It is not the intention, however, to issue at the present time any capital stock other than that required for the payment of the stock dividend.

In the event of the by-law increasing the stock being confirmed, the stock dividend will be made payable to shareholders of record at the close of business June 15, 1921.

At a special general meeting of shareholders of the Laurentide Power Co. in Montreal this week, the issue of \$1,500,000 twenty-year, seven per cent. general mortgage bonds was authorized. The money is to cover the cost of the installation of two additional units of 20,000 horsepower each, and the work will be completed within the next few months. This is the same issue which was sold to the Sun Life Assurance Co. of Canada, on a basis slightly under 7½ per cent.

## RECENT FIRES

Loss for Week Totals \$84,000, Compared with \$1,275,500 Last Week—Several Buildings in the Town of Vars, Ont., Suffered the Heaviest Loss

Antigonish, N.S.—April 25—St. Ninan Street Protestant School. Loss, \$3,000.

## Turnover Tax and an Extended Tax on Sales

Some of the Existing Taxes are Inequitable, But It is Questionable Whether a Levy on Turnover Would Make a Desirable Substitute—Principles Enunciated By Advocates of Turnover Tax Are at Variance With Sound Doctrines Previously Laid Down—There Will Be Difficulties In Collection—Position of the United States Is Different From That of Canada.

By W. G. CATES, B.A.

THE propaganda that is being conducted both in Canada and the United States for the introduction of the turnover tax, or the extension of the sales tax makes it advisable that both should be very carefully examined. This is the more desirable, because much of the American literature on the subject, from which the arguments used chiefly in this country for the introduction of the turnover tax are derived, would almost lead one to conclude that this was a remarkable discovery in taxation, a kind of new single tax rendering almost all other taxes quite unnecessary. Furthermore, the results following the introduction of the turnover tax in several countries may well cause one to ask, whether it is a desirable substitute for certain taxes now collected.

One can quite believe that some of the existing taxes in this country are not only heavy but inequitable, but it is doubtful whether this could not be said of any tax that would yield a considerable revenue. As long as the huge sums of money now demanded by the Dominion government must be raised, so long will taxes be heavy. It is also tolerably certain, that in the main, they will be paid by those best able to pay. To this it will come, even though for a season this class may succeed in shifting the burden to other shoulders. Some of the taxes levied during the war, and which have brought in large returns, having been of an experimental nature, will have to be adjusted. But having during the war adopted the principle of the "last man the last dollar," it is idle to think that, in the matter of taxation, the period of sacrifice is at an end, even before we have begun to retire the war bonds.

### Sales Tax Principle

The general principle of the sales tax requires little explanation to Canadians, it having been in operation for nearly a year. In its application the tax varies to the extent that it is deemed wise to levy it, the proposal most favored being that the present limited tax be replaced by another of one per cent. on all sales of commodities, an exemption of say \$500 a month being allowed in the case of farmers, laborers and small traders. Others advocate that the existing sales tax be continued, the rate, however, being increased so as to provide the extra revenue required. The turnover tax in its real sense is generally applied to all transactions, with stated exemptions, and in France includes not only sales of commodities but the profits actually received in the form of fees, profits or commissions. In Germany the turnover tax is equally sweeping, being paid by the seller both of commodities and services. Canadian advocates of the turnover tax seemingly would confine it to the sale of commodities, and possibly transfers of real property.

The sales tax is not new, having been levied in Spain several centuries ago, where it was known as the Alcala.

Reference is made to it in Adam Smith's "Wealth of Nations," as follows: "It was at first a tax of ten per cent., afterwards of fourteen per cent., and at present of only six per cent. upon the sale of every sort of property whether moveable or immovable, and it is repeated every time the property is sold. It is to the Alcala, accordingly, that Ustaritz imputes the ruin of the manufacturers of Spain." This tax apparently appeals strongly to Latin peoples. In its modern form it made its appearance in Mexico thirty years ago under President Porfirio Diaz, the well known Dictator. He found the finances of the Republic in a bad way, and concluded that such a tax would best rehabilitate them. The president willed it, and his will became law. It is true that the finances of the State were restored, but that the conditions resulting from the Diaz regime were artificial is evident from the collapse and chaos that followed its overthrow.

### In the Philippines

When the United States took over the Philippines from Spain, the finances of the Islands were in a chaotic condition. There was a veritable jumble of taxes. Cut off largely from her old market, Spain, the Philippines naturally looked to free trade with the United States, but the latter would not consent to this until an alternative system of taxation was introduced, holding that it would be impossible to abolish the customs tax in the Islands until the required revenue was provided by other means. The problem before the administration under Mr. Taft was to provide an alternative revenue. Finally a one per cent. sales tax was adopted. It in time provided the needed revenue and the customs taxes were abolished. It is to be noted that both in Mexico and the Philippines the tax is much more widely applied than in Canada. In the Philippines it yields about \$7,000,000 a year.

### France Adopted Turnover Tax

France adopted a turnover tax in June, 1920, the rate being 1.10 per cent. on all transactions, together with a tax on certain articles of luxury. The action of the Republic has been cited as a strong reason for the adoption of this tax elsewhere, but the results have been so disappointing that henceforth they are unlikely to be held up as a recommendation. At first the estimates were largely justified, 292,000,000 francs having been paid to the treasury in July last. Recently, however, the receipts have fallen to 151,000,000 francs a month. According to estimates the collections should have been 3,000,000,000 francs for the first six months; they were actually 1,200,000,000 francs. Indeed, the startling failure of the turnover tax is held responsible for the huge deficit in the national revenue for the current year. Germany also has a turnover tax, but it is impossible to judge of its results.

It is worth while noting that the adoption of the turnover tax, or a wide application of the sales tax, has only been made by those countries that are either bankrupt, or whose finances are in a bad way. Both Mexico and the Philippines were insolvent when they adopted it. France today can hardly be classed, much less Germany, as a thoroughly solvent nation. As a matter of fact experience would seem to indicate that the wide application of these taxes means that the last reserve of taxation has been reached.

#### Principles of Taxation Violated

In passing, it is worthy of note that some of the most prominent and ardent advocates of the turnover tax in the United States enunciate new principles of taxation utterly at variance with those laid down by Adam Smith and John Stuart Mill, which are rightly regarded as eminently sound. Mill's dictum, which is worth recalling, runs: "The subjects of every state ought to contribute to the support of the government as nearly as possible in proportion to their respective abilities. That is, in proportion to the revenue which they respectively enjoy under the protection of the State. In the observation or neglect of this maximum consists what is called the capability or inequality of taxation."

Jules S. Bache is one of the best-known of American champions of the turnover tax, and he enunciates an entirely different principle as follows: "It should be the policy of the country that everyone enjoying the protection of the government should pay in equal proportion towards the expense of that protection." This obviously would make the poor man pay as much as the rich, an indefensible position, and one which no government in a truly democratic state dare take.

#### Proposals for a Change

In Canada the most concrete proposals for a change in methods of taxation are to be found in the resolutions adopted at a conference of representatives of the Canadian Manufacturers' Association, the Canadian Credit Men's Association, the Retail Merchants' Association of Canada and the Canadian Wholesale Grocers' Association, held in Toronto at the latter part of March. These are as follows:—

That the Business Profits War Tax Act shall not be re-enacted.

That the Income Tax Act as regards corporations shall be repealed.

That the present existing manufacturing tax on confectionery shall be abolished.

That the present sales tax shall be adjusted so as to provide the additional revenue needed by the Dominion government.

It will not escape notice that these proposals are in reality designed to relieve but one class, those who pay the business profits tax and the income tax on corporations, the manufacturing tax on confectionery being negligible. In the United States, however, while some of the advocates of the turnover tax exhibit little solicitude for the masses, they do propose that the introduction of this tax should be accompanied by the raising of the exemption on the income tax from \$2,000 to \$4,000, and possibly \$5,000. If the four proposals referred to were adopted it would mean that the revenue now received from the business profits tax and the income tax on corporations will be paid by the mass of the people.

Without attempting to go deeply into the matter, it is obvious that this would weigh heavily on persons on salary and on others having but small incomes. According to figures supplied by the Canadian Manufacturers' Association at this conference \$180,000,000 could be raised through the turnover tax, an amount equal to \$20 per capita. In the case of a married man without a family having an income of \$2,500 this would be tantamount to the doubling of his income tax. If he had one child, then, instead of paying \$12, he would pay \$32; if he had two children, he would pay \$44; three children, \$60. In proportion as the number of children were increased, to that extent would the taxes of the head of the family be increased by a multiple of \$20. This would mean taxation, not according to ability to pay, but according to the number of children.

#### Estimate of Taxable Turnover

There is good reason to think that the estimate of the country's taxable turnover, which the Canadian Manufacturers' Association places at \$18,000,000,000, is unduly high. Otto H. Kahn is as reliable an American financial authority as can be cited, and according to his figures a reasonable estimate of per capita taxable turnover in the United States would be \$1,528, but, according to the C.M.A. estimate, in Canada it would be \$2,000. To say that the per capita turnover in this country is equal to that of the United States would be to exaggerate, to say nothing of placing it at 25 per cent. higher. It may also be said that the National Association of Manufacturers of the United States has estimated the returns from a turnover tax at four times the figure supplied by Mr. McCoy of the United States Treasury. Those who collect taxes do not share the optimistic views of some turnover tax advocates. This leads one to the conclusion that the estimates of the probable revenue from a turnover tax have been equally over-stated. As a matter of fact, the returns from the sales tax have not come up to expectations. From May 19, 1920, to March 31, 1921, the actual collections were \$38,025,165, or at the rate of approximately \$3,600,000 a month. Be it also remembered that this period included three months of very high prices and very heavy buying. Prices are falling to such an extent, to say nothing of the contraction in demand, that at the present rate the tax would hardly yield \$35,000,000 during the current fiscal year. On its present basis, were it trebled, it certainly would not yield anything like \$100,000,000. Estimates of the probable returns from a turnover tax made within the last six months are bound to be very disappointing for the reason that prices are far above normal, and an increase in the sales tax would but hasten their fall.

#### Difficulty in Collection

Business men may well investigate these new proposals very thoroughly, for they promise a great deal, and it is well known that in the difficult days that are upon us it is becoming increasingly hard for even sound propositions to make good. When one is told that by the levying of a mere tax of 1 per cent. the federal revenue may be increased by nearly 40 per cent, that \$180,000,000 may thus be taken from the great mass of those least able to pay without them feeling it, one may be pardoned for expressing doubt.

One of the strongest arguments used by the advocates of the turnover tax is that it can be passed on to the ultimate consumer. How could a street car company pass on a 1 per cent. tax on a five-cent fare? How could other concerns that make but a small charge for a service pass it on? If they did charge another cent or two they would then be using the tax as a means to collect huge profits, and there would be no way of getting at them if the business profits tax were replaced by the turnover tax. In a falling market, such as we will have for some time, it would be extremely difficult for many businesses to pass on the tax. If taxes and extra expenses generally could always be passed on, business losses would be few.

It is probable that experience would soon demonstrate the impossibility of always passing on the turnover tax. If levied widely, especially during the present unsettled state of business, it is quite probable that transfers of property and merchandise would be arranged in such a way that, to a considerable extent, a system of leasing and consignment would replace actual sale. Business men would be forced to get around the intermediate turnover tax, unless it were very low, and this tendency would be accentuated as competition became keener. Moreover, a uniform tax on all businesses, no matter what their rate of profit may be, cannot be considered equitable; those who imagine that the replacing of the business profits tax by a turnover tax will relieve them of a load, should bear in mind that they pay the former only when their profits exceed ten per cent., but they would pay the turnover tax whether they made a profit or not, for it must be remembered that it is a tax on gross business and not on net profits. These difficulties which must suggest themselves to those who give serious thought to the

subject, are usually met with the answer that exceptions may easily be made to cover such cases. But riddle the turnover tax with exemptions, and it becomes a mere sales tax, which must be levied at over treble the present rate if the desired revenue is to be obtained.

#### U.S. Argument Does Not Apply

A strong argument in the United States for the substitution of the turnover for the business profits tax, on the ground that the latter causes many wealthy persons to invest in the tax-free securities, is of little effect in Canada. It is true that the \$14,000,000,000 worth of tax-free bonds in the Republic does provide a way of escape for those who desire to beat the heavy imposts on capital; moreover, this class of securities is growing, because those of a municipal character are exempt. But the situation in Canada is quite different, for municipal securities are not exempt, while the total of tax-free bonds probably does not exceed \$1,200,000,000, and instead of growing, the volume is being diminished.

To abolish entirely the business profits tax for a turnover tax of one per cent., or a widely extended sales tax, or a much heavier sales tax on the existing basis, is a questionable proceeding. The business profits tax should be adjusted; it and the income tax on corporations should be combined. But to replace entirely the tax levied on ascertained profits above 10 per cent. by a tax levied on consumer, which is expected to raise not only as much, but from two to three times as much as the business profits tax produced last year, would be unjust. If the great mass of consumers were better off than formerly, better off than those relieved of taxation, there might be justification for such a course; but with unemployment increasing and wages falling, their lot is becoming less favorable. Besides, if the American proposal of replacing the business profits tax by a wide turnover tax is to be adopted, it should at least be accompanied by the other American recommendation, the raising of the exemption on incomes from \$2,000 to \$4,000 or \$5,000. It is also to be observed that while the excess profits tax in the United Kingdom has been abolished, no new forms of taxation have been introduced; that is to say, no attempt has been made to make up the revenue thus lost by levying heavier consumption taxes on the great mass of the people. It is in decisions such as these that true statesmanship is revealed.

#### Must be Equitable

Of one thing we may be sure, attempts to shift taxation from those best able to pay, will fail, and that more completely during a time of business depression than during any other. Canada needs population, and she will not get it if this becomes known as a dear country for the mass of the people to live in. Introduce weighty consumption taxes, such as are not in existence even in the United Kingdom, and which even if they are introduced into the United States will be much lighter because of the greater population, and those who desire to improve their lot will think twice of coming here. Our taxes may be heavy, but in effect they will be lightened in proportion as there is the consciousness that they are equitable. If the turnover tax should become law, and go the way of the luxury tax, then with other sources of revenue falling, the country would be worse off than ever; and the same may be said of a widely extended, or increased sales tax, it being assumed that the business profits tax is repealed.

As an alternative in case that in the opinion of the federal authorities an adjusted business profits tax, or the existing sales tax would fail to produce the required revenue, the following is suggested. The sales tax, as at present, is heavy enough, for 2 per cent. being the minimum, it, in the aggregate, adds more to the cost of many commodities than is generally realized. If in the effort to make ends meet, it should become a matter of choosing between a much more widely extended, or a higher sales tax, and a low turnover tax, then the latter, if levied at a rate of one-half of 1 per cent. on all transactions, would be preferable, since it would

not be confined to one class. It could not always be passed on, but the low rate would prevent it becoming oppressive. In these observations the contention is not against resort to either the sales or the turnover tax, should they be absolutely necessary—though they should not be resorted to until all other means have been exhausted—but to the adoption or the extension of these in order to make the less able take on burdens from which the better able to pay have been released.

#### SOME BUILDING ACTIVITY AT THE COAST

Scarcity of Funds for Bonds and Mortgages, However—City Finances a Difficult Problem—General Business is Dull

(Staff Special.)

Vancouver, May 4, 1921.

THE present outlook in Vancouver and the coast generally is, in some instances, quite discouraging. Lumbering and mining are extremely quiet, and, with the salmon canning industry, business is dull. This is not for lack of production, but for lack of demand. The outlook for a large fruit crop is bright, but warm weather is now needed. The spring season has been somewhat backward. The tourist industry will be a brisk one in the next few months, present weather conditions being ideal.

The financial outlook would be said to be healthy. The demand for loans on mortgage in Vancouver is increasing, but only a few of the loan and trust companies appear to be in a position to take care of this business, owing to the difficulty of procuring funds for investment from Eastern Canada.

In view of the excellent rate of yield on good bonds, companies are finding it more difficult to dispose of their debentures and guaranteed investment receipts, which, in days gone by, provided a regular source of supply. Some of the life insurance companies continue to loan, but on securities, the value of which is carefully scrutinized. While building costs are lower, both as to material and labor, there is no certainty of the present levels being maintained. There is at the present time a fair amount of new house building under way, chiefly by owners of vacant land, and for their own use. Very little speculative buildings is being indulged in, and the real estate market is decidedly quiet.

Point Grey continues to be more in demand than Vancouver City for home sites, there being no improvement tax in that municipality, and the roadways being, on the whole, in a much better condition of repair. During the past year many attractive homes have been built in the Shaughnessy addition, Strathcona and Kerrisdale.

Rentals have generally been maintained, with few increases, this spring. Some reductions have been granted in store rentals to tide over the situation during the deflation period. The outlook for an improvement during the summer months is only fair, but from all accounts conditions here in Vancouver are better than in many of the eastern cities, and decidedly better than across the line.

The civic taxation question is still a bone of contention, and, while the provincial government has not conceded the wide powers asked for by Vancouver and other municipalities, it is evident that an effort must be made soon to get together and agree (if that be possible) upon an enlarged basis of taxation to meet civic needs, such as school accommodation and roadway improvement. Were the interests affected by the proposed new taxation assured of the economic and proper expenditure of funds raised by additional taxation, no doubt the opposition to such would be greatly modified.

H. R. Silver, Ltd., of Halifax, N.S., have opened an office at 13 St. Sacrament St., Montreal. In addition to the West Indian products—molasses and raw sugar—in the import of which the firm is actively interested, H. R. Silver, Limited, run a fishing fleet, and will, should the business warrant it, send cargoes of fish direct to the port of Montreal during the open months.

## THE WEEK IN PARLIAMENT

Session Will End About June 1, and Budget Speech is Announced for Monday—Grand Trunk Arbitration Bill Passed

(Special to *The Monetary Times*.)

May 5, 1921.

Thursday, April 28

In House of Commons:—(a) First reading bill amending Civil Service Act taking appointments of certain postmasters, day laborers and scientific and technical employees from Civil Service Commission; (b) Second reading of bill amending Research Council Act and establishing a National Research Institute; (c) Second reading of act to authorize ratification and carrying into effect of the protocol of December 16, 1920, accepting the statute for the Permanent Court of International Justice; (d) Railway committee reported in favor of a bill to incorporate the Fort Smith Railway Co., the promoters of act to incorporate the Slave River Railway Co. having agreed to withdraw, as both railways would be for same purpose in same territory.

In Senate:—(a) Third readings of bill to extend time for payment of certain debentures issued by the Harbor Commissioners of Montreal, and bill to amend the Currency Act to provide for nickel 5-cent pieces; (b) Second readings of French Trade Agreement Bill, of act incorporating Commonwealth Bank of Canada, of act incorporating Metropolitan Trust Co. of Canada, of act respecting Credit Foncier Franco-Canadian, of act respecting Western Dominion Railway Co., and of Canada Shipping Act Amendment Bill to force vessels to clean out oil at sea to prevent fire in harbors; (c) Second and third readings of Grand Trunk Arbitration Bill with amendments.

Friday, April 29

In House of Commons:—(a) Petition by Quebec Steamship Co. asking for act to amend and consolidate their acts, and increase their authorized capital stock; (b) Third readings of following bills:—One respecting Quebec, Montreal and Southern Railway Co., and one to incorporate Fort Smith Railway Co.; (c) Amendments made by Senate to bill to incorporate Gilmour and Hughson, Ltd., agreed to; (d) Second reading of act respecting Dominion Express Co.; (e) Militia and Public Works Departmental estimates passed.

In Senate:—(a) Third readings of following bills:—One respecting the London and Lake Erie Railway and Transportation Co., and one respecting Maritime Coal, Railway and Power Co., Ltd.; (b) Debate on French Trade Agreement Bill; (c) Debate on West Indies Trade Agreement Bill.

Monday, May 2

In House of Commons:—(a) Amendments made by Senate to Grand Trunk Arbitration Bill agreed to; (b) Debate and division on bill to amend Civil Service Act by taking some appointments away from Civil Service Commission and the Hon. A. K. MacLean's amendment for a six months' hoist, the government being sustained by a majority of fifteen.

Tuesday, May 3

In House of Commons:—(a) First reading of Senate bill respecting Maritime Coal, Railway and Power Co., Ltd.; (b) Second readings of following bills:—One to amend the Maple Products Act, one to amend and consolidate the Copyright Act, and an act to amend the Bankruptcy Act; (c) Withdrawal of bills to consolidate the acts relating to Patents of Invention, and to amend the Trade Mark and Design Act; (d) Third reading of bill to amend Research Council Act and to establish National Research Institute.

In Senate:—(a) Royal assent given to following bills:—One respecting Dominion Life Assurance Co.; one incorporating Mayo Valley Railway, Ltd.; one respecting Canadian Pacific Ry. Co., Ltd.; one incorporating Canadian Transit Co.; one respecting Lake of the Woods Control Board; one extending time for completing St. John and Quebec Railway between

Centreville and Andover; one concerning Canadian Wheat Board; one to amend Winding-up Act; one to extend time for paying certain debentures of Montreal Harbor Commission; one to amend Currency Act of 1910 by authorizing nickel five-cent pieces; one respecting Grand Trunk Arbitration; one respecting the London and Lake Erie Railway and Transportation Co.; one respecting the French Trade agreement; one respecting the Canada-West Indies Trade agreement; one respecting the Quebec, Montreal and Southern Railway Co.; and one to amend the incorporation act of Gilmour and Hughson, Ltd.; (b) Second reading of act respecting certain patents of the Antographic Register Systems, Ltd.

Wednesday, May 4

In House of Commons:—(a) Appointment of special committee to hear evidence concerning proposed Copyright Bill; (b) Third readings to following bills:—One to amend Post Office Act, and one to amend Act concerning Inspection of gas and gas meters; (c) Passing of estimates of \$515,000 for expenditure on Trent Canal, and long debate on five million dollar estimate for expenditures on Welland Canal.

In Senate:—(a) Senator MacDonald gave notice that he will move for Senatorial committee to inquire into causes of unemployment in Canada, and remedies.

## Budget Speech Next Monday

The session will end before or shortly after June 1. This is the government intention, and to do that it is bringing down the budget on Monday next. Saturday, sittings commence this week, and, if necessary, the government will start morning sittings as well very soon.

During the past week debates grew animated on a variety of topics, the International Court of Justice, the Civil Service and a government bill which was interpreted by the Opposition as meaning a return to patronage, the Grand Trunk Arbitration Bill which is finally passed and estimates for public works, including the Trent Canal and the Welland Canal. Committees were busy, one trying to find out how to get a coal supply for Ontario in Canada, another trying to ferret out something useful about the Canadian National Railway and deficits thereon, and another discussing the best ways of re-establishing the returned soldiers not yet re-established.

## ALBERTA FARMERS THROUGH WITH GAMBLING

(Staff Special.)

Calgary, May 2, 1921.

**I**N an interview with *The Monetary Times'* representative, Wm. Toole, who is in charge of the Canada Life's investments in southern Alberta, said:—

"The past winter was unusually fine, and, consequently, the live stock on the ranges and farms have come through in exceptionally good condition, and bear full evidence of benefits derived from the well-cured hay and grass of the previous season. The cows are in excellent condition, and a big calf crop is anticipated. The same remarks apply to horses and sheep, and there should be an unusually heavy lamb increase. Last spring, you will remember, owing to the stormy and long winter and poor feed, the cattle, both on the farms and ranges, were in a very weakened condition, and, consequently, the increase was not up to the average. This year it will be much greater than the average. Another interesting feature is that the cattle are in such fine shape at the present time that the beef will be ready for exporting much earlier than usual.

"Regarding grain conditions. From the information I have been able to gather, I do not think there will be as large an area sown this year as last spring but all reports indicate that the ground is in excellent shape, and that the seed-bed has been more carefully prepared than in previous years. Each year the area of well-prepared land is increasing, as costly experience is teaching the farmers that it does not pay to gamble at the expense of good farming."

### TURNOVER TAX NOT DESIRABLE

A **T**URNOVER tax, admittedly designed for the shoulders of the consumer, would be one of the worst means of collecting revenue which this country could adopt. Like the tariff, it is an indirect tax, and is based not on ability to pay, which is now accepted as the equitable basis of taxation, but on the amount expended. It is at variance with the movement in the United States and throughout the British Empire to obtain revenue from those who are wealthy, by means of progressive income taxes and succession duties. It is in short an attempt to shift the burden of the war from the shoulders of business and wealth to the people as a whole. Such might in any case be assumed from the widespread support given to the proposal by business organizations. But interests which attempt to link themselves with a retrograde movement will finally suffer its ill effects themselves. But while the proposal, as a substitute for some of the present taxes, has appealed strongly to business men, the impetus to the movement has come from a very few, and originally from the United States. Industry as a whole has viewed it with passive favor, but from the unorganized consumers, and from the farmers and others engaged in the production of raw materials there has been no voice of protest. It is the duty of the government to guard their interests from the undoubted injury which a turnover or an extended sales tax would bring. That there are distinct disadvantages to the tax is shown in the leading article in this issue, which is one of the few critical examinations of the proposal to be published in this country.

Has Canada arrived at that stage of financial demoralization where such a drastic step is required? Scarcely so, when there are still unutilized possibilities in existing taxation. Rich and poor alike in this country enjoy a standard of living unexcelled elsewhere and equalled in few places. There is evidence of wealth and prosperity on every hand. If it were not so then our talk of immense resources and

attractions for both capital and labor would have been a delusion. Canada is far removed from the condition of the Philippines, Mexico, and France, where the threat of financial insolvency alone lead to the adoption of a turnover tax.

### THE INCOME TAX PAYMENTS

**C**ANADIANS who are fortunate enough to pay a federal income tax now wait in fear and trembling of the awful penalties for delay or mis-statement. April 30 and the few preceding days found the income tax offices crowded, so much so, indeed, that in Montreal the clerks had to come out and take in the money on the street. Special police guarded the offices in the larger cities, as many of the taxes were paid in cash. Most of the offices remained open until Saturday evening, but in spite of this there were still payments coming in early during the present week. These stragglers may have been alarmed to read only yesterday that their returns had been marked "for penalty," but there is safety in numbers and nothing drastic is expected. The prisons of Canada could not hold the income tax paying population, and it is safe to say that there has not been a perfectly correct return filed.

In the fiscal year ended March 31, 1920, the income tax yielded \$17,872,202. For the year ended last March it yielded \$38,814,495. With higher incomes and a better collection there should be still more this year. It is estimated that during the last week of April nearly \$10,000,000 was collected in Montreal alone, the figure for April 30 being \$3,000,000. The money came in in cash, and in cheques, certified or uncertified, and in the case of the larger payments the cheques were usually dated April 30, so that the company had the use of the money as long as possible. In Montreal the mail business was so great that clerks were continually busy opening the bushels of letters arriving with returns and cheques. Some of the money came in small bills, with a lot of silver and even coppers, which meant a great deal

of additional work to the cashiers and accountants, especially with the smaller payments running into silver and copper currency. The accountants said that were the returns all coming in in cheques their task would be comparatively easy, but the flood of bills with silver and copper multiplied the difficulties of the work. To cope with this work a staff of twelve cashiers was established. Each of these comprise a cashier, to receive the money, an accountant to record it, and an assistant to write out the receipts, while the mail business was looked after a similar procedure was followed.

A feature of the tax business this year is the manner in which many of the larger corporations and big taxpayers have employed expert chartered accountants to look after the preparation of their returns and payments. One leading accountant stated that he and many others of his profession had been almost exclusively engaged on this work for a week or more. To substantiate this statement he showed a pile of statements and cheques prepared for different firms and persons, each carefully worked out, with the accompanying cheques awaiting signature. In this way the accountants have become expert students of the income tax laws, and can make sure that such large taxpayers are meeting their just dues, and not over-taxing themselves. They have also become experts on tax law methods, so that the work has been considerably eased.

#### DISTRIBUTION OF BANK CREDITS

IN times of stress it is of the utmost importance that bank credits be easily transferred from one point to another. Similarly, when business is dull, it is a great advantage to be able to move funds from where there is no demand for them to where they can be profitably utilized. It is for this purpose that the federal reserve system was organized in the United States. The Canadian banks, being national in their scope, can do this already, as was pointed out recently by J. L. Clarke, of the Merchants Bank, in an address in Saskatoon. We have a banking system acclaimed by economic experts as one of the best, if not the best in the world. During the past twenty years this continent has experienced several financial periods of depression, and the fact that in Canada there was no panic, speaks well for our economic system. During the recent great war the Canadian banks withstood the strain of not only the financing of production, the marketing of our food products, the manufacturing and the forwarding of munitions and other supplies to our allies; but in addition extended large loans to the Dominion and Imperial governments in helping to finance Canada's part in the struggle. It might be mentioned the efficient manner in which the banks co-operated with the federal government in floating the various Victory war loans, and in this connection the Canadian people are to be highly commended for the generous response to the call. Since the war the country has been endeavouring to get back to normal, and here, again, the banks are rendering a great service in their wise policy of "gradual selective curtailments" of credits in order that the different interests may gradually get their "house in order" preparatory to weather any possible storm that may follow as the result of inflation brought about by abnormal conditions.

Money placed on deposit with the banks is used to a large extent to carry on the business of the country, being loaned out to borrowers entitled to assistance for legitimate production purposes and for the handling of the country's products, until finally disposed of on the world's markets. In loaning money to farmers the local bank manager has not to refer to his ledgers to ascertain if he has funds to loan. If his local deposits are insufficient to meet the needs of his district, he has the surplus deposits of other districts to draw from. Thus branches having a surplus of funds supply branches where local resources are insufficient to meet demands for loans. Canada is a country of great distances and varied climatic conditions, one province may suffer from

crop failure, in whole or in part, while another province may have a good all-round crop. One great strength of the Canadian banking system is that through its operation the equilibrium of the country's finance is maintained.

#### PAYING TOO MUCH FOR A WHISTLE

THE ratepayers of Three Rivers, Que., have ratified two by-laws to borrow a sum of over \$400,000 to pay off debts contracted by the city in recent years, in connection with the bonusing of certain manufacturing enterprises which became bankrupt. Only one-fifth of the ratepayers cast their votes. The financial affairs of Three Rivers were recently investigated by Judge Desy, sitting as a royal commission. He condemned the operations whereby bonuses were paid to certain enterprises. The by-laws now passed were submitted to the ratepayers several months ago and refused, the opponents of the measures contending that aldermen of the council responsible for the de-legislature at its last session ordered the council to submit the by-laws again or as an alternative levy a special tax, payable in three years to cover the deficit. The by-laws spread payments to meet the deficit over ten years.

Three Rivers is not the only municipality in Canada which has found a dependent industry to be worse than useless. Even where the concern is a strong one, and obtains municipal assistance, not because it needs it, but because such assistance is available, very often the city or town finds that it has paid too much for its whistle. The new business and taxes which are derived from the additional population may be more than offset by the cost of services performed for the company free of charge, where an exemption from assessment is granted. The still greater evil of guaranteeing securities often proves costly, for the necessity for such guarantee is evidence that the business is not strong. In short, a concern which cannot stand upon its own feet in adversity as well as prosperity, is no asset to a municipality.

Large transactions in war loan bonds led to the close shading of prices. The action of the Toronto stock exchange in substituting decimal quotations with steps of .05, in place of steps of  $\frac{1}{8}$ , makes possible sales of large amounts on the exchange, and is already reflected by a bigger volume of business. The new unit is just fifty cents on a thousand-dollar bond, or fifty dollars on a hundred thousand.

\* \* \* \* \*

Commenting upon the 1921 session of the Prince Edward Island legislature, a Charlottetown paper says:—"In some respects it has been the most remarkable ever held in this or probably any other country in the civilized world. As to producing results that can be of any benefit to the people of the province, it may be said to have been absolutely barren." Needless to say this is the comment of an opposition paper, which is none the less egotistical as to the importance of the island province.

#### THE REVOLVING DOORMAT

In London they now tell a story of a bailiff who went out to effect a seizure on the contents of a house. The inventory began with the chattles in the attic, downward to the cellar. When the dining-room was reached the tale of furniture ran thus:—

"One dining-table, oak.

"One set of chairs (6), oak.

"One side-board, oak.

"Two bottles of whisky, full——"

Then the word "full" was struck out and replaced by the word "empty." Soon the inventory went on in a hand that straggled and lurched diagonally across the page until it finally closed with:—

"One revolving doormat."

# To Investors

IF you wish to buy or sell Victory Loan or other bonds, we would remind you that our branches at Toronto, Montreal, Winnipeg and Vancouver have departments especially organized for this purpose.

Call at our nearest branch; our Manager will be glad to arrange this for you.

BOSTON CHICAGO NEW YORK

London, Eng., Branch:  
55, OLD BROAD STREET, E.C.2

PERSONAL NOTES

C. F. JAMIESON has been elected president of the Lethbridge Board of Trade, succeeding G. R. Marnoch.

W. G. WRIGHT, formerly of Ross and Wright, insurance adjusters, Toronto, has organized the new firm of Wright and McFadden, at the same address, 714 Excelsior Life Building.

JOHN A. ROSS, who for several years past has been associated with the firm of Ross and Wright, Toronto, has opened an office of his own at 2 Toronto Street, in the same city, as an insurance adjuster. Mr. Ross will have associated with him his son, Kenneth A. Ross.

EDWARD BECK, of the Canadian Pulp and Paper Association sailed for Europe from New York this week. During his absence, Mr. Beck will visit Scandinavia, Finland, France and other European pulp and paper producing sections for the purpose of discovering whether these offer anything by way of methods which could be used to advantage in the Canadian industry. At Stockholm he will be joined by G. N. Piche, chief forester of Quebec, and similar other forestry experts of the Dominion, who will aid in the investigation.

INVESTMENT HOUSES EXPECT IMPROVED BUYING

April was a Dull Month, but May Promises More Activity—  
Montreal Not Losing by Western Defaults, but  
Has Suffered in Stock Market

(Staff Special.)

Montreal, May 4, 1921.

**D**URING April Montreal bond dealers lived chiefly on expectations, as there was little demand for investments of any kind. Income taxes due at the end of the month were diverting the attention of people of means, and no doubt absorbed part of the accumulation of money. That dealers were justified in anticipating an improvement this month is already indicated by a revival of business, with a stiffening of prices and a disappearance of odd lots from the market.

There will, however, be no lack of borrowers if prices advance to any extent. The province, while not undertaking a big program, will likely require some funds on capital account this year. Grand Mere and Shawinigan Falls are now in the market for bids, and Montreal may also float a loan in the near future. Some corporate financing is also coming along, and an issue of power bonds, offered privately by a firm here, has been nearly all sold. The Laurentide Power Co. recently secured \$1,500,000 from the Sun Life Assurance Co. at about 7½ per cent.

Quebec province has always been cautious in bond buying, and very few western municipals have been sold here. Reading now of the numerous defaults in payments, investors are congratulating themselves on their caution. Quebec's own municipalities have practically a clean record; the only ones to get behind were a few adjoining the city of Montreal, and it was partly to strengthen their position that the Metropolitan Commission bill was passed at the recent session of the legislature.

Stock Markets Avoided

While prices on the stock exchange have been holding firm for the past two weeks, investors have been somewhat frightened by the breaks which took place during the winter, especially the late one in Riordon. There is, however, a class of stock buyers in Montreal and the district served by the Montreal houses who will come into the market sooner or later.

A local dealer, in discussing the general investment situation with *The Monetary Times'* representative, made an interesting comparison between Montreal and Toronto. The former, he pointed out, was inclined to go to extremes, buying the most secure bonds and the most speculative Canadian stocks. Toronto, on the other hand, had gone in heavily for western municipals and for some of the higher yielding corporation issues, but, as regards Canadian stocks, it was more conservative. There was, he added, however, a big Toronto business in speculative New York stocks which was not so prominent a feature in Montreal.

A number of enterprises which expect to sell their stock direct to the public are in process of formation. Some of these are in the building field, while another business which is in evidence is the discounting of automobile dealers' notes. There is also some interest in oil and other mining securities now being offered.

OBITUARIES

DAVID B. WOOD, prominent in the milling industry in Ontario, died in Hamilton this week at the age of 63 years. He was at one time president of the Wood Milling Company.

GEORGE E. CORK, a well-known figure in Toronto bond circles, died suddenly this week of tonsillitis. For more than a year Mr. Cork had been manager of the Toronto office of the United Financial Corporation, Limited. Previous to his association with that company he was connected with the Dominion Securities Corporation, A. Jarvis and Company, and Goldman and Company.

BANK OF NOVA SCOTIA

New Branch at Oakwood and St. Clair Aves., Toronto

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

- Rodas, Cuba ..... Royal Bank of Canada
- Banff, Alta. (C.P.R. Hotel Branch) ..... Bank of Montreal
- River John, N.S. .... Bank of Nova Scotia
- Joggins, N.S. .... Bank of Nova Scotia
- Santiago de Los Caballeros, Dominion Republic ..... Bank of Nova Scotia

The Bank of Nova Scotia announces the following transfers of managers: F. H. Gilroy, from Brussels, Ont. to Petrolea, Ont.; C. G. Walker, from Petrolea to Sudbury, Ont.; E. A. Dixon, from Sudbury to Brussels.

G. I. Alexander, formerly manager of the Imperial Bank at Ingersoll, has been appointed manager of the branch at Walkerville, Ont.

J. A. Woods, western superintendent of the Bank of Toronto and manager of the office in Winnipeg, has resigned, and will join the staff of the National City Bank of New York. He will be succeeded by J. F. Marsh, of Toronto.

## ADVANTAGES OF THE GROSS SALES TAX

Would be Both Practicable and Productive—Consumer Would Pay, But Not Too Heavily

By V. KENNETH JOHNSTON

AS one means of raising revenue it is understood that the Minister of Finance is seriously considering the imposition of a gross sales or turnover tax in accordance with the recommendations and proposals formulated at a meeting of Canadian merchants and business men at Toronto.

The gross sales or turnover tax has been advocated for some months in the United States as a fair, practicable and highly productive tax, the revenues from which, it is hoped, will bridge the chasm between receipts and expenditures of the federal government and provide a means of decreasing the national debt. It has been estimated in the United States that the imposition of a one per cent. sales tax will produce a revenue varying, according to different estimators, from two to six billions of dollars per year. While this seems enormous and beyond the bounds of reason, the Finance Committee of the United States Senate itself estimates the yield of such a tax at four and one half billions. The tax in Canada would, however, yield only a fraction of that amount, the estimate given by the meeting in Toronto, being only some 120 millions. This amount for a population of slightly over eight millions is fairly large but in no sense could be considered oppressive since the intention is to repeal some of the minor business taxes and get the bulk of revenue from customs, income taxes and the sales tax.

### A Banker's Views.

Commenting on the proposals for the imposition of this tax, it will be remembered, Sir Edmund Walker in his address at the annual meeting of the Bank of Commerce, said:

"As against the 'luxury' taxes now happily at an end, we have steadily urged a turnover tax of one per cent. on sales of commodities. We are aware that criticism, only however regarding certain details, of this form of tax have been made in the Tentative Report of the Tax Committee of the National Industrial Conference Board of New York, but these have been answered by the Chairman of the Business Men's National Tax Committee. One of the arguments made in the United States against it is that any tax which bears in the same rate upon the small earner as upon the large is unfair. But this is accompanied by the belief that a turnover tax would provide such a revenue as to displace the excess profits tax. *I believe it would only provide a substratum of tax revenue, in which it is true that all would join alike, paying in precise proportion to their expenditures for commodities, but the manner in which those who have larger incomes would be taxed through the income tax would provide for that difference in treatment which modern taxation recognizes.* A small tax on the sales of commodities and real property in Canada would hurt so little, would be so fair, would be so easily collected, and would produce such a very large sum, that to fail to levy it seems excusable only if it can be shown to be impracticable."

"If it can be shown to be impracticable," a tax is impracticable if it does not bring about the results desired. The first requisite is that it should produce a sufficient revenue. This difficulty is more than overcome for one of the chief objections to the one per cent. sales tax is the huge amount of revenue it will produce. If the Canadian public buys as often and as many goods comparatively as the American public, on the presumption that a one per cent. sales tax in the United States will produce four billions of dollars, on an eight million to one hundred and ten million proportion, the amount received in Canada from such a one per cent. tax would be about two hundred and ninety millions of dollars. This amount is extreme, however, and in any event the amount to be received from such a tax could be regulated by changing the percentage.

The second requisite is that it should be capable of enforcement and that it should be enforced conscientiously

against everyone who should pay it. Since the proposals are for a tax of a definite, fixed percentage on all sales, not as under the luxury taxes on some articles and not on others, the opportunities for evasion are almost negligible. Experience has shown on the other hand that in very few instances has the merchant been willing to absorb a tax in his sales price—where profits were large he may have done so, thus cutting off the amount of the tax from his profits but where profits were small and competition keen, such practices seemed to endow the Bankruptcy Courts with a very drawing kind of magnetism. If such practices were followed in the process of imposing the sales tax, the same results would follow and it is safe to assume that the tax will be passed on and those who are expected to pay it, will pay it.

### The Main Objection

The greatest objection to the sales tax is that the pyramiding of the tax on sales from the raw material man to the ultimate consumer will result in an oppressive load on the latter. After careful investigation, the Business Men's National Tax Committee of the United States reported, "The one per cent. turnover tax imposed on the sales of cotton cloth, shoes and tools, will probably amount to a pyramided tax of from 2½ to 3¼ per cent. of the price paid for the finished article by the consumer." On a pair of overalls retailing at \$8.00 per suit, the tax to the consumer, according to the same report, would be \$.24782 or about 25 cents. Thus it can hardly be asserted that the tax would be oppressive or that it would not produce a sufficient revenue.

The sales tax can thus be said to be practicable and capable of producing revenue. But there is another point. Since war debts have to be paid, is it not more reasonable that they should be paid in dollars of the same purchasing power as those with which they were incurred? If we wait till 1924 or 1937 to pay off war debts after our currency has been deflated, we or our descendants will be paying about double what we would have to pay to cancel that debt. The fair and reasonable course to follow is that the increase in the national debt caused by inflation and war activities should be paid in the same inflated currency; the sales tax will provide revenue in quantities and thus surpluses for the purpose of decreasing that increase in the national debt which has appeared since 1914.

Theoretically the sales tax can be proved capable of producing all the beneficent effects promised of it. Practically however, and in everyday working it will create for a time much friction and discontent for it inevitably will raise the price of everything we buy from two to three per cent. On the other hand everyone living in Canada will pay it directly or indirectly for everyone must live and to live necessitates buying in one form or another for no man can produce everything he needs. The result will be an equality of taxation and a decrease in the buying of luxuries and unnecessary, a tendency toward thrift and the purchase of Made-in-Canada products, all of which have been vociferously advocated by leading economists and financiers for the past year. If the sales tax is adapted in Canada, we shall have taken a forward step in a sane policy of taxation.

### BANK OF MONTREAL NOTES STOLEN

A package, said to contain about \$11,000 in Bank of Montreal bank notes, was stolen from a mail sack in Port Arthur, Ont., on April 30. The robber took advantage of the temporary absence of the mail carrier to lift the "locked" bag from the pile which was to have been despatched on the east-bound express. The sack was discovered several hours later not more than 100 yards from the depot. It had been cut open, but only the one package was missing. It is stated the robber left behind almost as much currency as he had taken away, which tends to the belief that he had advance information that the Bank of Montreal package was to go out on the train. No arrests have yet been made.

## NO CHANGE IN STATE OF TRADE

R. G. Dun and Co.'s *Trade Review* of May 7 will describe Montreal business as follows: The feature of the week is the very light failure list, only three minor insolvencies being reported in the district, with liabilities of about \$36,000. From the province of Ontario and eastward, remittances are fair to good, though conditions in the pulp, paper and fishing industries affect collections in some quarters. In general trade conditions there has been little recent change, and the return to normal activity is a process of slow growth. Manufacturing operations in heavy lines are undergoing some curtailment, and the iron market shows little present life. Manufacturers of paints, varnishes, etc., report some improvement in the demand, though under recent depreciated values, some lines are being sold at a loss. April showed an improved movement in leather with sales being still fairly maintained. In dry goods cautious buying is still the rule, but while business is much below the figures of a year ago, the aggregate is a little ahead of this date in 1919. Blouse and costume manufacturers continue to be well employed, but conditions in the general clothing trade are not encouraging. There is little indication of any improvement in the general woollen business, and there are reports of sales at heavily cut prices, and also of some considerable shipments in the way of goods being returned to the manufacturers in Britain. Fur travelers now out with full lines of samples of fall goods are meeting with rather poor encouragement so far. There is little new to be noted in groceries which show a fair distribution. Sugars are easy at the late decline, with some anticipation of a further price revision. Canned goods are selling freely, but there appears to be a plethora of jams in the hands of both wholesalers and retailers.

## WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended May 5, 1921, compared with the corresponding week last year:—

	Week ending		Changes.
	May 5, '21.	May 6, '20.

## For Less Service— A Lower Rate

Heretofore, when you asked the long distance operator to connect you with a distant telephone, even though you said to her, "Anyone at that number will do," you paid the same rate as if you had specified a particular person.

Now, a rate is in effect for this type of call ("Station-to-Station" service) which is lower than for calls where a particular person is wanted.

The operating cost and use of circuits involved in handling a call for a particular person are much greater than for a message where the calling party will talk with anyone who answers the distant telephone.

It is a real economy, when placing long distance calls, to say whenever possible, "Anyone at that number will do."

*Every Bell Telephone is  
a Long Distance Station*

THE BELL TELEPHONE COMPANY  
OF CANADA

## A Trust Company's Charges

CONTRARY to popular belief, a trust company receives no more remuneration for its services than does a private executor or trustee. The amount is based on a percentage of the funds handled and is fixed by the Courts when the accounts are audited.

Consider the following advantages which a trust company offers you:

- It is financially responsible.
- It is always available.
- Its officers have wide experience in the management of estates and trusts.
- It maintains an up-to-date accounting system ensuring accuracy.
- It furnishes statements to beneficiaries at regular intervals.
- It keeps all papers and documents in Safety Deposit Vaults.

These and many other advantages can be secured at no greater cost than private trusteeship. You can readily see, therefore, that trust company service is the more efficient and less expensive for you in the end.

*We solicit your business.*

*Interviewers and correspondents invited.*

# Canadian Loans Accounts Increased in March

But Call Loans Abroad Showed Large Reduction, According to the March Bank Statement—Municipalities Are Borrowing Heavily—Deposits Changed But Little—Cash Holdings Were Lower, While the Ratio of Liquid Assets Also Decreased.

	March, 1920.	February, 1921.	March, 1921.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand .....	\$ 657,412,028	\$ 561,578,474	\$ 560,937,663	-14.8	- 0.2
Deposits after notice .....	1,197,719,570	1,318,855,482	1,319,142,196	+10.2	+ 0.7
Current loans in Canada .....	1,322,267,030	1,266,235,381	1,280,982,873	-11.5	+ 1.1
Current loans elsewhere .....	183,642,658	163,044,476	164,093,930	-10.4	+ 0.6
Loans to municipalities .....	62,992,675	67,719,881	73,229,646	+17.8	+ 8.9
Call loans in Canada .....	128,233,310	112,680,497	113,818,308	-11.8	+ 0.9
Call loans elsewhere .....	205,202,133	190,413,527	168,598,046	-18.0	-11.6
Circulation .....	231,220,770	211,640,296	215,931,035	- 6.9	+ 1.9

WITHIN the past few weeks American bankers have been receiving gold from all parts of the world, and in such quantities that they have been wondering what to do with it, with the result that the reserve ratio of United States banks, as a whole, has risen rapidly. The March statement of the Canadian chartered banks indicates that our bankers have not been confronted with such a situation. In fact, their cash assets have been considerably reduced, as the following figures will show:—

Gold and sub-coin in Canada .....	+ \$ 4,034,935
Gold and sub-coin elsewhere .....	— 951,704
Total change .....	+ \$ 3,083,231
Dominion notes in Canada .....	— \$19,032,011
Dominion notes elsewhere .....	— 354
Total change .....	— \$19,032,365

But a substantial increase in bank balances offset the poorer cash position, and resulted in an increase in the ratio of quick assets to liabilities to the public from 22.92 per cent. in February to 23.83 per cent. in March.

After taking into consideration the reductions in security holdings and the big drop in call loans abroad, the liquid position of Canadian banks, as a whole, was considerably below that of the previous month, the ratio of liquid assets to liabilities to the public in March being 48.17 per cent., as compared with 48.88 per cent. in February.

Last September, when the current loans were at their peak, the ratio of quick assets was 22.44 per cent., while the ratio of liquid assets was 45.92 per cent., so that it will be readily seen that the bank's position in this regard has improved considerably.

Turning to other sections of the statement shows that loans, on the whole, are about the same as they were in February. There has been a big reduction in call loans in New York, and it seems that the proceeds have been used for the demands from commercial enterprises here and for municipal loans. The course of the current and call loans in Canada during the past thirteen months is given in the following figures:—

Loans.	Current in Canada.	Call in Canada.
1920—March .....	\$1,322,267,030	\$128,233,310
April .....	1,347,238,230	125,644,859
May .....	1,349,079,981	119,114,493
June .....	1,365,151,083	115,272,587
July .....	1,377,276,853	115,360,894
August .....	1,385,470,153	113,598,923
September .....	1,417,520,756	114,669,611
October .....	1,405,401,227	113,135,902
November .....	1,357,973,118	108,471,340
December .....	1,301,804,342	114,703,246
1921—January .....	1,264,490,463	112,474,318
February .....	1,266,235,381	112,680,497
March .....	1,280,982,873	113,818,308

The following figures form an interesting survey of the trend of the principal loans accounts in recent years:—

Mar.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1916 ...	\$ 770,139,526	\$ 52,705,827	\$ 81,747,512	\$141,889,989
1917 ...	843,054,466	83,551,225	76,478,708	161,616,735
1918 ...	886,995,222	102,317,679	74,257,877	167,296,701
1919 ...	1,117,197,446	123,984,608	87,601,337	160,116,443
1920 ...	1,332,267,030	183,642,658	128,233,310	205,202,133
1921 ...	1,280,982,873	164,093,930	113,818,308	168,598,046

The heavy increase in advances to municipalities is explained by the budgets of the towns and the cities of the Dominion. During the past few weeks, many municipalities have struck tax rates showing increases over the previous year. The demand for funds is large, and loans are being made in anticipation of tax collections.

There was very small change in demand and savings deposits, as illustrated by the figures below. It is encouraging to note, however, that the savings of the people have not been impaired by the trying circumstances of the past winter:—

	Deposits on demand.	Deposits after notice.
1920—March .....	\$657,412,028	\$1,197,719,570
April .....	652,918,760	1,209,573,990
May .....	615,957,229	1,229,073,515
June .....	639,622,583	1,243,700,977
July .....	639,415,025	1,253,170,443
August .....	640,361,707	1,261,647,732
September .....	677,286,905	1,270,194,097
October .....	687,651,781	1,271,275,751
November .....	686,754,094	1,292,009,008
December .....	657,496,742	1,293,007,488
1921—January .....	584,025,710	1,313,093,870
February .....	561,578,474	1,318,855,482
March .....	560,937,663	1,319,142,196

Business depression has resulted in the reduction of credit balances of our corporations during the past year, but this decline has been more than offset by the saving deposits. The following table shows this:—

March.	On demand.	After notice.	Total.
1916 .....	\$389,165,388	\$ 738,169,212	\$1,127,334,600
1917 .....	448,151,528	888,765,698	1,336,917,226
1918 .....	561,042,236	921,080,803	1,482,123,039
1919 .....	566,797,268	1,037,851,766	1,604,649,034
1920 .....	657,412,028	1,197,719,570	1,855,131,598
1921 .....	560,937,663	1,319,142,196	1,880,079,859

Other deposit accounts show that, on the whole, the banks had about the same amount of funds at their disposal as in February. Deposits abroad decreased by about \$5,000,000, while balances due to provincial governments declined by a similar amount. But the credit balance of the Dominion government increased to \$114,272,486, from \$105,121,289.

### Make Your Money Work to Earn More Money for You

Make it earn 4% per annum in a Savings Account instead of less. You wouldn't refuse an increase in your wages, would you? Then why refuse an increase in the interest on your Savings Account? It's as simple as A B C.

The Union Trust Company will pay you interest at 4% per annum, compounded regularly. Come and open your account here. If you cannot conveniently call, open your account by mail. Deposits promptly acknowledged and withdrawals by mail accurately and safely despatched.

### When You Are Among Those "Next of Kin"

When a man dies without leaving a will, the members of his family find themselves in much confusion. What is to be done about the business? How are these securities to be divided?

If that happens to you, or to any friend of yours, remember that the shortest cut out of the confusion is a petition to the Court for the appointment of **The Canada Permanent Trust Co.**

as administrator of the estate. A prompt settlement follows,—as equitable to all parties as the law permits.

The fact remains, however, that no settlement of an unwilld estate can ever be satisfactory to everybody. Someone will have a lifetime of thinking,—"I know Father would have planned things so differently."

The only way is to make your will, naming as your Executor

**The Canada Permanent Trust Co.**

Your family is then assured smoothness of settlement, security in your estate, and that just division which only you can make.

### The Canada Permanent Trust Company

### Capital and Reserves

No change was recorded in the authorized capital, but the additions to paid-up capital and reserve were fairly substantial, as follows:—

	Capital subscribed.	Capital paid up.	Reserve.
Merchants	\$ 300	\$ 33,140	.....
Standard	21,600	50,303	\$ 37,727
Provinciale	.....	40	.....
Royal	.....	53,200	26,600
Hamilton	.....	410	205
Home	.....	108	.....
Sterling	.....	117	.....
Totals	\$ 21,900	\$ 137,318	\$ 64,532

### Letters of Credit

There are three other factors deserving of consideration. One of these is the "letters of credit" account. The liabilities of customers in this regard at the end of March totalled \$32,221,442. The trend of this account in 1920 was between forty-two and fifty millions. With the falling off

in our buying abroad and in the curtailment of operations of Canadian business men in the foreign field, there has naturally been a lower demand for the convenience offered by our banking institutions.

The greatest amount of notes in circulation showed an increase for the month of nearly 2 per cent. This would seem to reflect an increase in buying movement, although, on the other hand, there is the fact that as a general rule in March, most of the lumbering camps are paid off.

As regards security holdings, the only account to show any change of importance was that of "Canadian municipal and British, foreign and colonial." There was a decline of about \$6,500,000, which can be largely attributed to the payment of the monthly instalment by the British government on their loan, in accordance with the terms made last year.

Permission has been granted the city of Winnipeg to appear before the Privy Council with its case against the decision of the Public Utilities Commission authorizing increases in street car fares. The Manitoba Appeal Court, which upheld the commissioners' ruling in recent judgments, granted the permission.

## The Saskatchewan Mortgage and Trust Corporation Limited

(Trustee under Bankruptcy Act)

offer you the benefit of their experience as

**EXECUTORS, ADMINISTRATORS, TRUSTEES,  
MANAGEMENT OF ESTATES, ETC.**

MONEY TO LOAN ON IMPROVED FARMS  
AND MODERN CITY PROPERTY

**REGINA - - - SASK**

## A BOND FOR \$100

\$100 or more invested in a "Canada Permanent" Bond for ONE YEAR will earn interest at FIVE PER CENT. per annum, payable half-yearly. A higher rate is paid on longer term investments. Interest begins the day the money is received, and the Bond will be made to become due on any date the investor desires.

The Bonds are issued in small sums and for short terms to enable those of moderate means to obtain a high grade security yielding a fair return and still have their funds available within a reasonable time. Small amounts should not be allowed to remain idle when they can be employed to such good advantage as by investing them in these Bonds.

The Corporation has been issuing these Bonds for nearly half a century. They are a first charge against its assets, which amount to over \$33,000,000.

**Canada Permanent Mortgage Corporation**  
14-18 TORONTO STREET - TORONTO  
Established 1855

## THE DOMINION SAVINGS AND INVESTMENT SOCIETY

Masonic Temple Building, London, Canada

Interest at 4 per cent. payable half-yearly on Debentures

T. H. PURDOM, K.C., President NATHANIEL MILLS, Manager

## THE Ontario Loan & Debenture Co.

LONDON INCORPORATED 1870 Canada

CAPITAL AND RESERVE FUND \$1,000,000

**5½%** SHORT TERM (1 TO 5 YEARS) **5½%**  
**5½%** DEBENTURES **5½%**  
YIELD INVESTORS

JOHN McCLARY, President A. M. SMART Manager

## London and Canadian Loan and Agency Co., Limited

ESTABLISHED 1873 51 YONGE ST., TORONTO

Paid-up Capital, \$1,250,000. Reserve Fund, \$1,000,000. Total Assets, \$5,067,253

Debentures issued, one hundred dollars and upwards, one to five years. Best current rates. Interest payable half-yearly. These Debentures are an Authorized Trustee Investment. Mortgage Loans made in Ontario, Manitoba and Saskatchewan.

WILLIAM WEDD, Secretary W. C. NOXON, Managing Director

## THE TORONTO MORTGAGE COMPANY

Office, No. 13 Toronto Street

Capital Account, \$724,550.00 Reserve Fund, \$700,000.00

Total Assets, \$3,168,500.00

President, WELLINGTON FRANCIS, Esq., K.C.

Vice-President, HERBERT LANGLOIS, Esq.

Debentures issued to pay 5½%, a Legal Investment for Trust Funds.

Deposits received at 4% interest, withdrawable by cheque.

Loans made on improved Real Estate on favorable terms.

WALTER GILLESPIE, Manager

## Six per cent. Debentures

Interest payable half yearly at par at any bank in Canada. Particulars on application.

**The Canada Standard Loan Company**  
520 McIntyre Block, Winnipeg

**5½%**

**Absolute  
Security**

OVER 200 Corporations, Societies, Trustees and Individuals have found our Debentures an attractive investment. Terms one to five years.

**The Empire  
Loan Company**

WINNIPEG, Man.

## Canadian Financiers Trust Company

Head Office - Vancouver, B.C.

**TRUSTEE EXECUTOR ASSIGNEE**

Agents for investment in all classes of Securities.  
Business Agent for the R. C. Archdiocese of Vancouver.  
Fiscal Agent for B. C. Municipalities.

Inquiries Invited

General Manager Lieut.-Col. G. H. DORRELL

J. C. SAUNDERS, Deputy Minister of Finance.

### MARITIME MANUFACTURERS' ANNUAL MEETING

Criticism of freight rates, which one speaker said made it impossible to do business with the rest of Canada, was one of the features of the annual meeting of the Maritime Branch of the Canadian Manufacturers' Association, held in St. John, N.B., on April 28. J. E. Walsh, general manager of the Association, reviewed its history and work.

A. D. Ganong said that with the manufacturers it is not a question of paying dividends but of saving capital invested. He paid a tribute to his own employees and said his company had not had any labor trouble. He agreed that the present freight rates put the east under a great handicap. No poor goods are made in the east, because of the superior intelligence of the workmen, and the industries here have prospered accordingly, but lower rates should be forthcoming. The home market, which is after all the best market, must be developed. He urged employers to do more for their men.

W. S. Fisher said the time had come for a concerted action to bring freight rates back to the pre-war level and give industry a chance. Industries must produce more than we can use and seek a good market for the surplus. The balance of trade in favor of the United States over Canadian was \$400,000,000. If we went in for more exports this would not be so. There is a great future in store for these provinces, but they must get busy. A. M. Belding said he thought English capitalists should be called on to help develop Canada's natural resources. The press is always ready to give publicity to anything that will tend to help the country.

A meeting of thirty-five of the agents of the New York Life, was recently held in Winnipeg, the visitors representing Saskatchewan, rural Manitoba and parts of western Ontario. Charles H. Langmuir, of New York, superintendent of agencies, delivered several addresses to the agents.

**DIVIDENDS AND NOTICES**

**BANK OF MONTREAL**

Notice is hereby given that a DIVIDEND of THREE per cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, payable on and after WEDNESDAY, the FIRST DAY OF JUNE next, to Shareholders of record of 30th April, 1921.

By order of the Board,

FREDERICK WILLIAMS-TAYLOR,  
General Manager.

Montreal, 22nd April, 1921. 542

**THE ROYAL BANK OF CANADA**

The Transfer Books will be closed from the 17th to the 31st day of May, both days inclusive.

By order of the Board,

H. B. SHAW,  
General Manager.

Winnipeg, April 19, 1921. 547

**DEBENTURES FOR SALE**

**CITY OF SASKATOON**

**Debenture Issue—\$201,000**

Sealed tenders will be received up to 12 o'clock noon, Monday, May 23rd, 1921, for the purchase of the following sinking fund debentures of the City of Saskatoon, viz.:—

- \$ 92,000 30 years, 6%
- 13,700 30 years, 5%
- 71,000 20 years, 6%
- 27,300 15 years, 6%

\$204,000

The 6% debentures are dated July 1st, 1921, and the 5% debentures are dated April 1st, 1917.

Principal and interest are payable in Canada only.

Tenders to be addressed to the City Commissioners and marked on the outside of envelope, "Tender for debentures."

The highest or any tender not necessarily accepted. Further particulars on application.

A. MACG. YOUNG, Mayor.  
ANDREW LESLIE, City Commissioner.

Saskatoon, Sask. 543

**TENDERS FOR DEBENTURES**

Tenders will be accepted up to 2 p.m., June 11th for \$10,000.00 Vermilion Municipal Hospital District No. 2 debentures. This debenture is to complete over-expenditures made in construction and equipment of Hospital. Term of debentures twenty years, repayable in equal annual payments of principal and interest. Rate of interest seven per cent., and is a debt on the District at large.

Highest or any Tender not necessarily accepted.

Apply to,

D. TAYLOR, Secy.-Treas.,  
Vermilion Munic. Hos. Dist. No. 2.

Vermilion, Alta. 549

**Condensed Advertisements**

"Positions Wanted," 3c. per word; all other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 65c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

SECRETARY-TREASURER, age 30, of large company in British Columbia, desires change and wishes connection in similar capacity with well-established company anywhere in Canada or United States. First-class accountant, with excellent credentials; the more responsibility to be assumed, the better. Prepared to report immediately for interview for any legitimate proposition. Apply by wire or letter to H. Anscob, 1921 Government St., Victoria, B.C. 546

**WANTED**

GUARANTEE AND CASUALTY DEPARTMENT MANAGER for well-established Canadian Company, Head Office, Winnipeg, entering above business. Must have thorough Head Office knowledge of various classes, including good Underwriting experience. State age, experience and references. Apply Box 409, *Monetary Times*, Toronto.

## NEW BRUNSWICK FUNDS RAILWAY DEBT

## Legislature Asks Dominion to Take Over St. John Valley Railway—Summary of 1921 Legislation

OUT of 102 bills presented at the session of the New Brunswick legislature, which closed on April 16, only four failed to pass, the government measure for the superannuation of civil servants being one of them. The late measures included an act to increase the sessional indemnities of members, and an act providing for the sale of the old Government House property to the Dominion government for \$50,000, this sum to constitute a trust fund and the interest thereon applied to the maintenance of an official residence. Resolutions were also passed demanding that the federal government take over the St. John Valley Railway, constructed by the province at a cost of \$7,000,000, and regarding the rights of the maritime provinces in freight rates.

In a discussion of the Provincial Loans Act, Premier Foster stated that it had been necessary to sell one or two 6 per cent. loans under par. As the act only authorized the payment of 6 per cent. the legality of the issues had been questioned, and an amendment was therefore desirable.

Regarding the water powers on the St. John River at Grand Falls, the Grand Falls Co. is granted two years' extension under condition that by May 1, 1923, they shall have expended \$150,000 on actual construction work, and a provision has been made whereby a preference will be given consumers in New Brunswick desiring electric energy from the Grand Falls and the matter of rates to be charged for same, etc., will be under the control of the Public Utilities Commission.

A bill to incorporate the Albertite and Oil Shale Co. of Canada, Ltd., brought about a general discussion of the rights in shale, natural gas and oil in Albert and Westmorland counties, and it was pointed out that the company were desirous of going on with their development by the retort process and their representative expressed a willingness to have the public utilities committee fix the terms upon which the New Brunswick Oil Co., Ltd., should supply the natural gas required by the company for carrying on its work.

An amendment to the Corporations Tax Act of 1920 requires every telegraph company to pay 1 per cent. of its receipts within the province, and limits the license or special tax by cities, towns and municipalities to the sum payable at the time the Corporations Act was passed. An Act relating to the Board of Public Utility Commissioners, provides that every corporation operating a public utility shall annually make a return to the provincial secretary-treasurer, showing a statement of assets, liabilities, receipts and expenditures; also that in future copies of orders by the board shall be forwarded to the provincial secretary-treasurer.

Acts were also passed to regulate the tolls of the South-west Boom Co., to incorporate the Port Canada Docks Railway, to authorize the municipalities of Kent and Albert to make temporary loans, and for fire prevention in Lancaster.

## Valley Railway Debts Funded

Explaining the act respecting the St. John and Quebec Railway, Premier Foster stated that the first clause of the bill provided for the funding of debts incurred during the construction of the road. This would include \$134,449 paid out of consolidated revenue, for interest during construction, and \$42,000 outstanding on October 31, 1920, for capital expenditure, besides \$73,000 needed to clean up outstanding accounts. The maximum amount to be bonded, therefore, under the first clause, was \$250,000. There was a suit pending with the Bank of British North America in which \$33,000 was involved, and claims not yet arbitrated upon amounted to \$25,000, and when provision was made for those amounts he hoped it would be the last.

The second clause provided for the funding of the net interest charged up to October 31, 1920, amounting to \$252,351, which amount had been paid by the province after its

share of the earnings had been deducted. The third clause would provide for the balance of three years' interest at the rate of \$250,000 per year, making a total of \$750,000 up to the end of 1922.

He said that the time for the construction of the line from Centerville to Andover would expire on December 31, 1921, and the agreement with the Dominion government for a subsidy would expire at the same time. Under the bill it was proposed to extend the time until December 31, 1923. He would say frankly that he had no political object in making the extension, but he thought it advisable to have it done in case something arose which would make it necessary to extend the road.

With respect to running rights from Westfield to St. John, he had been under the impression prior to the opening of the line for traffic that the Dominion government would make the necessary arrangements. Negotiations had been carried on, but without result. When the line was opened in October, 1919, the provincial government had to become responsible to the C.P.R. for a reasonable rental. A tentative agreement was drawn up and the rental was fixed at 3 per cent. on the value of the railway from St. John to Westfield, which the company placed at \$3,000,000. That made the annual rental \$90,000, which the government considered excessive, and the C.P.R. evidently thought so too, for it consented to a modification. The C.N.R. authorities refused to pay over any portion of the earnings to the province until the running rights had been provided for. He had met President Beatty, of the C.P.R., in Montreal, whom he had found very reasonable and disposed to act fairly with the province. After going fully into the matter President Beatty consented to accept a fee of \$2 per train mile for the fourteen odd miles of road. As there were four trains a day, it brought the rental up to \$35,000 per annum. The president had refused to enter into an agreement for any lengthy period, the best he would consent to was a term of three or six months.

A bill introduced by Joseph Steele, Labor member for Cape Breton, asking for a commission to inquire into old age pensions, health and unemployment insurance, was given the three months' hoist, as relating to matters coming under federal jurisdiction.

## POST-OFFICE SAVINGS BANKS

Deposits in the post-office savings banks showed an increase in February of more than \$70,000, but withdrawals increased from \$759,373 in January to \$898,940, thus reducing the amounts at the credit of depositors by a similar amount. The following are the February details:—

## REINSTATEMENT OF LIFE POLICYHOLDER

### Great-West Life Required to Pay Under Disputed Policies— Notice to Insured of Reinstatement Not Necessary

“A LIFE insurance policy contained the following provisions: (1) If default be made in the payment of the first or any subsequent premiums or any part thereof, or of any note, cheque or other obligation given on account thereof this policy shall be void; (2) should this policy lapse it will be reinstated at any time upon the production of evidence of insurability satisfactory to the company and the payment of all overdue premiums and any other indebtedness to the company upon the policy with interest at the rate of 6 per cent. per annum compounded annually from the date of lapse.”

In the case of Clarke vs. Great-West Life Assurance Co. the court held, on the facts and in view of the above provisions in the policy that when the company, through its agent, was satisfied as to the health of the insured at the time of payment of overdue premiums, it was not necessary to inform insured as to his reinstatement before it took effect.

The facts of the case and the judgment of the Court are as follows:—

“This is an action to enforce payment of two life insurance policies on the life of Dr. Clarke, the husband of the plaintiff, who died on December 8, 1918. The defence is that the policies lapsed before the death of the assured, for the non-payment of a quarterly payment on one of the policies and the non-payment of instalments due under promissory notes given for past due premiums, and that no evidence of the insurability of the deceased satisfactory to the defendant was furnished by assured after the lapse of the policies and prior to his death.

#### Paid Up Shortly Before Death

“The quarterly premium was due on September 24, 1918, and was for the sum of \$36.85. On September 18, the company wrote the assured calling his attention to the fact that the premium would be due on the 24th of that month, and again on October 10, they wrote him that the days of grace would end on October 24, and on October 23 he sent them a cheque for that amount. The company appropriated the cheque on past due indebtedness, but the jury have found, and I am of the opinion that the evidence justified them in so finding, that the assured appropriated this payment to the premium due September 24.

“The other payments, for non-payment of which it is claimed the policy lapsed, were the monthly payments on the notes for past due premiums due on the 16th days of September, October and November. The payment which fell due September 16, not having been paid, the policy lapsed. An application for reinstatement, dated October 9, was sent in, but, for some reason, was not accepted, and a new application for reinstatement was sent in on October 28, and the instalments due on the notes on September 16 and October 16 were paid. On November 22 the company accepted evidence of insurability of the assured up to October 28, and forwarded the same to Wright, their agent in Regina.

#### Evidence as to Reinstatement

“The policies became void on September 16, 1918, and, before they could be reinstated, evidence of the insurability satisfactory to the company would have to be produced and all overdue premiums and other indebtedness paid. As the head office of the company was in Winnipeg, it was not possible for them to get evidence of insurability up to the time of reinstatement. It was therefore their practice to pass upon the evidence of insurability sent into them, and then forward the same to their agent at the place where the insured lived, for him to collect all overdue payments and satisfy himself that assured was still in good health. That was done in this case, and the jury have so found.

“The company contends that it was necessary to inform the insured as to his reinstatement before it takes effect. Upon this point the jury has found that Wright on December 2, 1918, told Miss Williams (Dr. Clarke's book-

keeper) that, if she did not hear from him or the defendant company within three or four days, she could rest assured the policies would be all right. As there was evidence upon which they could make this finding, it, in my opinion, satisfies the above contention.

“I am therefore of the opinion that all arrears on both policies were paid on December 2, 1918, and that on that date the company had accepted evidence of the insurability of Dr. Clarke and reinstated the two policies.”

## INFRINGEMENT OF COPYRIGHT

### Copyrighted Book to be Used Only for Verification—All Information Must be Secured at First Hand

IN the case of Emmett vs. Meigs, an appeal to the Alberta Supreme Court from the judgment at the trial dismissing the plaintiff's action for infringement of a copyright, it was held that it is an infringement of a copyright for a subsequent compiler of a guide book to take any information from the copyrighted book; the only use he can make of the previous publication is to verify his calculations and results after independently working out the subject matter for himself. The facts and decision of Chief Justice Harvey are as follows:—

“Emmett has for several years been the publisher of an automobile road guide for Manitoba, Saskatchewan and Alberta. The issue for 1919 is called the 7th edition, that for 1918 the 6th. After the publication of the 1919 edition the defendants published an automobile road guide for Canada and United States and in doing so the plaintiff claims that they infringed his copyright of his 1919 edition. Meigs' guide gives particulars of many roads not included in the Emmett's guide, but there are many common to both, though in most cases the particulars of Emmett's guide book are much fuller but in both the chief places on the road are given with the mileage from place to place.

“Emmett swears that all the information in his guide book is obtained from actual observation and measurements. Meigs admits that he did not so obtain the material for his guide book, but denies that he obtained any of it from Emmett's guide books. His explanation of the manner in which he did obtain it is by no means convincing, and apparently did not convince the trial judge, Justice Scott, for he expresses the view that the material for Meigs' guide book was taken from Emmett's 1918 guide book and gives leave to amend. It was found, however, that at the time of trial the 1918 guide book had no copyright, and the action was therefore dismissed with costs.

“A comparison of the particulars in the two books of one route in respect of which Emmett claims an infringement that from Winnipeg to Elkhorn, shows that of 24 distances shown, 8 differ from those shown in Meigs' 1918 edition, and of these 7 correspond with Emmett's 1919 edition, 4 of which are corrections from the 1918 edition, and in addition two new places and distances are given which are in Emmett's 1919 edition, but not in either 1918 editions. I find myself quite unable to accept Meigs' testimony that he did not use Emmett's book to obtain this material and in doing so he was infringing Emmett's copyright.

“In my opinion this establishes Emmett's right of action and in view of the fact that since action was begun practically the whole edition complained of has been burned by accidental fire there is little more for Emmett to gain. He is, of course, entitled to a permanent injunction restraining the publication of the book with the objectionable matter.”

The Canadian Wheat Board has decided to close its Toronto office on May 31. In consequence of this, it will be necessary for them to stop making payments on participation certificates on 15th inst. There are still some certificates outstanding, and holders of these would be well advised to turn them in before the latter date.

# News of Industrial Development in Canada

**Newsprint Situation Will Change For the Better in Few Months. According to an Authority—Conditions in Europe Are Not Very Bright—Automobile Trade is Reviving — Plants of Ford and Studebaker Companies Are Running on Full Time — Ontario Government to Manufacture Cement.**

WHATEVER industrial expansion has taken place this year in Canada, having particular regard to the establishment of branch plants and the extension of already existing factories, the participation of foreign capital has been small. This is only natural, of course, for even our own companies found it necessary to adopt a rigid policy of retrenchment. Not only was there no need for further factory space, but the existing plants were found to be out of proportion to the marketable production.

Just recently, however, there has been a revival of interest by United States manufacturers and also of British companies. Enquiries which have been received here have not been of a very definite tone, but such a movement should at least indicate a healthier spirit of optimism. Manufacturers are still disposed to move cautiously, until there is a definite turn in trade, but it is encouraging to think that when the period of depression is really passed, and industry is again ready to take the offensive, there will be no lack of capital.

## Pulp and Paper Trade

Returning from a trip abroad, G. F. Steel, general manager of the Canadian Export Paper Co., states that in his opinion the present abnormal condition of the newsprint would change for the better in the next few months. "During my six weeks' trip abroad," he said, "I came into intimate contact with the largest producers of newsprint paper of Finland, Norway, Sweden, Germany, England, Belgium and Holland. Owing to the present world-wide disturbance of general business the producers of this grade of paper in Europe as well as in Canada and the United States have experienced a rather sharp falling off in demand as compared with the feverish and unhealthy situation which existed a year ago. This is especially in evidence in England, where business conditions seem to be more depressed than in other paper-consuming countries.

"Owing to the inequalities of exchange, foreign offerings of paper are current in England at prices far below the cost of British manufacture, and many mills are facing disaster, if not ruin. This also applies to many English newspapers, whose supply of paper has been arranged during the past for periods running through this year, and in some cases well beyond this year. Here, again, we found the unfortunate effects of fluctuating and unstable markets, which are not desirable from the viewpoint of either the buyer or the seller.

"This same state of affairs is, of course, also to a less extent affecting the outlook in the manufacture of paper and the publishing of newspapers in Canada and America. Here, however, the most enlightened and far-visions publishers are averse to rapid declines in the selling price of newsprint paper, believing that such a decline probably would have a disturbing effect on the stability of the publishing business. While there are a few large companies in America, and more particularly in Canada, which are especially well equipped and so thoroughly self-contained that they can produce paper at very low costs, there are a multitude of smaller concerns making paper from raw materials contracted for at earlier dates, which would be greatly embarrassed by drastic declines in the selling price of paper. It is certainly not to the advantage of the buyer that these concerns should be crippled or destroyed by a disturbed paper market, for the violent fluctuations in the price of paper in the past are largely due to causes which are now producing such unfavorable and unfortunate conditions abroad. It is believed by those best informed that the present situation is abnormal and temporary, and that another six months may tell quite a different story."

In correction of an editorial statement in *The Monetary Times* of April 15, F. Law, president of the Oak Tire and Rubber Co., Toronto, points out that this company is not one of those having no established plant or connection. It has been doing business since 1916, and has branches at Toronto, Montreal and Winnipeg. Regarding its present position, Mr. Law adds: "Throughout the entire depression our factory at Oakville has been running continuously, and we have not laid off one man. At the present time we are working 23 hours per day to full capacity.

"Our sales for the year 1920 were 79 per cent. greater than for 1919, and this year promises to exceed all previous records. We are not committed to any large contracts for high priced fabrics and rubber, and we stand good financially." This experience of the Oak Tire is in contrast to that of other rubber companies, which have been severely hit by dull business.

## Automobile Industry Brightening

Work has started on a full time basis at the plant of the Ford Motor Co. of Canada, at Ford, Ont. Speaking of the situation, W. R. Campbell, secretary of the company stated that this is the peak of the automobile season, and there seems to be an extra demand for cars. During the past six months the Ford plant has been running only four days per week, while the American plant in Detroit has been running but 60 per cent. of capacity.

This statement is corroborated by the words of E. C. Mackie, general manager of the Walkeville factory of the Studebaker Corporation of Canada. "Our domestic trade is much better than at this time last year," said Mr. Mackie. "For several weeks our factory has been running on full time production, and all indications point to a very busy year for the local plant. We cannot build enough cars to fill our orders and at the present time we are considerably behind in our production."

The Transportation Commission of the Toronto Street Railway has placed an order for one hundred motor cars and sixty trailer cars with the Canada Car and Foundry Co. of Montreal. The contract price is in the neighborhood of \$1,270,000, and is exclusive of electrical and air-brake equipment, which will be purchased under separate contracts from Canadian or British firms, or possibly both.

Work at the large pulp and paper plant, forming part of the Gatineau Co., Ltd., and situated at Kipawa, which ceased some time ago, throwing a number of men out of employment, is likely to be resumed around May 15th. Information to this effect has been received in the city from the head office of the Riordon Co., Ltd., Montreal, of which the Gatineau Company forms a part.

The Ontario legislature has approved of a vote of \$1,000,000 for the carrying out of Hon. F. C. Biggs' scheme to establish a provincial cement plant. The minister explained that the amount voted would build a one-unit plant with a capacity of something over 300,000 barrels annually, which would be sufficient to supply the needs of the province for its provincial highway program. He stated the location of the plant had not been decided upon, but that the department was negotiating for options on alternative sites.

Thomson Textiles, Ltd., a newly organized company, which purposes erecting a large plant at Whity, Ont., for the manufacture of hosiery and other similar articles, has purchased an acre of land on the Kingston Road from Samuel Bisney. The firm at present has a plant in Toronto, but it is proposed to move this to Whity as soon as the new factory is completed. It is expected the company will employ 130 hands.

The Abitibi Power and Paper Co. plant at Iroquois Falls, Ont., will be closed for a month, commencing May 10 according to information received. On reopening, the reduced wage scale that has been proposed will be put in force. The prospective cut amounts to thirty per cent.

At the annual meeting of the Asbestos Corporation of Canada last week, the president, W. G. Ross, told the shareholders that the company's exports would increase as soon as the German reparations discussions and the British miners' strike were over, as they had delayed certain shipments.

### NEW INCORPORATIONS

Capital for Week Ended May 4 is \$20,359,900, Compared with \$13,676,000 Previous Week

Authorized capital of \$20,359,900 is represented by companies whose incorporations were reported to *The Monetary Times* during the week ended May 4, compared with \$13,676,000 for the previous week. A comparative summary by provinces is as follows:—

	Week ended April 27.	Week ended May 4.
Dominion . . . . .	\$ 4,372,500	\$ 2,044,000
Alberta . . . . .	1,342,000	.....
British Columbia . . . . .	225,000	2,680,000
Manitoba . . . . .	.....	250,000
New Brunswick . . . . .	.....	49,000
Ontario . . . . .	6,803,000	11,520,000
Quebec . . . . .	556,000	3,816,900
Saskatchewan . . . . .	377,500	.....
Totals . . . . .	\$13,676,000	\$20,359,900

The following is a list of companies recently incorporated under Dominion charter, with head office and authorized capital:—

The Manufacturing and Engineering Corp., Ltd., Quebec, \$100,000; Compagnie d'Importation du Canada, Ltd., Montreal, \$125,000; Dominion Coach and Livery, Ltd., Toronto, \$50,000; Lemay, Ltd., Ottawa, \$250,000; Royal Agencies, Ltd., Montreal, \$250,000; Cenrda Farm Agencies, Ltd., Winnipeg, \$125,000; Transit Steamship Co., Ltd., Montreal, \$240,000; I. ### ROYAL INDEMNITY EXTENDING SCOPE

The Royal Indemnity Company is extending its scope to include many new lines of business. Insurance against breakdowns of electric motors, generators, transformers, starting devices, etc., will be written. In addition, golfers' liability and forgery and cheque alteration insurance will be transacted by the company.

License has been issued to the Casualty Company of Canada to transact in Quebec the business of automobile and plate glass insurance. Thomas Duffly, 11 St. Sacrament Street, Montreal, is the chief agent for the province.

The National Provincial Plate Glass and General Insurance Company, Ltd., has been registered to transact in Quebec the business of fire and plate glass insurance. Arthur Barry, Royal Exchange Building Montreal, is chief agent for the province.

The Niagara Fire Insurance Co., the Springfield Fire and Marine Insurance Co., the Pacific Coast Fire Insurance Co., and the underwriting firm of J. W. Grier and Co., have moved their Montreal offices to the Lake of the Woods Building.

Robert H. Leckey, Toronto, has been appointed associate special agent of the Aetna Insurance Co. The new appointment is necessitated by the constantly increasing duties of special agent J. R. Stewart. Mr. Leckey is well known as an inspector for several years for the Canadian Fire Underwriters' Association. He assumed his new duties on May 1st, and his address is the same as Mr. Stewart's, 36 Toronto Street, Toronto.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year, a total of \$3,452,800. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

## NEWS OF MUNICIPAL FINANCE

**Burnaby's Position is Improving—New Westminster Had Deficit Last Year—Edmonton's Tax Rate is Lower, but Calgary's Shows Increase—Peterborough's Net Debt Increased in 1920**

**Nokomis, Sask.**—It is reported that the municipality is in default in payment of interest coupons.

**Sannich, B.C.**—At 20 mills on the dollar, the tax rate has been struck at the same level as in 1920.

**Calgary, Alta.**—The tax rate for 1921 will be 48.50 mills on the dollar, as compared with 45.75 last year. The 1921 rate includes 1.85 mills provincial tax.

**Quebec, Que.**—The tax rate for this year will be \$1.40 on \$100, which is the same as last year. The budget shows an increase of \$173,227 over 1920.

**Windsor, Ont.**—A by-law, setting the tax rate for the year 1921 at 28 mills as recommended by the finance committee, has been passed by the city council. Last year the rate was 34 mills.

**Okanagan, B.C.**—The municipality has decided to defer issuing further debentures until the sinking fund is brought to par. At present the city has a bonded indebtedness of \$90,000 and there is a shortage of \$12,000 in the sinking funds.

**Edmonton, Alta.**—The city's tax rate will be 39.90 mills for 1921, as compared with 45 mills in 1920. The net land and building assessment this year is placed at \$80,202,245, while in 1920 it stood at \$79,191,550. The assessment of lands in the outer zone, and which are classed as farm lands, is set at \$266,445 for general municipal and debenture interest purposes. General debenture interest and redemption will absorb \$975,351 this year, against \$898,824 in 1920.

**New Westminster, B.C.**—A deficit of \$87,568 was experienced by the city council in operating the municipal departments during 1920, according to a financial statement submitted to the finance committee by A. J. Bowell, city treasurer. It shows that total income totalled \$-28,100 and expenditures \$915,719. Failure of estimated receipts to toe the mark, and also the fact that almost every department over-expended their estimates are some of the reasons advanced to explain the deficit.

**Saskatoon, Sask.**—The city recently resolved to invest sinking fund money in the purchase of \$35,000 of these debentures, maturing June 30, 1930, bearing interest at 4 per cent., at a price of \$1.86 and accrued interest. The price offered the city would have meant an interest yield of 6.65 per cent., and, being for a term of nine years, considered a good investment for the sinking fund.

The Local Government Board, however, was of the opinion that, owing to the existing deficits and the uncertainties as to future policies respecting Canadian National Railways, it was "advisable for the city council to invest its money in other securities which at the present time are readily obtainable at high interest yield." City Commissioner Leslie did not quite see the board's reason for refusal, seeing that the bonds are guaranteed by the province of Manitoba.

**Peterborough, Ont.**—Some interesting figures on the city's financial position were given out by City Treasurer Adams last week. It will be noticed from the comparisons below that the net and gross debenture debt has increased largely. There has been an improvement in receipts and tax collections:—

	1919.		1920.	
	Gross.	Per cap.	Gross.	Per cap.
Total debenture debt ..	\$2,550,913	120.00	\$3,094,582	142.00
Net debenture debt ..	885,165	41.00	1,704,338	73.16
Total receipts, current	501,357	23.61	604,002	27.72
Taxes levied .....	480,204	22.61	570,267	26.17
Taxes paid .....	453,101		547,478	
Percentage of taxes paid .....	94%		96%	
Population .....	21,230		21,790	

**Burnaby, B.C.**—In common with other municipalities in British Columbia, the district of Burnaby has experienced strenuous times since the slump in 1913, but by adopting a conservative policy the municipality has been enabled to maintain a satisfactory financial position, which continues to improve.

Details of the balance sheet as at December 31, 1920, were published in these columns last week, showing a surplus of capital assets over capital liabilities of \$425,996, and a surplus of current assets over current liabilities of \$200,783.

Two events have taken place recently which enhance the financial standing of the municipality. Early in 1920 a Property Department was established in connection with the land acquired at tax sales through which a steady stream of sales is maintained. So successful has this department been that the proceeds of sales, together with collections of arrears of taxes, was sufficient to provide at December 31, 1920, the full amount of the sinking fund required for the redemption of the \$400,000 temporary debentures issued in 1919 and maturing in December, 1924. Purchasers of the land through the department are bona fide settlers, not speculators, and many new homes were built in 1920, necessitating some 300 new water services, and preparations are under way for even more extensive building operations during the present year.

The consequent increase of population has necessitated more school accommodation and the provision of an alternative water main, and it was to meet these needs that recent issues of school and waterworks debentures, totalling \$131,700, were made. These are the first issues for capital expenditures which have been made by the municipality since 1913.

The other event is the passing of the "Conservation of Assets" by-law. The prime object of the by-law is to reduce the overhead indebtedness of the municipality, as the fixed charges on every levy made in Burnaby amount to about 50 per cent. of the revenue. That is, when a levy of \$400,000 in taxes is made, the ratepayer can figure that only one-half of that amount is going to maintenance and works in that municipality, the balance being absorbed by interest and sinking funds on previous loans.

The act validating this by-law gives the council power to deposit the proceeds from the sale of lands received to the credit of a trust fund to meet the temporary debenture loan of \$400,000, and any moneys accumulating thereafter from the sale of the unsold balance of bonds will go into this fund to purchase outstanding bonds of the municipality when same can be secured at reasonable prices. All bonds so purchased must be cancelled and cannot be resold. Should any balance remain in this fund after said bonds have been lifted off the market, the by-law provides that all unexpended balances can, with the sanction of the Lieutenant-Governor-in-Council, be utilized on such permanent works as waterworks, roads and sewers.

## TAX DEDUCTION FROM RENTALS

Shareholders of the Atlantic and St. Lawrence Railroad are informed that the company has been required by the United States government to pay income-tax upon the rental payable by the Grand Trunk Railway Co. of Canada, and in consequence the balance in hand available for payment on account of the coupon due on March 15 will be £2 8s. 1d. (instead of the £3, the amount of the coupon) from which English income tax will have to be deducted. The American income-tax payable is at the rate of 60 cents for each \$100 share, this being equal to 11s. 11d. on the £6 payable on each £100 share by the Grand Trunk Railway Co. by way of rental for the year 1920.

The Atlantic and St. Lawrence Railroad Co. have no funds out of which to pay the coupon, except rental payable under the lease, and the Grand Trunk Co. have been advised that they are not liable under the terms of the lease to pay the American income-tax.

***A Newspaper Devoted to  
 Municipal Bonds***

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

**Opportunities for Foreign Investors**

Here is the greatest profit-making investment opportunity ever available to Canadian Investors—Government Bonds of Great Britain and France—bonds that may now be bought to yield well assured profits up to 200%.

A good deal of attention is also being given to the bonds of German Cities, especially those in the occupied zone, along the Rhine. These may now be bought to yield possible profits up to and over 1,000%.

Now is the time to buy. Prices recently reached their lowest levels in history and have been much stronger since, due to a growing appreciation of the advantages of these bonds, and the consequent heavy buying of them coupled with the fundamental strengthening of all exchange rates.

# Government and Municipal Bond Market

**Ontario Sells Securities on 6.21 Per Cent. Basis—Offering Meets With Good Reception—Victory Loan Prices Show Stronger Trend—Lethbridge Irrigation Bonds Will Soon Be on the Market—Large Balance of Edmonton Bonds Returned.**

THERE was considerable activity in the government and municipal bond market during the past week, with a firming in prices, as evidenced by the trend of Victories. The strengthening, no doubt, was due largely to the funds made available by the May interest payments on Victory bonds. Ontario's issue came at an opportune time, and the province realized a pretty good price. The offering, which was made by a strong syndicate at 6.05 per cent., met with a good reception. Ontario floated a loan of \$20,000,000 in January, and on twenty-year securities received a price on a basis of 6.28 per cent.

The following table shows the recent trend of Victory bond prices, and illustrates the improvement which has taken place in the last few days:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close Apr. 27.	Close May 4.
1922 .....	98	98%	98%	98%	98.50
1927 .....	97	98	97½	97½	98.00
1937 .....	98	99%	99%	98%	99.00
1923 .....	98	98%	98	97%	98.00
1933 .....	96½	98	98%	96%	97.30
1924 .....	97	96%	96%	96½	96.50
1934 .....	93	95½	95%	93%	94.95

The long-drawn-out sale of Edmonton bonds to the bankrupt firm of Morris Bros., of Portland, was finally wound up last week, when the trustee's thirty-day option expired. Either the securities or cash returns for them are now safely within Canadian jurisdiction. It is reported by Commissioner Yorath that proceeds of the sale amount to \$950,000. An issue, therefore, is required to enable the city to pay off the bank loan which was made necessary last January by the maturity of notes. "Owing to the trustee of Morris Bros. only disposing of approximately \$430,000 out of \$1,593,600 short-term notes, it will be necessary to make other financial arrangements to pay off the bank loan," says the commissioner.

The bond issue, which is now proposed, is made up of \$221,618 for capital expenditures already incurred and charged to suspense account; \$831,638 for expenditures necessary this year, and \$1,404,596 for repayment of the Imperial Bank loan of \$2,354,596.

The treasury department of the Alberta government is now preparing to place the \$5,400,000 30-year bonds of the Lethbridge Northern Irrigation District on the market, with the interest rate reduced from the former set level of 7 per cent. to 6 per cent. According to Thos. Crofts, chairman of the district, the bonds will be disposed of in Canada, to avoid difficulty over exchange rates in repayment.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Windsor S.S., Ont. . . .	\$ 225,000	6½	30-instal.	May 9
Grand Mere, Que. . . .	100,000	6	30-yr. ser.	May 9
Windsor, Ont. . . . .	625,230	6	Various	May 9
Walkerville, Ont. . . .	95,982.35	6	Various	May 19
Shawinigan Falls, Q.	138,400	5½	Optional	May 11
Peterboro, Ont. . . . .	230,000	6¼ & 6½	20-years	May 16
Sarnia, Ont. . . . .	189,434	6 & 6½	Various	May 17
Saskatoon, Sask. . . . .	204,000	5 & 6	Various	May 23
Vermilion, Alta. . . . .	10,000	7	20-instal.	June 11

**Vermilion, Alta.**—Tenders will be received until June 11, 1912, for the purchase of \$10,000 7 per cent. 20-instalment

hospital debentures. (See advertisement elsewhere in this issue.)

**Peterborough, Ont.**—Tenders will be received until May 16, 1921, for the purchase of \$230,000 6¼ and 6½ per cent. 20-year bonds. The proceeds of the issue will be used for bridge purposes.

**Sarnia, Ont.**—Tenders will be received until May 17, 1921, for the purchase of \$65,180 6 per cent. debentures, maturing 1921-30, for pavements; \$86,147 6½ per cent. debentures, maturing 1921-30, for pavements; \$38,107 6½ per cent. debentures, maturing 1922-26, for sewers and sidewalks. (See advertisement elsewhere in this issue.)

**Windsor, Ont.**—Tenders will be received until May 9, 1921, for the purchase of \$475,230 6 per cent. 30-instalment school debentures, and \$150,000 6 per cent. 20-instalment Hydro-Electric debentures.

## Debenture Notes

**Three Rivers, Que.**—Ratepayers have approved the borrowing of \$400,000 to pay off certain debts contracted by the city in recent years.

**Nelson, B.C.**—A by-law will be submitted to ratepayers authorizing the issue of \$130,000 street improvement debentures, of which amount \$50,000 is to be spent this year.

**British Columbia.**—The province is considering a domestic loan of \$1,000,000 in regard to construction of the new University of British Columbia at Point Grey.

**Brantford, Ont.**—The city council has approved the issue of debentures to the amount of \$125,000 for extension to the local Hydro-Electric system. The Ontario Railway and Municipal Board has yet to approve of the issue.

**Goderich, Ont.**—A by-law to guarantee bonds of the National Shipbuilding Co., to the extent of \$50,000, has been carried by ratepayers. The company is going into some new line of manufacture, as shipbuilding is in a depressed condition.

**Milestone, Sask.**—The Local Government Board has authorized the town council to issue \$12,000 7 per cent. 15-instalment debentures, but ratepayers must first approve. The proceeds will be used for erecting a town hall.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board, from April 16 to 23, 1921:—

School Districts 8 per cent. 10-years annuity—Brandon, \$3,500; St. Wendelin, \$3,500; Freshwater, \$3,125; Rockhaven, \$5,500; Arundel, \$4,500; Wooler, \$1,500. 20-years annuity—Dalrymple, \$7,000; Marquette, \$13,500; Clear Creek, \$5,000. 15-years annuity—Beaver Dam, \$4,800; Evesham, \$5,000.

City of Regina, \$38,510 6 per cent. 30-year sinking fund debentures.

**Bolton, Ont.**—Ratepayers have authorized the borrowing of \$15,000 for local improvements.

**Outremont, Que.**—The Montreal Metropolitan Commission has approved a loan of \$750,000, and ratepayers will now be asked to endorse a by-law.

**Sherbrooke, Que.**—The city council has passed by-laws authorizing the borrowing of \$524,500 for various local improvements, and it is now left for the voters to give their approval.

## Bond Sales

**Manitoba.**—The provincial treasury has disposed of \$2,500,000 5½ per cent. treasury bills to a Canadian bank.

**Dufferin R.M., Man.**—An issue of \$60,000 6 per cent. 30-instalment debentures, guaranteed by the province of Manitoba, has been purchased by Wood, Gundy and Co. at 94.21, which is on about a 6.55 per cent. basis.

## Victory Bond Owners

with coupons due May 2nd experienced the satisfaction of collecting their interest promptly and conveniently. The wisest thing to do with this interest is to reinvest it either in further Victory Bonds, or in other high-grade Canadian Government or Municipal Bonds, which yield substantial interest returns. We offer a selection of these bonds, with a wide choice of maturities, affording interest returns as high as 6.80%

### R. A. DALY & Co.

BANK OF TORONTO BUILDING  
TORONTO

**St. Boniface, Man.**—The city council has disposed of a bond issue of \$273,233 to the Municipal Debenture Corp. The bonds mature in 10, 15 and 30 years, bear 6 per cent., and are payable in Canada and London, England.

**Rockwood R.M., Man.**—R. C. Matthews and Co. have been awarded \$70,000 6 per cent. 30-instalment debentures at a price of 94.96, which is on about a 6.49 per cent. basis. The securities are guaranteed by the province of Manitoba.

**York Township, Ont.**—R. C. Matthews and Co. have been awarded \$24,130 6 per cent. 20-instalment public school debentures at a price of 97.06, which is on about a 6.36 per cent. basis. Tenders received were as follows: R. C. Matthews and Co., 97.06; C. H. Burgess and Co., 96.634; United Financial Corp., Ltd., 96.362; Wood, Gundy and Co., 96.33; Harris, Forbes and Co., 95.87; A. E. Ames and Co., 95.33; Housser, Wood and Co., 95.317.

**Oshawa, Ont.**—McLeod, Young, Weir and Co. have bought \$190,257 6 per cent. 15 and 20-instalment local improvement debentures at 95.90, which is on about a 6.59 per cent. basis. Tenders were as follows: McLeod, Young, Weir and Co., 95.90; R. C. Matthews and Co., 95.80; C. H. Burgess and Co., 95.77; United Financial Corp., Ltd., 95.63; Wood, Gundy and Co., 95.17; National City Co., Ltd., 94.77; A. E. Ames and Co., 93.133.

**Miniota, Man.**—The item appearing in these columns last week regarding the sale of bonds was not correct. Details of the issue are as follows: Edward Brown and Co. purchased \$80,000 5½ per cent. 30-year good roads debentures, guaranteed by the province, at 89.50, which is on about a 6.53 per cent. basis. Tenders were:—

Edward Brown & Co. ....	89.50
R. C. Matthews & Co. ....	89.04
A. E. Ames & Co. ....	88.89
Bond and Debenture Corp. ....	88.56
Harris, Read & Co. ....	87.15
Strang and Snowden ....	87.00

**Brockville, Ont.**—Harris, Forbes and Co., Inc., have been awarded \$30,000 6 per cent. 10-instalment debentures at a price of 97.579, which is on about a 6.47 per cent. basis. The following is a list of tenders:—

Harris, Forbes & Co., Inc. ....	97.579
A. Jarvis & Co. ....	97.513
Brent, Noxon & Co. ....	96.863
C. H. Burgess & Co. ....	96.66
Dyment, Anderson & Co. ....	96.65
Wood, Gundy & Co. ....	96.26
Dominion Securities Corp. ....	96.13
United Financial Corp., Ltd. ....	96.13
R. C. Matthews & Co. ....	96.05
A. E. Ames & Co. ....	95.57

**Saskatchewan.**—The following is a list of debentures reported sold from April 16 to 23, 1921:—

School Districts 8 per cent.—Tilney, \$800 5-years; H. E. Corson, Tilney. Johnson, \$3,800 10-years; Waterman-Waterbury Mfg., Regina. Okabena, \$1,500 10-years; R. H. Rutherford, Drinkwater. Yorkton, \$40,000 20-years; Peaker Bros., Yorkton. Jack Pino, \$4,000 10-years; Nay and James, Regina. Iris, \$6,041 15-years, Versailles, \$5,941 15-years; C. C. Cross and Co., Regina. Prince, \$4,500 15-years; H. J. Birkett and Co., Toronto.

**Greater Winnipeg Water District.**—The Dominion Securities Corporation have been awarded \$1,500,000 6 per cent. 30-year bonds, payable in Canada only. The issue was made for the purpose of paying off five-year bonds maturing in New York on July 1 next. Alternative tenders were asked for, and the following bids were received:—

	Payable in Canada Only.		
	10-Yr.	20-Yr.	30-Yr.
Dominion Securities Corp. ....	95.50	94.61	94.16
Wood, Gundy & Co., and A. E. Ames & Co. ....	94.39	93.84	93.88
W. A. Mackenzie & Co., R. A. Daly & Co., and R. C. Matthews & Co. ....		93.17	92.71

Payable in United States (New York funds).

	5-Yr.	10-Yr.
Wood, Gundy & Co., and Wells-Dickey Co. ....	89.81	87.83
National City Co., and E. H. Rollins & Sons ....	89.17	86.58
A. E. Ames & Co., Halsey, Stuart & Co., and the Minnesota Loan & Trust Co. ....	89.06	86.48
Dominion Securities Corp. ....	88.10	86.31

At the price accepted, the district paid about 6.44 per cent. for its money. The price basis for the 20-year bonds was 6.48 per cent., and for the 10-year bonds 6.62 per cent., so that apparently there is a greater demand for long-term securities than for short-term bonds.

**Ontario.**—There was been bidding for the \$5,000,000 6 per cent. securities, and the provincial treasurer saw fit to dispose of 15-year bonds, notwithstanding the fact that a tempting offer was made for the treasury bills. At a price of 97.94, the province pays about 6.21 per cent. for its money. Bids were as follows:—

	15-year bonds.	6-months' treasury bills.
Wood, Gundy & Co., A. E. Ames & Co., Dominion Securities Corp., A. Jarvis & Co. ....	97.94	99.68
W. A. Mackenzie & Co., R. C. Matthews & Co., R. A. Daly & Co. ....	97.81	....
C. H. Burgess & Co., Canadian Debentures Corp., McLeod, Young, Weir & Co. ...	97.54	99.64
Canada Bond Corp. ....	97.47011	...
National City Co., Ltd., Harris, Forbes & Co., United Financial Corp., Ltd. ...	97.21	....
Edward Cronyn & Co., Canadian Bank of Commerce, Imperial Bank, Dominion Bank, Brent, Noxon & Co. ....		99.645

**Belleville, Ont.**—Harris, Forbes and Co., Inc., have been awarded an issue of \$210,000 6 per cent. 20-year debentures at a price of 96.719, which was on about a 6.29 per cent. basis. There was been bidding, as evidenced by the following figures:—

Harris, Forbes & Co., Inc. ....	96.719
A. Jarvis & Co. ....	96.50
Wood, Gundy & Co. ....	96.21
C. H. Burgess & Co. ....	96.071
McLeod, Young, Weir & Co. ....	95.81
Dyment, Anderson & Co. ....	95.68
Macneill, Graham & Co. ....	95.37
W. A. Mackenzie & Co. ....	95.35
Brent, Noxon & Co. ....	95.219
Dominion Securities Corp. ....	95.17
T. S. G. Pepler & Co. ....	94.813
United Financial Corp., Ltd. ....	94.64
National City Co., Ltd. ....	94.57
A. E. Ames & Co. ....	94.53
R. C. Matthews & Co. ....	94.28

**British Columbia.**—Further details concerning the sale of \$3,000,000 6 per cent. 5-year bonds of the province have come to hand. The price secured was 100.01, which was a shade under 6 per cent., as stated in these columns last week, and the syndicate was composed of the British-American Bond Corp., Carsten and Earles; Seattle, Seattle National Bank; Halsey, Stuart and Co.; Gillespie, Hart and Todd.

A bid by the Dominion Securities Corp., A. E. Ames and Co., and Wood, Gundy and Co., of Toronto, was also received for 95.35, on a 24-year basis, payment in Canada only, but Hon. John Hart stated this offer was not accepted, as it is not deemed advisable to float such long-term loans in view of existing high interest rates. The proceeds of the flotation will be devoted to work on the P.G.E. Railway chiefly, and certain road works it is proposed to carry ahead this year.

**County of Renfrew, Ont.**—Tenders will be received until May 17, 1921, for the purchase of \$250,000 6 per cent. 20-year highway improvement debentures. R. J. Roney, county clerk, Pembroke, Ont.

CORPORATION SECURITIES MARKET

Trend of Stock Prices is Still Irregular and Indefinite—Gunn's, Ltd., Pass Preferred Dividend—Quebec Manufacturing Company Makes New Bond Issue

ABOUT the only change which has taken place in the Canadian stock markets during the past few weeks is that the general disposition to pay particular attention to specific developments affecting industrial corporations has given way to a willingness to place greater emphasis upon general business and financial developments, both real and anticipated. Certain companies are being judged individually, but the markets, as a whole, are following the common course of events.

Such a change has not contributed very much to the situation, however, for the uncertainty has not been removed, and the character of the news has not changed. Thus, the trend of prices on the exchanges continues weak and indefinite.

Wall Street had a favorable week, but traders are still viewing the future with a certain amount of apprehension. Perhaps the most important event was the action of the United States Steel Corporation in reducing wages twenty per cent. Such a movement will undoubtedly go a long way to help the economic situation, for the stand taken by employees in regard to wages had created something of a deadlock between price recessions and labor costs, which only the largest producers could break.

In Canada labor is threatening a good many industries, but employees are beginning to learn to accept their share of responsibility in deflation, although there are still some who do not yet understand that falling commodity prices must be accompanied by a similar movement in wages.

Canada Cement Weak

Among the many declines Canada Cement was prominent. The belief is that shareholders will stand a small chance for dividends in the next quarter, in view of the fact that the last disbursement was made from surplus and that the present state of the cement business will warrant the conservation of funds. A disturbing factor in regard to the company's trade, and one to which shareholders have apparently given thorough consideration, is that the Ontario government is going into the cement business, and may make inroads upon the corporation's market.

Trading for the week resulted in a turnover of list stocks on the Montreal exchange of 46,771 shares, as compared with 57,973 in the previous week, while in Toronto the figure was 15,921, compared with 17,291. Bonds changed hands to the extent of \$1,356,809 in Montreal, as against \$1,207,710, while the turnover in Toronto was \$1,315,750, compared with \$826,580 previously.

At a meeting of the directors of Gunn's, Ltd., last week it was decided not to declare the regular quarterly dividend on the preferred stock, due May 1st, 1921, for the present. The company has felt the effect of adverse developments during the past year, that have been common to most packing companies, and the management consider it advisable to conserve resources and devote its entire strength to the re-

storage of its earning power, until conditions in this basic industry return to normal. The balance sheet of Gunn's, Ltd., as for March 31st, 1921, indicated a substantial margin of protection behind the outstanding \$1,500,000 preferred stock, the book net worth on that date amounting to \$3,559,426, consisting of fixed assets (after depreciation) of \$2,546,516, and net current assets of \$1,012,910. There was outstanding junior to preferred stock, \$1,760,350 of common stock.

An additional listing of \$500,000 National Trust Co. stock took place on the Toronto exchange this week. This is the new issue of June last, which brought the capital up from \$1,500,000 to \$2,000,000.

On Tuesday quotations of war loan bonds on the Toronto exchange in decimals was commenced to enable closer shading of prices.

New Offerings

An issue of \$4,000,000 7 per cent. 5-year bonds of "La Machine Agricole Nationale," of Montmagmy, Que., is being offered by La Banque Nationale, Le Credit Industrial, Ltd., Credit Canada, Ltd., and Emile Ranger, Montreal. The bonds are dated March 1, 1921, and are in denominations of \$100, \$500, and \$1,000, with interest payable semi-annually at offices of Le Banque Nationale. The company's property is valued at \$6,000,000, covers 48 acres, and farm implements to the amount of \$70,000,000 were sold in 1920. The bonds are offered at par and interest.

R. M. Heffernan and Co., Ltd., are offering \$500,000 8 per cent., preferred stock of the Ottawa Nukol Co., Ltd., at par (\$1.00 per share), with a bonus of 25 per cent. common stock. The company was incorporated in 1920 for the purpose of briquetting fuel known as Nukol to serve Ottawa, Ottawa Valley, and Eastern Ontario. A factory is to be built in Ottawa this year to produce briquettes similar in every respect to those manufactured by the Nukol Fuel Co. of Toronto.

Canadian Salt Bonds

For the purpose of funding capital expenditure on plant and to increase the working capital of the company, Royal Securities Corporation has purchased an issue of \$400,000 7 per cent. general mortgage bonds, due 1941, of the Canadian Salt Co., Ltd.

The company is the largest producer of salt, and the only commercial producer of bleaching powder and caustic soda, in Canada. Its plants are located at Windsor and Sandwich, Ont.: its table salt, under the brand of "Windsor," being used widely throughout the Dominion.

Dividends have been paid on the common share capital continuously since the inception of the company in 1901 at the rate of 8 per cent. The company found its origin with Canadian Pacific Railway shareholders, Canadian Pacific interests being to-day largely represented on its board by W. J. Shaughnessy, R. B. Van Horne, W. F. Angus and Sir Thomas Tait.

It is understood that the new 7 per cent bond issue will be senior to the outstanding \$1,200,000 of common shares, and junior to \$356,000 of first (closed) mortgage bonds, due 1934. Public issue of the new bonds, will it is expected, be made within the next two or three weeks.

# Corporation Finance

**Canadian Consolidated Felt Had Fairly Good Year—Nova Scotia Tramways Lost Money in 1920—March Statement of Canadian Pacific Railway Shows Improvement in Affairs of the Road—Brazilian Earnings Increasing.**

**Sydney Mines Electric Co., Ltd.**—The Cape Breton Electric Co., Ltd., has purchased the property of the Sydney Mines Electric Co., Ltd., for \$80,000, but the deal must have the approval of the board of public utilities before it can be consummated. The consideration is eight hundred shares of the preferred stock of the Cape Breton Electric Co., Ltd.

**Calgary Gas Co., Ltd.**—The company will be taken over by the parent company, the Canadian Western Natural Gas, Light, Heat and Power Co., Ltd. This concern will sell gas to Calgary consumers dating from midnight May 31 next. The price will be \$1.35 a thousand cubic feet less a ten-cent discount, or \$1.25 net for cooking gas and 85 cents less 10 cents discount or 75 cents net for heating furnace gas.

**Brazilian Traction, Light and Power Co., Ltd.**—Gross earnings of the company in March, 1921, amounted to 13,102,000 milreis, compared with 9,900,000 milreis in March, 1920. Net earnings were 6,522,000 milreis, an increase over the same month last year of 1,212,000 milreis. For the first quarter of the current year gross show an increase of 8,982,000 milreis at 37,918,000 milreis, while net earnings at 18,418,000 milreis show an increase of 3,014,000 milreis.

**Goodyear Tire and Rubber Co. of Canada.**—Approval of the proposed reorganization scheme of the company is being given by shareholders. Last week preferred stockholders received two letters, one from the company outlining the proposed scheme and the other from the financial houses which distributed the 7 per cent. preferred issue and who are now advising in favor of the adoption of the proposed plans. Replies from shareholders so far are favorable, but should serious objections be voiced a meeting will be called.

The advantages of the scheme pointed out in the letters to shareholders, are that the issue will greatly improve the position of the company, as they will replace overdue notes now outstanding to the amount of \$2,800,000 and \$300,000 current account, on which if payment were enforced at present the company would be put into liquidation. Under the plan submitted the annual interest charge on the liabilities is reduced, in addition to which the floating debt is to an important extent converted into capital.

**Nova Scotia Tramway and Power Co.**—Nineteen-twenty was a trying one for the company, according to the annual report and the enterprise was unable to earn its fixed charges, though they have all been paid when due. Permission to increase its fares to 7 cents or 6½ cents for tickets helped the gross earnings, though the company suffered the usual decrease in patronage that has occurred elsewhere following a rate increase. An increase of 20 per cent. in wages also reduced net earnings, and went far to offset the increase in fares. The ratio of operating expenses rose from 86.8 to 96.4 per cent. High cost of materials, especially coal, was another adverse condition. The net earnings were \$87,629, which, after payment of interest and amortization charges of \$202,526, left the loss on operation for the year of \$114,896. This compares with a profit of \$66,891 in the previous year, which enabled dividends on preferred to be paid in 1919.

Although business in Halifax is quiet, as in other cities, the directors look for an improvement in the company's operations. There will be a full year with the increased rate of fare, and it is expected that a somewhat higher rate for lighting will be allowed, from which increased earnings to the amount of \$50,000 are expected. Improved earnings from gas is also anticipated.

"Operating expenses," says the report, "have in general reached their highest point, and will in all probability de-

crease. The amount of maintenance necessary to be done will be less than last year. The cost of material is already showing a downward tendency, and with decreased living costs wages should tend downward as well."

**Canadian Consolidated Felt Co.**—The 1920 annual financial statement of the company is a fairly good one. Net sales increased to \$1,749,584 from \$1,234,030 in 1919. Expenses were higher, however, reducing operating income to \$89,178, as compared with \$136,410 in 1919. After deducting interest the surplus was \$20,721, against \$71,877, while with previous carry forward added in profit and loss, the balance was \$342,637, against \$321,916 carried into 1920.

The balance sheet shows a decline in current assets, current liabilities and working capital. Current assets at \$655,373, compared with \$944,446 in 1919; current liabilities at \$520,362, compared with \$760,308 in 1919, and working capital at \$135,011, compared with \$184,138.

In his report to shareholders, the president, W. A. Eden, says that previous to 1920, the company's products were made in one factory, the other having been leased to the Consolidated Rubber Co., but with prospects that both plants could be operated to capacity in the coming year, the other factory was taken over and equipped, which meant an outlay of \$127,529. Business, however, did not come up to expectations and the president states that it is now evident that the volume of sales in 1921 will be less than in 1920.

**Canadian Pacific Railway.**—The March earnings' statement reflects an improvement in the affairs of the road. Traffic receipts showed a decrease of slightly more than \$1,000,000, but this was more than offset by a decline in operating expenses. The following are the details of the March earnings, with comparisons:—

March.	1921.	1920.	Decrease.
Gross	\$14,705,726	\$15,715,936	\$1,010,209
Expenditure	12,254,818	13,758,171	1,503,353
Net	\$ 2,450,908	\$ 1,957,764	*\$ 493,143

Earnings for the first quarter are:—

Gross	\$41,940,143	\$43,187,609	\$1,247,465
Expenditure	38,034,418	39,930,030	1,895,611
Net	\$ 3,905,725	\$ 3,257,579	*\$ 648,148

\*Increase.

The most important announcement made at the annual meeting this week in Montreal was that concerning new financing, which will be done in London, England. E. W. Beatty, president, in this regard points out: "Your directors have recently accepted a proposal for the acquisition by London, England, interests of a substantial amount of 4 per cent consolidated debenture stock at a price which was very favorable. This is the first application for the acquisition of debenture stock from England since the outbreak of hostilities in 1914, and is of the utmost significance as indicating the resumption of interest in your principal capital security in Great Britain. It may conceivably be the first step towards the re-establishment of a market in England for the ranking securities of the company, which cannot but have an important influence on its future financing.

Among the purposes of the new stock are the purchase of three new steamers, which will cost \$22,600,000, and the construction of the Sufield Southwestern branch of the railway to a length of thirty miles at an estimated cost of \$30,000 per mile.

**DEBENTURES FOR SALE**

**City of Sarnia Debentures**

**TENDERS WANTED**

Tenders will be received by the undersigned up till 3 p.m., Tuesday, 17th May, for the following equal annual instalment coupon debentures:

- \$65,180.16 Pavement 10-yrs. 6%. Dated Dec. 31, 1920.
- 86,147.68 Pavements 10-yrs. 6½%. Dated Dec. 31, 1920.
- 38,107.91 Sidewalks and Sewers 5-yrs. 6½%. Dated Jan. 1, 1921.

Tenders must be made for each block separately. Accrued interest will be added to price on delivery. Delivery and payment to be made at Sarnia. Interest payable annually.

The bonds will be in denominations of \$1,000, as far as possible.

The lowest or any tender not necessarily accepted.

P. A. BLACKBURN,  
City Treasurer.

Sarnia, Ont. 550

"The finances of the Canadian Pacific Railway are in excellent shape," said Mr. Beatty, "and, while the balance in the bank is not as large as it was at the end of the last fiscal year, the amount is, nevertheless, a very substantial one, and there is still unissued or undisposed of over sixty-seven million dollars of consolidated debenture stock, the issuance of which has been heretofore authorized or that you will be asked to sanction at this meeting. Even in the trying times during and immediately succeeding the war the progression of the company has been steady and sure, and the asset statement shows an increase since 1914 of an amount in excess of one hundred and seventy million dollars.

"About the middle of December a pronounced contraction in business took place, resulting in diminished traffic of all description. This depression still continues, but by rigid economies the net results for the first three months of this year are somewhat in excess of those of the corresponding period of last year, notwithstanding the greatly increased costs of labor prevailing in 1921.

"Increases in wages may have been justified at that time by the abnormal increase in the cost of living, but they were accompanied by alterations in working conditions of such a character as to impose heavy, and, in the view of the companies, unnecessary burdens on the transportation agencies of North America. The conditions which rendered them necessary being rapidly ameliorated, it is apparent that readjustments will be essential. These increases in wage scales, while not the only element which entered into the increase in freight and passenger rates, were still a very outstanding and potent factor, and when the readjustment of wages takes place, it is only right that the rate situation should be again reconsidered with a view to revision downward.

"The rates are high, but I am not one of those who believe that the existing scale of wages and consequent high freights is responsible for the present business depression; the causes of that go much deeper than the mere standard of wages paid to any given class, and are world-wide. Nevertheless, a reduction in both wages and freight rates would have a pronounced and beneficial effect on the general sentiment in the country through the encouragement it would give and the confidence that normal conditions had been more nearly reached."

At a special general meeting immediately following the directors were authorized to issue bonds, debentures or other securities as they deemed fit, and at such times as they should approve, as collateral to the consolidated debenture stock. In this connection no amount was mentioned, but President Beatty stated that there still remained unissued \$67,000,000 of consolidated debenture stock. The annual meeting lasted fifteen minutes and the special session five minutes.

#### ONTARIO SAFETY LEAGUE

The annual meeting of the Ontario Safety League was held in Toronto, April 27-28. J. S. McKinnon, president of the Canadian Manufacturers' Association, declared his association was greatly interested in the work of the Ontario Safety League. He referred to the large increase in the number of accidents reported to the Workmen's Compensation Board during the past year, and the increase in compensation paid by the board, which amounted to \$3,883,994 over the year 1919. He said the contention of the C.M.A. was that the Workmen's Compensation Board should be of a judicial character. In concluding he asked for the establishment of a national university, fearing that provincial institutions would foster narrower sentiment.

Joseph Gibbons, who spoke for organized labor, told the gathering that too much attention was paid to the radical element of the trades union movement, and too little credit given to the international trade union movement, for the work they had done in the past in the interests of humanity. He contended that the trades union movement had always supported all progressive legislation.

#### RECENT FIRES

#### ADDITIONAL INFORMATION CONCERNING FIRES

Manitoba.—The fire commissioner's statement for the month of March states that during the month there were 157 fires, with a loss of \$141,139. There were 83 dwellings destroyed, 17 stores and 16 farm buildings. Stoves and furnaces caused 43 fires, carelessness with matches 19, and careless smokers 16.

Nanaimo, B.C.—March 24—The general store, occupied by Malpass and Wilson, was destroyed by fire. The loss is \$25,000, with insurance of \$15,500 in the Northwestern Mutual, Royal, State of Pennsylvania, Northwest National, Fidelity Phenix.

Vancouver, B.C.—April 13—The frame factory, machinery and stock of the Mill Cut Homes and Lumber, Ltd., was destroyed by fire. The fire, which is believed to have been caused by electric wire, caused a loss of \$16,000, with insurance of \$11,000 in the Dominion Fire, Nationale of Paris, London Mutual of Canada, Globe and Rutgers, and North Empire Fire Insurance Companies.

At the annual meeting of Hamilton Clearing House, the following committee of management was appointed:—Chairman, D. B. Dewar, Canadian Bank of Commerce; vice-chairman, J. Stephens, Bank of Toronto; manager and secretary-treasurer, A. C. Rowe; R. H. Harvey, Royal Bank of Canada; E. V. Ilsey, Standard Bank of Canada; A. M. Bethune, Dominion Bank.

## Business Profits Tax Not to be Renewed This Year

Remaining Luxury Taxes to be Abolished—Sales Tax is Extended, and New Duties Imposed on Liquor—Few Changes in Customs Duties—Sir Henry Drayton in Budget Speech Summarizes Changes Proposed This Year, and Outlines Financial Position of the Dominion

FINANCIAL changes proposed by the government, as announced by Sir Henry Drayton in his budget speech on May 9, were closely anticipated. The business profits tax will not be renewed, and there is no change in the income tax, nor to any degree in the tariff. Heavier duties are to be placed upon imported and domestic liquor, however. Extensions of the sales tax are to make up for revenue otherwise lost. The proposals may be summarized as follows:—

Dropping of business profits tax.

Elimination of the few remaining luxury taxes, such as on confectionery.

No general revision of the tariff, but certain changes made to implement trade agreements with France and with the British West Indies.

Notice is given of two changes to be made in the Customs Act. The purpose of the first is to secure a more efficient carrying-out of the principle of the existing dumping provisions, and has to do with the valuation on which duties are assessed. The act at present provides that the value shall be "the fair market value, when sold for home consumption, in the principal markets of the country whence and at the time when the goods were exported directly to Canada." The amendment will add to this "such value in no case to be lower than the wholesale price thereof at such time and place," and in addition provides that the value for duty shall not be less than the actual cost of production of similar goods at date of shipment direct to Canada, plus a reasonable profit thereon. The other amendment relates to the valuation for customs purposes of foreign currencies. The present customs practise is to convert the foreign depreciated currency into Canadian on the basis of existing exchange rates. It is proposed that no reduction in excess of 50 per cent. of the standard or proclaimed value will be allowed, no matter what the exchange rate is. Where the rate of exchange is adverse to Canada, the value for duty will be computed at the rate of exchange existing at the date of the shipment of the goods.

To make stringent regulations forcing every imported article to have country of origin plainly stamped upon it.

Changing present excise duty of three dollars a gallon on spirits and two dollars additional duty under the luxury taxes to a straight ten dollars customs rate.

Excise tax of eight to fifteen cents a pack on playing cards at the time of sale by Canadian manufacturer or when taken from Custom House.

Excise tax of thirty cents a gallon on wines of all kinds except sparkling wines.

Excise tax of three dollars per gallon on champagne and other sparkling wines when taken from Canadian manufacturer, but not when exported; excise tax on distilled spirits of \$9 a gallon, with rebate of 99 per cent. of duties on alcohol to hospitals on spirits actually used for medicinal purposes, and being only \$2.40 a gallon when used for patent

and proprietary medicines and pharmaceutical preparations, which was the rate in effect before last year.

Increase of present tax on sales of manufacturers, wholesalers, jobbers and importers from 1 and 2 per cent. rates on domestic transactions to 1½ and 3 per cent., respectively, and the import rates from 1½ and 3 per cent. rates to 2½ and 4 per cent., respectively; the exemptions being foodstuffs in their natural state, initial sales of farm produce by the farmer of his own production, and the first products of fisheries, mines and forests.

Two dollars license fee for every manufacturer and business man affected by above sales and excise tax.

All of these taxes go into effect on May 10.

### Increase in Revenue

The minister referred to the country's economic development and trade, pointing out the necessity for preservation of the home market. Referring more especially to finances, he said:—

"The country's revenues have been well maintained. The revenue for the fiscal year, when the accounts are finally closed, will reach approximately \$432,000,000, as against \$349,746,334 for the year before. This marked increase, in a year of deflation, can only be regarded as satisfactory. The chief sources of revenue are as follows:—

Customs .....	\$163,000,000
Excise .....	37,200,000
Post office .....	26,000,000
Business profits war tax .....	40,000,000
Income tax .....	46,500,000
Inland revenue war tax .....	79,050,000
Other war taxation .....	2,355,000

"The estimated expenditure for the year amounts to \$533,368,077, as against a total outlay provided by the estimates of \$613,225,411. The total expenditure has been met without new loans, being covered entirely by current revenue and cash resources available at the close of last year. The amount of cash resources from the past year and applicable to 1921-22 will be relatively small. The figure cannot be definitely stated, as sundry expenditures and revenue for 1920-21 have yet to go through the books.

### Expenditures

"In considering the consolidated fund expenditure, having regard to the country's pre-war activities, it will be found that these amount to some \$141,000,000. Consolidated fund charges connected with and growing out of the war, such as increased interest, pensions, military records, Air Board, expenses of Land Settlement Board, Soldiers' Civil Re-establishment, etc., and such new services and expenses as cost of collection of war taxation, bonus to the Civil Service, aids granted for technical education and road building, etc., approximate \$225,000,000. Other war expenses, includ-

ing soldiers' land settlement, loans and demobilization, increase the total payments resulting from the war and new services, to \$277,000,000. Services similar to these provided for by the consolidated fund expenditure of \$141,000,000 this year, as referred to above, cost in the year 1913-14 \$127,384,472.

"Of the expenditures, the total chargeable to consolidated fund is \$362,600,000. Special expenditure, including capital of \$36,972,000, and demobilization of \$20,000,000, accounts for a further sum of \$57,102,000. Then there are investments, classed as non-active for the time being, as follows:—

Canadian Northern Railway .....	\$48,611,077
Grand Trunk Railway .....	26,520,000
Grand Trunk Pacific Railway, receivers' estimates .....	18,300,000
Grand Trunk Pacific guaranteed interest .....	3,500,000
Quebec Harbor Commissioners .....	335,000
<b>Total .....</b>	<b>\$97,266,077</b>

"And, finally, disbursement for railway equipment of \$16,400,000.

#### Surplus and Debt Reduction

"The revenues for the year exceed the ordinary expenses of the country, including all pensions and all current war charges, by \$69,400,000, and exceed the sum total of the ordinary expenses, together with the regular charges to capital and war, by \$12,298,000.

"As already stated, there have been no fresh borrowings. On the other hand, the debt has increased by the amount that the liquid surplus of the year before has been used—namely, \$101,368,077. It should be noted that out of available cash, tax-exempt bonds aggregating \$89,228,300 have been acquired and taken off the market. It is proposed to cancel them. The result is that, having regard to the writing-down of assets which took place last year, the net debt now amounts to \$2,350,236,700. An interesting observation may be made as to the increase in debt.

"In the period 1896 to and including 1914 the net additions to the debt totalled \$77,499,417. As compared with this, during the period 1914 to date, if the writing-down of non-active assets had not taken place and if the bare war cost be deducted, but resulting current expenses arising from the war, such as, for interest, pensions, etc., be nevertheless charged, the net debt to-day would stand at approximately \$115,000,000 less than at March 31, 1914. The situation may be otherwise expressed by saying that, notwithstanding the largely increased cost of government, to the extent of this sum the country's war activities have been financed out of current revenue.

"Over and above all this the charges to the consolidated fund of payments made on current war account from and including the year 1914-15 to 1920-21 amount to \$553,732,120, and for new services and expenses \$30,077,580, making a total of \$583,809,700. The net result is that war obligations, current and capital, have been met and paid to the extent of \$696,809,700.

#### Estimates for Present Year

"All indications point to a falling customs revenue, and, with the disarrangement of business consequent on imminent tariff legislation of the United States, it is difficult to accurately forecast the revenue for the coming year. The following estimate (based on existing legislation) may be given:—

Customs .....	\$135,000,000
Excise .....	33,600,000
Post office .....	26,000,000
Interest on investments .....	19,000,000
Casual revenue .....	4,000,000
Inland revenue .....	72,000,000
Business profits and income tax .....	70,000,000
Miscellaneous war-tax revenues .....	2,000,000
All other revenues .....	11,000,000
<b>Total .....</b>	<b>\$372,600,000</b>

"The main estimates tabled call for a total expenditure of \$582,062,698, and the supplementary for bonus to the service an additional \$9,375,000. The policy of the government is to pay at least all current expenses, including capital charges, out of current income. The following summary gives the details of these votes, properly appropriated to their various objects:—

Estimated consolidated fund expenditure .....	\$343,021,594																						
Estimated capital expenditure .....	27,459,127																						
Estimated demobilization expenditure .....	7,777,380	<b>Total .....</b>	<b>\$378,258,101</b>	<b>Investments.</b>	<b>Non-active.</b>	Canadian Northern Railway .....	\$ 50,000,000	Grand Trunk Railway .....	89,687,633	Grand Trunk Pacific Railway .....	26,000,000	<b>Total .....</b>	<b>\$165,687,633</b>	<b>Investments.</b>	<b>Active.</b>	Soldiers' Settlement Board .....	\$ 32,000,000	Housing loans .....	13,310,000	Sinking funds .....	2,181,963	<b>Total .....</b>	<b>\$ 47,491,963</b>
<b>Total .....</b>	<b>\$378,258,101</b>																						
<b>Investments.</b>	<b>Non-active.</b>																						
Canadian Northern Railway .....	\$ 50,000,000																						
Grand Trunk Railway .....	89,687,633																						
Grand Trunk Pacific Railway .....	26,000,000	<b>Total .....</b>	<b>\$165,687,633</b>	<b>Investments.</b>	<b>Active.</b>	Soldiers' Settlement Board .....	\$ 32,000,000	Housing loans .....	13,310,000	Sinking funds .....	2,181,963	<b>Total .....</b>	<b>\$ 47,491,963</b>										
<b>Total .....</b>	<b>\$165,687,633</b>																						
<b>Investments.</b>	<b>Active.</b>																						
Soldiers' Settlement Board .....	\$ 32,000,000																						
Housing loans .....	13,310,000																						
Sinking funds .....	2,181,963	<b>Total .....</b>	<b>\$ 47,491,963</b>																				
<b>Total .....</b>	<b>\$ 47,491,963</b>																						

"From the above it will be seen that \$378,258,101, in the first instance, ought to be raised out of current revenue. It is true that this amount includes capital expenditure for canals, public works, etc., capital expenditure which does add to the equipment and facilities of the country. Under the policy adopted, this, however, ought to be met out of current revenue. It should be noted that this capital vote also includes \$1,903,133 required for railroad equipment. It also includes \$7,000,000 for deficits in the Canadian Government Railways proper, which must be regarded as a current expense."

#### TO DEVELOP BRITISH-CANADIAN TRADE

About 50 Canadians attended a meeting on May 9 for the promotion of a Canadian Chamber of Commerce in London, Eng., and an executive committee was appointed to complete the organization, which, it is hoped, will play a prominent part in developing trade relations. Among those included in this committee were: Lord Beaverbrook, Sir James Dunn, Col. Hamilton, Sir George Brown and Col. Blaylock. Col. L. S. Amery, parliamentary and financial secretary to the Admiralty, and formerly Under-Secretary for the Colonies, addressed the gathering. He expressed the belief that Canada was destined in the fullness of time to rival, if not outstrip, her great neighbor, but she could not do this simply by imitating the policy of development peculiar to the American Republic.

#### GLENS FALLS INSURANCE COMPANY

Nineteen-twenty was a good year for the Glens Falls Insurance Co., of Glens Falls, N.Y., premiums amounting to \$6,405,968, net. Losses amounted to \$3,309,928, or 51.7 per cent., of the losses.

The balance sheet section of the report shows that total assets increased from \$9,332,139 to \$10,107,334. The reserve for unearned premiums is shown at \$4,823,784, compared with \$4,175,440, while there is a net surplus of \$2,725,686, as against \$2,701,786 in 1919.

The Canadian organization of the company made good strides, with S. C. R. Crocker as chief agent. Details of the complete operations are not yet available, but in 1920, net cash received for fire premiums amounted to \$237,816, compared with \$191,848 in 1919. The net amount of fire insurance at risk is now \$25,366,595, while a year ago the figure was \$21,999,942.

## SERVICE AT COST IN VANCOUVER

## New Plan for British Columbia Electric Railway—Financial Situation Healthy, But Caution is Necessary—Benefits From Government Marine

(Staff Special.)

Vancouver, May 11, 1921.

WITH the approach of the tourist season in Vancouver business is gradually improving, and an excellent season is looked for. Shipping on the Pacific coast is on the increase, and steady cargoes are provided for every addition to the Canadian Merchant Marine fleet. The C.P.R. expect to add to their excellent Pacific coast service one of the large, recently acquired German boats.

Upon the completion of the Canadian Government Merchant Marine program, Vancouver will have twelve 8,300-ton freighter carriers, making Vancouver their port home, and should the requirements of the port demand, other vessels will be transferred here from the Atlantic to the Pacific run.

Although the Canadian Government Merchant Marine vessels are owned by the Canadian people, in which all have a stake, they are not being operated directly by the government, but when completed are handed over to an operating company known as the Canadian Government Merchant Marine, Limited. Thus the fleet must enter the shipping field in all respects the same as every private-owned company, and must compete for freight and buy supplies exactly as every other privately owned company does. The broad policy of the company has been to open new trade routes from Canada and to put steamers on routes already covered, but which need supplementing, in order to adequately handle the business offered.

Notwithstanding the slump in foreign trade during the past few months the Canadian Government Merchant Marine vessels from Vancouver have made steady and well-laden runs to Australia and New Zealand, calling in with freight to the Hawaiian and the Fiji Islands, as well as inaugurating the India and the Orient routes with bumper cargoes. People in British Columbia feel that is of great benefit to the country that the many millions of dollars expended by shippers for freight shipped on Canadian-owned and operated steamers remain in Canada and tend to make the balance of trade more favorable in their home country.

## Service at Cost System

Negotiations are under way between the British Columbia Electric Railway Co. and the city of Vancouver and surrounding municipalities for the revision of the company's franchises. As tentatively agreed to the franchise will be on a service-at-cost covering the whole of the company's operations on the mainland, and including railway, light, power and gas service. The franchise as drafted is to be submitted to the various municipalities and cities outside Vancouver for approval.

The terms so far agreed to are that the company is to have a return of six per cent. on its present investment, and eight per cent. on new investments, a valuation of the company's property being one of the terms. Fares are not to exceed seven cents in Vancouver, and light, power and gas rates are not to exceed those at present in force, but a re-adjustment of rates is to take place by a board of arbitration every three years. It is expected that the stability this franchise will give the British Columbia Electric Railway Co.'s finances will enable it to raise further capital for development. The company is faced with an expenditure of \$1,000,000 for further power development late this year, and has already on order some of the machinery for an additional unit at Stave Lake. Increase in demand for current for domestic and industrial purposes is rapidly using up the company's available supply.

The change in the rule of the road from left to right will be put in effect, it is expected, on or about December 1.

The British Columbia Electric Railway Co. estimates its expenses will amount to \$1,000,000, and the provincial government has granted \$350,000 towards the cost of making the change. The company will start immediately to rebuild its cars preparatory to the change. Considerable new track work will be necessary. It is probable that the change will go into effect on the mainland before Vancouver Island, owing to the mechanical problems in changing the electric railway lines.

## Financial Situation Sound

In an interview with General Victor Odlum, vice-president of the Royal Financial Corporation, as to the outlook on the coast, he said:—

"Conditions on the Pacific coast are dull, and no very marked change need be expected for some time. The lumber industry, which is the business thermometer of British Columbia, is depressed. The expected spring activity has not made itself evident. A good deal of building, on a small scale, is going on in and around Vancouver, but with the prairie and export markets inactive, it is not sufficient to affect the output of the mills.

"The mines, too, are feeling the effects of existing conditions and very little work is being done, the same thing is true of the pulp mills. Unemployment still continues on a considerable scale; and it is probable that it will be more or less in evidence throughout the year.

"But fundamentally, the situation is sound, for it is a long time since British Columbia experienced a period of general speculation. Comparatively few people are carrying debit balances on land agreements. Moreover, more than half the homes have become acquainted with public bonds, and investment in this liquid form of security is quite general. Manufacturing has taken the place of speculation in Vancouver to a very large extent, and in time the terminal city promises to be known as well for its manufactures as for its ocean trade, its sawmills, its fish and its tourist traffic.

"So far this year, the spring has been cold and wet, and tourist traffic has been delayed, but there is plenty of evidence to show that it will assume large proportions this summer. It will cause a certain increase in retail activity, and will set a good deal of new money in circulation.

"Summarized, the present is a time for economy and caution, but not one for alarm."

## Building Activity

R. Kerr Houlgate, prominent in financial circles here, said in an interview with *The Monetary Times*: "While business conditions generally are quiet in Vancouver, the rents of business premises, apartments and dwellings do not show any signs of falling. They were very low for some little time prior to the war and for most of the war years, but they gradually rose with the return of the population, and in some cases are back to pre-war rentals. In spite of the high cost of building during the last twelve months or so, there has been extensive building of houses in all residential sections of the city and the surrounding municipalities and there is still a good demand for residences. The reduced price of vacant lots has influenced people to purchase and build their own homes. This has been the cause of the real estate activity in that class of property, which is evidenced by the Vancouver Land Registry Office return for the month of April, 1920. The transactions that month were: Deeds 833, agreements of sale 245, mortgages 228, making a grand total of 1,306. While there were a fair number of real estate transactions in business and semi-business properties, still the bulk of them were for residence purposes.

"The Vancouver Real Estate Exchange has been conducting an advertising propaganda in the daily papers on the subject of "Own Your Own Home" and recently gave prizes for an essay competition on the same subject. This resulted in many hundreds of essays being sent in and undoubtedly will help to make people have the desire to own their own home and thus naturally become better and more

interested citizens in their community. This is one of the many ways in which the red radical propaganda can be met.

"It is the experience of most mortgage and investment companies that mortgage collections, both of principal and interest, have been very good for some time past and are the same to-day. A very large number of mortgages that were in arrears during the war period, have been brought up to date and put on a satisfactory footing. The same applies to the taxes, the arrears of which have been reduced. Whilst there has been the activity mentioned in real estate, there are no signs of any boom, all transactions being on a sound and healthy basis.

"Trade and commerce being the life's blood of any city, the Vancouver Board of Trade, with over thirteen hundred active members, has been a great factor in this and in looking after every point of the city's interests. They believe in co-operation and have travelled the length and breadth of British Columbia organizing boards and getting to know the people, and have also taken a very large interest in the 'Foreign trade area question,' which is a live one at the present time. They were largely, if not wholly, instrumental in getting the government to change its ruling about sending mail to the Orient on Japanese boats, by the order which came through recently that any mails could travel over on the C.P.R. mail steamers."

#### DOMINION MORTGAGE ASSOCIATION MEETS

##### Rural Credits Criticized as Subsidizing a Special Class— Need for Prudence in Selecting Municipal Securities

(Special to *The Monetary Times*)

Winnipeg, May 12, 1921.

**I**NVESTING institutions of Canada were well represented at the annual meeting of the Dominion Mortgage and Investments Association, which opened in Winnipeg to-day, and will close to-morrow. This is the first time that the annual meeting has been held in the west.

The report of the executive committee was a very full review of investment affairs during the year. New members of the association are as follows: Crown Life Insurance Co., Toronto; Capital Trust Co., Ottawa; Crown Savings and Loan Co., Petrolia; British Mortgage Loan Co., Stratford; London Life Insurance Co., London; Provident Investment Co., Toronto. Fire prevention to protect investments, mortgage clauses in fire insurance policies, commissions paid to officers acting as fire insurance agents, Dominion seed grain liens, taxes and other charges ranking ahead of first mortgages on property, rural credits in Ontario, succession duties, taxes on corporations, and legislation affecting loan and trust companies were among the subjects on which the committee took action during the year.

Reports were also presented by the special committees on membership, municipal finance, uniform returns, trust companies, and Ontario legislation were also presented.

Horace L. Brittain, director of the Citizens' Research Institute of Canada, gave an address entitled "Citizen Co-operation in Government," in which he pointed out that the governments of this country now spend about \$550,000,000 per year, which is \$62 per capita, or \$310 per family. With such a large expenditure it is essential that waste be eliminated.

A brief regarding loan and trust companies, prepared by V. Evan Gray, superintendent of insurance for Ontario, was presented to the meeting. It gives an exhaustive description of the law regarding these companies.

"Rural Credits in the United States" were fully described by E. D. Chassel, secretary of the Farm Mortgage Bankers' Association of Chicago. D. J. Thom, K.C., of Regina, spoke on "Land Titles Systems in the West," referring especially to the Torrens system.

At the opening session a special committee was appointed to inquire into the whole matter pertaining to the lien priority given to seed grain advances, the gathering agreeing with the statement of John Appleton, secretary, that this was a "pernicious and quite unjustifiable practise." Sharp criticism of the moratorium and of defaulting municipalities also featured the session which, in the absence of the President, A. E. Holt, Montreal, was presided over by W. E. Long, Toronto.

#### Changes of a Year

Mr. Long in presenting the report of the Executive Committee, said the conference had met under a sense of grave responsibility. A year ago business was active, the demand for capital and commodities strong, and employment was plentiful on an exceptionally high basis of remuneration. They were now faced with some of the most serious consequences of credit expansion and expenditure of capital and labor on undertakings which did not yield wealth. Prices of agricultural products had now fallen to almost pre-war time levels, unemployment was serious, and great anxiety existed as to the possibility of finding markets capable of absorbing the country's exportable products. The seriousness of the situation was emphasized by the uncertainty of the tariff policy governing those markets in the United States and Europe which hitherto had absorbed many of their important products. Money required to meet the natural demand which arose in territory but partially developed would have to be obtained from their own resources, he said.

Conditions would necessitate adjustment of the machinery in Canada to meet new mortgage conditions. In giving essential public service, by prudently exercising their functions as lenders on mortgage security, the organizations concerned would be greatly aided if it could be stated, particularly in western provinces, that there was no legislation of a discriminatory or restrictive character. A mortgage lender, making a contract in conformity with existing statutes, frequently found that during its currency new legislation had been passed, which generally resulted deleteriously to the lender.

#### Municipal Finances Report

In the report of the municipal finances committee, reference was made to default in payment to cities and towns in Alberta and Saskatchewan. In Manitoba, Ontario and Quebec, it was stated, the provincial municipal departments had intervened and effected adjustments, which had averted loss to debenture holders. Twelve municipalities, principally in Alberta and Saskatchewan, had a funded debt of \$4,513,283, on which arrears amounted to \$263,881, or six per cent. Seven in default at present had a funded debt of \$3,485,300, of which \$377,697, or 10.8 per cent., was overdue. The situation in Saskatchewan was described as the cause of anxiety to holders of all classes of securities issued by the province and its municipal institutions. By appointing a Local Government Board, the Saskatchewan government admitted responsibility in respect of credit of municipal institutions, some of which at the time of the establishment of the board in 1912, were experiencing trouble. In Alberta, Manitoba and British Columbia, active steps had been taken to obviate loss to debenture holders in future.

E. M. Saunders, Winnipeg, said financial statements should be checked by expert auditors and when the statements indicated that trouble was pending, the government should send out trained and experienced accountants to investigate the situation. The municipal act should provide better protection for investors when it became apparent that a municipality was hopelessly involved.

Speaking of the western land titles system in effect prior to the establishment of the Torrens system, D. J. Thom said it had three cardinal defects: uncertainty, expense and delay. The defects had been largely obviated by the Torrens system, the advantages of which so outweighed any disadvantage, as to place its real value beyond any possibility of contradiction.

### A DISCREET BUDGET SPEECH

THE finance minister was not deluded by visions of large revenues from a turnover tax, advocated by several boards of trade and other business organizations in this country. His new taxation on business is confined to additions to the sales tax, a proven source of revenue. On the other hand the expiration of the business profits tax will be a boon to the country as a whole, bringing more efficient management and attracting capital to where it will be most effective. The profits of successful enterprise will not by any means escape in future; they will pay through the income tax on corporations and on individuals.

The budget as a whole is a very sane one, bringing no radical changes at a time when industry cannot safely be tampered with. There will of course be much criticism of the government's failure to revise the tariff. But the best time to make a downward revision is when business is brisk, as it was up to a year ago, and certainly no increases are wanted in this country. Nevertheless some reductions which would have made the lot of the farmer, the lumberman and the fisherman easier would have been in order. The unemployment complained of in the cities at the present time is its own condemnation of the excessive and unnatural growth of Canadian urban centres. The Dominion government is evidently lending its support to the provinces' efforts to stamp out the liquor business, for customs and excise duties on distilled liquor are made extremely high. Other changes to be introduced as legislation are not of great importance. All taxes take effect from May 10, the date of the speech, as the legislation is to be made retroactive to that date.

The weak point in the budget is that revenue is not increased to any great degree. With national expenditure fixed, while customs and some other sources of revenue are falling off, it is difficult to see how any substantial reductions in the national debt can be made. The government has capital expenditures falling due nearly every year. Next

August a loan matures in New York, and will probably be met by refunding. Victory bonds fall due in 1922, 1923 and 1924, and war loan bonds in 1925. In addition there are war savings stamps, war savings certificates and debenture stock. If part of these debts can be met as they mature the national debt will be quickly brought down. If they are not met, they must be refunded, to be repaid at a time when dollars will likely mean a great deal more than they do now.

The income tax escaped revision this year, probably because it is now about as high as the United States income tax. Nothing has been done in fact to levy more taxes on the wealthy, and on the other hand the burden of the general public has not been increased, apart from the proportion of the new sales taxes that may be shifted to them.

### THE CANADIAN PACIFIC FINANCING

AT the annual meeting of the Canadian Pacific Railway, held in Montreal last week, E. W. Beatty said: "Your directors have recently accepted a proposal for the acquisition by London, Eng., interests, of a substantial amount of 4 per cent. consolidated debenture stock at a price which was very favorable. This is the first application for the acquisition of debenture stock from England since the outbreak of hostilities in 1914, and is of the utmost significance, as indicating the resumption of interest in your principal capital security in Great Britain. It may conceivably be the first step towards the re-establishment of a market in England for the ranking securities of the company, which cannot but have an important influence on its future financing."

This is not the first instance of a revival of British interest in Canadian investments, but it is one of the first actual transactions to take place. Just at the present time British investors are putting more capital into the Canada Land and Irrigation Co., of Medicine Hat. Sales of Canadian securities in Great Britain during the past few years have

been as follows: 1913, \$277,470,780; 1914, \$185,990,659; 1915, \$41,175,000; 1916, \$5,000,000; 1917, \$5,000,000; 1918, \$14,600,000; 1919, \$5,105,133; 1920, nil. The figures since 1915 are insignificant, and are of course offset many times over by repurchases of Canadian securities held there.

Our investment relations with the old country cannot, however, be reversed as suddenly as they were in 1914 and 1915. It will be some years before the flow of capital in this direction reaches its pre-war volume. New York is still our chief market, and during the past few days there have been reports that the Canadian Pacific was marketing \$50,000,000 of 15-year 6½ per cent. debenture bonds there. This is, however, denied by the Guaranty Trust Co., of New York and the Union Trust Co., of Pittsburgh, which were mentioned as being head of the purchasing syndicate. While this deal may be off it is evident that where large amounts are required it is the New York market to which resort must be had.

### FOREST FIRES STARTING AGAIN

SOME weeks of dry weather have again brought fires in the north. Every year sees a large area of timber destroyed, the 1920 loss being especially heavy. Northern Ontario is the only section from which reports of serious fires have come this year. Spring came quite early in the north, and the "closed season" for setting out fires for the purpose of clearing land was set for April 15, after which date settlers were required to make applications for permits to do so and to be governed by certain rigid regulations. As late as May 7 an advertisement appeared in northern papers which read as follows: "Order-in-council has been passed changing the closed season from April 15 to May 15 in the Northern Division, after which date permits to burn must be secured." This appeared over the name of E. J. Zavitz, Provincial Forester.

Up to the present time the amount of property damage has not been very heavy, although considerable valuable forest areas are reported to be ablaze. The point mentioned in the northern districts is that it seems highly dangerous to permit setting out fires without restriction up to as late a date as May 15 during a season which is admittedly dry. The weather forecasts indicate showers, and if these materialize in sufficient volume they may check the danger of heavy loss to the northern forests. Heavy clouds of smoke from a fire in Gillies' limit, near Gillies' Depot, are rolling above the town of Cobalt, and ashes are falling in the street.

On May 11 a fire started at Anstice, 16 miles west of Capreol. The section foreman's house with contents was completely destroyed. A peculiar incident is that a large amount of dynamite was stored under the section foreman's house and the fire swept over without doing it any damage. Conditions west of Capreol are somewhat better. Several small fires started up in small dry patches, which were quickly burnt out. The larger fires of the past few days are still smouldering, and the damage done during the past few days is extensive.

### MAY DAY MADNESS

AS the saner branches of organized labor, represented by the international unions, have been becoming more and more conservative since the climax reached in the spring of 1919, the more radical wing has been drifting to the other extreme, widening the breach between themselves and the more responsible majority. The radicals continue to favor the Soviet system, long after trade unionists of Great Britain and the United States have disowned it. Andrew Glen, chairman of a May Day meeting in Toronto, said: "We are all agreed that capitalism has been an ignominious failure

and is falling. If we believe Socialism or something else will take its place, we have a right to say so. We are here and will not leave until we have said as much as we like upon the subject." James Simpson expressed the opinion that the great interests which brought about the war would never have done so if they had realized the change of thought it would cause and had realized that systems and monarchies would be overthrown. He charged that capitalism, not content with holding what it had gained, was now attempting to drive the workers back to a lower standard of living than they had held in 1914. He described the work which the Russian government was doing to raise the masses of Russia. "Link up with the third Internationale," was the advice of John Macdonald, who also said it was impossible to believe that any class which exploited another would release its hold at a word. He had not much faith in Parliamentary institutions, charging that they were representatives of the capitalist class alone.

"There is no solution to the present problem of unemployment but the complete overthrow of capital," declared John Macdonald, president of the Metal Trades Council of Toronto, at a meeting in Hamilton on the same day. If violence broke out in Canada next winter—and he feared it would—Labor would not be to blame, as it did not want violence. The onus would rest on the privileged and capitalistic class that did not want to relinquish its fatted ease. Failure of the movement to grow as rapidly in Canada as in some European countries was assigned by James Simpson to the press, which, he said, was unsympathetic and cold. Moreover, all the machinery of capital was set in motion against labor, and many who had a fair sympathy with labor were poisoned and prejudiced against it. Cycles of unemployment were coming around more frequently. In the first three months this year R. G. Dun and Co. reported that there were 4,600 failures, involving a loss in bankruptcy of \$75,000,000, the worst series of failures in the history of the United States. All this, contended Mr. Simpson, pointed to the coming collapse of capitalism. He scored those employers who sought to cut wages and reduce the standard of living to lower than what it was in 1914.

It is evident from these remarks that radical labor, in becoming more radical, is losing the support of more cautious unionists.

The valuation of \$2,150,000 placed by the Standard Reliance on Overcourt Land investments has been found to be excessive by \$685,000. Land is an excellent speculation, but is not suitable for funds held on deposit from the public.

\* \* \* \* \*

Col. L. S. Amery, secretary of the British Admiralty, expresses the opinion that Canada may some day rival, if not outstrip, her great neighbor to the south. He must be referring to the Canadian navy, for he surely can not have such visions about our industry and population.

\* \* \* \* \*

### A DISCRIMINATING INVESTOR

A writer in the London *Financier* says that certain American "financiers" are inundating the country with alluring circulars for the benefit of the British investor. For some inscrutable reason the average American gold brick man has always been obsessed by the notion that these Isles are inhabited mainly by simpletons! But he sometimes meets his match.

A firm of New York brokers wrote to a party in London making him a generous offer of more or less genuine railway and other bonds, inviting him to reply in detail as to his "wants," and specifically requesting him to mention in the course of his reply, "what States he wished to avoid." After analysing the offer, thus did he reply: "Dear Sirs,—Referring to question No. 5 of your letter, I beg to state that the States I desire to avoid are the United States of America."

## PERSONAL NOTES

FRANK E. FISHER, vice-president and general manager of the Canada Bond Corporation, Toronto, has announced his resignation. Mr. Fisher's plans for the future are not yet known.

W. H. CARTER, head of the firm of Carter, Halls, Aldinger and Company, Winnipeg, has been elected to the directorate of the Sovereign Life Assurance Company of Canada.

F. D. PATTERSON, for nearly seven years manager of the Calgary branch of the Standard Bank of Canada, has been promoted to the position of inspector for Alberta and Saskatchewan. He will be succeeded by J. H. McDowell, formerly of Tillsonburg, Ontario.

A. T. LOWE, recently appointed inspector of Ontario branches for the Royal Bank of Canada, will have his headquarters in the supervisor's department, Toronto. Mr. Lowe

is a native of Burlington, Ontario, where he attended the public and high schools, afterwards graduating from Ryerson School, Hamilton. In June, 1901, he entered the service of the Traders Bank as a junior clerk at Burlington branch. In December, 1903, he was transferred to the Hamilton branch of that institution, where he remained until December, 1906, when the managership of Burlington branch opened up, and he was appointed

to the position. He continued in charge of that office until March, 1913, when he was appointed manager of Ingersoll branch. In April, 1919, he was transferred to Toronto as assistant manager, which position he continued to occupy until his present appointment.

### BANK BRANCH NOTES

The Molsons Bank have opened new offices at 13 Pitt St. West, Windsor, Ont.

The main branch of the Merchants Bank of Canada, formerly at 13 Wellington St. W., Toronto, has been moved to the new building at 14 King St. W.

C. C. King, manager of the Lethbridge branch of the Union Bank has been transferred to the branch at Minnedosa, Man. He is succeeded by George J. Hunter, at present manager of the branch at Fort William, Ont.

R. G. Wallace, formerly manager of the Sparks St. branch, Ottawa, of the Bank of Nova Scotia, has been appointed manager of the Hamilton branch. T. G. McMaster, formerly manager at Hamilton, is being transferred to general office, Toronto.

The Canadian Bank of Commerce are erecting a new building on Commercial St., Gloucester Bay, N.S.

### RIORDON COMPANY'S POSITION OUTLINED

**New Financing Must be Done to Prevent Liquidation of the Enterprise—An Appeal to Shareholders—A Bonus of Seventy-Five Per Cent. in Preferred Stock is Offered With Bonds**

WHAT the stock market has been discounting for the past few weeks concerning the Riordon Co., Ltd., has been definitely laid before the public in detail. A statement has been issued by the board of directors outlining the situation, and shareholders are frankly told that unless the proposed plans are followed through and supported, liquidation is inevitable.

The committee which forms the board now appealing to the shareholders is comprised of new names, as compared with the old board, with the exception of Senator W. C. Edwards. F. P. Jones, who signs the appeal, as chairman of the board, is general manager of the Canada Cement Co., and recently became vice-president of the Riordon Company. George M. McKee is general manager of the Donnacona Pulp and Paper Co., F. M. Southam is vice-president of Wm. Southam and Sons, Ltd., and Fred E. Bronson is president of the Bronson Company.

"Referring to the balance sheet as on March 31st, 1921, of the Riordon Co., Ltd.," the statement remarks, "you will see that current liabilities amount to \$12,714,483, to which must be added the commitments for plant, etc., not yet delivered, and noted in auditors' certificate at \$1,500,000, so that, in reality, your current liabilities amount to \$14,214,483, your current assets amount to \$10,451,680. Therefore, your current liabilities exceed your current assets by \$3,762,803. From our investigation of the affairs of your company, it is apparent that its present position is due to commitments for construction and other expenditures having been undertaken before adequate financial arrangements were made—the construction expenditures on the Kipawa plant having exceeded the original estimate of cost—and to the world-wide reaction in general trade conditions. Shipments and consequently receipts for the last five months have fallen far below those anticipated. These combined factors make it of the utmost urgency that further working capital be furnished at once.

#### The Proposed Plan

"Your directors propose that the company shall forthwith authorize an issue of \$5,000,000 ten-year 8 per cent. mortgage and collateral trust bonds, to be dated June 1, 1921, and to be secured by a specific mortgage and charge on the fixed properties, plants and timber lands of your company (subject to the bond issues and mortgages mentioned in the enclosed balance sheet), and by a first pledge and charge by deposit with the trustee for the bondholders of \$6,000,000 of 8 per cent. ten-year refunding mortgage bonds to be created by the Gatineau Co., Ltd., and issued to your company in payment and satisfaction of advances heretofore made by it to the Gatineau Co., Ltd. The Riordon ten-year 8 per cent. mortgage and collateral trust bonds will be further secured by a floating charge (subject as aforesaid) on all the other properties and assets of your company. They will rank ahead of \$47,000,000 par value of preferred and common shares of your company.

"The bonds of the Gatineau Company to be pledged and deposited with the trustee as security for the 8 per cent. mortgage and collateral trust bonds to be issued by your company, will be secured by specific mortgage and charge on the properties of the Gatineau Company, consisting of all the real estate and saw mills of that company at Ottawa, Hull and Rockland, freehold water power rights on Gatineau, Nation and Lievre Rivers and by assignment of over 8,000 square miles of pine and pulp wood limits purchased by that company through its acquisition of the business of W. C. Edwards and Co., Ltd., and the Gilmour and Hughson Co., and a floating charge on all the other prop-

(Continued on page 16)

## TWO MILLION ELECTRIC COMPANY STARTED

Incorporated by P.E.I. Legislature—Act Also Passed Regarding Insurance Fees

PRINCE EDWARD ISLAND'S 1921 legislative session came to a close on April 30. Little in the way of new legislation was passed. This was the second session presided over by the Liberal administration and is described by the *Charlottetown Guardian* as being notable for the fact that it opened with both sides throwing bouquets and closed with them throwing brick-bats. Another new development was the absence of a meeting of the agricultural committee.

An increase in the rate of interest on provincial loans from  $5\frac{1}{2}$  to 6 per cent. was authorized. On motion of Premier Bell it was resolved that the House express its desire that legislation be enacted at the present session of the parliament of Canada which will prohibit the importation of liquor into the province for the purpose of export and word to this effect was ordered to be submitted through the proper channels to Ottawa.

### Insurance Fees

An act respecting insurance sets forth the amount of the fees to be paid to the provincial secretary-treasurer by authorized agents and sub-agents of life insurance companies for the issue of certificates of authority. One clause of the bill giving power to the provincial secretary to cancel certificates for misconduct or violation of the provisions of the Dominion Insurance Act, was struck out. An amendment was inserted to the effect that nothing in the bill should affect the Provincial Agricultural Fire Insurance Co., the Prince Edward Island Fire Insurance Co., or the Charlottetown Fire Insurance Co.

There were also acts passed to incorporate the Imperial Biscuit Co., the Cardigan Milling Co., Ltd., the town of Georgetown, the St. Catharines Rural Telephone Co., and the Institute of Chartered Accountants of Prince Edward Island.

In discussing the bill regarding education, special reference was made to a clause providing that school trustees in determining the amount of poll tax to be levied on their respective districts shall compile their figures according to the collector's assessments lists under the taxation act. Hon. Mr. Arsenault, objected to the clause and its various subsections as being too cumbersome. He could not see what necessity there was for examining the government rolls before making the assessment. Premier Bell maintained that there was much dissatisfaction among the people with regard to School Trustees' valuations. The percentage of valuation differs in many districts. The clause was, however, struck out.

Clause 20 of the bill, authorizing the Board of Education to grant moneys by way of aid to school trustees of districts (not to exceed \$25 annually to any one district) for the purpose of procuring school equipment, also elicited discussion. Hon. Mr. Arsenault did not believe that the Board of Education should be empowered to vote public money as it saw fit. If the funds were for the special benefit of poor districts, it should be so stated in the Act. Premier Bell explained that the money would be supplemented on condition that the districts would assist—the government to pay half the expense of additional equipment, the districts to make up the balance. Mr. Dewar thought it a better plan to have money paid through the Public Treasury. After some further discussion the clause was passed.

### The P.E.I. Electric Company

The bill to incorporate the Prince Edward Island Light, Heat and Power Co., Ltd., provides that the company be incorporated with Henry A. Sanders, of London, England, capitalist and electrical engineer; Noah A. Timmins, of Montreal, capitalist; John A. Bannan, of Chicago, electrical engineer; William J. O'Leary, of Montreal, electrical engineer; and James J. Hughes, of Charlottetown, merchant, as directors, with such other persons as may become shareholders in the corporation. The head office of the company is to be at Charlottetown or such other place in Canada as

the directors with the approval of the shareholders decide upon. The capital stock of the company is \$2,000,000, divided into \$100 shares. The company reserves to itself all the usual rights and powers of the ordinary incorporated company, together with other specifications referring to the production and supply of electricity for light, power and heating purposes. The company may acquire any property, etc., and may lease or operate any works or undertakings and may enter upon and construct the usual facilities for the conduct of such a business.

The company must submit a detailed statement of their assets to the Lieutenant-Governor-in-Council annually and the surplus of the net earnings after providing for a dividend of ten per cent. to the shareholders must be used and expended in the improvement and extension of the company's lines and plant or in the reduction of its tolls rates and charges to the subscribers. If the company within a year of the passing of the Act fails to commence the erection of its plant, its rights and privileges shall cease and determine. Not less than \$25,000 must be expended in the construction of its plant within the first year and not less than \$100,000 within two years of the passing of the Act. The rates to be charged to subscribers in the city of Charlottetown and town of Summerside for lighting and power shall not at any time exceed the rates existing in the said city and town respectively from the time of the passing of the Act.

### MANITOBA'S SURPLUS IS \$33,693,329

Capital Revenue and Deferred Assets Exceed Liabilities—Receipts for Year 1920 Exceeded Estimates

PUBLIC accounts of Manitoba for the year ended November 30, 1920, show assets of \$94,108,069 in the combined balance sheet. This total is made up as follows:—Cash, \$2,645,429; investments (sinking funds, etc.), \$7,810,428; secured and other accounts, \$13,079,584; Dominion of Canada, \$13,046,973; public works and undertakings (book values), \$37,821,154; drainage and judicial districts (capital expenditure), \$6,275,318; unsold lands, \$13,429,181. The corresponding liabilities are made up as follows:—Treasury bills and accounts payable, \$6,516,389; stocks and bonds, \$49,700,870; sinking funds, replacement reserves and trust funds, \$4,924,977. This leaves a surplus of \$33,693,329, divided as follows:—Capital, \$15,661,025; revenue, \$35,566; deferred, \$17,996,737. Guarantees of securities, not included in the above liabilities, are as follows:—Canadian Northern Railway, \$25,663,553; municipal debentures, \$3,261,358; Farm Loans Association, \$1,541,449; total, \$30,466,362.

Separate balance sheets show capital assets, \$71,189,370, or \$15,661,025 more than the capital liabilities; current assets of \$5,072,956, or \$35,566 more than current liabilities; and deferred assets of \$18,292,356, leaving a surplus of \$17,996,737 on deferred account. There are also trust assets of \$5,155,576, not included in the combined balance sheet.

### Revenue and Expenditure

Revenue for the year was \$10,482,471, or \$547,267 more than the estimates, the larger items being:—Dominion subsidy, \$1,470,991; school lands, \$541,603; fines, \$139,657; land titles fees, \$405,903; agricultural college, \$129,690; lands, \$125,304; interest, \$801,189; succession duties, \$478,012; corporation taxes, \$713,950; Public Amusement Act, \$358,772; widows' pensions, \$193,360; automobile licenses, \$400,008; municipal levy, \$1,330,141; tax on unoccupied lands, \$114,635; telephone rentals, \$2,482,508.

Expenditure was \$10,942,808, or \$129,666 less than estimates, and by departments was as follows:—Legislation, \$139,510; executive council, \$207,612; treasury, \$3,191,100; provincial secretary, \$35,404; education, \$1,638,595; agriculture and immigration, \$955,728; attorney general, \$937,530; provincial lands, \$13,756; railway commissioner, \$22,672; telephones and telegraphs, \$1,880,000; public works, \$1,840,166; municipal commissioner, \$80,730.

## RIORDON COMPANY'S POSITION OUTLINED

(Continued from page 12)

erties and assets of the company, subject to purchase money mortgages for \$5,000,000 which mature 1925 and \$478,533 now due and bank liens. The trust deed securing the bonds will provide for the refunding of these mortgages at par.

"It has also been arranged that a voting trust will be created, by which voting control of the shares of your company will be placed for a period of five years in the hands of five voting trustees to be nominated by the bankers interested in the company and its securities. The voting trust agreement will be completed to the satisfaction of the undersigned committee before allotment.

"Your directors, therefore, solicit subscriptions from the shareholders for the entire issue of \$5,000,000 ten-year 8 per cent. mortgage and collateral trust bonds of the Riordon Co., Ltd., at the price of 90 and accrued interest. Unless by June 1st subscriptions for these bonds are received for an amount which, together with the amount to be realized from the sale of the first mortgage bonds which the company is negotiating, will assure the company at least \$5,500,000, no subscription will be accepted, and the moneys paid on application will be returned, the directors reserving the right to return all moneys if in their opinion it is not in the interests of the company to proceed to allotment. For instance, even with the amount of money required as above stated, your directors feel that it may be necessary, in order to be sure of successful operation in future, to obtain the consent of the creditors to an extension of time in which to liquidate the company's indebtedness to them.

"On account of the urgency of the situation and as an inducement to the first preferred shareholders to subscribe for the bonds above mentioned, all the holders of the 7 per cent. cumulative convertible (second) preferred shares of your company have agreed to surrender pro rata to the subscribers to the bonds a sufficient proportion of their holdings to provide a bonus of \$750 par value of said 7 per cent. cumulative convertible (second) preferred shares for each \$1,000 of the bonds so subscribed and paid for, and the shares necessary for this purpose have been deposited with the Montreal Trust Co."

## TRADE CONDITIONS

R. G. Dun and Co.'s *Review* for May 14 will say regarding trade in the Montreal district: The alterations and modifications in the tariff and business taxation, as announced in the budget speech of Monday last, are not of a pronounced character, and have no unsettling effect on trade in general. Collections in the middle and eastern provinces are graded fair as a rule, and the district failure list for the week is again a very light one, only six minor insolvencies being reported with liabilities of \$45,000. The main item of interest in the dry goods trade is a cut of from 12½ to 15 per cent. in domestic cottons, as announced by three prominent milling corporations. A very fair volume of sorting business is still in evidence, but the buying of fall and winter fabrics is being deferred by the majority of retailers. In general clothing and boots and shoes manufacturing operations are of a comparatively limited character, and the leather market is assuming a quieter phase. Grocery orders are not large as a rule, but there is a fair steady distribution with few variations in values. Starch and finer grades of rice are slightly higher. Sugars are unchanged. Choice new molasses has been offered at 63 cents laid down, as compared with \$1.65 asked last fall. There is a continued pronounced decline in butter, with cheese now following suit. Hardware men report a gradual growth in the distribution countrywards, but find city trade dull. The spring clean-up spirit is evidently abroad, and some paint manufacturers report a considerable aggregate of small to moderate mail orders. The weather is proving very favorable to spring work on the farm, and meadows and pasturage give good promise.

## EXCHANGE QUOTATIONS

Quotations of exchange on European countries and the United States as at May 12, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

## GRAND TRUNK AGREEMENT RATIFIED

At the meeting of the shareholders of the Grand Trunk Railway Co., on May 12, it was decided to ratify the agreement between the management and the Canadian government providing for the transfer of the control of the railway to the government this month. Only three dissentient votes were cast. The meeting was crowded, but quiet. The speech of the chairman of the board of directors of the railway, Sir Alfred Smithers, dealt with the position of the company exhaustively, and was listened to without ejaculations. An amendment to defer ratification until there was a better guarantee concerning future action by the Canadian government was withdrawn.

## WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended May 12, 1921, compared with the corresponding week last year:—

	Week ended May 12, '21	Week ended May 13, '20	Changes
Montreal .....	\$124,776,553	\$133,579,230	— \$ 8,802,677
Toronto .....	105,579,777	109,897,691	— 4,317,914

## FOREIGN TRADE MACHINERY IS DELICATE

Fundamental Principles Remain the Same, However—Prospect, of Barter with Europe Affects Canada

BY A. B. BARKER

IN the rather acrimonious discussion on the tariff the fact has apparently been lost sight of that trade consists, not in the exchange of goods for money, but in the exchange of goods for other goods or services. Money enters into the transactions, it is true, but only as a means of facilitating the exchange, by enabling dealers to divide the goods exchanged into convenient quantities, and to arrange for future settlement. Money is a measure of value and a medium of exchange, and is of no use unless so utilized.

Foreign trade, upon which much of our prosperity depends, is no more or less than the exchange of goods for other goods by the inhabitants of one country with the inhabitants of another country. Trade is always between individuals, as nations do not trade with each other as nations, any more than cities trade with each other as cities. This was better understood in the early days of foreign trade. In those times men traded direct. A ship was loaded with goods, the cargo being usually owned on shares. Arrived at the destination, the cargo was sold and the proceeds used to purchase goods. These were brought back to the home port, sold, and the proceeds divided among the syndicate according to their shares in the venture. Money was used in the dealings. The cargo was sold for money—local currency—in the foreign port, and this money used to purchase goods, to be sold when the ship arrived at the home port. The question of the value of foreign funds did not enter into the matter at all.

### Essentials Remain the Same

Foreign trade in reality is no different now in its essentials. The only difference is in the method. As trade grew, the means of handling it become more highly organized. Foreign loans were floated and the proceeds reached the borrowing country in the shape of goods purchased by the inhabitants. The complications arising from these and similar transactions gradually focused attention on the purely financial side of trade, and its real basis has been to a certain extent obscured.

The present system has been built up and perfected by generations of use, and in times of peace usually functioned as intended, though there were at times minor breakdowns. Just as in a plant equipped with automatic machinery, some machines occasionally get out of order, but the rest work as usual, and the output is maintained until the necessary repairs are completed. If, however, the engine-room of the plant is damaged, and some of the important machines wrecked, the whole plant must shut down and output stops. Sometimes the plant is able to resurrect some of the old discarded machines to keep going, and the results obtained from supposedly out-of-date machinery have frequently surprised the owners. One difficulty with the use of automatic machinery, however, is that those operating it lose much of their skill as craftsmen, and this is to a large extent the difficulty to-day. Trade, domestic and foreign, has been handled for many years by means of a most complicated system of international credit, and this delicate mechanism has been largely wrecked by the war, with the result that goods are not being exchanged, and the effects of this stoppage of trade are just beginning to be felt.

### Barter is Result of Currency Depreciation

In some sections it has been recognized that the general depreciation of money, especially in Europe, has made trade on former lines impossible, and for this reason negotiations between Great Britain and Russia have, it is said, been begun, to revert to what is practically barter through the medium of a neutral country, Denmark. The Soviet government of Russia has lodged in one of the Danish banks a large sum in gold as a guarantee of good faith, and we may see

a system in operation by which goods of British manufacture will be exchanged for Russian grain and raw materials. This will have serious results here, as we are depending, as in the past, on being able to dispose of our surplus in Great Britain. Owing to the heavy discount on sterling in Canada the prices of Canadian wheat and raw materials are, when translated into sterling, extremely high, if not prohibitive, and we cannot complain if Great Britain's purchases are made where she can get better returns. We have always insisted on this privilege for ourselves, and the people of Great Britain have the same rights.

It has been reported recently that Australia has practically forbidden transfer of funds to foreign creditors, and this will effectually put a stop to any dealings with the inhabitants of that country under the ordinary methods of settlement. Australia, however, like any other country, cannot exist alone, and if trade relations are to be maintained with other countries, it looks as if it would have to be by some system of barter.

It is not suggested that there will be an actual return to the primitive system of barter already described, but the probability is that an arrangement will be made by which all future transactions will be adjusted by means of a credit clearing house in London. Purchases from Australia would be credited to this fund and any sales charged to it, the sellers and purchasers in Australia receiving and making settlement in that country through the ordinary machinery of credit now in use. Existing obligations would, of course, have to stand over under the terms of the embargo. The situation would be similar to that in which an organization is operated as a going concern by a receiver. The old creditors' claims stand in abeyance, the proceeds of any sales of output going to pay for materials purchased by the receiver to keep the plant in operation.

## LAND CORPORATION OF CANADA

The ordinary general meeting of the above company was held on March 18 in London, Eng. Sir Alexander Roger, president of the company, said:—

"The report has been in your hands for some time, and I presume you will take it as read. You will see that the profit on the year's working amounted to £4,486, as against a profit last year of £2,918. Owing, however, to the North Coast Land Co. having gone into liquidation, we have been obliged to write off £4,347 in respect of our holding which was acquired some years ago. This loss is apparently a direct result of the deflation in the price of land in Canada consequent upon the war, although I am bound to say that in my opinion, whether the war had happened or not, the deflation in the price of land was long overdue in Canada and would have happened in any event.

"Since I joined the board in January, 1919, we have been very active in our management of the company's affairs, and I think it would be interesting for you to know that during 1919 our total realizations in Canada amounted to £8,116, and in 1920 our total realizations amounted to £12,379. We have deliberately pursued this policy of realization, with the result that we now have in our assets some £31,000 of government securities and cash.

"During the year Mr. Watkins has again visited Canada, and there are many matters on which he was of great assistance. He inspected our farm lands and town sites, and secured the repayment of a loan on mortgage in Winnipeg amounting to £6,955, which incidentally brought us a profit on exchange of £1,400. He also interviewed the debtors who were in arrears with their payments. He also succeeded in obtaining the issue of £3,000 5 per cent. debentures in the North Coast Land Co. in exchange for £2,000 of sterling notes which would otherwise have lapsed. Finally, in accordance with the policy of the board, he made fresh arrangements for looking after our affairs in Vancouver."

**Make Your Money Work to Earn More Money for You**

Make it earn 4% per annum in a Savings Account instead of less. You wouldn't refuse an increase in your wages, would you? Then why refuse an increase in the interest on your Savings Account? It's as simple as A B C.

## AMERICAN AND CANADIAN TRUST COMPANIES\*

## Some Important Differences in Business Methods—Opportunity for Profitable Investments in Canadian Mortgages

BY EDWIN CASSIDY

*Secretary, National Trust Co., Toronto*

COMMERCIAL and financial relations between Canada and the United States are so close and of such long standing, and the proximity of the two countries such that business connections between Canadian and American trust companies would seem natural. In fact to a certain extent connections between the trust companies in the two countries have already been established, and the Canadian trust companies look forward to their further development in the future.

Such development, however, must take into account certain differences in practice between Canadian and American trust companies—differences which are not always fully realized on either side of the boundary line. For, although it is true that there are ways in which Canadian and American trust companies are serving each other and could serve each other more, yet the fields of operation of trust companies in the two countries do not coincide. The objects of this article are to show what are the chief differences between the trust company systems of the two countries and to point the ways in which more intimate and profitable relations may be expected between the two systems in the near future.

## More Limited Spheres of Activity

Among the differences must be noted first that financial corporations in Canada limit their spheres of activity more than do American financial corporations. For example, in the United States trust companies carry on banking business while the National banks are increasingly coming to discharge trust functions. Thus, to the outside observer the American bank and the American trust company seem to perform almost the same functions. In Canada the situation is different. Canadian banks do a banking business—Canadian trust companies do not. Canadian trust companies lend money on mortgage security—Canadian banks do not.

While Canadian trust companies do not engage in commercial banking, do not buy and sell commercial paper, and do not deal in foreign exchange or sell drafts or acceptances, nevertheless, a large field remains which they have made their own. The most important of all their activities is the carrying out of all kinds of personal and corporate trusteeships, and they are rapidly being accepted by the Canadian public as the most satisfactory agents for this purpose. They are executors, administrators, trustees and guardians.

Canadian trust companies serve corporations as transfer agents and registrars of stocks, and as trustees for bondholders they perform the great variety of duties which arise under trust deeds securing bond issues. They act as receivers, liquidators and assignees. They carry on a safe deposit business, and they act as agent for property owners whether the property be real estate or personalty. They receive funds on savings account, but as trustees, not as bankers. They make call loans. They receive moneys upon which they guarantee a fixed return to the investor under arrangements which approximate those applying to guaranteed mortgage certificates in the United States. Finally, from their capital funds and as trustees and agents they lend money extensively on mortgage security, and invest largely in government and municipal bonds.

## Fiduciary and Agency Lines

The fact is that Canadian trust companies have had extensive development along the lines first projected for trust companies first organized in the United States—as executors, trustees and as lenders of money on mortgage security; so that it would probably be within the mark to say that gen-

erally the Canadian companies have had the same history as American trust companies would have had if they had not extended their business to banking.

There remain to mention two other respects in which Canadian trust companies differ from American ones. The first is of interest to American trust company men because it contrasts sharply with the American system. It is the system of branch offices extending to several provinces. This is more developed with some companies than with others. Some of the larger trust companies have offices in several of the provinces, and are thus able to offer a National service, in their own field. It is worth mention, too, that in Canada trust companies have been chartered either by the provincial or the federal governments. Most incorporations, however, are provincial.

From this summary it will be clear that any closer connections between American and Canadian trust companies must necessarily be along fiduciary and agency lines, rather than along banking ones, since the Canadian trust company is not in a position to render reciprocal service with respect to the latter, as is the Canadian bank. Canadian trust companies might be more frequently employed to administer the Canadian assets of American estates. This tendency has already become apparent in border cities where interests are more closely interwoven than elsewhere.

## Mortgage Investment Situation

To Canadian trust companies the outstanding feature of the financial situation during the past year has been the scarcity of funds available for mortgage investment on farm, city and town property. This is of National significance to Canada's development. Before the war the moneys put out in this way largely came to the trust companies from investors in European countries, especially Great Britain, Holland, Belgium and France, who sent out large sums for Canadian investment. The European requirements of capital and adverse exchange rates make it impossible now to send money profitably out of Europe. This source of supply has therefore been cut off. Early in the year it was pointed out—and up to the present the statement has proved true—that for some time Canada would be thrown mainly on her own resources for the capital needed for her development.

This state of affairs suggests to Canadian trust company officials that in time to come—perhaps soon—investing corporations of the United States may increase the amount of mortgage money which they send to Canada. Already considerable investments in mortgages have been made in Canada in years past by United States institutions, principally life insurance companies. The security taken in Eastern Canada has in the main been city property, while in Western Canada improved farm property has been as popular a security as city property. If in the near future United States investors, whether individuals, trust companies or other corporations, become more accustomed to placing their funds abroad, and include Canadian mortgages in their survey, Canadian trust companies in serving them will find greater opportunities of usefulness.

## EASTERN TOWNSHIP'S BOARDS OF TRADE

The annual meeting of the Eastern Townships Associated Boards of Trade was held at Sherbrooke, Que., April 11. H. C. Dubayer said in his presidential address: "The past year has been marked by no outstanding features of transcendent importance. The Townships seem to have settled down to the long pull necessary to round out properly the reconstruction period brought about by after-the-war conditions and nothing startling or inspiring to the imagination has marked the history of these boards for the time that I have been in office. However, as it has been said that a nation without a history is the most fortunate of nations, let us venture the hope that the lack of outstanding events in the Townships during the past year augurs well for the future of these boards and these townships."

## A BOND FOR \$100

\$100 or more invested in a "Canada Permanent" Bond for ONE YEAR will earn interest at FIVE PER CENT. per annum, payable half-yearly. A higher rate is paid on longer term investments. Interest begins the day the money is received, and the Bond will be made to become due on any date the investor desires.

The Bonds are issued in small sums and for short terms to enable those of moderate means to obtain a high grade security yielding a fair return and still have their funds available within a reasonable time. Small amounts should not be allowed to remain idle when they can be employed to such good advantage as by investing them in these Bonds.

The Corporation has been issuing these Bonds for nearly half a century. They are a first charge against its assets, which amount to over \$33,000,000.

APRIL BOND SALES TOTAL \$26,500,877

New Financing This Year to Date, Including Temporary Financing, Nearly \$106,000,000

APRIL was another busy month for bond dealers, at least that is the indication from the record of sales of *The Monetary Times*. The total of new public financing was \$26,500,877, including provincial treasury bills to the sum of \$6,500,000. A summary and comparison of last months' transactions, shows the following results:—

	April, 1921.	March, 1921.	April, 1920.
Provincial .....	\$12,840,000	\$10,500,000	\$10,300,000
Municipal .....	3,202,877	5,671,037	4,962,368
Corporation .....	10,458,000	7,425,000	11,725,000
Totals .....	\$26,500,877	\$23,596,037	\$26,987,368

So far this year there has been more activity than in 1920. Canada's borrowings for the first four months of 1921 aggregated \$105,811,452, as compared with \$102,969,692 last year. It must be remembered that the 1921 figure includes temporary financing, such as provincial treasury bills, which will mature before the end of the year, amounting to about \$13,750,000, while the 1920 total does not. But as far as Canada is concerned, there has been a great deal more activity in permanent financing, when it is considered that slightly more than 70 per cent., of the offerings have been taken up here, while last year investors of the Dominion participated to the extent of but 20 per cent., the balance going to the United States.

There was a slight softening in prices last month, as evidenced by Alberta's loan, which was made on a basis almost as high as in January. British Columbia also had to pay more for its money than in March. Ontario and Manitoba municipals sold on a higher basis.

BORROWER	AMOUNT	RATE %	MATURITY	COST TO BORROWER	PURCHASER	PRICE PAID	SOLO IN U.S.
<b>PROVINCIAL</b>							
Ontario	\$			%			\$
British Columbia	4,000,000	6	6 months	6.98	A. E. Ames & Company and Syndicate	99.53	
Manitoba (treas. bills)	3,000,000	6	5 years	6.60	British-American Bond Corporation and Syndicate	100.01	3,000,000

## APRIL FIRE LOSSES WERE HIGHER

Total Exceeded March Figure by Some \$100,000, But Was Lower Than in April a Year Ago

APRIL fire losses were again high, being some \$400,000 in excess of the previous month. The total was considerably below the loss of April a year ago, however. A summary of last month's fires is contained in the following figures:—

Fires exceeding \$10,000 .....	\$1,921,000
Small fires reported .....	89,700
Estimate of unreported fires .....	500,000
<b>Total</b> .....	<b>\$2,510,700</b>

The *Monetary Times'* record for the past four years shows the following monthly losses:—

Month.	1918.	1919.	1920.	1921.
January ...	\$ 2,688,556	\$ 3,915,290	\$ 2,637,850	\$ 2,237,900
February ...	2,243,762	1,091,834	1,895,575	2,735,500
March .....	1,682,286	2,154,095	1,793,200	2,112,200
April .....	3,240,187	1,080,070	3,229,500	2,510,700
May .....	3,570,014	1,785,130	2,001,819	.....
June .....	3,080,982	3,337,530	1,424,319	.....
July .....	3,369,684	1,118,377	1,426,850	.....
August .....	3,110,445	1,374,495	1,857,800	.....
September ...	917,286	1,940,272	2,480,485	.....
October .....	5,119,145	1,023,288	2,467,901	.....
November ...	1,059,580	2,339,870	2,769,800	.....
December ..	1,733,917	2,047,496	3,721,475	.....
<b>Totals ..</b>	<b>\$31,815,844</b>	<b>\$23,207,647</b>	<b>\$27,706,574</b>	<b>\$ 9,596,300</b>

## List of Large Fires

The following are the April fires causing damage of \$10,000 and over:—

Cudworth, Sask., April 1, barns, \$16,000.
Altona, Man., April 2, business block, \$35,000.
Montreal, Que., April 2, building, \$35,000.
Walkerville, Ont., April 3, paintshop, \$20,000.
Vercheres, Que., April 5, boathouse, \$20,000.
Cloverdale, B.C., April 7, sawmill, \$20,000.
Vonda, Sask., April 8, school, \$12,000.
Quebec, Que., April 10, building, \$100,000.
Taymouth, N.B., April 10, residence, \$15,000.
Vancouver, B.C., April 13, factory, \$40,000.
Vancouver, B.C., April 13, plant, \$40,000.
Winnipeg, Man., April 13, stores, \$50,000.
Sidney, B.C., April 14, factory, \$50,000.
Hatton, Sask., April 16, business section, \$50,000.
Ochre River, Man., April 16, elevator, \$18,000.
Montreal, Que., April 19, church, \$800,000.
Carleton Place, Ont., April 19, feed mill, \$15,000.
St. Stephens, N.B., April 20, roundhouse, \$200,000.
Swift Current, Sask., April 21, hotel, \$15,000.
Sarnia, Ont., April 26, store, \$10,000.
Vars, Ont., April 26, business section, \$20,000.
Shawville, Que., April 27, business section, \$65,000.
Regina, Sask., April 29, building, \$250,000.
Outlook, Sask., April 30, coal docks, \$25,000.

Among the causes reported were: Sparks, 2; defective chimneys, 2; incendiarism, 2; overheated furnace, 1; cook stove, 1; spontaneous combustion, 1; electric iron, 1; and cigarette stub, 1.

The following structures were destroyed or damaged: Residences, 39; stores, 15; barns, 12; buildings, 11; plants, 7; business sections, 3; garages, 3; mills, 3; hotels, 3; schools, 2; churches, 2; boathouse, 1; paintshop, 1; town hall, 1; station, 1; coal dock, 1.

The following is a list of deaths from fires during April:—

Halifax, N.S., April 5, clothing caught fire .....	1
Melbourne, Que., April 6, burnt in building .....	2

Digby, N.S., April 8, clothing caught fire .....	1
St. Laurent, Que., April 12, fell into bonfire .....	1
Cornwall, Ont., April 18, clothing caught fire .....	1
Winnipeg, Man., April 20, burnt in a hay stack .....	1

## Comparison of Deaths

The record of deaths from fire has been as follows:—

Month.	1914.	1915.	1916.	1917.	1918.	1919.	1920.	1921.
January .....	26	3	10	21	28	13	22	17
February .....	18	11	23	19	87	26	30	18
March .....	27	23	23	20	34	9	35	11
April .....	22	14	6	15	7	27	8	7
May .....	8	5	14	12	10	15	13	..
June .....	12	2	6	9	9	28	15	..
July .....	8	13	268	19	6	11	15	..
August .....	3	14	30	12	7	24	14	..
September ...	9	27	6	21	13	23	13	..
October .....	9	7	39	23	11	16	13	..
November ...	14	12	12	21	3	14	31	..
December ...	19	11	94	15	26	19	18	..
<b>Totals</b> .....	<b>175</b>	<b>142</b>	<b>531</b>	<b>207</b>	<b>241</b>	<b>225</b>	<b>227</b>	<b>53</b>

## TO TAKE OVER TELEPHONE BUSINESS.

According to present plans, the Ingersoll, Ont., Telephone Co. hopes circumstances will permit its taking over the interests of the Bell Company about July 1. Officials of the Ingersoll Company have just returned from Montreal, where they were in consultation with representatives of the Bell Company regarding the consummation of the deal. In the meantime there is much to be done by the engineers and by way of valuation.

## MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Few changes of importance are shown in the March statements of the Montreal City and District Savings Bank and the Cassie d'Economie de Quebec. Deposits continue to reflect healthy conditions, while loans have changed but little. The liquid position of both institutions is better, with security holdings substantially advanced. In the case of the former bank, cash assets show a considerable reduction, but the latter shows an increase in this regard. The following are the March details, with comparisons:—

## Montreal City and District Savings Bank

	Mar., 1921.	Feb., 1921.	Mar., 1920.
Dom. gov. dem. dep. ...	\$ 93,364	\$ 93,364	\$ 624,835
Other dem. deposits .....	47,489,056	46,933,620	42,693,315
Total liabilities .....	48,082,834	47,495,540	43,660,338
Gov. and other sec. ....	13,844,585	13,612,926	11,194,854
Cash .....	7,883,312	8,772,889	7,052,432
Can. municipal sec. ....	16,558,115	15,685,561	15,800,058
Loans on bank stocks ...	856,266	807,978	788,812
Loans on other sec. ....	8,523,152	8,619,423	8,856,906
Total assets .....	50,891,224	50,575,216	46,499,586

## Cassie d'Economie de Quebec

	Mar., 1921.	Feb., 1921.	Mar., 1920.

# *And Now —* **Toronto Printers May Strike**

**T**HE present agreement between printers in book and job offices and employers in Toronto expires May 31. The minimum wage paid is \$35.20 per week (increased voluntarily a year ago by the employers from \$32.00, although the agreement had a year then to run). This wage covers a 48-hour week.

The International Union is demanding a week of 44 hours as the basis for all wage scales, and the Toronto unions are demanding a wage of \$44.00 per week of 44 hours, \$8.80 more per week for 4 hours less work.

This means an increase from 73 cents per hour to \$1.00 per hour, or over 36%.

Publishers and other employing printers feel that under present conditions of business and the admitted decreasing cost of living, the increased wages and shorter hours demanded by the International Union are unreasonable.

This is acknowledged by many of the thoughtful, loyal printers employed in the Toronto offices, who believe that the International Union has blundered in its demand that local unions shall not sign new agreements except on the basis of the 44-hour week.

The position, however, may be that these local men may not be able to make the International officers in Indianapolis see, that to force a strike now on these unreasonable demands would be an act of folly—and a strike may be called on June 1st.

The facts of the case are presented here, for the information of the sections of the public—subscriber and advertiser—reached by this publication.

The attitude of the employing printers is shown by their voluntary action in giving a 10 per cent. increase last year while the agreement calling for the minimum wage of \$32.00 a week had still a year to run.

They feel strongly now, however, that this is not a time when an increase of 36 per cent. in the labor cost of production should be permitted.

If publishers are forced to pay \$44.00 a week instead of \$35.20 and get only 44 hours of work instead of 48, it is inevitable that subscription and advertising rates must advance. No business can stand an increase in its wage bill of 36 per cent. and absorb that increase. The extra cost will have to be added to the sale price of the product.

Publishers sincerely hope that the great body of sane opinion among the local printers may prevail and that the Indianapolis officials will be induced to withdraw their unreasonable demands so that Toronto printers may continue to find well-paid, congenial employment.

If this sane, thoughtful opinion does not prevail, a strike seems inevitable, with its equally inevitable result of loss to the printers and publishers, and inconvenience and loss to the public.

*An expression of the opinion of readers of this paper on the Union's proposals, involving an increase of 36% in the labor cost of printed matter is asked. Will you not write a letter to the editor (not for publication) telling him your view of the situation.*

*This statement is published by and has received the endorsement of the Toronto publishers who are members of the*

 including THE MONETARY TIMES OF CANADA.

## ADMINISTRATION OF ESTATE

Court Holds There was No Undue Delay in Placing Assets in Safety—Firm of Bankers Failed

IN an action against the administrator of an estate to recover a sum of money lost to the estate it was held that, if the administrator of an estate and trustee of trust property acts honestly and in good faith, and having regard to all circumstances, reasonably, he ought to be excused for breach of trust, if there is a breach, and should be entitled to be relieved from all personal liability.

The facts of the case were that the father of the plaintiff, having died intestate during the minority of the plaintiff, left an estate of \$12,000 on deposit with a firm of private bankers. Cook, the defendant, at the instance of the plaintiff's mother and the family solicitor, was induced to apply for administration of the estate, and such was granted him on the 31st December, 1913. Thereafter, these moneys, less a comparatively small sum withdrawn for the payment of debts, etc., remained on deposit at interest with Ray Street and Co. in the name of the defendant as administrator until the bankers suspended payment on the 30th August, 1914, the war being assigned as the cause of the bank's failure. Computing interest to that date, the bankers, when they failed, were indebted to the estate in the sum of \$10,592. A dividend of 25 to 30 per cent. has been paid on the amount and the balance cannot be recovered. The plaintiff has come of age, and claims to recover the amount of the loss from the defendant upon the ground of negligence and breach of trust.

## Judgment of the Court

Justice Lennox says in his written judgment:—

"The first duty of trustees is to place the trust property in a state of security. . . . If the trust fund be a *chose in action* as a *debt*, which can be reduced into possession, it is the trustee's duty to be active in getting it in; and any unnecessary delay will be at his own personal risk.

"There is no hard-and-fast rule as to what constitutes undue or unreasonable delay; but the courts always attach importance to the question whether the alleged breach of trust by failure to convert or to realize the assets, and consequent loss, occurred within or beyond a year of the testator's death or the grant of administration. There are many cases upon this point.

"Matthew Trost having died intestate, his estate could not be regarded as a fund for permanent investment. It was in the hands of the defendant for the payment of debts, expenses of administration, and distribution. He appears to have applied himself promptly to the execution of his trust. He was appointed administrator, as I have said, on the 31st December, 1913, advertised for creditors within fifteen days, and applied to have his accounts passed, with a view to distribution of the assets, on the 12th May, 1914. At or about the same time, Catherine Trost, acting through Mr. McGovern, applied to be appointed guardian of the plaintiff, then an infant. Long vacation, absence of the Surrogate Court judge, doubts he entertained, and correspondence with the Official Guardian—all of which are incorporated in admissions of fact filed—prevented the appointment of Mrs. Trost as guardian (and prevented the withdrawal and distribution of the money in question) until the 30th October, 1914. In the meantime, as already stated, Ray Street and Co. suspended payment on the 29th August, and just after Mr. Ray must have become aware, as shown by the correspondence filed, that the Matthew Trost money might be demanded almost any day.

"It is not suggested, and could not be fairly argued, that the defendant did not act honestly and with the utmost good faith, and, having regard to all the circumstances, I am of opinion that he also acted reasonably, and that, in the terms of the statute, he "ought fairly to be excused for the breach of trust" (if what is complained of was a breach of trust) and for omitting to obtain the directions of the Court, and that he is under the statute entitled to be wholly relieved from personal liability accordingly."

## NEW OCEAN STEAMSHIPS SERVICE

The formation of a new steamship company, to be known as the Intercontinental Transports, Limited, which will operate a line of twelve ships between Montreal and Liverpool, and Montreal, Havre and London, was announced in Montreal on April 22 by A. W. Doherty, general traffic manager of the Canada Steamship Lines, Limited. The vessels for the new line will be supplied jointly by the Canada Steamship Lines and a Norwegian firm, and all will be rechristened and given the name of Ontario counties. The new services will provide a sailing out of Montreal every week, destinations alternating between Havre-London and Liverpool, and the first sailing will be May 14 by the steamship "Porsanger."

## GRAND RIVER DISTRICT ASSOCIATION

The Grand River Region Improvement Association was organized on May 1 in Kitchener, Ont., taking the place of the Grand River Improvement Association, formed some years ago for the conservation of the waters of the Grand River.

Representatives were present from Brantford, Galt, Preston, Kitchener and Waterloo, and the delegates were addressed by Thomas Adams, city planning expert of the Commission of Conservation. He offered to come to this district for a week to make a survey of the district with a view to making it an industrial centre, with the very best facilities to improve the relations with the agricultural sections of the region lying between Waterloo and Brantford. Mr. Adams asked for the co-operation of the engineering staffs of the various towns and cities interested, and the delegates present agreed to enlist the support of the municipal councils represented in the new association.

## REGISTRATION OF TRADE MARK

In a petition praying for an order directing that the trade mark "Christie" may be registered as a specific trade mark to be used in connection with the manufacture and sale of biscuits, etc., the Exchequer Court of Canada decided that, as the word had been used as a trade mark to denote and advertise the products which had been manufactured for a great many years, it may be registered as a trade mark to be used in connection with those products.

In the petition it is alleged that petitioners are the proprietors of a trade mark consisting of the word "Christie," which has been used by them for many years in connection with the manufacture and sale of biscuits, cake, puddings and infants' food, manufactured and sold by them, and which distinguishes said goods from similar goods manufactured and sold by others, which said trade mark is known throughout Canada as denoting and distinguishing the goods of your petitioners; that the petitioners made application to the Minister of Agriculture of the Dominion of Canada for the registration of the said trade mark as above described as a specific trade mark to be used in connection with the manufacture and sale of biscuits, cake, puddings and infants' food, in accordance with the provisions of the Trade Mark and Design Act; that the Minister of Agriculture, by letter dated December 15, 1914, refused to register the said trade mark on the grounds that it is a surname, and could be registered only in accordance with an order from the Exchequer Court of Canada; that, as a matter of fact, the word "Christie" has, through long-continued use and extensive sale acquired a secondary and trade mark meaning, denoting and distinguishing goods manufactured and sold by the petitioners.

The Court said: "I find myself bound by the judgment of the Supreme Court in the petition of the Horlick Malted Milk Co. to have their trade mark 'Horlick's' registered. The Supreme Court have thought that they were entitled to register such a trade mark, and directed by their formal judgment that the word 'Horlick's' be registered. The case of 'Christie' is very much stronger than that of 'Horlick,' and I am bound by the judgment of the Supreme Court."

## NEWS OF INDUSTRIAL DEVELOPMENT

**Fewer Canneries Will Operate in British Columbia This Year—Algoma Steel Corporation Secured Large Rail Order From Dominion Government—Cotton Manufacturers Convene With Garment Makers On Price Reductions**

INDICATIONS are that only about forty-six of the British Columbia canneries will operate this year out of a possible ninety-two, according to reports from the Fraser River district. Last year about sixty-one were in full swing all season and the pack of chums and pinks is still in the hands of the cannerymen awaiting a favorable opportunity to market. The sockeye season will open on the Fraser River July 1, but in the northern waters on June 19.

The British Columbia cannerymen have decided not to unite with the combination of British brokers who are interested in the marketing of all red fish in Great Britain and Europe. The reason given locally is that these British brokers have on hand about 400,000 cases of Japanese and Siberian red fish, and these cans, like 95 per cent. tins going to Britain are labelled after they get to London. Some of the United Kingdom brokers are financially interested in canneries in Siberia, and others have supplied money for canning operations for a season in order to get an option of the pack. With these points in view the British Columbia cannerymen decided that the Canadian fish would have but little chance until the Siberian fish had been marketed.

Cost of production was another matter which entered into this decision. Canada gave the Canadian cannerymen a tariff to protect them against cheap fish from Japan invading this market, on the ground that it was of an inferior grade, and also, being canned at a low cost the Canadian cannerymen could not compete. As the Dominion takes about 15 per cent. of the salmon packed in British Columbia, and Great Britain takes about 65 per cent., the cannerymen decided there was four times the necessity to impress upon the British government the rights of the colony and demand better treatment in inter-empire trade. To forcibly place their case before the British government the cannerymen decided that they could do so better without being hampered by an international alliance of fishing interests in which Japan and Siberia would play an important part.

#### Mining in Nova Scotia

The cost of producing coal in the Nova Scotia mines is in the neighborhood of \$5 per long ton, according to evidence given before the Special Parliamentary Committee on Fuel Resources last week by representatives of the United Mine Workers. The laborers received \$2.30 out of that \$5 total. The mine operators are asking the Canadian National Railways for \$7 per ton for coal at the mines on the basis of the short ton, which gives the coal operators the advantage of 240 pounds on each ton. Halifax coal dealers, selling to householders, make a spread of \$4.25 for taking the coal off the cars and delivering it to the consumers cellars, while the workers made only \$2.50 per long ton for producing the coal at the mines. The U.M.W. witnesses complained of wretched living conditions at the mines, and of low wages, made worse by lengthy periods of idleness.

Reports from Sydney Mines, N.S., speak of gloomy employment conditions. Workers who were employed at the Nova Scotia Steel and Coal plant, have been idle since last November, and are unable to get official information regarding the resumption of work. Many miners are also out of employment. The situation is regarded as serious, and there is no visible sign of a change for the better.

#### Algoma Steel Gets Order

The Algoma Steel Corporation has received an order from the Dominion government for 50,000 tons of rails for the Canadian National Railways. The plant at Sault Ste. Marie, Ont., is in full operation on the contract, which will require about two months to complete. Two thousand men are at work. The price paid has not been disclosed.

The Maritime Foundry Co., Ltd., Chatham, N.B., manufacturers of engines, planing mill machinery, etc., has closed down, because of the dullness in the milling and pulp and paper business. It is hoped by the management that operations will be resumed shortly.

Employment conditions in the New Brunswick milling industry have become settled. The men have agreed to the companies' terms, and a busy season is looked for. Stanley Douglas, Limited, have commenced operations at the mill at South Devon, with a ten-hour working day, and wages reduced 15 per cent. The estimated amount of lumber to be cut this year is given at 5,000,000 feet of long lumber and 2,000,000 feet of cedar for shingles.

Frasers Companies, Ltd., have commenced operations at their mill at Magaguadavic. The season's output, it is estimated, will be about 4,500,000 feet.

The Prince Rupert Pulp and Paper Co., recently incorporated in British Columbia, is asking industrial privileges at Seal Cove within the Vancouver limits. The company will erect a sulphite mill with a capacity of fifty tons of pulp. It will operate in conjunction with the Emerson sawmill, and the intention is to later build a large paper mill.

#### Garment Prices and Wage Reductions

Leading men in the Canadian garment manufacturing industry, who are now in Cleveland taking part in the International Association of Garment Makers' convention, met in Toronto this week to discuss matters at issue between the garment manufacturers and the cotton goods manufacturers. Three representatives of the three big mills which control the supply of Canadian-made cotton goods met the garment manufacturers in the conference, which was held at the King Edward.

Replying to representations from the garment makers urging a drop in the price of cotton fabrics, the mill men stated that prices at present were at the lowest possible point, and there could be no further drop, except in the case of a drop in wages. Wages in the cotton mills have decreased twelve and a half per cent. since the war, but the increase over the pre-war rate of wages is reckoned to be 157 per cent. Wages in the Southern States for cotton mill employees have dropped considerably, and Canadian manufacturers are anticipating decreases in the mills of the Dominion.

Deciding to accept a 10 per cent. wage cut, the sheet metal workers of Windsor, Ont., and adjacent municipalities returned to work this week. They had been on strike since May 6.

It is reported from Montreal that instructions have been issued to the refinery of the Atlantic Sugar Co. at St. John, N.B., to operate at full capacity. For several weeks the plant has been running at about 50 per cent., but several important export orders have recently been taken which will tax their capacity of 1,000,000 lbs. daily for some time.

#### FUR PRODUCTION OF CANADA

The Dominion Bureau of Statistics has completed its census of raw furs for the season 1919-20. The preliminary statement shows the total value of pelts of fur-bearing animals taken in Canada during the season 1919-20 to be \$21,197,372. To this total Ontario contributed \$6,414,917, Quebec \$4,587,110, Manitoba \$3,130,627, Saskatchewan \$2,338,761, Alberta \$1,550,009, Northwest Territories \$1,118,972, British Columbia \$742,242, Prince Edward Island \$660,704, Nova Scotia \$287,990, New Brunswick \$225,871, and Yukon Territory \$140,169.

The principal furs in order of value were: Muskrat, \$5,966,762; beaver, \$5,336,067; marten, \$1,787,940; mink, \$1,697,561; silver fox, \$932,602; fisher, \$859,178; coyote, or prairie wolf, \$727,093; white fox, \$713,210; red fox, \$669,689; ermine, \$599,641; skunk, \$435,286; otter, \$382,479; lynx (including wildcat), \$231,834; patch fox, \$227,217; raccoon, \$198,755; timber wolf, \$166,066; black bear, \$108,832.

## ACADIA FIRE INSURANCE COMPANY

A successful year was completed by the Acadia Fire Insurance Company in 1920, with greater earnings and smaller losses. In the fire department gross premiums amounted to \$539,911, as compared with \$413,407 in 1919. After deducting return premiums and reinsurances, net cash received for premiums amounted to \$258,181, against \$227,602 previously. The hail department was equally as successful, showing gross premiums of \$173,294, and net, \$36,153, compared with \$103,248 and \$23,981, respectively, in 1919. Total net income, including \$44,239 from interest and rents, amounted to \$338,573, compared with \$312,536.

Turning to the losses, shows that the fire department contributed \$102,664 and the hail department, \$7,570, making a total of \$110,234, compared with \$120,128 in 1919. Commission and general expenses totalled \$94,543, against \$67,156 previously. After paying dividends at the rate of 6 per cent. on the paid-up capital of \$400,000 there remained a balance to be carried forward of \$217,511, compared with \$151,412 in 1919.

The Acadia Fire Insurance Company is an organization of long standing, having been incorporated in 1862. It was not until 1905, however, that a Dominion license was secured, and previous to that date the company's operations were confined entirely to the province of Nova Scotia. The total assets are now \$913,870, and the surplus to policyholders is \$636,922.

The Vancouver office of the Standard Trusts Company has been moved to 541 Pender Street, of that city.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year, a total of \$3,492,840. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

## NEWS OF MUNICIPAL FINANCE

**Victoria Sinking Fund is in Arrears by a Large Sum—Edmonton's Budget Reflects Favorable Conditions—Glace Bay Tax Rate is Not Increased**

**Glace Bay, N.S.**—The tax rate for 1921 will be 5½ per cent., which is the same as for 1920.

**Leader, Sask.**—A better financial position is shown in the annual statement of the municipality. Taxes collected last year amounted to \$25,409, as compared with \$24,235 in 1919, while arrears are now only \$4,431, as against \$5,335 in 1919. The debenture debt has been reduced from \$22,837 to \$20,489, and the surplus of assets over liabilities is \$18,883.

Total assessment valuation in 1920 was \$850,575, compared with \$836,847 in 1919, and the tax rate last year was 40 mills, as against 37 mills previously.

**Outremont, Que.**—In analysing the financial position of the municipality last week, to ascertain the ability of the corporation to borrow money, it was declared by the Montreal Metropolitan Commission that the total value of property in that municipality was \$29,011,059, and as the amount of properties exempted from taxation was \$6,036,459, this left a balance of \$22,974,600 of taxable property. The statement further showed the limits of Outremont's borrowing power based at 15 per cent. on assessable property to be \$3,446,190, and as the amount for local improvements was \$1,535,446, this gave a total of \$4,981,632. It was also shown that as the total debenture debt of Outremont was \$2,850,000, and as the municipality was asking for a further loan of \$750,000, this made a total of \$3,600,000, and with the latter amount deducted from the amount of the borrowing power, this left an available balance over and above the proposed issue, of \$1,381,632, which the commission regarded as a safe margin.

**Edmonton, Alta.**—A comparison of the proposed expenditures for 1921 with 1920, reveals a satisfactory condition of affairs. The following are the figures:—

	1921.	1920.
General municipal purposes	\$ 924,324	\$ 1,375,557
General debenture interest and sinking fund	973,331	898,824
Public school board	1,126,006	1,112,900
Separate school board	124,342	106,015
Library board	43,964	49,098
Total expenditures	3,191,967	3,542,394

The tax rate this year is 39.90 mills for public school supporters, and 38.80 mills for separate school supporters, as compared with 45 mills and 41.76 mills, respectively, last year.

For the first quarter of 1921, civic utilities accumulated a surplus of \$84,240, as compared with a surplus of \$28,019 in the same period of 1920. All departments had a substantial excess of earnings over expenditures, with the exception of the street railway, which showed a deficit of \$12,386. The deficit in this department for 1920, however, was \$17,377, so that there has been an improvement.

**Victoria, B.C.**—Seventy-five per cent. of the city taxes were paid last year, or approximately the same as in 1919, and 5.88 per cent. better than in 1918, according to the report of James L. Raymur, city comptroller. Mr. Raymur says:—

"In November the price of Victory Loan bonds being at 93, we purchased \$100,000 for our sinking fund. During the year the policy of receiving Victory bonds for taxes was continued, the bonds being taken at their market value and placed in the sinking fund. In 1920 the bonds so taken amounted to \$10,450. In February \$50,000 Dominion War Loan bonds, due 1922 and bearing interest at 5 per cent., were exchanged for \$50,000 Victory bonds due 1934, bearing interest at the rate of 5½ per cent. In April \$25,000 Victory bonds, due 1934 bearing interest at 5½ per cent., were purchased at 97. Province of British Columbia bonds, due 1939 bearing interest at 5 per cent., amounting to \$60,000, were bought at 88.75. Our holdings of Victory bonds now amount to \$1,209,550, and of British Columbia bonds to

\$108,000. Other than moneys deposited in the bank, these are the only securities in which our sinking funds are invested. On January 1, 1920, we held city of Victoria debentures amounting to \$115,553, due in 1920. These were paid off as they fell due, and the proceeds deposited in the sinking fund.

"The general purpose sinking fund is intact, but the local improvement is, unfortunately, short the sum of \$2,806,995. Debentures are due in 1921 amounting to \$498,225, and in 1922 to \$284,231. These can be taken care of, but in 1923, when \$2,466,982 falls due, refunding will have then to be resorted to; authority for this was obtained at the 1920 session of the legislature.

"The annual tax sale was held in October, and property of the assessed value of \$321,800 was sold to private purchasers for the sum of \$80,213. The city bought in property of the assessed value on land of \$2,663,270, the taxes, interest and costs on which amounted to \$1,100,296. Property to the assessed value of land of \$233,780 has either been redeemed or the city's equity purchased, and as there are valuable improvements on some of the property, it is expected that a further amount will be redeemed before next October, when the year allowed for redemption expires."

## FUTURE OF PUBLIC UTILITIES

A circular has been prepared by McCuaig Bros. and Company dealing with the public utility stocks and the situation as applied to the companies. The circular points out that at the present moment prices of street railway, lighting and gas companies offer greater possibilities than any other class of bonds and stocks. The circular says:—

"The recent collapse in commodity prices, which forced industrial concerns to write down their inventories to present market values, has been a veritable blessing to street railway and lighting companies, owing to the great saving in operating expenses due to the prevailing low prices of coal, copper, lumber, rails, etc. Moreover, it is by no means certain that the declining movement of commodity prices is at an end. Still further economies may be effected by corporations—the outlook for public utility securities is perhaps better than ever before, and they promise to rapidly regain the popularity which they enjoyed prior to the war."

The circular then goes on to review the position of various public utility securities holding out interest to Canadian investors. Each one is taken individually and briefly but thoroughly analyzed. Returns on these securities at the present time vary from 6.09 to 9.58 per cent.

## PRICES DECLINE IS SLOWER

The index number of wholesale prices, constructed by Professor H. Mitchell, of McMaster University, Toronto, stood at 186.4 for the month of April, showing a decline of 1.8 per cent. from the previous figure for 190 for March, and a total decline of 37.8 per cent. from the peak of 298.3, reached in May, 1920. Among the twenty foodstuffs listed declines were registered in flour, mutton, pork, bacon, lard, butter, cheese, sugar, potatoes, oatmeal and tapioca. Advances occurred in beef and fish. In the twenty manufactured goods declines were registered in rubber, leather, galvanized sheets, coal oil, and advances in cotton, silver, lead and hard maple.

It will be noticed that the decline this month is very small, being almost exactly half of the decline in March. This steadying of prices was expected, having been predicted as far back as the beginning of the year. It is to be noted that such great staples as wool, cotton, hides, lead, copper, tin and lumber have ceased to fall, and in some cases have risen slightly. The steadiness in stock exchange prices would seem to foreshadow a continued steadiness in commodity prices during the summer, with perhaps a resumption of the decline in the autumn.

# Government and Municipal Bond Market

**Ontario's Loan Increased—Greater Winnipeg Water Securities Have Been Fairly Well Absorbed—Victory Loan Prices Stronger—Windsor Borrows on 6.56 Per Cent. Basis—Talk of New Financing by Canadian Government in New York**

**T**HERE was nothing in the budget, which was brought down this week at Ottawa by the minister of finance, to influence the government and municipal bond market adversely or otherwise. There is still a good demand for securities, and prices were firm. The issue of Greater Winnipeg Water District bonds brought out last week has been pretty well absorbed at a price to yield the investor 6.30 per cent. Ontario's \$5,000,000 was taken up at 6.05 per cent., and from what can be understood, the issue has been increased to a figure somewhere in the neighborhood of \$15,000,000 and these additional bonds are being marketed at the same price as the original block.

Victory loan prices were stronger, including the taxable issues. The following comparisons give the recent trend:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close May 4.	Close May 11.
1922 .....	98	98%	98¼	98.50	98.50
1927 .....	97	98	97½	98.00	98.00
1937 .....	98	99%	99%	99.00	99.30
1923 .....	98	98%	98	98.00	98.10
1933 .....	96½	98	98%	97.30	97.30
1924 .....	97	96¾	96%	96.50	96.75
1934 .....	93	95¼	95%	94.95	95.00

There is talk in New York of new financing by the Dominion government, to pay off the securities maturing in August, and to build up depleted balances. As far as known, negotiations have not yet been inaugurated, but are expected to be during the early part of the summer. The August 1 maturity of the Canadian government is \$15,000,000 5½ per cent. notes, now quoted at 93%. Their recent strength has been noticeable, as less than three weeks ago the bonds sold at 96.

The Canadian government had a maturity of \$25,000,000 in New York on April 1. Efforts were made at the time to do some new financing, but officials of the Dominion demurred at the 7½ per cent. rate required by the bankers. So the Canadian government shipped approximately \$9,000,000 of gold to New York, and made up the remainder of the maturity from its balances at that centre.

The new financing is expected to be approximately \$40,000,000, which not only will pay off the \$15,000,000 maturity, but will replenish the depleted balances of Canada in New York. It is pointed out by bankers familiar with the financial affairs of the Dominion that its payment of its April 1 maturity, in large part, out of balances there, was a temporary measure, and that it is the intention of Dominion officials to replenish these balances at the earliest opportunity. The opinion is expressed by bankers that the financing should be accomplished on a 7 per cent. basis.

### Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
York Tp., Ont. ....	\$ 210,000	6	10-instal.	May 16
Peterboro, Ont. ....	230,000	6¼ & 6½	20-years	May 16
Sarnia, Ont. ....	189,434	6 & 6½	Various	May 17
Renfrew County, Ont.	250,000	6	20-years	May 17
Saskatoon, Sask. ....	204,000	5 & 6	Various	May 23
Pembroke, Ont. ....	80,324	6	Various	May 25
Toronto, Ont. ....	5,000,000	6	Serials	June 1
Westbourne R.M., Man.	60,000	6	30-instal.	June 7
Vermilion, Alta. ....	10,000.	7	20-instal.	June 11

**York Township, Ont.**—Tenders will be received until May 16, 1921, 4 p.m., for the purchase of \$210,652.91 6 per cent. 10-instalment sidewalk debentures.

**Westbourne R.M., Man.**—Tenders will be received until June 7, 1921, for the purchase of \$60,000 6 per cent. 30-instalment debentures, the proceeds of which will be used for constructing and improving roads, bridges and culverts. A. M. McGregor, secretary-treasurer.

**Pembroke, Ont.**—Tenders will be received until May 25, 1921, 3 p.m., for \$80,324 6 per cent. 10, 20 and 30-instalment debentures, the proceeds of which will be used for local improvement and waterworks purposes. (See advertisement elsewhere in this issue.)

**Toronto, Ont.**—Tenders will be received until June 1, 1921, for the purchase of \$5,000,000 6 per cent. serial bonds, issued on account of the acquisition and the rehabilitation of the Toronto Railway Co. (See advertisement elsewhere in this issue.)

### Debenture Notes

**Outremont, Que.**—Electorates have voted in favor of borrowing \$750,000 for various local works.

**Thetford Mines, Que.**—Ratepayers have approved a by-law authorizing the borrowing of \$60,000.

**Windsor, Ont.**—The Separate School Board has turned down all offers for \$225,000 6½ per cent. 30-instalment debentures.

**Victoria, B.C.**—The city will endeavour to float a loan of \$225,000 for the building of a new unit for the Provincial Royal Jubilee Hospital.

**Verdun, Que.**—The council has passed two money by-laws, one providing for \$100,000 to cover alterations to the filtration plant, and the other for \$26,500 for local improvements.

**Preston, Ont.**—Ratepayers have voted in favor of loaning \$15,000 to the H. W. Steel Shank and Specialty Co. for a period of ten years, with interest at the rate of 6 per cent.

**St. Lambert, Que.**—The by-law authorizing a loan of \$500,000 for a new fire station, sidewalks, sewers and water service has just been approved by the Lieut.-Governor-in-Council. The by-law was voted on June 7, 8 and 9, 1920, but was disapproved by the Department of Municipal Affairs on account of a technicality. The town council then appealed to the provincial cabinet through the minister of municipal affairs, with the result that the by-law has been approved.

**Lindsay, Ont.**—The municipality this week asked for tenders on the following debentures: \$15,000 6 per cent. 1921-35; \$20,000 6 per cent., 1921-40; \$9,794.31 6 per cent., 1921-31; \$11,200.67 6 per cent. 1922-31; \$3,154.68 6 per cent., 1922-41; \$1,545.19 6 per cent. 1922-26. The bids received were not considered satisfactory and the debentures will be offered to local citizens.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from April 23 to 30, 1921:—

Schools, 8 per cent.—Garvagh, \$3,500 10-instalments; Affleck, \$3,500 10-years annuity; Fur Lake, \$1,600 10-years annuity; Blighty, \$5,000 10-instalments; Kutawa, \$4,600 10-years annuity; Driver, \$1,200 8-years annuity.

Rural Telephones, 8 per cent.—Rhein, \$1,500 15-years annuity; Stramaer, \$1,000 10-years annuity; Denzil, \$1,500 15-years annuity; Elrose, \$2,600 15-years annuity; Speers, \$1,200 15-years annuity.

Villages.—Aberdeen, \$4,000 8 per cent. 15-instalments, for concrete sidewalks. Luseland, \$2,500 8 per cent. 10-instalments, for cement crossings.

#### Bond Sales

**Chatham, Ont.**—An issue of \$24,000 6 per cent. debentures has been disposed of locally at par.

**Shawinigan Falls, Que.**—A. E. Ames and Co. have purchased \$138,400 5½ per cent. 5-year bonds at a price of 95.916, which is on about a 6.46 per cent. basis.

**St. Boniface, Man.**—As mentioned in these columns last week, the municipality sold its \$273,233 6 per cent. 10, 15 and 30-year debentures to the Municipal Debenture Corporation, of Montreal. The cost to St. Boniface was 7 per cent.

**Walkerville, Ont.**—There was good competition for the \$95,982 6 per cent. 10 and 20-instalment debentures, the issues going to A. E. Ames and Co. at 95.69, which is on about a 6.75 per cent. basis. Tenders were as follows:—

A. E. Ames & Co. ....	95.69
C. H. Burgess & Co. ....	95.66
R. C. Matthews & Co. ....	95.62
Geo. Carruthers & Son ....	95.60
Wood, Gundy & Co. ....	95.59

**Windsor, Ont.**—The city this week disposed of \$625,230 6 per cent. 20 and 30-instalment debentures to A. Jarvis and Co., at a price of 94.846, which is on about a 6.56 per cent. basis. The following tenders were received:—

A. Jarvis & Co. ....	94.846
National City Co., Ltd. ....	94.655
Wood, Gundy & Co., and R. C. Matthews & Co. ....	94.58
Dominion Securities Corp. ....	94.33
A. E. Ames & Co. ....	93.43

**Saskatchewan.**—The following is a list of debentures reported sold from April 23 to April 30, 1921:—

School Districts, 8 per cent.—Pretty Valley, \$5,000 10-years; Waterman-Waterbury, Regina, Sharon, \$400 10-years; Geo. Pirefer, Hoath, Parkside, \$2,000 20-years, Inverallan, \$1,200 10-years, Manchester, \$300; C. C. Cross, Regina, Vernon, \$1,500 10-years; T. A. Mattick, Qu'Appelle, Chesley, \$2,000 10-years; City of Prince Albert Sinking Funds.

Rural Telephones, 8 per cent.—Flett Springs, \$3,500 15-years; C. C. Cross and Co., Regina, Dilke, \$2,000 15-years; Continental Securities Co. Spruce Home, \$31,900 15-years; W. Shackleton, Prince Albert.

Town of Vonda, \$13,000; locally.

#### REVENUE ESTIMATES HIGHER IN NOVA SCOTIA

Increase of \$727,984 in Present Year, Chiefly Obtained from Corporations, Motor Vehicles and Other Taxes

**NOVA SCOTIA'S** revenue for the year ended September 30, 1921, was estimated at \$4,529,059, an increase of \$727,984 over that for the previous year. The increase is made up largely from supplementary revenues, which show an increase of \$234,121, and is taxation on banks, insurance companies, corporations, etc. Then there is a substantial increase in motor vehicle fees of \$89,285, and the revenue from taxation, which includes municipal road tax, theatres, motor vehicles and income tax on corporations, and in the total makes the largest single group of the several which constitute the increase—namely, over \$500,000.

These figures were placed before the provincial legislature on May 6, in the budget speech of James C. Tory, treasurer. Mr. Tory gave a history of the revenues since Confederation. The total raised and given to the province since that date was \$60,000,000. Of this \$26,000,000, or 43 per cent., was from federal government subsidies. Revenue from provincial Crown lands, mines, and railways, was \$23,000,000 or 38 per cent. Taxation during that time lived on such things as succession duties, income tax and fees on corporations, motor vehicle taxes, theatres, municipal road tax and sundry tax items totalled \$6,186,000 or only 9 per cent, and a small revenue from public services of 8 per cent. of the total.

It was forty years after Confederation before the revenue of Nova Scotia reached a million dollars. Before Confederation the revenue was \$2,000,000 and during several years between 1867 and 1900 the revenue of the province went down to below a half million dollars. During that time there was practically no taxation in the province and the public services were starved for want of money. The people were not trained in taxation, and the governments were reluctant, naturally, about imposing taxation.

#### Expenditures Reviewed

As he had totalled the revenues for the years since Confederation so also Mr. Tory described the expenditures. For education in that time there had been spent in Nova Scotia \$14,000,000, for roads and bridges, \$10,000,000, interest on debt \$9,000,000, public relief \$8,000,000, this included sanatoria and hospitals. It was to be seen by this there were three or four primary items which had absorbed revenues of the province. The expenditures for 1920 was a total of \$3,893,724, including the expenditure on revenue accounts of \$88,034. Of this amount 25 per cent. was on roads and bridges; on public relief such as hospitals and sanatoria, 21 per cent.; interest, 16 per cent.; education, 14 per cent., and agriculture, 3 per cent. The increase of expenditures was due mainly to the following: Education, total expenditure, \$369,241; besides the School Book Bureau \$58,060, and technical education, \$93,549. Interest on debentures, \$607,237. Provincial sanatorium, \$286,679, the Victoria General Hospital, \$180,064, and highways, \$971,252.

The national obligations to-day were such as staggered the imagination of financiers. There had been during the war an incomprehensible increase of taxation upon the people. In Canada it was the enormous sum of \$253 per capita. In Great Britain, \$758 per head, in France it amounted to \$5,000 per family, or considerably over one thousand dollars per capita. The United States, of all the powers, was the lowest, being lower than Canada. Great Britain had reduced her debt last year by £250,000,000, or a billion dollars in a round sum. These national obligations of Canada had their bearing upon the financial conditions to be met by the province.

Mr. Tory did not regard with any pessimism the conditions in Nova Scotia. He thought every member of the House should realize the limitations in raising revenue. The taxing power of the people was limited and he believed the province would never be able to be more than anything than conservative. He had one fault to find with the members of the House and that was that every one of them was thinking of expenditure, but few thought of the difficulties of getting money. He urged upon the municipalities the use of the powers which had been given them to raise money for the functions of government and public service which had been allocated to them by the constitution.

#### Taxes on Corporations

In connection with the supplementary revenue the greatest increase was with banks and insurance companies, the banks increasing from \$32,000 to \$65,000, and the increase with insurance companies had been \$36,802. This Mr. Tory explained, was due to different form of taxation in an effort to get down to the principle of taxation on capital. Banks, he said, reasonably agreed to it. It was an effort to get revenue from those most able to pay for it. "This was not blind finance, but done in the light of Liberal principles," declared Mr. Tory. Nova Scotia in regard to banks and insurance companies was in a disadvantageous position owing to the majority of these institutions having their head office in the province of Ontario to which government they paid their taxation, Nova Scotia getting no advantage. Something had to be done to equalize this by an imposition of taxation. The group of resources which produced the greatest single item of revenue came under taxation. This produced \$501,000 of the increase. Examination of this group Mr. Tory said would show that such taxation was not directed against the individual, but against wealth and companies and corporations.

CORPORATION SECURITIES MARKET

Stock Prices Improve on Canadian Exchanges With the Elimination of Uncertainties—Brompton Offering is Now Being Made

WITH two uncertainties removed, the Canadian stock markets this week were able to make a little headway. The obscurity of Riordon's position had a depressing influence upon paper stocks and upon all prices in general, while the ambiguity surrounding Canada Steamships was the other unsettling factor.

Regarding the latter, the publication of the annual statement and the announcement that the company had made arrangements with certain London interests to take the proposed issue of \$5,000,000 8 per cent., collateral trust debenture stock, gave a certain amount of encouragement. The question connected with Steamships was whether the company could continue to pay the dividend or pass it, and recently, when it was understood that there was some difficulty in raising finances in England, it was currently expected that if the financing was not done the dividend would be passed, and that induced a good deal of short selling.

Last week the directors met, and a notice was sent out calling a special meeting of shareholders to approve the recommendations of the directors and certain by-laws relating to the issue of debenture stock, a circumstance indicating that the company's financing plans were nearing completion. This, together with a fairly satisfactory condition of earnings shown in the annual report, and the substantial surplus, led to the belief that the preferred dividend was safe, and the stock moved up.

Riordon's Influence

But the most important development of the week was the publication of the position of the Riordon Company. The details were not altogether surprising, as the drastic decline of the stock on the exchanges two weeks ago foretold of some such event, but their announcement eliminated the uncertainty.

The company is closer to bankruptcy than is comfortable, and the shareholders are asked to lend their support. The question was asked whether it would be better to sacrifice what is now involved in the business than to risk further amounts, but the directors and those who are in direct touch with the situation have a great deal of faith in the enormous resources of the enterprise, and it is felt that the maturity of the present plans will put the company upon its feet again. It is evident to all, however, that the next few years will call for skilful and conservative handling of this immense and complex organization. It is expected that there will be a fair demand this year for sulphite pulp, of which the Riordon Company is the largest producer.

Budget Has Little Effect

As far as the budget was concerned, the market was affected but little. National Breweries responded to the removal of the thirty per cent. tax on beer, but no other

movements were recorded. As far as the whole market was concerned the budget was not displeasing. The abolishment of the business profits tax was considered a favorable factor.

Trading for the week resulted in a turnover of listed stocks on the Montreal exchange of 76,164 shares, as compared with 46,771 in the previous week, while in Toronto the figure was 13,963, compared with 15,921. Bonds changed hands to the extent of \$1,520,500 in Montreal, as against \$1,356,809, while the turnover in Toronto was \$1,328,850, compared with 1,315,750 previously.

Greenshields and Co., Hanson Bros., and R. A. Daly and Co., are now making public offering of the unold balance of \$2,500,000 8 per cent. 20-year convertible mortgage bonds of the Brompton Pulp and Paper Co., Ltd., at 99 and accrued interest, to yield 8.10 per cent.

The securities are payable in Canada only, are in denominations of \$1,000, \$500 and \$100, and can be registered as to principal only. They are callable in whole or in part on any interest date at the option of the company at 110 and accrued interest to May 1, 1931, provided holders be given 90 days' notice in which to exercise conversion privilege; after that date at 105 to May 1, 1936; thereafter at par.

The bonds are convertible at any time until May 1, 1931, at the option of the holder, into common stock on the basis of 20 shares of common stock for each \$1,000 par value of bonds. They are secured by a direct mortgage and charge on all fixed assets and properties of the company, and on all securities now owned or hereafter acquired by it, including entire common stock of the Groveton Pulp and Paper Co. and the Claremont Paper Co., subject only to \$3,413,000 underlying bonds.

As at January 1 last, plant and property valuations, after deducting depreciation reserves, was \$14,567,000, and net quick assets were \$3,586,000.

National Brick Will Reorganize

The National Brick Co., of Laprairie, Que., has issued a circular to the bond and shareholders of the company, telling of a plan for the reorganization of the company. Two new by-laws will be submitted to a special meeting to be held June 15. The first by-law will effect an increase in the capital stock of the company from \$2,000,000 to \$5,500,000 by the issuance of 35,000 shares of \$100 par value 7 per cent. cumulative preferred shares, dividends being cumulative from May 1, 1921. This stock shall rank in a winding up, both as regards capital and dividend, in priority to the common shares. Preferred shareholders shall have the right to elect a majority of the directors, but not minority directors. Bondholders will convert their bonds presently outstanding into 7 per cent. cumulative preferred stock.

The second by-law is to create an issue of 6 per cent. 30-year first mortgage bonds to an amount not exceeding \$750,000, said bonds to be secured by the trust deed of hypothec mortgage and pledge upon the company's properties, the deed to be in favor of the Quebec Savings and Trust Co., as trustees for the bondholders. A special meeting of bondholders is called for 3 p.m. June 15, and of shareholders at 2 p.m.

# Brompton Pulp & Paper Company

LIMITED

## 8% Convertible Twenty-year Mortgage Bonds

Dated May 1st, 1921. Due May 1st, 1941. Interest payable semi-annually May 1st and November 1st, at the Quebec Savings and Trust Company, Montreal, and at the Royal Bank of Canada, Montreal, Toronto, Halifax, Winnipeg and Vancouver. Coupon Bonds of \$1,000, \$500 and \$100 denominations, with privilege of registration as to principal only. Callable in whole or in part on any interest date at the option of the Company at 110 and accrued interest to May 1st, 1931, provided holders be given 90 days' notice in which to exercise conversion privilege; after that date at 105 to May 1st, 1936; thereafter at par. Trustee—Quebec Savings and Trust Company.

### CAPITALIZATION

	Authorized 210,000 shares	Outstanding 140,000 shares   As per Balance Sheet
Common Stock (No par value) .....		\$7,000,000
8% Cumulative Preferred Stock .....	\$2,000,000	2,000,000
6% First Consolidated and General Mortgage Bonds, due 1927, 1935 and 1939, including Bonds of Groveton Pulp & Paper Co., Ltd. ....	3,707,000	3,413,000
8% Convertible General Mortgage Bonds (this issue) due 1941. ....	3,000,000	2,500,000

The Bonds of this issue are convertible at any time until May 1st, 1931, at the option of the holder, into common stock on the basis of 20 shares Common Stock for each \$1,000 par value of Bonds.

For detailed information regarding the Company, we refer to a letter from F. N. McCrea, President of the Company, from which he summarizes as follows:

1. Brompton Pulp and Paper Company, Limited, is one of the largest Canadian companies producing miscellaneous pulp and paper products, including newsprint paper, kraft and fibre paper, boxboard, sulphite, sulphate and groundwood pulp. The business has been in successful operation for many years.
2. This issue is for the purpose of partly reimbursing the Company for expenditures on Capital account made in recent years largely out of earnings, and aggregating approximately \$5,000,000.
3. Bonds will be secured by a first mortgage and charge on all the fixed assets and properties of the Company, and on all securities now owned or hereafter acquired by it, including entire common stock of the Groveton Pulp and Paper Company and the Claremont Paper Company, subject only to \$3,413,000 underlying bonds listed above.
4. The issue of remaining \$500,000 in Treasury is restricted to 50% of additional Capital expenditure, and provided net earnings for preceding year have been twice the amount necessary for all Bond interest.
5. An annual cumulative sinking fund of approximately 2 1/2% of bonds outstanding will be commenced, May 1st, 1923, sufficient to retire entire issue at maturity irrespective of bonds which may be cancelled through conversion.
6. Under terms of trust deed Company is required to maintain surplus of current assets over current liabilities of not less than \$2,000,000 during the life of these bonds.
7. Freehold and leasehold timber areas of the Company and subsidiaries aggregate 1,190 square miles estimated to contain 7,000,000 cords pulpwood and a very large quantity of saw logs. These reserves are estimated sufficient for all future operations at present capacity. They can be further conserved, as in the past, by purchases from individuals.
8. Annual production of the Company's Mills at East Angus, P.Q., Bromptonville, P.Q., Claremont, N.H., and Groveton, N.H., in net tonnage for sale, is as follows:—

	Tons
Groundwood Pulp .....	15,000
Unbleached Sulphite Pulp .....	8,000
Newsprint Paper .....	34,000
Kraft and Fibre Paper .....	51,000
Box Board .....	15,000

Total Annual production for sale .....

Lumber Production, ft. b.m. ....	123,000
Water Powers 22,150 H.P. maximum developed, and 12,000 H.P., capable of reasonably economical development. ....	10,000,000

9. Total assets, on which these Bonds are a charge, as per combined balance sheet of these Companies, at January 1st last, after giving effect to present financing amount as follows:—
- |  |              |
|--|--------------|
| Plant and Property Valuations, after deducting Depreciation Reserves ..... | \$14,567,000 |
| Net Quick Assets .....   | 3,586,000    |
| Total Assets .....   | \$18,153,000 |
| Total Bonds Outstanding .....  | \$ 5,913,000 |
10. Net earnings after interest, taxes, and depreciation for the last four years have averaged \$1,291,000 as against bond interest, including interest on this issue, of \$105,000, or over three times interest requirements on outstanding bonds, including present issue.
  - Net after depreciation and taxes for last fiscal year was \$2,314,000, or over five times all Bond interest requirements.

A large part of this issue having been sold we offer the unsold balance at the price of **99 AND ACCRUED INTEREST, TO YIELD 8.10%.**

## CORPORATION FINANCE

Canada Steamship Lines Had Larger Gross but Smaller Net Earnings—Winnipeg Railway Position Improving

Winnipeg Electric Railway Co.—For the first quarter of 1921 net earnings show an increase of 14.4 per cent. over the same period in 1920. The figures are as follows:—

	1921.	Increase.	Per cent.
Gross .....	\$1,487,578	\$86,953	6.2
Operating and taxes .....	1,123,664	76,593	7.1
	\$ 363,914	\$10,359	3.
Fixed charges, interest, etc..	182,714	*12,479	6.4
	\$ 181,199	\$22,839	14.4

\*Decrease.

Canada Steamship Lines, Ltd.—The annual financial statement of the company has at last made its appearance, showing a fairly satisfactory position in regard to earnings, and an enlarged surplus. Gross revenue was \$19,871,461, as against \$15,039,277 in 1919 and \$13,878,224 in 1918. After addition of other income, deduction of operating expense and all charges, including interest and reserves and preferred dividends, net earnings available on the common stock amounted to \$1,057,772, as compared with \$1,471,679 in 1919 and \$1,358,741 in 1918. After deduction of common dividends and inclusion of profits from sale of assets, surplus amounted to \$1,846,236, as compared with \$1,765,280 in 1919 and \$2,634,877 in 1918. Addition of previous surplus balance brings total balance at profit and loss account at the end of the year to \$8,611,147, as compared with \$6,774,911 in 1919 and \$5,009,631 in 1918.

Net earnings for 1920 were equivalent to 8.81 per cent. earned on the outstanding common capitalization of \$12,000,000, as compared with 12.26 per cent. in 1919 and 13.22 per cent. in 1918.

As previously forecasted, the working capital position of the company has been somewhat impaired. Net working capital as at the end of 1920 was \$469,694, as compared with \$929,299 in 1919. Other changes in the balance sheet are illustrated by the following comparisons:—

	1920.	1919.
Vessels .....	\$27,308,960	\$25,697,823
Real estate .....	6,685,061	6,351,017
Current assets .....	8,017,693	5,866,873
Investments .....	1,245,930	551,700
Total assets .....	48,894,394	44,557,179
Funded debt .....	6,501,483	7,979,619
Current liabilities .....	7,547,999	4,937,574
Reserves .....	175,776	142,443

Canadian Cottons, Limited.—Although business fell off in the last six months of the fiscal year, which ended March 31 last, total business done was above the banner year of 1919-20, sales reaching \$11,231,102, against \$11,148,438 in that year. With the inclusion of other amounts a total of \$11,496,580 was reached, against \$11,290,116 the preceding year. The cost of raw material, manufacturing cost, marketing of products, repairs and maintenance, however, showed a marked increase, amounting to \$10,817,112 against \$9,709,071 in 1919-20. This left profits at \$679,468, against \$1,581,045 in 1919-20, and \$1,365,103 the previous year. Rentals and investments showed a decrease, bond interest an increase, and after preferred dividends the amount left for common dividends was \$459,507, against \$1,441,093 the preceding year.

The earnings statement for the year shows that the company earned 16.88 per cent. on common stock before depreciation and 9.6 per cent. after depreciation of \$200,000. This, compared with 23.24 per cent. in the preceding year, which was a record in the company's history.

The president, C. R. Hosmer, in his annual report, states that the profits for the first half of the year were satisfactory, but those of the last six months were seriously affected by the severe and wide depression which existed in business.

(Continued on page 43)

## DEBENTURES FOR SALE

## THE CANADIAN BANK OF COMMERCE

### Dividend No. 137

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches, on and after Wednesday, 1st June, 1921. The transfer books of the Bank will be closed from the 17th May to 31st May next, both days inclusive.

By Order of the Board,

JOHN AIRD,  
General Manager.

Toronto, 22nd April, 1921. 545

## THE MERCHANTS BANK OF CANADA

### ANNUAL MEETING

The Annual General Meeting of Shareholders for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the first day of June next. Chair will be taken at 12 o'clock, noon.

By Order of the Board.

D. C. MACAROW,  
General Manager.

Montreal, 26th April, 1921. 553

## THE OGILVIE FLOUR MILLS COMPANY, LIMITED

### DIVIDEND NOTICE

Notice is hereby given that a quarterly dividend of one and three-quarters per cent. has been declared on the Preferred Stock of The Ogilvie Flour Mills Company, Limited, payable Wednesday, the first day of June, 1921, to shareholders of record at the close of business Thursday, the nineteenth day of May, 1921.

By Order of the Board.

G. A. MORRIS,  
Secretary-Treasurer.

Montreal, May 6th, 1921. 554

duces, fell over 50 per cent. It is understood that large and important enlargements have been made to the company's various mills and also to the valuable waterpowers owned by the company, which will increase their capacity and efficiency, thereby making for substantial decrease in the cost of operation.

AN ADVERSE BALANCE OF \$51,000,000

RECENT FIRES

Such was the Result of Canada's Trade Last Year—Our Imports from the United States Were in Excess of Our Exports by \$314,000,000

**A** SUMMARY of trade of Canada for the fiscal year ended March 31, 1921, prepared by the Dominion Bureau of Statistics, indicates that there was an adverse balance of about \$51,000,000. This may see unfavorable in the light of the large balances accumulated to our credit during the war years, but by going back a few years farther it will be seen that an adverse trade balance, as far as Canada is concerned, is not a new event.

For instance, in the period of 1905-13, the Dominion's trade resulted in a debit balance of about \$1,141,000,000, and in the two years following the figures were \$187,000,000 and \$46,000,000, respectively. From 1916-20, however, there was a turn in our trade, and large balances were built up in our favor, the figure reaching as high as \$578,000,000 in 1918.

Two outstanding features of last year's trade are that our exports to the United Kingdom took a decided drop, and that our imports from there increased largely. Canada's sales to Britain are still far in excess of the purchases, however.

Imports from the United States exceeded exports to that country by about \$314,000,000, but here again there is need for comparison to show that the position of the Dominion in this regard is better than it has been in the past. In 1917 and 1918 there were adverse balances of 384 and 374 millions, respectively, while in 1920 our purchases from across the border exceeded our sales by \$338,000,000.

The trade relation of Canada with other countries is illustrated by the following comparisons—

	Twelve Months ending March		
	1919	1920	1921

Loss For Week Totals \$939,000, Compared With \$377,700 Last Week—Town of Maxville, Ont., Suffered Heaviest Loss

Aylmer, Que.—May 5—Shingle mill, owned by R. H. Wright. Loss, \$5,000.

Bolton, Ont.—May 9—Town hall and several stores. Loss, \$20,000.

Breakeville, Que.—May 7—Store of Mr. Laterreur and residence of Mr. Juveny.

Douglstown, N.B.—May 9—Residence of Willis MacKenzie. Two fatalities.

Exeter, Ont.—May 9—Plant of Exeter Flax Co. Loss, \$50,000.

Fort William, Ont.—May 9—Home and farm building of Sam Laughton, O'Connor township.

Goderich, Ont.—May 3—Plant of the National Shipbuilding Co. on Maitland St. Loss, \$100,000; insurance, \$75,000.

Laforest, Ont.—May 10—Marshay Lumber Co.'s yard. Loss, \$200,000. Cause, forest fires.

Maxville, Ont.—May 8—Two blocks of the business section. Loss, \$300,000. The losses are as follows:—

	Loss.	Insurance.
Town Hall.....	\$20,000	\$5,000
Hugh McLean Business Block.....	35,000	5,000
Hydro-Electric Plant.....	7,000	3,000
King George Hotel.....	20,000	.....
Thos. Merkle's barber shop.....	500	200
Gordon Empey's residence.....	3,000	1,000
Dr. Wm. McDiarmid's home.....	4,000	1,000
Bank of Hochelaga.....	6,000	2,000
Household property of Mrs. Philip Trangeau, in the bank.....	500	.....
Hugh Christy's general store.....	20,000	3,500
Dr. A. T. Morrow's dental parlors slightly damaged.....	.....	.....
Samuel Bingwell's residence.....	5,000	2,000
Wm. St. John's residence.....	3,000	1,500
P. Thauvette's residence.....	3,500	1,500
Stanley Winter's Shoe Store.....	4,000	1,500
J. S. Livingstone (fixtures).....	1,500	.....
Donald Duperron's restaurant.....	2,400	5,000
Campbell's general store.....	5,000	1,500

Montreal, Que.—May 6—Premises of Liberty White Wear Mfg. Co., 1818 St. Lawrence St. Loss, \$15,000.

May 4—Dry goods store and three residence, at corner of Beaubien and Alma Sts. Loss, \$55,000.

New Waterford, N.S.—May 1—Rukasin Building on Polummer Ave.

Pickering, Ont.—May 5—Pickering Flax Mill, operated by John Rose.

Queenston, Ont.—May 7—Hydro power house. Loss, \$50,000.

St. Boniface, Que.—May 5—The parish church, Gerbeault Hotel, Dugre Bakery, Boucher store and four private residences. Loss, \$100,000.

St. Neree de Bellechasse.—May 7—Sawmill of Messrs. Geo. Therrien and Jos. Dumont. Loss, \$15,000; insurance, \$7,000.

Toronto, Ont.—May 11—Building, occupied by Reliable Furniture Co., 36 Queen St. E. Loss, \$2,500. Carpenter shop of R. Kirby, 439 York St. Loss, \$300. Three freight cars, at G.T.R. roundhouse, York Road. Loss, \$1,200.

Vancouver, B.C.—May 5—Main buildings of the Joseph Chew Lumber Company's shingle mill, Sixth Ave. and Lough St. Loss, \$25,000.

Yarmouth South, N.S.—May 5—Warehouse of Yarmouth Trading Co.

ADDITIONAL INFORMATION CONCERNING FIRES

Hamilton, Ont.—April 28—Residence of Mrs. Fanny Michelina, 790 Burlington St., was destroyed. Loss, \$1,627, with insurance of \$1,000 in the Ocean Insurance Co.

## Dominion Mortgage and Investments Association

W. E. Long Elected President at Annual Convention Held Last Week in Winnipeg—Municipal Defaults, Seed Grain Loans and Heavy Taxes Some of Worries of Investment Institutions—Rural Credits Systems of United States and Canada—Land Titles in the West

**B**OTH the supply of and the demand for funds for investment were dealt with at length at the annual convention of the Dominion Mortgage and Investments Association held in Winnipeg, May 12 and 13. Municipal defaults in the bond field, and western mortgages, were given special attention.

### Officers Elected

Officers elected for the ensuing year are as follows: President, W. E. Long, Toronto, Credit Foncier Franco-Canadian; first vice-president, J. B. McKechnie, Toronto, Manufacturers' Life Insurance Co.; second vice-president, J. C. Breckenridge, Toronto, National Trust Co.; executive committee.

Insurance—C. S. Macdonald, Toronto, Confederation Life Association; Charles Ruby, Waterloo, Mutual Life Assurance Co. of Canada; G. B. Woods, Toronto, Continental Life Insurance Co.; F. G. Cope, Montreal, Sun Life Assurance Co. of Canada; J. F. Weston, Toronto, Imperial Life Assurance Co.

Loan—W. C. Noxon, Toronto, Canadian Loan and Agency Co.; A. B. Fisher, Toronto, Central Canada Loan and Savings Co.; Joseph Campbell, Winnipeg, Trust and Loan Co. of Canada; M. Aylesworth, London, Huron and Erie Mortgage Corporation; T. Taggart Smyth, Montreal, Montreal City and District Savings Bank.

Trust—S. Macdonald, Hamilton, Mercantile Trust Co.; J. T. K. Pickett, Toronto, Union Trust Co.; W. G. Watson, Toronto, Toronto General Trusts Corporation; E. B. Stockdale, Toronto, Trusts and Guarantee Co.; R. P. Pellett, Montreal, Royal Trust Co.

### Government and Citizenship

Speaking on citizen co-operation in government, Dr. Horace L. Brittain, of Toronto, director of the Citizens Research Institute of Canada, said there were three grades of government in Canada, national, provincial and municipal, and on these developed the progress of the community. Every member of a community was entitled to life, liberty and the pursuit of happiness, but unfortunately cases had and were arising where governments were burdening the people instead of contributing to the prime factors already mentioned. When they saw cases of manufacturers moving away from one district it meant generally that the burden of taxation was too great. Taxation was essential for the upkeep of the community, but careful supervision of expenditures also was essential to keep taxation down to a minimum.

In the Dominion last year, \$357,000,000 was spent on current account, in the provinces, \$76,000,000, while the total for the Dominion, provincial and municipal authorities was \$550,000,000. It was doubtful, however, if all these moneys were spent on current account. "I think if careful analysis was made, it would be found that a great many expenditures

called 'capital,' would be found to be due to current account. I know of one province that charged large amounts of interest that were paid out of funds into which borrowed moneys were placed. That is not only misleading, but decidedly immoral. It is practically robbery, because if that money had been paid out of current funds, other expenditures would have been impossible and debt charges would not be piled up on a loss, and earning powers of succeeding generations mortgaged."

### Deposit Business

Speaking on the deposit business as a factor in mortgage lending institutions, V. Ewan Gray, registrar of loan corporations for Ontario, credited that province with the origin of the loan and trust corporations in Canada. After tracing the history of loan corporations in Ontario, he outlined the requirements for mortgage loan money. War conditions, he said, had affected lending institutions to a considerable extent, while at the present time money was not flowing into Canada from foreign countries because investors were receiving attractive offers for their capital at home, to aid in the post-war reconstruction. But the net result of the last seven-year period showed that loan corporations had received an increase in deposits of \$9,000,000; an increase in currency debentures of \$8,500,000; and out of this \$17,500,000 of new money, \$14,500,000 had been repaid to Scottish investors. This was not a special feature of the war, as in seven years the increase and deposits amounted to \$3,400,000, the increase in currency debentures \$2,500,000, and of this \$5,900,000, \$5,770,000 was repaid to sterling debenture holdings.

It had been found, he continued, that the maximum limits of deposits imposed on loan and trust corporations was proving irksome, and if companies were to be relieved of the necessity of new financing by the issue of new shares of capital stock a change was necessary in the statutory limitations. A new field of loan and trust company operations would be found in a development of the savings deposit business and it was to this source that the companies must look for important new accessions of money for mortgage loan purposes, he added.

In his paper on "The Torrens System in Western Canada," D. J. Thom, K.C., of Regina, drew a close comparison between the old registry system and the present one. In the past, he said, there were three big drawbacks, namely uncertainty, expense and delay. The Torrens system was introduced to remedy, as far as possible, these defects. The Torrens system was not a new one. It was based on the principles applied with respect to the transference of personal property, such as stocks and shares. The new feature of the system, however, was the certificate of title which was given to an owner after his title was registered.

After comparing the advantages of the Torrens system with the old disadvantages, Mr. Thom said he was certain

that the new system outweighed the old one, although he admitted there were some defects in the Torrens system. "With the principles as embodied in any one of our prairie provinces' acts, and handled by competent officials, we have the nearest approach to a system of land transfer law which meets the needs of to-day," he added.

In regard to uniformity of laws, between eastern and western Canada, Mr. Thom said, theoretically, the idea was good; practically, it was hopeless. The Canadian bar association, since 1915, had been working on uniformity while the commissioners on uniformity met annually and considered the same subject, but there had been no suggestion of attempting uniformity of land laws.

#### Rural Credits

The rural credits system and the federal banks of the United States were criticized strongly in a paper read by E. D. Chassell, secretary of the Farm Mortgage Bankers' Association of America, Chicago. He declared that this system had been run for political purposes, and that as a result the federal government had been set back \$5,000,000. Mr. Chassell said that in planning such a system the general welfare of the country should be taken into consideration. If private businesses stood in the way of advance, they should be brushed aside.

The speaker advocated that competition between the private and the government systems of loans to farmers should be put on an equal basis, and that no favoritism should be shown to one which would put the other at a disadvantage. He said the farm mortgage bankers in the United States were compelled to pay their own expenses out of their private pockets, while those of the federal land banks were paid from the public treasury. The bankers also object to tax exemption discrimination in favor of the investors in the federal land banks. He said also that it was the bankers' belief it would be cheaper in the end for the government to subsidize borrowing farmers direct than to maintain the present rural credits system.

A resolution urging the Dominion government to cease giving priority to liens or advances for seed grain was passed at the closing session. Members claimed that the idea was unjust and economically unsound, while, they said, the practice was not necessary, as seed grain requirements could be provided for otherwise. Criticism was made of the provincial government for again passing this legislation.

#### Manitoba Farm Loans

W. D. Glendenning, chartered accountant, of Winnipeg, in an address on the Manitoba farm loans, discussed the financial methods of handling the organization and the procedure followed in obtaining the requisite moneys for the scheme. During the three and a half years of the operation of the association, he said, the province had shouldered costs amounting to \$250,000, and while arguments might be made that the province possessed an interest in half of the surplus of approximately \$50,000, it could not be used for distribution as displayed in accounts of the association, could not be used for distribution to shareholders as return on their investment, because it would be required, as reported at the last session of the legislature, for the retirement of such bonds as were outstanding.

The whole question of the farm loans, he asserted, was whether the material benefits derived from governmental organization make it wise or justifiable for the province to bear part of the cost.

Concerning "Saskatchewan government farm loans," H. W. Givins, of Regina, said it might reasonably be claimed that if repayments could not be applied in repayment of a specific debt, the funds should be used for capital expenditures which otherwise involve additional borrowing at higher rates. It seemed evident that, being invested in farm loans stock, they will not be available when the debenture issues to which they respectively relate, mature. On the one hand, the provincial treasurer of Saskatchewan has been placing capital funds of the province in farm loan stock bearing interest at five per cent., and on the other—and during the

same period—borrowing at rates ranging from 5.35 to 6.47 per cent. In closing, Mr. Givins quoted the provincial treasurer as stating that it was not intended that the people of Saskatchewan should be taxed for the purpose of providing cheaper money for the farmers.

W. R. McConnell, Regina, dealt with the municipal seed grain legislation of Saskatchewan: and papers were also read by W. G. Styles, Regina, and A. M. J. English, Vancouver, the latter dealing with the infeasibility of titles in British Columbia. F. R. Mackellean, of the National Trust Co., Toronto, discussed the recent Ontario legislation in detail.

#### Canadian Rural Credits

"Rural Credits in Western Canada" formed the subject of a paper read by A. E. Parker, editor of *Canadian Finance*, Winnipeg. He said one of the legitimate functions of such a scheme was to enable a farmer to put in and take off his season's crop. In order to warrant such assistance a farmer should be in a position that with a normal crop the returns should be sufficient to provide for all floating liabilities, including the advance through the rural credit scheme. One of the weaknesses of the Canadian banking system, he said, was that it was established to meet commercial conditions, and did not provide for agricultural needs and emergencies.

An amendment to the Canadian constitution which would make it impossible for any legislature to pass any law impairing the obligation and sanctity of contracts was suggested by R. E. Bennett, K.C., Calgary. Commenting on the movement for a definite understanding as to the future status of Canada as a nation, Mr. Bennett said this might well settle itself in the days to come. For the moment, in order that the world might know and not misjudge, when Great Britain was going through the greatest crisis in its history, Canadians should take every opportunity to show that their hearts beat true to "those over yonder" who had faced great problems and who with great courage and determination had saved civilization for mankind.

#### Lenders and Borrowers

Speaking at the banquet, Premier T. C. Norris said that he had been closely identified with the borrow class and the loaning class, and he found that the two classes were indispensable in the community. If those who represented this splendid organization were going to continue in business and success, it was quite as essential that the borrower should continue to borrow, and unless mutual interest was recognized and unless some mutually satisfactory arrangement were carried out, the whole business of development in the Dominion could not be continued, and neither class would succeed. This country was passing through a time of deflation. It had passed through such times before, like every other country. But there was no country in the world which recovered so quickly in the past, and that fact made him optimistically regard the situation now. With the great resources possessed by western Canada, there was abundant reason for optimism. Sometimes borrowers were forgetful of their duty. They must not forget that had it not been for the ability of the loan institutions to advance money for development purposes, the progress of western Canada would have been much slower than it had been. At no time was a better understanding needed than at the present time.

Hon. C. R. Mitchell, provincial treasurer, Alberta, asked the mortgage loan men to realize that legislation in the prairie provinces of which they complained had not been passed for "the pleasure of being mean," but because of circumstances which it had been considered made it necessary. Their attention had been called to the disabilities under which the loan companies labored in this country, and he believed every provincial government was willing to do its duty toward them to the fullest extent in order to allow of the free and easy flow of money into this western country. So far as priority liens were concerned, they could take it from him as an absolute fact that the policy of the present administration in Alberta was that there would be no further priority to seed grain liens, no matter what the circumstances might be.

# The Past Two Weeks in Parliament

Budget Debate Brought Out Well-worn Arguments—National Railways Committee's Report Expected Soon—Commonwealth Bank Bill Withdrawn—Another Session Expected Before General Election

(Special to *The Monetary Times*)

Ottawa, May 19, 1921.

Friday, May 6, 1921

In House of Commons:—(a) First readings of following bills:—Bill amending and consolidating Quebec Steamship Company Acts, and one amending Criminal Code giving gas wells protection now given to oil wells, providing against making metal tokens redeemable in goods and making other changes; (b) First reading of Patent Act amendment bill granting relief to patentees and inventors who, through disturbances caused by the war lost their patents by avoidance and to place Canada in position to get benefit of reciprocal clauses of Nolan bill which passed through both houses at Washington; (c) Railway estimates debated and many passed; (d) Second readings of following bills: one respecting Maritime Coal, Railway and Power Co., Ltd., and one concurring in Senate amendments to bill respecting James MacLaren Co., Ltd.

Saturday, May 7

In House of Commons:—(a) Third reading of bill to authorize ratification and carrying into effect of Protocol of December 16, 1920, accepting statute for Permanent Court of International Justice; (b) Immigration and Colonization Act estimates; (c) Customs and Inland revenue estimates; (d) Second reading bill respecting Quebec Steamship Co.; (e) Third reading bill respecting Dominion Express Co.

Monday, May 9

In House of Commons:—(a) Second reading Dominion Elections Act amendment bill; (b) Budget address by Sir Henry Drayton; (c) Second reading bill to amend Bankruptcy Act.

Tuesday, May 10

In House of Commons:—(a) Third reading bill to amend Bankruptcy Act; (b) Budget debate continued by Hon. W. S. Fielding, Sir George Foster, Messrs. McMaster, Edwards, DuTremblay, Casselman and Baldwin.

In the Senate:—(a) First readings Gas Inspection bill, Opium and Narcotic Drug bill, National Research bill and Court of International Justice bill; (b) Third readings of bill incorporating Fidelity Insurance Co. of Canada, bill incorporating Metropolitan Trust Co. of Canada, bill respecting the Credit Foncier Franco-Canadien, bill respecting Western Dominion Railway Co.

Wednesday, May 11

In House of Commons:—(a) Budget debate continued by the Hon. C. C. Ballantyne, Dr. Michael Clark, Messrs. Manion, and Nesbitt and Hon. Rodolphe Lemieux.

In the Senate:—(a) Debate on Lord Shaughnessy's proposal regarding Canadian railways and their future operation; (b) First readings of following bills:—One respecting Great West Bank of Canada and one to incorporate Edmonton and Mackenzie River Railway Co.; (c) Second readings of bill respecting Central Railway of Canada and bill to incorporate Fort Smith Railway Co.; (d) Third reading Public Harbors bill providing larger penalty for cleaning ships in harbor of accumulated oil.

Thursday, May 12

In House of Commons:—(a) Budget debate continued by Messrs. F. L. Davis, Hon. Hugh Guthrie, McKenzie, Nicholson and Thomson.

In the Senate:—(a) Second readings of Gas Inspection bill giving government authority to have gas measured by

heat units instead of by the cubic foot, Court of International Justice bill, Opium and Narcotic Drug bill.

Friday, May 13

In House of Commons:—(a) Inspection and Sale Act amendment bill (hay and straw inspection) read first time; (b) Budget debate addresses by Premier Meighen, Messrs. Pacaud, Anderson and Maharg.

In Senate:—(a) First reading of following bills:—One amending Dominion Lands Act, and one amending Northwest Territories Act; (b) Gold and Silver Marking bill withdrawn; (c) Second reading Animal Contagious Diseases Act amendment bill providing for three years' extension of compensation features for animals destroyed; (d) Second reading Conservation Act Repeal bill; (e) Second readings of following bills:—One respecting Great West Bank of Canada, one incorporating Edmonton and Mackenzie River Railway Co.

Saturday, May 14

In House of Commons:—(a) Budget debate continued by Messrs. Cowan, Reid (Mackenzie), Melsaacs, Kennedy (Essex), Charters, Knox, and Fortier; (d) Third reading Quebec Union Electric Telephone Co. bill.

Monday, May 16

In House of Commons:—(a) Budget debate continued by Messrs. Armstrong (Lambton), Prevost, Demers, Caldwell, Turgeon, Morphy, Ledue, Dechene and Sinclair (Queen's, P.E.I.).

Tuesday, May 17

In House of Commons:—(a) Budget debate continued by Hon. T. A. Crerar, Messrs. Cockshutt, Pardee, Harold, McCoig, McGibbon (Muskoka), Lanctot and Butts; (b) Third readings of bill to amend and consolidate acts respecting Quebec Steamship Co., and to incorporate Standard Insurance Co., the title of latter company being changed on third reading to Ensign Insurance Co.

In Senate:—(a) First reading Quebec Union Electric Telephone Co.; (b) Third reading of bill to amend and consolidate acts respecting inspection of gas and gas meters; (c) Second reading Bankruptcy bill.

Wednesday, May 18

In House of Commons:—(a) Budget debate continued. In Senate:—(a) Commonwealth Bank bill withdrawn.

## Financial Situation Uppermost

Since the delivery of the budget address by Sir Henry Drayton, Minister of Finance, on the evening of Monday, May 9th, practically the whole time of parliament has been taken up by the budget debate. The familiar changes on the old protection versus free trade controversy have been rung, and the Opposition speakers have drawn the Government's attention to past sins of omission and commission, recommending more economy and dwelling on the present financial condition of the country. Some doubts have been expressed as to whether the government will be able to collect sufficient revenue with the extended sales tax to meet all the demands upon it, and the criticism ventured most often on this feature of the government's proposals is that it seems to be making no provision for a constant and progressive reduction of the national debt, which increased more than a hundred million dollars last year because of advances to the railways. Thus the railway situation has dominated the budget debate as it did previous debates in parliament. The acceptance by the Grand Trunk shareholders of the government's proposals for

an immediate handing over of the road clears the way to the final co-ordination of all the government roads with the Grand Trunk Railway, and the final selection of a board of directors and chairman to manage them. Even with the economies that will be affected in this way the disposition here is to expect large deficits for a number of years, but the hope is that with increasing immigration and denser settlement near the railroads the deficits will eventually disappear. It is admitted by all that the county for the most part is over-built, although there are other railway enterprises which will have to be undertaken soon or completed, but this is beginning to be looked upon as a possible advantage in that the country is prepared ahead of time for the population that will come to it, and to take care of the traffic that will consequently grow. The first load is the heaviest.

The special parliamentary committees on the Canadian National Railways will report shortly. Their reports will not affect the situation materially because the magnitude of the task undertaken by each was such that it could not possibly be covered in so brief a space of time.

It is generally expected now that another session of parliament will be called for next January, and that the general election will be in the summer or fall of 1922. The redistribution bill will be the important legislation then, and possibly the tariff revision postponed from this year.

## VICTORIA TO DRAW TOURIST BUSINESS

Natural Surroundings and Government Sale of Liquor are Advantages—Some New Industries

(Staff Special)

Victoria, May 18, 1921.

THE city of Victoria, the beautiful capital of British Columbia, is now at the height of its beauty, and during the next three or four months will be visited by thousands of tourists. A great deal of wealth is centred in Victoria, as many wealthy citizens of Canada have come there, also large numbers of English people to reside permanently. It is doubtful if, per capita, there is any other city in Canada that could compare with Victoria in wealth. Victoria is going to concentrate on building up a great tourist industry if that is done industrial expansion of the right kind will undoubtedly follow.

### Developments in Fruit

One of the most important industries Victoria has ever had, is about to be established here. This is a Loganberry juice plant, which it is proposed to set up at once, for the manufacture of Loganberry juice, either in the raw state or concentrated for shipment throughout the different Canadian provinces.

The Loganberry which was comparatively little known until the last few years has come greatly into favor. It thrives only on the coast, west of the Cascade range, and cannot live through frost. It is excellent in the fresh state or made into jam, but is more popular as a drink. Furthermore, it has been demonstrated that an acre of berries converted into juice represents double the revenue from the marketing of the berries in the fresh state. One large factor to be considered is the elimination of all loss through deterioration when only the juice is handled. Thirteen pounds of berries produce an imperial gallon, i.e., ten pounds, and the by-products can also be marketed.

The British Columbia Fruit Markets' Commissioner is at present on a trip through the prairie provinces and Ontario with a view to studying the situation. He has an assured market already this year for twenty thousand gallons of juice on the prairies. It is anticipated that there will be a big demand from Ontario owing to the dry condition of that province. The Loganberry plant in Victoria will be con-

ducted on a co-operative basis, the fruit growers will be assisted by the business men of the city. Next year it is expected that the same organization will go into the manufacture of fermented juices, wines, etc. There will not be time, however, this year, to undertake this branch of the work. It is anticipated that this venture will prove an important factor in swelling the provincial revenue, and tiding the fruitgrowers who have gone in heavily for Loganberry culture over what otherwise with an unstable jam market might prove a very trying season.

### Other New Industries

Another industry which is fairly on its feet, though not yet in a condition to cater to the trade except in a small way, is the wool industry. The Sidney Roofing Co. has established its headquarters in Victoria, and is moving its entire plant to this city. The Hudson's Bay Co. is opening its departmental stores on August first. The completion of the Johnson Street bridge and the changing of the main highway will mean the shortening of the route from Victoria to Esquimalt by nearly a mile. Several new business blocks have been completed during the past year and others are in progress of construction, building activities fairly brisk at the present time.

Advices received from prospective travellers indicate a very large tourist trade this year. The fact that this province is under government control is proving an excellent advertisement, and will doubtless attract many people, who are unsatisfied with the prohibiting conditions of their own states and provinces.

Business generally in Victoria was found to be quiet as elsewhere, but financial and commercial conditions could be said to be healthy and on a par with the other large centres of the west. The Pacific coast has a number of serious problems in its midst. There are seventeen thousand Japanese and thirty thousand Chinese living in British Columbia.

## STERLING BANK OF CANADA

One feature of the report of the Sterling Bank of Canada which always attracts attention, and which is particularly prominent in the statement for the year ended April 30, 1921, just made public, is the remarkably strong liquid position which the institution maintains. The ratio of liquid assets to liabilities to the public is shown at 71.43 per cent., as compared with 70.83 per cent. in the previous year. A stronger cash position is also shown, the ratio being 16.10 per cent. of the liabilities, as compared with 15.90 per cent. given in the preceding report.

With such large reserves, it is evident that the bank is building up a good position to ably handle the expansion in business which will follow the slump, and this is indicated in the report of the president, when he said: "You will understand why the item of current loans shows a decrease. Last year this account stood 30 per cent. higher than the previous year—we had not yet passed into the readjustment period. The figures in the report now indicate the policy your directors have followed during the past twelve months. It was their intention and plan that the bank's assets should be in as liquid a position as possible, so that advantage might be taken of conditions such as would prevail after world affairs and general business matters were completely readjusted."

Notwithstanding the uncertainty which has pervaded the commercial world during recent months, and which has reflected on our financial institutions, Sterling was able to show a profit of \$255,976, as compared with \$251,346 in 1919-20 period. The dividend was raised from 7 to 8 per cent., \$83,000 was transferred to contingent account for depreciation of assets, etc., and \$50,000 was transferred to reserve fund. The balance carried forward was \$37,564, as compared with \$42,942 previously.

### RETAILERS NOW TAKING LOSSES

THE retail trade in Canada is now falling in line with the general movement towards price reductions. There are already a few commodities, the retail price of which is not more than 50 per cent. of what it was a year ago. While the reductions made some time ago by manufacturers and wholesalers has taken part of the burden from the shoulders of the retailer, yet the latter must cut his prices as a whole to bring them into line with the prices of his new stocks.

This action on the part of retailers had been anticipated. A survey made in April by the American Bankers' Association showed that liquidation in the United States and in the world has proceeded to a point at which elements in our economic life must fall in line. Neither money nor transportation costs nor taxation nor materials nor labor can effectively nor permanently avoid the irresistible forces that are working toward readjustment on a lower level. Indeed, it would work to the disadvantage and not to the advantage of those factors that would, if they could, keep out of line with the rest. The weight of opinion is, however, that this readjustment, this tendency toward stabilization, will not be accomplished in the year or the two years that lie just ahead of us.

Our whole economic life has been thrown out of alignment by the war, and the period of inflation that continued after it. Every element was thrown out of line, some to a greater degree and some to a lesser degree. It is but natural that not all elements should respond in the same degree, and with the same rapidity to the forces working toward readjustment, but it is inevitable that ultimately the normal relative position of all these elements will be restored, and then we shall have what we call stability.

Inflation is the inevitable result of war, because consumption and waste increase at the same time that wealth is destroyed and the world's ability to create new wealth is decreased. Commodities and services required for the pur-

poses of war create no wealth out of which payment for them can be made, and consequently there must be expansion of credit and currency, operating to produce the other manifestations of inflation that are so familiar to all of us.

### CANADA AND SOUTH AFRICA

AN outside view of a country is necessarily more uncertain as to detail, but is more clear as to perspective, than one from within. Such a view of Canada has been tensely expressed by I. Wallach, of Pretoria, in his report as delegate to the British Chamber of Commerce Congress here. After a brief eulogy of the Dominion as a whole, he draws some striking contrasts. Canadian fruit he describes as "watery and insipid, used as we are to greater sweetness—thanks to our magnificent sunshine." Zambesi Falls, he says, are much more beautiful than Niagara, but not so useful. Canadian dependence upon the United States for coal, for capital, and for many of its industrial plants counters to some extent the imperial influence. Continuing Mr. Wallach says:—

"There is much that we can learn from Canadian push and efficiency. There is one thing in particular that I should like to impress on you. Whereas in some countries (the names of which wild horses would not drag from me) a large proportion of merchants are happy to persist in a state of perpetual importation from abroad, the Canadian dealer shows a keen and beneficent interest in his own country's industry. He always considers how he can advance its interests, and his Chambers of Commerce are doing what they can for Canadian factories. So far from keeping their eyes glued on the question of imports, Canadian business men are for ever trying to foster exports. That, gentlemen, is the spirit which makes a country great: to become self-supporting first, and an exporter afterwards.

"I will admit that the Canadian climate in its vigor is a greater stimulus to hard work than ours. But I will also say that not to be burdened with a seven months' cover of

thick snow is a great advantage. South Africa has neither the wood nor the water of Canada, but it has an advantage in cheap unskilled labor; it is still richer in minerals than Canada; it can produce a greater variety of agricultural products; in cattle it leaves Canada far behind; its more or less cheap coal is an advantage not shared by those parts of Canada which are without water power. It has not the competition of a powerful neighbor like the United States. It has ports that do not know what ice is. It has no such barrier as the Rockies to divide East from West."

#### A NEW AUTOMOBILE CONCERN

ANGLO-AMERICAN MOTORS, LTD., has been incorporated with a capital of \$10,000,000 for the purpose of "manufacturing in Canada a Canadian car at a Canadian price." Half of the stock is 8 per cent. cumulative preferred and is being offered for sale at par with a bonus of 40 per cent. common stock, by Manning Brothers and Co., Ltd., Toronto. Evidently the preferred stock is all that will be sold for cash; in fact \$4,500,000 is all that is estimated in the prospectus as cash to be received. From this \$450,000 is to be deducted as expenses of financing. Actual investments in productive property are estimated as follows: Machinery and equipment, \$2,000,000; plant and building, \$500,000; land (30.5 acres) \$100,000; blue prints, working drawings, factory plans, and machinery layout, \$62,000. The remainder, \$1,382,000, is to be used as circulating capital.

This plan of financing is all right, though the large amount of water is obvious, and it should also be pointed out that the underwriters receive not the usual block of common stock, but 10 per cent. of the cash from the sale of the preferred shares. It is the estimate of profits that is rather too rosy. With an actual investment of \$4,500,000 of capital, fixed and circulating, the company expects to make a profit of \$2,250,000 per annum, or 50 per cent. In the halcyon days of war prosperity such profits were frequently made, even by new concerns, but they cannot be expected under normal conditions, much less at present. The company plans to manufacture two "La Marne" cars, one to sell at \$975 and the other at \$3,000, the hope being expressed that the larger car "would be without competition amongst the medium priced and high priced cars and that in conjunction with a small car the company would hold the upper hand in the automobile market of Canada." This may of course be accomplished if the company can, with \$4,500,000, put up "the most complete and modern automobile plant on the continent," but the whole project seems to be too ambitious for this country and out of proportion to the capital involved.

#### ASSESSMENTS AND LAND SALES

ABOUT three years ago a plan originated in Winnipeg for the adoption for land assessment purposes of valuations fixed by the owners, such valuations to be the price at which the owners agreed to sell the land. The plan was never put into force by legislation. Now, however, the Western Canada Colonization Association after investigating the situation throughout western Canada, has concluded that there can be no successful colonization effort at the present time without lists of unoccupied land for sale at prices good for a reasonable period. The only vacant land within easy reach of existing railways is held out of production by absentee owners, and speculators.

The association has asked each of the prairie province governments to create a Land Settlement Board, clothed with authority to require each owner of unoccupied land to place a sale valuation on his holding good for two years; such sale valuation to be the basis of the wild land taxation for the future. It is also desired that the absentee

owner appoint a land agent in the locality of his land with power to conclude the sale of his holdings to settlers brought in by the Western Canada Colonization Association, or any other colonization agency.

These proposals have been favorably received by the retail merchants, the banking fraternity, and the United Farmers of Manitoba. They have received the support of farm papers on the prairies, and of daily and weekly newspapers throughout the three prairie provinces. At the instance of Premier Norris, of Manitoba, the three prairie province premiers are to be called shortly into conference with the executive of the Western Canada Colonization Association. It should be borne in mind, however, that the freedom of the individual to buy or sell his property is a fundamental principle of private ownership, to which exception is made only in such individual cases as where property is required for public use. To adopt such a wholesale measure as is suggested, for the resale of the property to other individuals, would not help western Canada's reputation as an investment field. Would not a comprehensive list of properties be sufficient to promote the work of colonization?

#### LIFE INSURANCE AND THE INCOME TAX

THAT life insurance policyholders should start a campaign for the exemption of life insurance premiums from income tax is suggested by *Canadian Insurance*. In support of the argument it is stated that "all the prominent statesmen and financiers, not only of Canada, but of the world, advocate life insurance as being a tremendous influence for good in the affairs of the individual, the community, and, be it emphasized, the state." Presumably our contemporary knows the views of all the prominent statesmen and financiers, whoever they may be, on the subject, but apparently it has overlooked the fact that life insurance is often sold as an investment, not merely as protection for dependents, and that property, bank deposits, bonds and stocks are also investments the income from which could be exempted with equal justification.

The principle of the income tax is, however, that it reaches those able to pay, i.e., those who have a taxable income, and does not concern itself with the disposition of that income. In this respect it differs from customs and excise duties and all other taxes which are based on expenditure. It is this principle which has made the income tax the most popular means of revenue of the present day. The man who uses his income to pay insurance premiums should pay just the same as others.

\$36,227,715 of new capital authorized for companies incorporated in Canada during one week is an indication that the future is not regarded as wholly devoid of business possibilities.

#### ACCIDENT POLICY AS A LIFE SAVER

A little insurance story, admitted as being rather chestnutty but still worth repeating, is told in the *May Gosling*, published by the Alberta Pond of the Blue Goose. A traveller on a ship that was wrecked, was the sole survivor, and was cast upon a small island. The island was a mere rock in the vasty deep, and devoid of vegetation, nor had the shipwrecked traveller any means of shooting birds or animals—there being none. Several months later a second ship observed signals of distress on the island and sent a boat ashore. The officer in charge of the boat listened to the survivor's tale interestingly but dubiously. "If you have been here nine months," he said, "how have you managed to live? There is no vegetable or animal life at all." The other replied: "Before I sailed, I took out an accident policy, and when I was wrecked, that policy was, happily enough, in my pocket. 'In that policy, gentlemen, I found sufficient provisions to last me nearly a year.'"

## PERSONAL NOTES

W. E. LONG, who was last week elected president of the Dominion Mortgage and Investments Association, has been with the Credit Foncier Franco-Canadien in his present capacity of manager of the Ontario division for 33 years. An attendance of 125 at the convention shows the interest in the association's work at the present time. Speaking from

his own long experience, Mr. Long in presenting the report of the executive committee drew attention to some of the outstanding points in the present situation. He emphasized the fact that mortgage money must now be secured in Canada, and in view of our limited capital the supply should not be interfered with by legislation of a discriminatory or restrictive character. A mortgage lender, making a contract in conformity with

existing statutes, frequently found that during its currency new legislation had been passed, which generally resulted deleteriously to the lender. To those engaged in obtaining funds for investment in mortgage securities it had been found that one of the great obstacles was the uncertainty as to what might be done by legislators.

E. B. MCBRYDE has been appointed to handle the electric department of the Royal Indemnity Company, in connection with the new electric motor insurance which the company is now writing. Mr. McBryde has had considerable experience in the engineering side of this class of insurance in England and has made a close study of it during the past ten years as applied to Canadian conditions. He came to Canada in 1910, and in 1912 undertook a portion of the work of standardization of the Toronto Electric Light systems. As assistant superintendent of distribution with this company he had an opportunity to study the application of electrical insurance to the

larger number of power consumers. He was appointed assistant sales manager of the company in 1914, which position he held until 1917 when he left to engage for four years in the handling of electric power equipment and its application to industrial purposes.

KENNETH THOM has been appointed assistant fire manager for the Employers' Liability Assurance Corporation.

FREDERICK S. FARRIS, for thirteen years manager for the Excelsior Life Insurance Company, for New Brunswick, died recently.

RALPH M. BIRD, secretary of the Canada Bond Company, Toronto, has been appointed to succeed Frank E. Fisher as vice-president and general manager.

F. G. COPE, secretary of the Sun Life Assurance Company, and F. D. MACORQUODALE, of the same company, have been in Great Britain recently.

## BANK BRANCH NOTES

The Dominion Bank of Canada has opened a new branch at Kenora, Ont.

The Imperial Bank of Canada is to erect a new building at the corner of King and Argyle Streets, Preston, Ont.

The Bank of Montreal announces the following: W. H. Hogg, manager at Vancouver, appointed superintendent of British Columbia branches; E. V. Leslie, manager at Ingersoll, appointed manager at Goderich; G. B. Hutchings, appointed manager at 12 King St. East, Hamilton; G. C. Dewar, appointed manager at Ingersoll; E. S. Martin, manager at Yonge St., Toronto, appointed manager at Peterboro; C. C. Walker, appointed acting manager at Riverport, N.S.; J. J. Bryan, manager at Eglinton, appointed manager at Carlton St., Toronto; C. S. R. Laidlaw, manager at Carlton St., Toronto, appointed manager at Yonge St., Toronto; G. F. Laing, formerly manager Yonge and Wellington Streets, Toronto, appointed manager at Vanconver; A. G. Guest, appointed acting manager at Wolfville, N.S.

W. H. Hogg, manager and acting superintendent of the Bank of Montreal in Vancouver, who has been appointed superintendent of the bank for the whole province, went to Vancouver in January, 1913, from Calgary, to succeed R. R. Wallace, as manager of the Vancouver branch, and when T. A. Clarke, their superintendent, was called to the head office at Montreal, Mr. Hogg took over his duties. For two years Mr. Hogg has been acting superintendent of the bank.

The Bank of Montreal are to erect a new building at Kentville, N.S., at a cost of \$350,000.

The Royal Bank of Canada announces the following: M. W. Wilson, superintendent of branches, and S. R. Noble, general inspector of foreign branches, head office, sailed on April 22 for England and the continent. Whilst abroad they will visit the London, Paris and Barcelona offices of the bank. J. A. Laird, for the past sixteen years in charge of Hamilton East End branch, has been appointed assistant manager at the main office. Two new assistant inspectors, R. M. Sutherland, who until recently was manager at Dubuc, Sask., will have his headquarters in Winnipeg, and N. E. Zimmerman, recently assistant manager at Hamilton, will be attached to the supervisor's department, Toronto.

During the month of April there were eighteen branches of Canadian banks opened. The following have not already been mentioned in *The Monetary Times*: Earlton, Ont., Hochelaga; Lac Bouchette Sta., Que., Hochelaga; Leroy, Sask., Standard; Rigaud, Que., Nationale; St. Catherine, Portneuf, Que., Nationale; St. Gerard Megelia, Que., Provinciale; St. Redempteur, Que., Hochelaga; St. Thuribe, Que., Nationale.

The following seven branches were closed: Brantford, Ont., Eagle Place Branch, Hamilton; Bristol, Que., Nova Scotia; Caimaners, Cuba, Royal; Deepdale, Man., Union; La Passe, Ont., Provinciale; Laurel, Ont., Hamilton; Marshville, Ont., Hamilton.

The branches opened were distributed among the banks as follows: Royal, 3; Hochelaga, 3; Nationale, 3; Dominion, 2; Montreal, 1; Home, 1; Imperial, 1; Standard, 1; Provinciale, 1; Nova Scotia, 1; Commerce, 1.

## For Less Service— A Lower Rate

Heretofore, when you asked the long distance operator to connect you with a distant telephone, even though you said to her, "Anyone at that number will do," you paid the same rate as if you had specified a particular person.

Now, a rate is in effect for this type of call ("Station-to-Station" service) which is lower than for calls where a particular person is wanted.

The operating cost and use of circuits involved in handling a call for a particular person are much greater than for a message where the calling party will talk with anyone who answers the distant telephone.

It is a real economy, when placing long distance calls, to say whenever possible, "Anyone at that number will do."

Every Bell Telephone is  
a Long Distance Station

THE BELL TELEPHONE COMPANY  
OF CANADA

# 50%

Statistics show that 50% of the people who died in Ontario in 1920 died without leaving any property.

This does not necessarily mean that none of these people had ever possessed any property. Doubtless many of them at one time had possessed property, but through lack of oversight or good judgment they lost all they had, and died penniless.

You can protect yourself against such a calamity by investing your property under the plan known as the "Voluntary Trust."

This plan is fully set forth in our booklet entitled "Voluntary Trusts and their Uses."

Write to-day for a copy

## INSURANCE IN ONTARIO IN 1920

All Classes of Business Show Substantial Growth—Weather Companies Did Not Experience a Very Favorable Year, Losses Being Heavy

THERE are now three life insurance companies operating in the province of Ontario under a provincial license, according to the abstract report of the superintendent of insurance for 1920, the figures of the Ontario-Equitable Life and Accident being included for the first time. It is interesting to note how these companies compare, and the following figures give a good illustration.

	Equity Life.	Ontario Equitable.	Policy-holders' Mutual.
Gross premiums	\$ 121,725	\$ 18,168	\$ 150,564
Total income	192,096	150,632	161,766
Claims	15,500		12,300
Total expenses	133,353	31,905	105,311
Total assets	721,246	171,150	285,293
Liabilities	675,452	75,438	249,434
Capital	35,400	41,050	46,640
Net amount at risk	4,048,102	864,800	4,745,521

## Joint Stock Fire Companies

There are two joint stock fire insurance companies, and the important figures for 1920 compare as follows: The combined results of these two companies show that the net amount at risk at the end of the year was \$115,281,692, compared with \$87,694,708 in 1919. Losses were \$265,410, compared with \$196,400 previously:—

	Merchants.	Queen City.
Gross premiums	\$ 570,634	\$ 200,673
Total income	606,947	237,807
Losses	198,978	66,431
Total expenses	452,289	176,903
Total assets	807,422	555,259
Liabilities	425,720	146,805
Capital	150,000	100,000
Net amount at risk	90,670,047	24,611,645

## Cash Mutual Fire Companies

Cash mutual are distinguished into those having no joint stock capital, and those having a joint stock capital. The results of the former are as follows:—

	Gore			
	Economical.	District.	Perth.	Waterloo.
	\$	\$	\$	\$
Fixed payments	68,822	74,055	63,455	82,010
Cash premiums	149,117	197,561	131,502	185,010
Total receipts	339,015	325,841	251,788	352,543
Losses paid	57,157	96,584	68,328	92,007
Total expenses	182,779	232,901	187,428	360,926
Total assets	1,161,583	1,156,346	947,239	1,192,255
Liabilities	176,286	170,147	124,266	177,721
Net amount at risk	28,694,626	38,776,015	34,281,097	43,731,154

## Cash Mutuals With Joint Stock Capital

Cash mutual fire insurance companies with joint stock capital are five in number. The Fire Insurance Exchange has a paid-up capital of \$43,650; total assets of \$90,635; total liabilities of \$25,707. Cash premiums in 1920 amounted to \$22,602, with total income at \$29,951. Losses were \$21,654 and total expenditure, \$39,857. The net amount of insurance at risk is \$6,580,408.

Hand-in-Hand had losses of \$96,971, as compared with cash premiums of \$314,923, and total income of \$350,324. The net amount at risk is \$26,142,494, and total assets are \$368,418, with liabilities of \$168,817.

The figures for Millers' and Manufacturers' show a net amount at risk of \$12,041,777. Total assets are \$188,335;

total liabilities, \$61,949; capital, \$25,000. Total income last year was \$114,117, and total expenditure, \$94,885.

Monarch had losses of \$47,292, and total expenditure of \$131,081, as against total income of \$143,310. The capital stock of the company is \$102,152; total liabilities, \$86,716, and total assets, \$137,313; net amount at risk, \$10,675,341.

The results of operations of the Wellington show a net amount at risk of \$15,765,407. Total assets are \$246,611; liabilities, \$108,744; and capital, \$124,500. Cash premiums totalled \$158,504, and total income, \$180,247, while total expenditure, including losses of \$51,146, amounted to \$157,257.

## Purely Mutual Fire Companies

Fire companies of the purely mutual character are very much in the majority, there being seventy-two in number, as compared with seventy-one in 1919. A comparison of the summary shows the following interesting results:—

	1920.	1919.
Total assets	\$ 13,929,026	\$ 12,506,102
Liabilities	22,832	21,689
Net amount at risk	409,858,341	369,951,356
Fixed payments	802,512	688,541
Assessments	161,863	166,561
Total income	1,121,140	988,328
Losses	620,839	599,783
Total expenditure	899,951	863,724

A summary of the results of the fire insurance mutual companies of all classes, shows the following comparisons:—

	1920.	1919.
Gross amount at risk	\$452,379,470	\$408,176,771
Premium notes net unassessed	13,394,975	12,165,349
Surplus of assets over liabilities	18,294,556	16,616,236
New business taken	178,264,243	154,484,626
Premium notes taken	6,363,397	5,440,448

## Weather Insurance

Three companies transact weather insurance, namely, Huron Weather, Ontario Farmers' and Western Farmers'. Assets of the three companies amount to \$847,247, as compared with \$766,399 in 1919. Total liabilities at the end of 1920 were \$42,450, as against \$106,189 at the end of the previous year. The net amount at risk is now \$39,741,285, while in 1919 the figure was \$28,474,320. Losses were much heavier at \$229,777, and the total expenditure amounted to \$349,889, as compared with \$39,488. Total receipts were \$256,660, as compared with \$67,984 in 1919.

The statement of the Provident Assurance Company, of Montreal, which is the only one given under the heading of accident, sickness, guarantee and automobile, shows a net amount at risk of \$28,954,470, compared with \$20,904,092 in 1919. Claims amounted to \$242,199, and total expenditure, \$559,572, compared with \$139,731 and \$337,060, respectively, in 1919. Total income was \$584,179, while in 1919 the figure was \$336,579.

## CANADIAN EXPORT CLUB OF TORONTO

At an organization meeting of the Canadian Export Club of Toronto, held on May 10, the following were elected to the executive: President, B. B. Halladay, Weston; first vice-president, L. L. McMurray, Toronto; second vice-president, W. B. Wedd, Toronto; secretary-treasurer, T. M. Keruish, Toronto. Committee—F. P. Megan, Toronto; H. A. Telfer, Toronto; W. C. McLaughlin, Toronto; W. A. Moore, Toronto; F. E. Sheridan, Toronto; John M. Taylor, Guelph; H. J. Waddie, Hamilton; G. W. McFarland, Brampton; J. S. Thompson, Oshawa; Logan M. Waterous, Brantford. One of the aims of this club is to ascertain sound principles on which further development of Canadian export trade may be based. It is expected that before long similar clubs will be formed in other localities.

Grand Trunk Railway.			
May 7 .....	\$1,788,310	\$1,548,988	+ \$ 239,322
May 14 .....	1,762,926	1,664,627	+ 98,299

## UNION TRUST BUILDING ACQUIRED

The twelve-story building of the Union Trust Co. in Winnipeg, Lombard and Main Streets, adjacent to the Bank of Commerce premises there, has been purchased by the Bank of Commerce for additional office accommodation. The sale is a result of a recent amendment of the Loan and Trust Corporation Act of the province of Ontario, under which the Union Trust Co. operates, restricting trust companies operating under Ontario charters in their investments in office premises. For this reason the trust company desired to dispose of its Winnipeg property in order to keep within the statutory requirements, and to enable it to provide satisfactory head office accommodation in Toronto required for its growing business.

W. A. Rowlands, manager for Western Canada of the Union Trust Co., explained that the sale of the property does not mean that his company is withdrawing from western Canada. Such a plan has not for one moment been considered, and the trust company's offices will continue in the building as heretofore, and its business will be carried on without interruption. The Union Trust Co. has been appointed managers of the building for the Bank of Commerce, in order to cause as little disturbance as possible to the tenants now lodged in the building.

## TRADE CONDITIONS IN CANADA

R. G. Dun and Co.'s *Review* of to-morrow will say regarding business conditions in the Montreal district:—

"All out-going steamers are carrying considerable quantities of grain, principally wheat and corn, with a moderate proportion of oats and barley, and all available space for May is taken up. The European demand, however, has now slackened off somewhat and June shipments will likely show some falling off. Cheese exports thus far have been comparatively light as compared with former years. With regard to the general trade situation there has been little recent change. The iron market shows no revival. Some little business is reported with manufacturers of heating apparatus and other specialties, but the large consumers, such as the railways and those doing heavy foundry work, are not in the market, and quotations rule easy at \$36.80 for foundry iron. A fair number of outside buyers have been noticed among the dry goods warehouses, making mostly moderate sorting selections, and wholesalers are apparently not pushing sales of all lines at the moment. The downward revisions of prices for domestic cottons, noted last week, is confirmed, and all local mills are now practically on the same basis. City retailers report a fair volume of shopping, but would like to see a spell of warmer weather. Moderate buying prevails in the grocery line, and values show little or no variation. High grade black teas are firmly held, but low grade teas are easy. Japans are comparatively neglected. There is a steady outgo of canned vegetables and fruits, and it is figured by some that there are probabilities of some shortage before a new pack is due. Butter, cheese, eggs and hog products continue to show a continued downward tendency, to the great gratification of the consuming public. In other lines there is nothing of special interest. Sixteen district failures are reported for the week, with liabilities of about \$440,000."

## WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended May 19, compared with the corresponding week last year:—

	Week ended		Changes.
	May 19, '21.	May 20, '20.	
Montreal .....	\$129,789,159	\$150,037,284	— \$20,248,125
Toronto .....	103,029,530	116,783,734	— 13,754,204

# Ontario's 1921 Legislation Covers Broad Field

Rural Credits System Established on Recommendation of Special Commission—Insurance Law Amended and Deposit Powers of Loan and Trust Companies Extended—Hydro-Electric Development—Amendments to Mining Tax, Corporations Tax, and Succession Duties

ONTARIO'S legislation passed in the session which opened January 25 and closed May 20 last affects insurance, municipalities, public utility companies and business in general in the province. It was the municipal field that received the most attention, however, at least as regards the number of measures. The number of acts passed was 140.

To increase the province's own revenue is the object of three measures. The Land Transfer Tax Act imposes a tax of  $\frac{1}{2}$  of 1 per cent. upon the purchase price of lands transferred, to be collected by the registrar or master of titles. The Corporations Tax Act, 1921, extends the tax to navigation companies and increases the rate in the case of telephone companies from  $\frac{1}{4}$  to  $\frac{1}{2}$  of 1 per cent. Some minor changes are made in the provincial succession duties. There are increases on the expenditure side as well, one of these being the Mothers' Allowance Act, which makes some changes in the mothers' pension system inaugurated last year. Provision is also made for a "Lake of the Woods Control Board," two members of which are to be appointed by the province and two by the Dominion.

## Municipalities and Their Finances

The municipal statutes include an amendment to the Planning and Development Act, providing that powers may be delegated to a commission, that from \$5,000 to \$10,000 may be expended over a period of three years, and specifying the objects to be kept in view. Provision is made for the separation of farm lands from towns and villages, by the Municipal Board, upon application of a majority of the owners, with a suitable adjustment of assets and liabilities. Organizations receiving aid from the government are required to file statements with the Bureau of Municipal Affairs not later than January 31 each year. Municipalities are empowered to establish air harbors or landing grounds and to issue twenty-year debentures for this purpose. In borrowing funds for any purpose, they may include in the capital amount interest on temporary loans and the estimated cost of the issue and sale of debentures, and any discount allowed to purchasers of them. Another municipal amendment provides that a by-law for establishing or altering a highway may provide that the work be deferred for from three to fifteen years.

There are also several amendments to the Assessment Act. One of these requires that in cities with a population of not less than 100,000, instead of 200,000 as previously, every person make a statement of his income to the assessment commissioner. Land occupied by a distiller is to be assessed at 150 per cent., but so much as is used in producing industrial alcohol is to be assessed at 60 per cent. of its value. Agents or trustees who collect income on behalf of people resident in Ontario are required to make a return of it. Another provision relating to income taxes is that where income cannot be exactly stated it must be reported at not less than that for the preceding year.

## Loan and Trust Companies

One of the most important items of financial legislation, and one which brought forth much difference of opinion, was the loan and trust amendment. It provides that trust companies may not issue debentures or debenture stock, but guaranteed investments are not to be regarded as such. Funds received as guaranteed investments or deposits by a trust company are to be invested only in trustee investments. Specific securities must be allocated for these, and quarterly returns made to the government. The amount invested in the company's own buildings may not exceed 25 per cent. of the paid-up capital and reserve. Deposits must not exceed

twice the paid-up capital and reserve, plus cash, and total borrowings are not to exceed four times this total. Provision is also made for the inspection of loan and trust companies by the government.

## Insurance Changes

Several important amendments are also made regarding insurance. Fraternal societies are to file an actuarial valuation and statement annually, and if the registrar deems the assets insufficient he may require an increase in the rates charged. Provision is also made for a reduction in benefits. If the society fails to comply with the request of the registrar, the latter is to appoint a committee to make such changes as are necessary. Rates of premium on children's lives are subject to the approval of an actuary.

The Fire Department Two Platoon Act requires that firemen shall be divided into two sections, working for 24 hours alternately, or ten hours of day work and 14 hours of night work, alternating every seventh day. A heavy fine is to be imposed on fire chiefs who do not put this system into effect.

The Co-operative Credit Societies Act provides for the organization of societies along the lines recommended by a commission. Shares may be sold and deposits received, but at least ten per cent. of net profits are to be set aside annually until a guarantee fund is established equal to the deposits plus the capital. There is to be a board of administration of at least five members to control the affairs of the society generally, a board of credit of at least three members to consider and approve of loans and investments, and a board of supervision of at least two members to examine the accounts.

To enable municipalities to acquire and operate telephones, an amendment to the Ontario Telephone Act, 1918, was passed. Provision is made for taking over the liabilities of companies purchased, and for issuing debentures for purchase and extensions.

The Toronto Power and Railway Purchase Act, 1921, authorizes the city to purchase the property of the Toronto and Niagara Power Co., and of the Toronto Electric Light Co., Ltd., and the lines of the Metropolitan Railway within the city limits. These are to be operated by the Toronto Electric Commission. Power is also given to issue \$7,811,295 of debentures dated December 1, 1920, payable in 20 years at 6 per cent.

The Natural Gas Conservation Act, 1921, provides that the minister of mines shall control the sale of natural gas in Ontario, his powers being enumerated at length. This replaces the provisions of the Natural Gas Act, 1919.

## Several Commissions Reported

The session was also notable for the fact that an unusually large number of special commissions were making investigations. These included the agricultural credits commission, the university commission, the hydro-electric radials commission, and the inquiry into timber dues. The first two reported before the end of the session, their recommendations being in part adopted.

A bill to amend the Ontario Railway Act, providing that fares on electric railways must be approved by the Ontario Railway Board, and that the terms of an agreement between a municipality and a corporation may be varied with the approval of the Board, but without reference to the electors, brought forth an acrimonious discussion in the house, and was finally defeated. Another measure which failed to pass was Hon. W. R. Rollo's fair measure for the establishment of fair rent courts.

**Make Your Money Work to Earn More Money for You**

Make it earn 4% per annum in a Savings Account instead of less? You wouldn't refuse an increase in your wages, would you? Then why refuse an increase in the interest on your Savings Account? It's as simple as A B C.

The Union Trust Company will pay you interest at 4% per annum, compounded regularly. Come and open your account here. If you cannot conveniently call, open your account by mail. Deposits promptly acknowledged and withdrawals by mail accurately and safely despatched.

# Immigration and Unemployment

Stoppage of Immigration as a Possible Solution—The Present Policy of Selection a Sound One — Emigrant is Necessarily Ambitious — Continued Inflow is Essential to Canada.

By E. L. CHICANOT

UNEMPLOYMENT, arising from a combination of causes centering about the general slump which followed the period of post-war inflation, has undoubtedly been a serious phase in Canadian economic life in the past winter. But that the problem is not merely one of topical acuteness, as the extreme amount of discussion and pessimism the situation gave rise to would suggest, is evidenced by the fact, substantiated by government figures, that unemployment in the middle of the past winter (December, 1920) was less than in the corresponding month of 1914. There is no gainsaying the fact, however, that there is no more serious problem confronting the future prosperity of the Dominion, and it is one which should be of prime interest to all those who have the welfare of the country at heart, and which, from its national importance, should occupy the first minds of the land.

The government has been grappling with the problem; the labor unions have devoted great attention to it; many individuals, moved by a national spirit, have made suggestions and given their ideas. From nearly all sources comes the same suggestion, qualified only in operation: cutting off the flow which is finding its way to these shores until such time as the industrial and economic conditions of the country would seem to warrant the opening of the gates to let in the tide, unstemmed. The first step, the precursor of what legislation it is yet impossible to prognosticate, has been the continuance indefinitely of the regulation which necessitates the possession of \$250 for himself and \$100 for each dependant, in the case of each immigrant of the artisan or laborer type, which legislation was passed in the first instance only to cover the months of the winter.

The suggestion in all the argument and legislation is that the immigrant is largely, or at least partially, responsible for swelling that aggregation which, with the advent of each winter, finds itself without employ, and a portion of which becomes destitute and dependant. The immigrant to our shores has been blamed for a good many things which are not substantiated by statistics, because they are non-existent, and it would be an interesting and valuable work to discover, if possible, just how far exactly the immigrant is to be held responsible for Canada's winter unemployed.

Let us glance over Canada's immigration system, and we can make the observation with a good deal of satisfaction, for, whilst there undoubtedly are a few obvious imperfections, it will be found, in the main, to be one of the best in the world, and is, indeed, paid frequent tribute by the United States, which is still in a position to keenly appreciate a good method of sifting immigrants. The careful system of sifting screens out practically all undesirable of every nature, and the deportees from our ports make at times surprising totals. During the winter months some of our border towns turned away as many desiring to enter Canada as they granted admittances, and in one month one steamship company from five sailings had more than forty deportees.

With these regulations strictly carried out, those persons who survive the several screenings may be considered eminently desirable for admittance to Canadian citizenship, as possessing the requisite qualities and having the necessary guarantee against unemployment in the winter months. (No person in good health need be unemployed in Canada in the summer.) This system resulted in 1920 in a well-balanced and highly assimilable total of immigration which would seem to exactly fit the Dominion's needs. The preponderant class of immigrants, according to government returns, were intending farmers, accounting, in all, for 19,185. There were 6,821 laborers, 9,283 mechanics, 2,720 of the trading class, 538 miners, 996 female servants, and 9,721 whose callings were unclassified.

Whilst the money requisition placed upon immigrants is a safeguard against destitution, it will be generally found that these people, especially in the cases of emigration from the United States and Canada, the two countries from which emanates the heaviest and most desirable flow, bring with them in the shape of cash and effects an amount exceeding the government's old winter standard of \$25. Immigrants from the United States have always had a very high average per capita wealth on entry, authorities having placed this as high as \$1,150, though it would seem that \$500 is a very fair average. In the year 1920 each immigrant from across the border brought to Canada an average of \$371.77. British immigration maintains a much lower per capita average, and is more varied. Whilst the greater part of the United States exodus consists of farmers, who, having sold their farms, bring the proceeds with them to Canada for reinvestment, the British tide is made up of both capitalized classes with money to invest in privately owned and improved land, and also those professional and working classes who have been accustomed to living on wages or salary, brought in weekly or monthly. The period since the war, whilst it has seen the return of many Imperial veterans previously resident in Canada, who, from the low rate of their pay, were not of very sound financial standing on entry, has also seen the entry of many people from the British Isles of substantial capital, which, in its relation to living in those islands before the war, had seriously dwindled.

But it is not in his possession of wealth, which, without the ability to manage, will soon disappear, that the immigrant has the soundest assurance against unemployment and eventual destitution, so much as in his personal qualities and attributes. Whatever else may be said of the characteristics of that body of people coming continually to our shores, it must at least be logically admitted that their calibre is such as to be a pretty good guarantee, with the rigorous sifting carried on at landing and given a fair chance, against becoming a burden on the country. It takes no little pluck, imagination, hope and initiative to pluck oneself up by the roots and be transplanted to a totally unknown and untried field, where nothing is to count but personal qualities and endeavor. It must in all reason be admitted that, apart from the few men who wish to leave their native land for criminal reasons, an immigrant comes to a new country in the hope and expectation of bettering himself in a new start, and that he believes he has the qualities of initiative and perseverance to do this. Emigration is not carried out on the spur of the moment, but is the result of much thinking and calculation.

Since the termination of the war Canada has been in a position to secure the very best types of immigrants. The classes hit most seriously and acutely by the war were the professional and so designated middle class. In the aftermath they have had to face a lowered purchasing value of their capital and incomes, which assured comfortable living circumstances in the days before the war, but no longer do so. The eyes of thousands of these in the belligerent countries, more especially the British Isles, have been turned to the British Dominions, including Canada. That we have not already absorbed more of these people since the Armistice has been due to lack of transportation facilities, and that much of what was available was given up, owing to a none too efficient supervision, to a less desirable class of foreign immigration which has furnished the detained and deported.

A recent despatch states that a total of 16,766 ex-service men and women from the British Isles have been accepted as approved settlers under the Overseas Settlement Scheme, and received free passage vouchers to arrive in Canada this summer. This is overwhelmingly more than have declared their desire to go to the other Dominions. These are the

## A BOND FOR \$100

\$100 or more invested in a "Canada Permanent" Bond for ONE YEAR will earn interest at FIVE PER CENT. per annum, payable half-yearly. A higher rate is paid on longer term investments. Interest begins the day the money is received, and the Bond will be made to become due on any date the investor desires.

The Bonds are issued in small sums and for short terms to enable those of moderate means to obtain a high grade security yielding a fair return and still have their funds available within a reasonable time. Small amounts should not be allowed to remain idle when they can be employed to such good advantage as by investing them in these Bonds.

The Corporation has been issuing these Bonds for nearly half a century. They are a first charge against its assets, which amount to over \$35,000,000.

JOHN R. LITTLE, Managing Director

peoples a ban on immigration would shut out to the everlasting loss of Canada, and the benefit of less shortsighted Dominions. Immigration once shut down cannot be resumed at a moment's notice when the government and labor unions decide the time is fit. An intricate machinery linking a great part of the globe must be reassembled and put into motion, and the popular mind prepared for some time before results can be expected. People do not decide over night to cast the die and make a new home; it is a slow process, long thought out and deeply pondered. According to those in touch with the situation immigration could continue at the present time and all available ships be filled at each sailing with the most desirable types from the British Isles and continental Europe.

As president of the only paying railroad in Canada, and practically in the world at the present time, and one which has been built up by immigration, has probably induced greater immigration than any other factor, and maintains a large department for this very purpose, the opinion of Mr. E. W. Beatty is a very valuable one. Interviewed recently in Montreal in the matter of the Grand Trunk Railway deficit, he stated that the salvation of the government road lay in a wise and vigorous immigration policy. "I am afraid that many people in Canada to-day," he said, "do not sufficiently realize that the most urgent and essential need to-day is increase in population, not only to provide traffic for the railways, but also to help pay our enormous national indebtedness. It was an aggressive immigration propaganda that built up the Canadian Pacific and without immigration, the prospects of the Canadian National are, in my opinion, hopeless. Any legislation which would stem the tide of desirable immigration must inevitably pile up further deficits, for immigration is Canada's great salvation."

By all reasonable thinking, and borne out by statistics, it is not the immigrant who is responsible for unemployment or ultimate dependency; this entire mass, when it has undergone the careful sifting which the immigration system ensures, enters the country, instigated by a keen energy and active endeavor, and the predominant idea of bettering their condition and making good. The naturally idle, the indigent, the unambitious, are, physically and temperamentally, incapable of the effort of uprooting and transplantation, of the incidental expense involved, and of the initiative necessary to attempt new things. The opportunities of a new country are nothing to them, for they are incapable of making use of such advantages as their native environment offers.

The absolute stoppage of immigration at the present time would defeat all the objects for which the Dominion, through her government, her railways and various other organizations, has been straining every effort for years, and eliminate the only factor which will eventually develop the Dominion into that great nation which those who believe in her future anticipate. It would keep out those thousands of desirable citizens now planning and waiting to come to our shores. Indirectly, it would inevitably be the cause of a certain amount of unemployment, thus directly defeating its own aims.

Canada's immigration policy of careful selection in force at the present time is a good one, and the best guarantee against the unemployment or destitution of those constituting the flow. Following this out intelligently, Canada can grow, more slowly, perhaps, but certainly more safely and sanely. Canada can accommodate unlimited numbers of this high type. Let us continue in this manner to build up Canada to the place we believe her enormous latent wealth warrants among the nations of the world, letting in the best peoples, with the process of most thorough assimilation. Do not cut off this development by stopping entirely the flow of new blood which is necessary to her vivification.

The "Gosling" is the title of a monthly journal, publication of which has just been commenced by the Alberta Pond of the Ancient and Honorable Order of the Blue Goose, in the interest of those engaged in the business of fire and casualty insurance.

## BUILDING PERMITS INCREASE 106 PER CENT.

March Figure Indicates a Big Revival—Total Still Shows a Considerable Reduction as Compared With Last Year

**B**UILDING permits issued in 56 cities showed an increase during March, 1921, as compared with the preceding month, the value rising from \$3,216,085 in February to \$6,610,703, an increase of \$3,394,618, or nearly 106 per cent. All provinces reported increases in this comparison, that of \$2,701,083, or nearly 214 per cent. in Ontario being the most pronounced. Details are given below.

As compared with the figures for the corresponding month in 1920 there was a decline of \$1,549,457, or nearly 19 per cent., the value for March of last year having been \$8,160,160. In this comparison New Brunswick, Ontario and British Columbia showed increases, while of the declines registered in the other sections of the country, that of \$738,830, or 77.7 per cent. in Alberta was the largest.

## Strong Convincing Evidence

THE value of Imperial Lubricants is best measured by the results they give. Bigger output, steadier and longer service from machinery, lower operating expense—all are made possible by their regular use.

In the accompanying list there is a right grade of oil for any make of machine and every moving part. All grades are of the same high quality. Carefully formulated to give dollar-for-dollar lubrication.

The success of countless Canadian industries is closely tied up with Imperial Lubricants. These testimonials from representative firms speak for themselves.

### Entirely Satisfactory

*We have been using Imperial Lubricants for several years. We are entirely satisfied with their quality, and the service could not be improved upon.*  
—Vancouver Lumber Co. Limited.

### A Grade for Every Need

*We have found Imperial Lubricants perfectly satisfactory and of very high grade. The fact that your company makes such a large line of lubricating oils has enabled us to make proper selections for the different machines we have to lubricate.*  
—Garden City Paper Mills Co.

Imperial stocks are always available. Imperial Engineers will gladly advise you regarding lubrication. Write to 56 Church St., Toronto.

# Canada's April Trade Shows Large Reduction

Exports and Imports Both Declined—In the Former Class the Most Notable Changes Were in Wood and Paper and Iron and Steel—Sales of Agricultural Products Abroad Were Much Larger in Volume Than a Year Ago

SOME big changes are shown in Canada's trade for the first month of the fiscal year. As compared with the previous month, April exports decreased by about twenty-five million dollars, while imports declined to the extent of twenty-seven millions.

Analysing these figures according to class, reveals declines in all imports, notable among which are non-metallic minerals, agricultural products, textiles and iron and steel. All classes of exports, with the exception of textiles, showed

falling away. Here the largest declines were in wood and paper, agricultural products and iron and steel.

Extending the comparison to 1920 shows similar results. Sales of agricultural products abroad were much larger in volume this year than in April, 1920, however. But in all other accounts, both of imports and exports, the revision was downward.

The following table, which was compiled by the Department of Customs, gives the April detail:—

	IMPORTS ENTERED FOR HOME CONSUMPTION				EXPORTS			
	Month of April				Month of April			
	1920		1921		1920		1921	
	Free	Dutiable	Free	Dutiable	Domestic	Foreign	Domestic	Foreign

## PUBLICATIONS RECEIVED

While Europe Waits for Peace.—By Pierpont B. Noyes, American Rhineland Commissioner, April, 1919, to June, 1920. Macmillan Company of Canada. 99 pp., \$1.65. The struggles of Europe during the past two years are here explained, frankly and clearly, by one who was in a position to observe them closely. Not the least startling statement in the book is Mr. Noyes' insistence that the United States must cancel France's debt. He takes issue with Mr. Keynes' suggestion that the British debt also should be cancelled. It is not less interesting than such other points as the revelation of the intrigues which sought to separate the Rhine provinces from Germany, the consideration of the consequences of possible French military invasion of Germany, and the results of a fifteen years' occupation of the German Rhine provinces.

Montreal Year Book, 1921.—The first edition of a Montreal Year Book in English and French has been published by the City Chamber of Commerce. Besides illustrations and a general description of the city's industries, it gives a list of firms classified by products, a list of consulates and other useful information.

## BOND PRICES SHOULD STRENGTHEN

The Canadian Debentures Corporation, Toronto, has commenced the issue of a monthly letter. The first one, after pointing out that a steady decline in bond prices during the past four years has evoked serious reflection on the part of many holders, then describes some of the influences which should make for a change. "History points that every great rise in commodity prices," says the letter, "has been associated with a decline in the price of investment bonds, with a corresponding increase in their yields. Similarly, every pronounced decline in commodity prices has been reflected in advancing bond prices. Thus, the yield on long-term high-grade municipal bonds advanced during the past three years from 4½ to as high as 7 per cent. This was an increase proportionate to the advanced cost of living, and traceable to much the same cause." It is then contended that there is already evidence of influence which should turn the scale. "Prior to any advance of bond prices," it is said, "we must have (1) deflation; (2) lower commodity prices; (3) lower interest rates." These influences have already set in, and it is added that the investor will be unable to secure in a year or so the interest return now available on certain bonds."

### DIVIDEND NOTICE

Notice is hereby given that a Dividend of Three per cent. (Twelve per cent. per annum) on the paid-up Capital of the Bank, for the quarter ending 31st May, has this day been declared, and that the same will be payable at the Bank and its branches on 1st June next to shareholders of record at close of business, May 20th.

By Order of the Board.

J. P. BELL, General Manager.

Hamilton, 18th April, 1921. 566

## DEBENTURES FOR SALE

### CITY OF TORONTO

#### \$5,000,000 Serial Bonds

Sealed tenders, endorsed "Tender for City of Toronto Bonds," addressed to Thomas L. Church, Esq., K.C., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon (daylight saving time), Wednesday, 1st June, 1921, for the purchase of \$5,000,000 serial bonds, issued on account of the acquisition and rehabilitation of the Toronto Railway Company.

Full details as to the purposes for which the bonds are issued, and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issue has been approved by Mr. J. B. Clarke, K.C., Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, and are of the denomination of \$1,000.

They are payable both as to principal and interest in Toronto, and carry interest at the rate of 6% per annum, payable half-yearly. They are dated June 1st, 1921, the first maturity date of principal being June 1st, 1925.

Engraved bonds will be ready for delivery on or about June 10th, 1921. Delivery and payment, with accrued interest, are to be made at the office of the undersigned.

Tenders will not be received for any part, but must be for the entire issue.

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

GEO. H. ROSS,  
Commissioner of Finance.

Treasury Department,  
City Hall, Toronto, Canada, May 12, 1921. 562

### CITY OF SASKATOON

#### DEBENTURE ISSUE—\$204,000

#### TIME FOR RECEIVING TENDERS EXTENDED

The time for receiving tenders on above-mentioned debenture issue has been extended to 12 o'clock noon, June 6th, 1921.

A. MacG. YOUNG,  
Mayor.

ANDREW LESLIE,  
City Commissioner.

Saskatoon, May 16th, 1921. 567

C. D. E. Wilson, of Montreal, who rented a furnished cottage on Lake St. Louis for the season of 1918, has been condemned by the Quebec Courts to repay to the Westchester Fire Insurance Co. of New York, the sum of \$614 which the company had paid the owner on a fire insurance policy. The fire took place on the night of May 12, when Mr. Wilson arrived to take possession.

## 14-Day Sea Trip on the Placid Waters of St. Lawrence River and Gulf

All the fascination of an Ocean voyage—without its monotony or discomfort.

A boat trip of a thousand miles through Lower St. Lawrence and Gulf of St. Lawrence. From Montreal and Quebec to St. Johns, Newfoundland—the modern Steamship "Manoa" (6,000 tons displacement) passes down the picturesque Gaspé Coast—giving a "close-up" view of the impressive Perce Rock—a huge mass of red sand stone pierced by the curious apertures from which its name is derived—Majestic, beautiful—its inaccessible crags, the home of myriads of beautiful sea-birds.

### *A Cruise in Cool Latitudes*

The heat and dust of cities are left far behind—you enjoy the tonic qualities of bracing sea air—plus the comfort of de luxe stateroom accommodation, including parlor-rooms with bath en-suite.

The "Manoa" touches at Gaspé and at Charlottetown—and docks for three days at St. Johns to permit of visiting the many points of interest in Newfoundland.

Cruises commencing at Montreal on June 11th and 28th, — July 15th—August 2nd and 19th.

## "INVESTING" IN OIL

Fortunes Sunk in Oil Far Exceed Those Made Out of It—  
Companies May Never Own Property, or Drill,  
or Strike Oil

BY VICTOR LAURISTON

AT the registered-letter wicket in a small city post office, a very much excited negro workman thrust between the bars a couple of sealed envelopes.

"You'll git dem off rightaway, mistah," he urged. "Dey'll git dah rightaway, sho'?"

"Yes," the clerk assured him, "they'll get there just as quick as the mails can carry them."

As the darkey departed, the clerk made a wry face. "Don't it beat the Dutch?" he commented.

The addresses on the two envelopes told their own story. One went to an insurance office in Baltimore. The other to the "World Wonder Petroleum Producing and Refining Co."—somewhere in Texas.

It didn't require a Sherlock Holmes to deduce the significance of the transaction. The colored man was "investing" in oil stock. To finance his investment, he had borrowed money on his insurance—probably money patiently saved and put away during the greater part of his working lifetime. And in order to "invest" to the best advantage, he had to buy "World Wonder Petroleum Producing and Refining Co." stock at once; because on Saturday it would advance 20 cents a share.

### Shares Didn't Advance

You won't find World Wonder stock listed on the exchanges of New York, Toronto, Pittsburg or anywhere else that legitimate stocks are dealt in. You won't even find it listed on the curb. Probably after next Saturday you'll never hear of it again. It's merely one of a myriad "fly-by-night" oil stocks that are peddled nowadays to credulous "investors" eager for easy money. It doubtless promises \$100 or perhaps \$1,000 return for every ten cent share. I don't know as to that, for I haven't seen the prospectus—but I've seen lots of others, and I know how they read. And if I know anything about the game, William Jefferson Washington Jackson firmly believes that the World Wonder Petroleum Producing and Refining Co. is going to drill in a 100,000-bbl. gusher inside of a few days. For hasn't it got a lease on the very dome of the anticline and right next to the famous Texas No. 1, or some other well equally reputable.

If I wanted to get rich quick, I wouldn't bother with the money that's made from oil production—I'd be satisfied merely to have the far larger sums that have been "invested" in oil stocks since Colonel Drake drilled his first well at Titusville. In fact, I'd even be satisfied with the money that has been "invested" in hopeless Canadian oil ventures since J. H. Williams drilled the first Canadian oil well at Oil Springs in the latter 50's. Nay, I'd be amply satisfied

to garner the sums that have been "invested" in Canadian oil schemes that were absolutely and irredeemably hopeless from the start.

For there are all grades of oil speculations, yeleft "investments"—apart from the solid, tangible investments such as Imperial Oil, which have real assets behind them and pay a modest two per cent. or thereabout on their high-priced shares.

A great many of the oil stocks now being peddled are absolutely hopeless. This is particularly true of the Texas schemes. Texas has been a great oil producing state; but it has also produced a tremendous crop of worthless oil stocks, backed by "leases" where oil never possibly could exist, and never will be found. For the actual oil production, huge though it is, is secured in a limited area, or a succession of limited areas; and the wide spaces of dry territory intervening are good for nothing except the floating of worthless schemes designed to separate the suckers from their money.

### Some Do Not Even Drill

These stocks represent the simplest and probably the commonest form of oil investment—the companies which never drill and never intend to drill because they know that drilling is hopeless. There are, of course, the still flimsier ventures where the company is merely a charter, or even merely a name; and the leases, prospects and drilling operations discussed in the flamboyant prospectus are merely figments of the promoter's imagination. These ventures are downright swindles; nothing less.

From the downright swindle, the oil "investment" shows gradations clear through to the honest and legitimate venture which may succeed or may fail, but involves an element of risk and speculation that renders its shares undesirable as an investment for widows and orphans. For at its very best, oil production is speculative and uncertain, except in proven fields. Even in the proven field there is an element of risk. But in the proven field, the negro roustabout, the charwoman with a few dollars saved, the street sweeper and the retired minister cannot buy stock at 10 cents a share, simply because it will be held by men who understand the possibilities and intend to realize for themselves.

In the downright swindle class of oil "investments," previously referred to, the men who make money are the promoters; when they have made a sufficient killing they simply vanish from the landscape, to renew their activities a little later under some other alluring name at some different address.

### Some Don't Know When to Stop

Perhaps the next gradation is the venture which actually drills for oil. This class of "investment" may in turn be subdivided into others. For instance, there is one venture in Ontario right now that has drilled clear through the sedimentary formations into the granite, and is still pegging away. Of course, all hope of securing oil is exhausted when the igneous rocks are reached; since oil is found only in sedimentary formations. There are, too, ventures located in

# Must the Printing Industry Follow the Building Trade to Stagnation?

An unheard of condition exists in the building trade in Canada.

Everywhere there is a crying need for homes, but practically none are being built.

Why?

Because the cost is considered prohibitive. Labor and materials are so high that the man who contemplates building a home for himself counts the cost, and decides he cannot afford it.

The result, of course, is increased demand for houses to rent—and higher rents—and no one knows the end.

We don't want this stagnation to occur in the printing industry, but employers are right now faced with a demand from the International Typographical Union that the 44-hour week shall be the basis for all wage scales, and the Toronto Unions are demanding a wage of \$44 per week. This will add 36 per cent. to the wage bill of Toronto job printers and publishers, other than those of daily papers.

Does anyone feel that under present economic conditions an increase from 73 cents per hour to \$1.00 per hour for printers is justified?

Does anyone believe that the effect of such an increase in the labor cost of printed matter, can be other than harmful to the industry as a whole?

Printers can only find employment so long as users of their product continue to buy.

Will there not come a time when—if costs keep on mounting—printers will find themselves in the same position as many highly skilled carpenters, bricklayers, plasterers and painters are now in. They are willing and anxious to work but cannot find a market for their services.

This is a matter in which the buyers of printing—the subscribers to this and other papers—and the advertisers—are vitally concerned. An increase of 36 per cent. in the wage bill of publishers would necessarily involve an increase in subscription price and advertising rates.

That is plain.

Publishers would be very reluctant to add one cent to the present subscription price of their papers or to effect an increase in advertising rates, but they cannot possibly absorb any such addition in wage costs as is proposed, and stay in business.

An expression of the opinion of the readers of this paper on the Union's proposals, involving an increase of 36% in the labor cost of printed matter is asked. Will you not write a letter to the editor (not for publication) telling him your view of the situation.

**Don't let us drive the printing industry into the condition of the building trades**

*This statement is published by and has received the endorsement of the Toronto publishers who are members of the*

**Canadian National Newspapers and Periodicals Association**  
including THE MONETARY TIMES OF CANADA.

territory where neither the formations nor the geological structure favors oil. Here, again, the prospects are hopeless; but the company can, on the strength of its drilling, sell stock a great deal more readily than otherwise. For the credulous speculator, any hole in the ground with a drilling rig over it is a prospective gusher.

Next in order come the ventures drilling in territory where there are actual prospects of oil, as indicated perhaps by surface seepages and favorable geological conditions. Here the company stands a chance of securing production. But if production is secured, the investor's returns still have to run the gauntlet of the men at the head of the company. If these men are dishonest, the returns can be readily absorbed in office expenses, commissions, travelling expenses, directors fees and other disbursements more or less legitimate, which leave the company with a treasury too empty to pay dividends.

#### Pitfalls Near Success

Granted the honesty of the management, there are still pitfalls even after a producing well is brought in. The capitalization may be too heavy to permit of adequate returns. There is one company in the Okotoks field southwest of Calgary which has a good producing well; but it also has a capitalization of \$20,000,000. It would take a good many large wells to begin to pay dividends on such an investment. There is, too, the risk that production, once secured, may not be maintained. Quite a few ventures starting with a good initial production peter out after a few days. Only the initial 100 barrel or 1,000 barrel production is chronicled, however; and disappointed shareholders wonder why they receive no dividends. Often a well is rated at 1,000 barrels a day on the strength of a pocket of oil that may gush at that rate for an hour or two and then fails absolutely. And even the best producing wells are apt to decline rapidly after a few days production.

The oil business, in so far as it is within reach of the ordinary man, is a gamble. If he recognizes it as such, well and good. In isolated cases he may make good money; as a rule he loses. The isolated winnings, however, serve to keep the gambling spirit alive. But it is only the most exceptional cases where the small speculator wins for he has to run gauntlet of so many risks—the honesty of the management, the chance of a holeless or poor location, the chance of failing production, the danger that, with big winnings, the men at the head of affairs may freeze out the small stockholders. Oil is a game for the man who can afford to lose, not for the man who must win to repay the loan on his insurance.

As, for example, William Jefferson Washington Jackson.

#### CONSOLIDATION OF THE RITHET INTERESTS

On the fiftieth anniversary of the foundation of R. P. Rithet and Co., Ltd., of Victoria, B.C., it has been decided to amalgamate what has been generally known in British Columbia coast business circles as the Rithet interests, which consist of the wholesale, importing, shipping and insurance firm of R. P. Rithet and Co., Ltd., the Victoria Wharf and Warehousing Co., Ltd., and the Rithet Proprietary Co., Ltd.

The Victoria Wharf and Warehouse Co. was formed to operate the wharves and warehouses, which have been, and are now, such an important feature in connection with the shipping of Victoria, and which were inaugurated by the late R. P. Rithet in 1882. At a later date the Proprietary Co. was organized as the holding company of the above, and various other interests owned by Mr. Rithet. On and after the 22nd of April, the companies will be amalgamated, and the new company which has taken these over will be known as Rithet Consolidated, Ltd., which will carry on the business formerly operated by the other companies, which will be voluntarily wound up with the formation of the consolidated company. The personnel of the new concern will be the same as under the old companies, and no difference will be made in the general administration of the present business.

#### PREMISES TIE UP BANKING CAPITAL

Sixty Million Might be Released for Commercial Purposes by Creating Holding Companies

By R. W. HUNTER, C.A.,  
Vancouver, B.C.

CANADA has reached a point in her history as a nation which may be likened to that of the United States after the civil war—she is on the eve of great industrial and economic and financial expansion. There lies before her the vista of wealth which lay before our sister nation to the south, when North and South had become one.

It goes without saying that for expansion capital is required. Eventually there will flow from different parts of the world capital to develop Canada's industries, and her banks will be strained to their utmost to keep up with the calls made on them during the expansion. This state is not in the very immediate future, for complete readjustment must have first been brought about.

#### Sixty Million in Bank Premises

An examination of the combined balance sheets of the Canadian banks for the month of November reveals the fact that of the moneys subscribed by the shareholders and of the moneys accrued to their credit by way of undivided profits or reserves there is a total amount of \$60,467,669 invested in fixed assets, which are not available for trade purposes, such assets being the real estate and buildings used as bank premises. It is generally known that the real present day value is greatly in excess of the amount at which they appear on the books.

If any way could be arrived at for releasing these funds invested in bank premises there would be made available for commercial purposes not only \$60,000,000 but an amount vastly in excess of that. Can a way be found which will accomplish this and yet without injuring the financial stability of the banking institutions?

The following suggestion is made whereby this could be done wholly or in part according to what would be compatible with the financial safety of the institutions. The plan given is outlined only, as a great many governing factors which cannot be determined now would affect any detailed plan put forth at the present time.

#### Create Premises Holding Company

Each bank would create a Bank Premises Holding Co. owning all the shares, the issue of which would be nominal only, in such company. This holding company would purchase the bank premises from its particular bank at a present day conservative valuation, paying the bank therefore by funds derived in the following way: The holding company would issue stock or permanent bonds to either the full value or to such percentage as would be determined. The bank would pay its holding company a rental which would be a percentage of the value. Such percentage would be of sufficient amount to provide for repairs and renewals, administration expenses and interest on the bonds. The question of depreciation would also have to be considered.

It is not advisable to go into the form of security to be issued, treatment of additions to bank premises and other matters, as such are not capable of being determined until the plan be gone into more fully. The place of sale of the bonds or stock would be governed by the exchange situation of the day. Naturally amendment of the bank act and other legislation would be necessary.

The large amount which could be made available in this way can be appreciated if one only takes into consideration the amount at which the premises appear on the balance sheets of the banks, viz, \$60,467,669.

Not only would the people of Canada benefit by putting into operation such a plan. The shareholders of the banks would also benefit as the rate of interest payable on the bonds would be less than the rate of interest obtained when the money is lent to the banks customers.

# Union Assurance Society

Limited  
OF LONDON, ENGLAND

## *A Bit of History*

INSTITUTED in the Reign of Queen Anne, A.D. 1714, in that year the OLD UNION in the City of London commenced granting insurance against fire.

The Canada Branch was established November, 1890, under the present management.

In the interval Canada has passed through some fiery experiences, as may be gathered from following list of conflagrations:—

Toronto	1895 (three fires)	loss	\$2,500,000	UNION PAID	\$45,000
Windsor, N.S.	1897	loss	\$1,500,000	UNION PAID	\$11,000
New Westminster, B.C.	1898	loss	\$2,000,000	UNION PAID	\$41,000
Ottawa-Hull	1900	loss	\$9,500,000	UNION PAID	\$180,000
Montreal	1901	loss	\$3,500,000	UNION PAID	\$68,800
Sydney, N.S.	1901	loss	\$400,000	UNION PAID	\$11,000
Ottawa	1903	loss	\$1,000,000	UNION PAID	\$10,000
Toronto	1904	loss	\$10,500,000	UNION PAID	\$174,600
Three Rivers, P.Q.	1908	loss	\$2,000,000	UNION PAID	\$5,500
Fernie, B.C.	1908	loss	\$4,000,000	UNION PAID	\$31,000
Campbellton, N.B.	1910	loss	\$2,000,000	UNION PAID	\$47,000
Northern Ontario	1911	loss	\$1,450,000	UNION PAID	\$21,000
Northern Ontario	1916	loss	\$2,000,000	UNION PAID	\$47,000

In the thirty years ending 31st December, 1920, Union paid \$6,261,976.61 to Canadian policyholders for fire losses.

AGENCIES THROUGHOUT THE DOMINION

**QUARTER BILLION LOSS, WHO'S RESPONSIBLE?**

**Careless Individual Chiefly—Canada's Yearly Fire Toll of Property and Lives**

By J. DOWER

"AS each working day ends in the Dominion of Canada, fire has destroyed one life and over \$70,000 worth of property."

It is some fifty-four or five years since *The Monetary Times* first drew attention to this economic loss, and the above statement is proven by the records given over this long stretch of years. This loss affects every person, it affects finance, commerce, life insurance, fire insurance. For many a year the insistent editorial pleas of *The Monetary Times*, for a reduction of this wastage, were the only ones heard in the Dominion, then other pens took up the work, and in the past decade provincial governments appointed fire marshals, the Commission of Conservation appointed experts, clean-up days were inaugurated. Children were taught in schools regarding the fire demon.

But from the volume of losses being recorded this year it seems necessary to go further into the matter. Going over *The Monetary Times'* record for the past ten years we find that property to the value of \$232,000,000 has been destroyed and 2,500 lives have been lost. In this period fire insurance companies have paid \$156,000,000, leaving \$76,000,000 as absolute loss unprovided for.

**Greatest Loss Not Recorded**

To this must be added these greater losses:—(1) Value of lives lost; (2) lost business; (3) lost wages; (4) lost goodwill; (5) disrupted organizations, etc.

To glance at the figures in next column shows the problem is a large one, and one that must be solved.

For a period of ten years Canada's fire loss has averaged month by month \$2,000,000, exclusive of forest fires, and other unreported destruction. The figures for the 10 years follow:

	<i>The Monetary Times'</i> Paid by insurance record of fire losses.		Deaths.
	companies.		
1911	\$ 21,459,575	\$ 10,936,947	317
1912	22,900,712	12,119,581	203
1913	26,346,618	14,003,759	236
1914	24,321,012	15,347,284	175
1915	13,670,527	14,161,949	142
1916	20,487,509	15,111,133	531
1917	20,086,085	16,379,101	207
1918	31,815,844	19,359,252	241
1919	23,207,647	16,679,355	225
1920	27,371,574	21,945,114	224
	\$231,667,103	\$156,043,475	2,501

**Careless Individual a Criminal**

Some things this loss could do every month: (1) Pay 10,000 men's wages at \$50 per week; (2) build 400 homes at \$5,000; (3) reduce cost of living by \$2,000,000.

Canada has efficient fire fighting apparatus, its fire prevention campaigns are excellent; wherein then lies the cause of a loss which shows no diminution in amount? The answer seems to be: "The careless individual." What shall be done by him remains for Canada's citizens to say, but in too many cases fires are crimes, and those who permit them to start should be labelled criminals.

For several days now the daily papers have carried reports of towns almost destroyed by fire, therefore it would seem now is an appropriate time to start to eliminate by constructive means some of the enormous losses, for Canada needs every dollar and every productive agency preserved and kept in full running order.

## REGISTRATION OF TRADE MARK

Company May Duplicate Product, but Cannot Use Name When Latter is Registered Trade Mark

"THE word 'Castoria,' in connection with the manufacture and sale of a senna laxative for infants and children, has been held by the courts not to be the generic name of a medicinal preparation, but an arbitrary designation, and as such may be the subject of a valid trade mark, which, being registered in Canada, protects the right to the sole use of the word in Canada during the life of the trade mark, although the patent rights to the preparation and sole right to the use of the word in the United States have expired, and the product has not been protected by a patent in Canada." Such is the decision of the Quebec Court of King's Bench in the case of American Druggists' Syndicate, Ltd., vs. The Centaur Co. The written judgment of Justice Carroll contains much interesting information as to the distinction between trade marks and patents, some of the paragraphs being as follows:—

"Nobody will contest to the manufacturer the right to put his own name on his products; neither will anyone deny that no other person may usurp such name. No definite legal enactment is required to permit a manufacturer to place his own name on the products of his industry, but for diverse reasons and in his own interests, instead of placing his name on his products so as to certify their origin, he will sometimes use some sign or mark. Such will consist either in several letters of the alphabet, in a word or in certain signs, which belong to nobody in particular and are public property, but which, by thus being applied on the manufactured article, will allow it to be distinguished or differentiated from other similar products. The particular manner in which a trader will inscribe his name on goods of his personal make may, to all intents and purposes, confer to that name the character of a mark.

"Considered in its object, the trade mark, to be considered such, requires no particular labor or pains. It has of itself no literary, artistic or industrial worth, and gives none to the object to which it is affixed. In that respect it in no way compares with patents which properly cover creations of the intelligence, and by virtue of which the law grants to the patentees exclusive rights for a given period of time.

## Trade Marks and Patents

"It is impossible, as I said a moment ago, to assimilate a trade mark and a patent. The object covered by the patent, whether it be a literary or artistic work or an industrial device, has a great value. The mark, in itself, has no value; its only utility is that of a certificate as to the origin or source of the product to which it is affixed. Employed by another, it ceases to be the expression of truth or genuineness.

"The patent differs from the trade mark in that a new substance results from the invention. The State, to encourage the patentee and reward his industry, grants him the privilege, during a given period, to manufacture the article invented. That privilege is not, however, conferred for an indefinite time, as it would then become a monopoly. Such is not the case as regards the general trade mark, which, once it is registered, endures indefinitely, R.S.C. 1906, ch. 71, sec. 16, or as regards a specific trade mark, which endures for a period of twenty-five years, and may be renewed by the proprietor thereof or his legal representative for an additional period of twenty-five years, and so on without limitation. (Sec. 17.)

"Appellant company may well manufacture a product similar in its constituting elements to that which respondent company offers for sale, but it is precluded by law from giving it a name, the exclusive use of which belongs to said respondent company.

"In order that there be no illegal competition between two commercial products of the same nature, their respective names or designations must be sufficiently distinct that the purchaser may not, as I have already said, be led to mistake one for the other."

## AGENT FRAUDULENTLY WITHDRAWING DEPOSIT

Power of Attorney to Agent Protects Bank—Principal Suffers Loss Where There is Ambiguity in Wording

IN an appeal to the Quebec Court of King's Bench in the case of *Robidoux v. The Royal Bank* it was held that one who gives a power of attorney to collect funds to a solicitor who deposits the funds collected in his own bank and draws the money out later for his own use, cannot recover as against the bank, there being no privity of contract between the giver of such power and the bank.

In his decision Justice Pelletier says:—

"It is admitted by all parties that the advocate, A. D., who had made the deposit at the bank, could withdraw the money in the same manner as that in which he deposited it, that is to say, by cheques conforming to the deposit slip and the entries in the bank books. But the appellant says, with much plausibility at first sight, that 'when the bank received this deposit made by my solicitor as my attorney, it was at the same time notified of the terms and of the extent and limitation of the powers my mandatory had.' This contention is well founded in fact. When A. D. deposited the cheque the respondent bank received at the same time, and kept in its custody, the appellant's power of attorney. The decision of this case rests then entirely, in my opinion, upon the interpretation that should be given to the terms of this power of attorney, the text of which is reproduced above, and which was signed by the appellant in the presence of an agent of the respondent, Harwood. If, by this power of attorney, the mandate of A. D. was at an end after the deposit was made, the bank was not justified in permitting A. D. to withdraw as attorney, by cheque payable to his own order, moneys which did not belong to him. But the power of attorney, which, at first sight, I would believe conclusive in favor of the contentions of the appellant, is susceptible of two interpretations.

"The sound doctrine, I believe, in the matter of mandate, is that if a power of attorney is incomplete, or susceptible of two interpretations, it is the person giving the mandate who should suffer; it is for him to draw his power of attorney in such a form that his agent cannot abuse it, and if he does not take precautions sufficient to protect himself, the benefit of the doubt should be given to the third party, who acts with evident good faith. In view of what I have said, I do not believe that there was any privity of contract between the appellant and respondent. I am sorry for the unfortunate woman who suffers from all this to be obliged to arrive at this conclusion, but I do not see how it is possible to do otherwise."

## SUIT OVER FOREIGN EXCHANGE

Another foreign exchange complication came to the Quebec courts on May 11, when Joseph Andrejczuk sought to recover from William Nadler the sum of \$2,820, alleged by plaintiff to be due him by defendant under the following circumstances:—

Andrejczuk kept a steamship ticket agency at Sudbury, Ont., in 1919. In the course of business, and between August 25 and September 18, 1919, he alleges he sent, on behalf of clients, to Nadler, president of the Universal Passage and Financial Co., Ltd., 125 St. Antoine Street, Montreal, orders to forward immediately to certain parties in Poland 155,000 Polish marks. Instead of forwarding the moneys as ordered at once, Nadler waited until September 19, 1919, to do so, thus profiting by the fall in the money market. On the date mentioned, Nadler arranged with the Guarantee Trust Co. in New York to forward to Poland Czecko-Slovakian kronen. On these transactions Nadler made \$1,820, which plaintiff and his clients lost.

Nadler pleaded that plaintiff had no interest in the matter, since the moneys forwarded were not his, but that of other persons; that he acted in good faith, and if he made any profit out of the deals, he made them in the course of regular business.

# News of Industrial Development in Canada

**British Capitalists Are Interesting Themselves in the Affairs of the Dominion—Nova Scotia Coal is Now Being Exported to Britain—Conditions in the Maritimes Are a Little Brighter—Closing of Newsprint Mills Will Not Affect Newspapers to a Very Large Degree—Wool Growers Expect Large Domestic Absorption of Their Products**

RECENT predictions are being fulfilled by the apparent increasing interest of British capital in Canadian industry. A group of English financiers, headed by Frederick Benson, a London banker, arrived in New York last week en route to British Columbia, where the development of a tract 450 square miles of timber in the Revelstoke district will be considered.

According to Mr. Benson, already ten million dollars has been spent in the development of this tract, and eight millions more is to be appropriated for the work. Mills, factories for turning the standing timber into finished wood products, many of these plants being already in operation, form part of the development, and British Columbia will absorb all of the timber.

Last week a representative from Birmingham arrived in Toronto to investigate the market for a pressure gauge, which is his line of manufacture, and to appoint Canadian agents. In his opinion British makers can compete with United States manufacturers in this line. The managing director of a London merchant banking house is also in Canada to place a Canadian agency for a British disinfectant. He desires to get in touch with Canadian manufacturers who want active representatives in London.

These are just a few instances, however, and may be the forerunners of a larger movement. With conditions settling down in Europe capitalists of Great Britain are now preparing to proceed upon a wider scale of investment in this country, and will find a helpful medium in the trade commissions which have been established here.

## Steel and Coal Trade

The turn of events in the steel and coal trade in Nova Scotia during the past week were a little more cheerful. It was reported that the Dominion Steel Corporation had received an order from the Canadian National Railways for 50,000 tons of rails, but this has not yet been confirmed. It is thought, however, that negotiations to this end are under way. At the moment the different departments at the company's plant are reaching the end of their stock of orders, so that new business would be very welcome. From New Glasgow, word is received that one of the mills at the plant of the Nova Scotia Steel and Coal Co. has started rolling, which, along with additional work at the plant, will provide employment for three or four hundred men.

As regards the coal situation, the outlook is promising. The Dominion Coal Co. has received orders from Britain for 25,000 tons, which have been filled. England is badly in need of coal for both industrial and domestic purposes, and while orders have not been excessive, more are expected, and the company has a fleet of chartered ships ready to put to sea as soon as cargoes can be put aboard them, once word is received ordering shipment.

Apart from this phase of the situation other conditions are much brighter. With navigation in full swing, coal officials are looking for considerable activity in the bunker trade. Already several large steamers have called at Louisbourg and Sydney for bunker. Many small schooners have also entered the trade, and are plying between the smaller ports along the coast.

Armstrong Whitworth of Canada, Ltd., are advertising for sale the steel works at Longueuil, Quebec. The plant is situated on the south shore of the St. Lawrence River, opposite the city of Montreal. Announcement was made in these columns recently of the closing of the works.

Robert E. Hogan, representing the Palatine Mining and Development Co. of Chicago, who has arrived in Port Arthur,

Ont., officially announced the purchase of the Atikokan Blast Furnace by his company. In connection with the development of iron ore lands held by his company in Cook County, Minnesota, it is proposed to construct a connecting link of 21 miles of the Port Arthur, Duluth and Western Railway as far as the United States boundary, thus completing a pioneer line built southwestward from Port Arthur many years ago. A Canadian corporation is to be formed to operate the blast furnace, which will have to be rebuilt. It is expected to have the furnace in operation by the fall. The coke ovens are also to be rehabilitated. The capacity of the blast furnace is to be increased from 150 tons of pig a day to 225. Ore docks are also to be built at Port Arthur, and homes are to be built for workmen.

## Paper Mills Closed

Seven large paper mills in the United States and Canada closed down last week, thereby throwing about 9,000 men out of employment. The mills affected include the St. Maurice Paper Co., Ltd., Three Rivers, Que.; Anglo-Newfoundland Paper Co., Grand Falls, Newfoundland; Abitibi Ltd., Iroquois Falls, Ont., and Spanish River Pulp and Paper Mills, Ltd., Sault Ste. Marie, Ont., Espanola, and Sturgeon Falls, Ont. The men asked for a wage increase of 15 per cent., while the manufacturers sought a reduction of 30 per cent., and the adoption of a nine-hour day.

"The men demanding higher wages from pulp and paper companies now have a very weak position," said A. L. Dawe, secretary of the Canadian Pulp and Paper Association, in discussing the closing. "It is bad enough that they should demand a continuance of their high wages, seeing that men of the steel corporation have accepted a 20 per cent. cut, and reductions in wages everywhere are in order now, to meet the public demand for lower prices.

"The companies who closed down are all newsprint manufacturers, and some make pulp too. They include the Spanish River, the Ontario, the St. Maurice Paper, the Fort Frances and the Powell River Co. I don't think that Montreal newspapers will be affected, as none of them obtain their paper from these companies. But some newspapers may feel the shutdown soon, if it lasts, as the manufacturers do not keep any stocks, since newsprint is so bulky. Where the newspapers are located at a distance from their newsprint mills, they keep stocks, this being the case in New York, where no trouble is likely to be experienced."

## Wool Growers Hopeful

Wool growers in the west are hopeful that Canadian manufacturers will take practically the whole of this season's clip, according to J. W. Renton, a member of the Calgary branch of the Canadian Wool Co-operative Growers' Association. This is considered fortunate in view of the fact that it is a fairly foregone conclusion that the Fordney tariff bill will be put into force. Wool growers in Canada had been dependent in the past on the United States market to absorb their supply. With better grading methods, however, there is every possibility that they will be able to sell their wool in the home market. Last year about 45 per cent. of the production was disposed of to Canadian manufacturers.

According to Mr. Renton, there is also a better demand for Canadian wool now in the old country and there are expectations that this trade might be greatly developed. It is estimated that the clip this year would run about what it was in 1920; that was 16,000,000 pounds for the whole of Canada. Manitoba, Saskatchewan, Alberta and British Columbia had contributed 3,000,000 pounds, Alberta's quota being 2,200,000 pounds.

ATTRACTIVE AGENCY CONTRACTS

British Empire Fire Underwriters

82-88 King Street East, Toronto

Assets Exceed \$4,000,000

The Ogilvie Flour Mills Co., Ltd., which had been closed temporarily, has resumed operations. The Western Canada Flour Mills, Ltd., of St. Boniface, Man., is operating on a 10-hour shift, after three weeks' shutdown. The Western Canada Flour Mills plant formerly operated on a 24-hour basis, employing 140 men. On the 10-hour basis the plant employs somewhat more than half that number.

The plant of the Dominion Sugar Co., at Chatham, N.B., has ceased refining raw sugar, according to a statement of an official of the company. The Kitchener plant of the company will not be operated this autumn. The contract with the farmers this year calls for such a high minimum price for beets that the company will not contract for a full acreage with the present peculiar sugar situation.

### NEW INCORPORATIONS

Capital for Week Ended May 18 is \$36,227,715, Compared with \$25,703,400 Previous Week

Authorized capital of \$36,227,715 is represented by companies whose incorporations were reported to *The Monetary Times* during the week ended May 18, compared with \$25,703,400 the previous week. A comparative summary by provinces is as follows:—

	Week ended May 11.	Week ended May 18.
Dominion . . . . .	\$12,818,000	\$29,106,000
Alberta . . . . .	1,325,000	.....
British Columbia . . . . .	2,580,000	945,000
Manitoba . . . . .	60,000	.....
Ontario . . . . .	6,966,500	5,338,715

British Columbia.—Arnold and Quigley Properties, Ltd., Vancouver, \$75,000; George Park Amusement Co., Ltd., Victoria, \$5,000; Elysium Hotel, Ltd., Vancouver, \$25,000; Seymour Logging Co., Ltd., Lund, \$50,000; Corless, Ltd., Prince

George, \$10,000; Coast Amusement Co., Ltd., North Vancouver, \$10,000; Optimist Publishing Co., Ltd., Victoria, \$10,000; Consolidated Homestake Mining and Development Co., Ltd., Vancouver, \$500,000; Campbell, Henderson, Ltd., Vancouver, \$20,000; Searson Manufacturing Co., Ltd., Vancouver, \$50,000; Oil Drillers of Canada, Ltd., Vancouver, \$25,000; Edgett Shingle Co., Ltd., Vancouver, \$50,000; Foreign Exports, Ltd., Vancouver, \$10,000; Victoria Waste Products, Ltd., Victoria, \$10,000; Holmes and Gordon, Ltd., Kelowna, \$10,000; Maple Leaf Publishing Co., Ltd., Vancouver, \$25,000; Deanshaven Development Co., Ltd., Deanshaven, \$60,000.

Ontario.—Co-operative Association of Fournier, Ltd., Fournier, \$15,000; H. and L. Specialty Manufacturing Co., Ltd., Toronto, \$40,000; Brown and Bernard, Ltd., Toronto, \$40,000; Jack Frost Ice Machine Co., Ltd., Toronto, \$1,000,000; Auto Rim Co., Ltd., Toronto, \$250,000; Canadian Construction Co., Ltd., Toronto, \$40,000; Adanac Mortgage Investments, Ltd., Toronto, \$1,000,000; Hamilton Surveys, Ltd., Hamilton, \$40,000; Titterington Co., Ltd., St. Catharines, \$100,000; Gloucester Township Telephone Co., Ltd., Carlsbad Springs, \$100,000; the Kakery, Ltd., Toronto, \$100,000; Pembroke and Mud Lake Telephone Co., Ltd., \$840; Verona and Frontenac Telephone Co., Ltd., Verona, \$7,875; Centennial Temple Association, Ltd., Windsor, \$100,000; Hamilton Professional Hockey Club, Ltd., Hamilton, \$100,000; British and Colonial Trading Co., Ltd., Toronto, \$40,000; Chilver Land and Building Co., Ltd., Walkerville, \$200,000; Ferrey Coal Co., Ltd., Hamilton, \$100,000; Tanco of Canada, Ltd., Windsor, \$40,000; Armour, Bell, Boswell and Cronyn, Ltd., Toronto, \$50,000; Modern Cinderella Shops, Ltd., Toronto, \$100,000; Keele and Moore, Ltd., Toronto, \$80,000; Traders Realty, Ltd., Hamilton, \$40,000; Fraser Hardware Co., Ltd., Galt, \$40,000; Rowntree Estates, Ltd., Toronto, \$205,000; West Lorne Turf and Athletic Club, Ltd., West Lorne, \$10,000; Inter-Terminal Transportation, Ltd., Toronto, \$500,000; British Canadian Petroleum Co., Ltd., Toronto, \$1,000,000.

Quebec.—Dominion Theatres, Ltd., Montreal, \$198,000; Club de Reforme du Comte de Hull, Inc., Hull, \$10,000; Carlton Club, Ltd., Montreal, \$10,000; Club Ouvrier, Inc., Montreal, \$20,000; Travellers' Club, Inc., Montreal, \$20,000; La Compagnie Gentin, Montreal, \$20,000; La Compagnie d'Approvisionnement d'Eau de Ste. Clothilde de Horton, Ltd., Sainte Clothilde de Horton, \$10,000; Silico, Ltd., Montreal, \$550,000.

### EXCHANGE ON INTEREST COUPONS

Another litigation resulting from a dispute over the right of payment of interest coupons according to their face value in United States currency when the creditor has option to collect in the United States was decided in the Quebec courts on May 12 in favor of the demander. Plaintiff was La Societe des Artisans Canadien Francais. As holder of debentures of the School Commissioners of the municipality of St. Charles Bas du Sault, it had the option of collecting the interest at maturity either at the Hochelaga Bank, Montreal, or at the National Park Bank, New York. Ten interest coupons, representing a value of \$300, fell due in December last, and choice was made to collect the amount at the bank in New York. The school commissioners, however, had made no provision there to meet the demands, and when a letter was written advising them that the plaintiff wished to collect in New York, the amount due was offered in Canadian currency. Plaintiff, however, claimed that \$34.50 should be added to make up the difference in the rate of exchange at that date. The present action, therefore, was directed to recover \$334.50.

In accordance with established jurisprudence, Justice de Lorimier held that, as the creditor had the right to claim the value of the interest coupons in New York, and, as defendants refused to pay the money in New York, plaintiff was justified in its demand that payment here should be to an amount equivalent to the value of the coupons in United States currency. Judgment, therefore, was given for plaintiff for \$340.50, with interest as from December 1, 1920, and the costs of the action.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to **\$11,500 for every working day** throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds in hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

**Establishment of South Saskatchewan River Water Project is Planned—Financial Arrangements Involve Debenture Issue—Edmonton Had Surplus on Current Account in 1920—Collections Showed Improvement—Winnipeg Water District Had a Credit Balance Last Year—St. John Tax Rate is Lower as a Result of Higher Assessment**

**P**LANS are under way for the establishment of the Regina-Moose Jaw water district, and in due course approval will be sought by popular vote of this South Saskatchewan River project. The most difficult part, it seems, will be the financing, but arrangements have been prepared which so far appear satisfactory. In the cities the rate to be paid by the consumer will vary according to the total annual consumption. The water will be sold in bulk to the cities, which will vary from 32 cents per thousand gallons at first to 20 cents when the system is running at full capacity. It is estimated that the average cost to consumers in Regina, including local distribution, will be 43 cents, as compared with the present rate of 37.6 cents, and in Moose Jaw 50 cents, as compared with the present 80 cents.

All costs of construction undertaken by the water district authorities will be paid from the proceeds of the sale of debentures, secured by the total assessable property of the district. Sinking fund contributions and all interest charges will be met from revenue from the sale of water. To ensure that the revenue will be sufficient to cover operation, maintenance and all fixed charges, a base rate for water at points of delivery on the main system will be fixed each year, based on the operation of the preceding year. Interest and sinking fund charges on debts incurred for the construction of branches will be met by rates additional to the base rate for water used on such branches.

Parcels of land, any part of which lie within half a mile of a pipe line affording a water supply, shall be assessed at the rate of \$10 per quarter section per year for twenty years in the country, and 1½ mills on the dollar on the rateable assessment in towns, villages and hamlets, but this assessment shall cease when the water is taken for use in connection with such parcels of land. The maximum charge for water on branch systems, including the base rate, will be \$1 per 1,000 gallons. Any excess revenue required to meet charges against such a branch system will be raised by assessment levies over the area of the branch system.

In the improbable event of the occurrence of a series of deficits in revenue, and it becomes necessary, through the action of the debenture holders, to levy an assessment on all property within the water district, the rate to be applied to property, not exceeding quarter sections, all parts of which lie beyond a distance of three miles from a pipe line containing a water supply, shall be one-half the rate to be applied to other properties within the water district. A rate, additional to the base rate of 50 cents per 1,000 gallons for a minimum quantity of 200 gallons per day shall be charged for water delivered to individual service branches to properties adjoining the main system, and this will be considered to pay all charges in connection with such branches and the supply of water therefrom, provided they do not exceed 1,000 feet in length.

**Victoria, B.C.**—The city council has fixed a tax rate of 29 mills, as compared with 26 mills in 1920.

**Sydney, N.S.**—The tax rate for 1921 will be 3½ per cent., which is one-half per cent. higher than 1920. The assessment this year amounts to \$12,229,000.

**Greater Winnipeg Water District, Man.**—A net credit of \$27,023 accrued to the district from the sale of water in 1920 after all costs of operation had been deducted. Levies for the year amounted to \$959,955. These have all been collected with the exception of \$9,561 from the town of Transcona.

**Prince Albert, Sask.**—An improved financial position is reported by the city. It reduced its bank loan from \$431,112

in 1918 to \$290,048 in 1920, cut down its arrears of taxes from \$849,154 in 1918 to \$747,185 in 1920, and collected \$253,655 out of the tax levy of \$290,615 for 1920 on its taxpayers.

**St. John, N.B.**—Tax rate for 1921 will be \$2.76 on \$100, as compared with \$2.98 in 1920. In analysis, the rate for this year includes \$0.74 for county purposes and \$2.02 for city purposes. Last year the respective allotments were \$0.63 and \$2.35. It is evident that the city has achieved a considerable curtailment in expenditures, while the county apportionment has advanced.

The total levy is \$1,657,511, an increase over last year of \$43,965. The total assessable valuation is \$55,626,350, an increase of \$4,917,050 over last year. An increase of over \$20,000 is reported in the tax on special corporations, banks and in the surptax.

**Edmonton, Alta.**—City Comptroller Mitchell has issued his annual report for 1920, giving an exhaustive review of the city's financial position. The debenture debt of the city outstanding at the close of last year, inclusive of general, special (property share) and utilities, was \$25,556,102. Deducting the sinking fund investments, inclusive of surplus earnings, the total funded debt was \$19,267,980. The net funded debt amounted to \$9,377,801.

The report shows that the surplus earnings of the sinking fund board last year amounted to \$32,937, as compared with \$54,341 the previous year. Surplus earnings to date; subject to a realization of loans on mortgages, amount to \$265,275. The schedule shows that the board has \$1,094,130 in first mortgages on real estate, and the arrears and interest on these mortgages amount to \$269,899. Total sinking fund investments amount to \$6,288,122.

Dealing with tax arrears, Mr. Mitchell shows that the total outstanding at the close of last year was \$7,824,265. Arrears on the tax rolls amounted to \$5,279,115, while the amount against lands forfeited to the city was \$2,545,150. Nearly 10,000 lots were added to Edmonton's property holdings as a result of the last tax sale. The arrears on these properties, on which the city was given the right to obtain titles, amounted to \$703,566.

"A further contribution was made to the reserve against uncollectable taxes of \$310,000—\$150,000 from the tax levy," says the comptroller. "The balance was the difference between the estimated penalty on arrears of taxes and the actual, bringing the reserve up to \$1,005,007. It has already been necessary to draw upon the reserve to the extent of \$81,267 in writing off tax arrears on certain under subdivision properties which have been cancelled under orders of the Board of Utility Commissioners, and also exemptions for soldiers' homes, leaving the reserve at \$923,810."

Collections during the year amounted to \$3,333,094, or 73.39 per cent., inclusive of discount, of the current year's levy, as against 69.4 per cent. for 1919. The combined collections of current taxes and arrears amounted to \$4,408,460 for 1920, compared with \$3,641,701 for the year previous. On the current revenue and expenditure account for 1920 there was a surplus of \$98,761. This, together with a surplus brought forward from 1919 of \$53,407, makes a total surplus of \$152,168 on net revenue account. The provision of \$50,000 for an incinerator has been charged to 1920 revenue account and carried forward as a reserve for the purpose when required.

Reporting on the utilities, the comptroller shows there was a net loss of \$89,186, as compared with a surplus of \$147,147 the previous year. The street railway deficit was \$200,191, as against \$59,674 for the previous year.

**"FOREIGN INVESTMENT"**

Canadian investors would do well to study the oppor-  
 tunities now available in Foreign Government and  
 Municipal bonds.

Now that the Reparation question has been accepted  
 by the German Government, we anticipate further activ-  
 ity and increased prices.

The market already shows an upward move and  
 investors would do well to give immediate consideration.

# Government and Municipal Bond Market

**Victory Loan Prices React Slightly From Recent Strength—Option on Large Block of Edmonton Bonds Taken by Wood, Gundy and Company—Lethbridge Northern Irrigation Issue is Now Offered—Newfoundland Government Makes Loan in New York**

**M**ANY Ontario municipalities disposed of bond issues during the past week, paying from 6.27 per cent., as in the case of Peterboro, to 6.72 per cent. in the case of York Township. The high rate paid by the latter is explained partly by the fact that the municipality has been a pretty heavy borrower lately, and that ten-year bonds are not as attractive as twenty or thirty-year securities. The township paid 6.32 per cent. for its loan in March, the maturity being for twenty years.

It is hard to define the exact trend of the market by municipals, owing to the variety of the issues, but it seemed as though there has been a weakening. There are many large issues pending which will also tend to further weaken the market. Manitoba and the Lethbridge issues may possibly go to the United States, but British Columbia and Toronto bonds are payable in Canada only. Victory loan prices have reacted slightly from their recent strength, as illustrated by the following figures:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close May 11.	Close May 18.
1922	98	98½	98½	98.50	98.50
1927	97	98	97½	98.00	98.00
1937	98	99½	99½	99.30	99.00
1923	98	98½	98	98.10	98.10
1933	96½	98	98½	97.30	97.35
1924	97	96½	96½	96.75	97.60
1934	93	95¼	95½	95.00	94.95

Final arrangements in connection with the debenture issue of the Lethbridge Northern Irrigation District have now been completed. The interest rate has been reduced from 7 to 6 per cent., and it has been decided to place only \$2,400,000 of the securities on the market at the present time. By splitting the issue it is expected that a better price will be received. The bonds are payable both in Canada and the United States, and a fully detailed prospectus, together with a call for tenders, has been sent to all leading bond dealers in this country and across the border. Bids will be opened by the provincial treasurer in Edmonton on May 26 next.

For the second time in two years, the government of Newfoundland has come into the American market for funds. This week \$4,500,000 6½ per cent. 15-year bonds of the colony were offered and sold in New York by a syndicate comprising Dillon, Read and Co., Lee, Higginson and Co., and the Dominion Securities Corporation, at a price of 93½, to yield over 7.20 per cent. The proceeds of the loan are to be for railway improvements and extensions, for other public works and for naval and military expenses.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Manitoba	\$2,000,000	6	Optional	May 23
Pembroke, Ont.	80,324	6	Various	May 25
British Columbia	3,000,000	6	Optional	May 25
Moosomin, Sask.	6,600	7	10-instal.	May 26
Lethbridge Northern Irriga. Dist., Alta.	2,400,000	6	30-years	May 26
Renfrew, Ont.	42,404	Var.	Various	May 31
Toronto, Ont.	5,000,000	6	Serials	June 1
Alameda, Sask.	6,500	8	10-instal.	June 1
Saskatoon, Sask.	204,000	5 & 6	Various	June 6
Westbourne R.M., Man.	60,000	6	30-instal.	June 7
Vermilion, Alta.	10,000	7	20-instal.	June 11

**Saskatoon, Sask.**—The city has extended the date for which tenders were to be received on \$204,000 5 and 6 per cent., debentures of various maturities, from May 23 to June 6, 1921.

**Moosomin S.D., Sask.**—Tenders will be received until May 26, 1921, for the purchase of \$6,600 7 per cent. 10-instalment debentures, dated August 1, 1921. G. S. Page, secretary-treasurer, Moosomin.

**Alameda, Sask.**—Tenders will be received until June 1, 1921, for the purchase of \$6,500 8 per cent. 10-instalment debentures, the proceeds of which will be used for building a rink. T. H. Truscott, town clerk.

**British Columbia.**—Tenders will be received up till May 25, 1921, for \$3,000,000 6 per cent. bonds, payable in Canada only. Bidders are asked to submit offers for securities maturing in 15 or 20 years.

**Manitoba.**—The province is calling for tenders until May 23, 1921, for the purchase of \$2,000,000 6 per cent. bonds. Alternative bids are asked on 10-year securities, payable in the United States, and 20-year securities payable in Canada only.

**Renfrew, Ont.**—The town is calling for tenders until May 31, 1921, for the purchase of the following debentures: \$34,640 6½ per cent. 20-instalment; \$2,000 5 per cent. 22-instalment; \$5,764 5 per cent. 30-instalment.

**Pembroke, Ont.**—A slight change in the amounts of bonds offered by the town has been made. The advertisement on another page of this issue gives the correct details. The total is still the same—namely, \$80,324.50.

## Debenture Notes

**Brant County, Ont.**—The county council has decided to place \$65,000 road debentures on the local market.

**Chatham, N.B.**—Ratepayers have voted against a by-law which authorized the issue of \$100,000 bonds for building permanent roads, with a view of providing employment for those out of work.

**Brantford, Ont.**—City Treasurer Bunnell advises *The Monetary Times* that the city will not be doing any financing until after the 1st of July, and in view of the success which has attended the efforts of the municipality in the local market, another domestic loan may be floated, so that the amount of funds required from outside may not be very large.

**Saskatchewan.**—The following is a list of authorizations granted by the Local Government Board from April 30 to May 7, 1921:—

Schools, 8 per cent. 10-years annuity—Rosebrae, \$4,000; Florentine, \$4,000; Tailman, \$1,160; Trafalgar, \$3,500; Halich, \$2,000; Crooked Valley, \$2,000; Dartmore, \$3,000; Lily Vale, \$1,600; Summerside, \$5,000; Loverna, \$7,000. 8 per cent. 15-years annuity—Kuroki, \$12,200; Elstow, \$14,900; Eastman, \$4,000; Flett's Springs, \$5,700; Hague, \$12,000; Boyer, \$5,000. 8 per cent. 20-years annuity—Danzig, \$5,500; Regina Beach, \$13,500. Willow Springs, \$1,800 8 per cent. 10-instalment.

Rural Municipality of Cut Knife, \$3,000 8 per cent. 10-years annuity, for Red Cross outpost.

City of Regina 6 per cent. sinking fund debentures.—\$14,000 30-years, for sewer-house connections; \$33,448 30-years, for waterhouse connections; \$16,271 20-years, for water-meters.

**Montreal East, Que.**—The Metropolitan Commission has authorized the municipality to borrow \$100,000 to pay a floating debt.

## Bond Sales

Prescott and Russell Counties, Ont.—R. C. Matthews and Co. have bought privately \$200,000 6 per cent. 20-instalment debentures.

Etobicoke Township, Ont.—MacKay and MacKay have purchased \$45,000 6 per cent. 30-instalment debentures at a price of 96.18, which is on about a 6.35 per cent. basis.

St. Thomas, Ont.—The city has disposed of about \$150,000 of 6 per cent. short-term bonds to local investors since the beginning of this month, according to City Treasurer Perry.

Moncton, N.B.—An issue of \$130,000 6 per cent. bonds, dated May 1, 1921, and due May 1, 1941, has been disposed of, and the securities are now being retailed by eastern brokers at par, in denominations of \$500 and \$1,000.

Whittemouth R.M., Man.—The Bond and Debenture Corp. has purchased \$25,000 6 per cent. 30-instalment bridge and culvert work debentures at 88 and accrued interest, which means that the municipality pays about 7.24 per cent. for its money.

Brandon, Man.—The city has sold \$50,000 6 per cent. school bonds to J. A. Thompson and Co. The money will cost Brandon a little more than 6½ per cent. The present debentures are a portion of an issue which was arranged a year ago. At that time it was proposed to sell \$150,000 worth of securities and \$100,000 worth were actually sold to J. A. Thompson and Co. As the schools did not need the additional \$50,000, the bonds were held by Brandon for one year. These securities will be offered to the public by J. A. Thompson and Co. to yield the investor 6.40 per cent. The bonds mature in 1950.

Saskatchewan.—The following is a list of debentures reported sold from April 30 to May 7, 1920:—

Schools.—Craik, \$33,500 7½ per cent. 20-year; to Regina Sinking Fund. Ceylon, \$1,500 8 per cent. 10-year; to H. McIlraith, Gunnell, Iowa. Allindale, \$1,000 7½ per cent. 20-year; to H. Glover, Regina. Allindale, \$1,700 7½ per cent. 20-year; to local purchaser.

Star City R.T., \$2,000 8 per cent. 15-annuity, to C. C. Cross and Co.

Sarnia, Ont.—The Dominion Securities Corporation have purchased \$189,434 debentures, including \$65,180 6 per cent. securities maturing 1921-30, for pavements; \$86,147 6½ per cent. securities, maturing 1921-30, for pavements; \$38,107 6½ per cent. securities, maturing 1922-26, for sewers and sidewalks, at a price of 97.461. Tenders were as follows:—

Dominion Securities Corp. ....	97.461
R. C. Matthews & Co. ....	97.34
Wood, Gundy & Co. ....	96.62
C. H. Burgess & Co. ....	96.507

Renfrew County, Ont.—R. C. Matthews and Co. have bought \$250,000 6 per cent. 20-instalment highway improvement debentures at a price of 96.81, which is on about a 6.40 per cent. basis. The following tenders were received:—

R. C. Matthews & Co. ....	96.81
United Financial Corp., Ltd. ....	96.715
A. E. Ames & Co. ....	96.56
Wood, Gundy & Co. ....	95.84
National City Co., Ltd. ....	95.81
C. H. Burgess & Co. ....	95.54
Dominion Securities Corp. ....	95.254

York Township, Ont.—A. E. Ames and Co. have purchased \$210,652 6 per cent. 10-instalment local improvement debentures at a price of 96.69, which is on about a 6.72 per cent. basis. The following tenders were received:—

A. E. Ames & Co. ....	96.69
United Financial Corp., Ltd. ....	96.58
Dominion Securities Corp. ....	96.293
Wood, Gundy & Co. ....	96.18
R. C. Matthews & Co. ....	96.07
C. H. Burgess & Co. ....	95.71
A. Jarvis & Co. ....	95.21

Peterboro, Ont.—The city has awarded \$100,000 6¼ per cent. and \$130,000 6½ per cent. 20-year bridge debentures to Wood, Gundy and Co., at an average price of 101.33, which means that the money costs the municipality about 6.27 per cent. Sixteen tenders were received as follows:—

Wood, Gundy & Co. ....	101.33
C. H. Burgess & Co. ....	101.22
Harris, Forbes & Co., Inc. ....	101.079
National City Co., Ltd. ....	100.97
McLeod, Young, Weir & Co. ....	100.83
Dyment, Anderson & Co. ....	100.41
R. C. Matthews & Co. ....	100.28
United Financial Corp., Ltd. ....	100.13
Brent, Noxon & Co. ....	100.08
Housser, Wood & Co. ....	100.02
A. E. Ames & Co. ....	99.94

## OPTION TAKEN ON EDMONTON BONDS

Negotiations were concluded last week by Wood, Gundy and Co. with the city of Edmonton, Alta., for the sale of \$2,600,000 7 per cent. 20-year bonds. Included in the issue are the following amounts:—\$221,618 for capital expenditures which have already been incurred and charged to suspense account; \$831,638 for capital expenditures deemed necessary to be incurred in 1921; \$1,404,596 for repayment of the loan advanced by the Imperial Bank to enable the city to redeem the notes falling due last January, owing to the failure of Morris Brothers. The additional amount in the issue is an allowance for discount.

The offer of Wood, Gundy and Co. was for a sixty-day option on the entire amount, the price being 92.50 or better, and accrued interest payments in Edmonton funds for bonds having principal and interest payable in Canada only. Provided \$1,500,000 of the securities have been sold in the period of the option, the authority to sell is to be extended for another sixty days. One main condition of the sale is that the city will sell no further bonds nor incur further capital expenditures this year. It is also provided that no further capital expenditures, excepting those which will be absolutely unavoidable, will be made during the next two years. In addition all tax arrears on lands in possession of the city are to be transferred to the sinking fund board, and all receipts therefrom paid to the sinking fund board until all notes outstanding against tax arrears have been fully provided for. These terms were accepted by the city after a good deal of discussion, and at the price of 92.50 the cost will be 7¼ per cent., although eventually a slightly better rate may be secured.

Edmonton has been conspicuous lately as a result of that unfortunate Morris Bros.' event, but that should not have any particular bearing on the present issue. The city's record in the past has not been as good as it might have been, and the commissioners admit that there have been some poor methods of financing. There has been an improvement recently, however. For the first quarter of this year utilities showed a surplus of \$84,240, while estimated expenditures for 1921 are much below those for the previous year. Assessment has been reduced 60 per cent., since 1914, and at \$79,119,000 is now considered to be upon a fair valuation. It is also a notable fact, as pointed out in these columns recently, that the city has been able to reduce its tax rate from 45 mills to 39.90 mills. The sinking fund, which is an important consideration, is favorably situated, there now being a surplus, after marking down investments, of \$100,000. With conservative management Edmonton's position, both financially and otherwise, should show good improvement in the future.

CORPORATION SECURITIES MARKET

Stock Prices Firmer on Canadian Exchanges—Bell Telephone Arranging New Financing—Preferred Shares of Anglo-American Motors Being Offered

WHILE firmer prices this week suggested that constructive forces were at work in the Canadian stock markets, it is not safe to assume that the upturn has commenced, for the industrial world is still without a safe and solid foundation, and general financial and business conditions are surrounded by a degree of uncertainty. Until these are adjusted there can be no assurance of permanency in advances of security prices, although some stocks will no doubt sell higher in the meantime upon merits of their own. But there is danger in trading in securities which are out of line with the general trend, for unless the underlying fabric of the whole market is sound, an upward movement by any individual stock will be insecure.

There is one factor which is preventing any progress in industry and that is the labor trouble. When this has been disposed of manufacturers will have established a proper working basis, and trade will be able to proceed more smoothly and equitably. The stock markets are waiting for this, for strikes and such disturbances eat into profits. Some encouragement is forthcoming in this regard, however, by the announcement by the United States railway labor board that there must be a general reduction of railroad wages. The effect of this upon the New York stocks was but slight, because the exact scope of the revision will not be made known until June 1, but it is apparent that such action will be a great relief to railways and will also go a long way to influence labor difficulties in other industries. The new schedule will have a direct interest for Canadian railwaymen, in view of the fact that their wages were raised last year in conformity with the United States schedule.

Interest in the Canadian stock markets centered principally around National Breweries while Brazilian gave a good demonstration of strength. It was thought that the success of the Brazil loan in the United States contributed to the new movement in the traction issue, although it is not likely that Brazilian exchange will be improved thereby, for the money is to be spent in the United States. Whatever influence there would be in this regard would be largely psychological.

Trading for the week resulted in a turnover on the Montreal exchange of 76,902 shares of listed stock, as compared with 76,164 in the previous week, while in Toronto the figure was 12,558, compared with 13,963. Bonds changed hands to the extent of \$1,401,920 in Montreal, as against \$1,520,500, while the turnover in Toronto was \$1,170,100, compared with \$1,328,850 previously.

Bell Telephone Stock Issue

The Bell Telephone Co. of Canada has decided upon a new issue of their stock amounting to \$5,725,000. This new stock, which will raise the capital stock of the company from the present \$22,900,000 to \$28,625,000, will be offered to

shareholders of the company of record at the close of business on May 31, for subscription at par, \$100, in proportion of one new share for every four old shares held.

Stockholders purchasing the new stock must file their subscriptions at the office of the Royal Trust Co., Montreal, before the close of business June 15 next, except shareholders residing abroad whose application must be in by June 30. Subscriptions will only be accepted for full shares. Holdings that are not multiples of four shares can be adjusted by purchase or sale of rights, but the company will neither buy, sell or adjust rights.

Payment at the rate of \$100 for each share may be made in full on June 30, certificates to be issued therefore as of July 1 when the next stock will rank for dividend, or may be made in the following instalments: \$50 per share June 30; \$25 September 30; and \$25 December 30. The first two payments will carry interest at the rate of 8 per cent. per annum from their date up to and payable on December 31, 1921. Certificates for stock purchased on instalment payments will be issued January 2, 1922, or as soon thereafter as possible.

This announcement seemed to adversely affect telephone stock traded on the exchanges. That the offer to shareholders was not considered much of a bargain was evident from the fact that the demand for rights was not very active and sales were made as low as fifteen cents.

New Offerings

Versailles, Vidricaire, Boulass, Ltd., of Montreal, have purchased \$600,000 serial first mortgage 7 per cent. bonds of Lamontagne, Ltd. The bonds run from 1923 to 1933 and are redeemable 5 per cent. each year and the balance at maturity. Lamontagne, Ltd., are manufacturers of leather goods and harness, and have a large plant in Montreal. The offering will be placed on the Canadian markets.

Manning Brothers and Co., Ltd., Toronto, are offering \$4,500,000 8 per cent. cumulative preferred stock of the Anglo-American Motors, Ltd., at par (\$100), with a bonus of 40 per cent. of common stock. The Anglo-American Motors, Ltd., has a capital of \$10,000,000, of which \$5,000,000 is common stock and \$5,000,000 preferred stock. There is no bonded indebtedness. The company has been formed to manufacture a Canadian car, the "La Marne," which is to sell at \$3,000, for the seven-passenger limousine model, and \$975 for the four-passenger junior model. Plans are being prepared for plant and equipment, and the present financing is for the purpose of providing land, factory and equipment, and to provide sufficient working capital for the production of the car. The board of directors of the company is as follows: President, Col. C. R. Hill, president of Hill and Co., Toronto; W. H. Hamblin, Winnipeg; E. M. Gallant, Toronto; F. J. Neale, Toronto; George P. Smith, Toronto; F. Richard, Paris, France; secretary-treasurer, A. A. Bolte, Toronto.

Authorization has been granted to the Security Lumber Co., Ltd., to increase its capital from \$750,000 to \$1,200,000 by the issue of 4,500 new shares. The company operates under a Dominion charter.

ACTUARIAL SOCIETY OF AMERICA MEETING

MONTRÉAL STOCK EXCHANGE MEETING

Some Unpopularity Among Agents and Some Misstatements in Applications are Features of Non-Medical Insurance in Canada, Says D. E. Kilgour

At the annual meeting of the Montréal Stock Exchange, held on May 13, the former governing committee was re-elected, as follows: President, C. Simpson Gærland; vice-president, H. Austin Ekers; secretary-treasurer, B. H. Porteous; C. H. Branchaud, G. W. S. Henderson, W. R. MacDougall, Purvis McDougall, J. Herbert Redpath, Hope Scott; secretary, John M. Miller.

TWO Canadians, D. E. Kilgour, actuary of the North American Life, Toronto, and J. D. Buchanan, actuary of the London Life, London, Ont., gave addresses at the semi-annual meeting of the Actuarial Society of America held in Richmond, Va., May 19 and 20. Mr. Kilgour spoke on "Life Insurance Without Medical Examination," reviewing the place of medical examinations in life insurance, and outlining the experiment now being made by several companies in Canada. The decision was hastened, he said, by the agitation among a number of the medical associations for increased medical fees. The companies are operating on practically the same basis. Proceeding, Mr. Kilgour said:—

NEW MONTRÉAL BOND FIRM

Lieutenant-Colonel J. H. Rorke and Arthur Webb make the announcement that they have opened an office at 136 St. James St., Montréal, for the conduct of their business of investments. Both are well and favorably known in financial circles in this city. Col. Rorke is a newspaperman, with a wide experience in connection with Canadian publications, and has been for about a year connected with the sales department of Hew R. Wood Co., Ltd., bond dealers.

"A fairly complete family and personal history is called for, in fact practically all those questions, included in the ordinary medical reports, which do not demand a clinical observation or professional opinion. Insurances are issued on the same terms for amounts of \$1,000 and under to both men and women. In each case a mercantile report is called for and a scheme is now on foot to establish a central bureau for the purposes of informing the contributing companies the names of applicants applying for additional 'Non-medical' insurance. By this means much of the personal adverse selection is hoped to be avoided. I regret that sufficient time has not elapsed to furnish the society with some information as to the success of the operation of these companies. While the executive officers generally regard the business as satisfactory, one medical officer volunteered the information that there appeared to be an alarming number of misstatements in the 'Non-medical' applications. I had occasion to look over a few days' business of one company and as far as superficial observations went, the class of the business, with one or two exceptions, seemed to be normal.

LLOYDS BANK, LIMITED

Nineteen-twenty was a year of expansion for Lloyds' Bank, Limited, of London, England. Net profits amounted to £3,237,741, as compared with £2,876,302 in 1919. Dividends at the rate of 16½ per cent. were paid, as compared with 18½ per cent. in 1919. In this regard, however, it must be mentioned that larger appropriations were made for bank premises account and for special contingency for writing down the bank's investments. Furthermore, the paid-up capital was increased from £9,420,544 to £14,137,796. The balance carried forward amounted to £543,864, as compared with £505,420.

The following comparisons taken from the balance sheet show the changes which have taken place:—

	1920.	1919.
Cash in hand and with Bank of England .....	£ 51,153,076	£ 57,587,215
Cash at call and short notice...	14,747,688	14,621,755
Bills of exchange .....	76,037,123	57,491,863
British government securities..	64,041,038	66,232,570
Advances including stock exchange loans .....	151,079,173	135,763,591
Current, deposit and other accounts .....	345,028,984	324,711,755
Reserve fund .....	10,000,000	9,675,105

"I have taken occasion to enquire through a number of agents and others in touch with the business, and from my knowledge of the situation I do not believe that there has been any insistent or general demand from the agents throughout the country for their companies to conduct the 'Non-medical' business. Some have expressed the fear that it would result in the reduction of the average amount of an application. In fact many agents make a point of endeavoring to raise the amount of the applications at the time of the medical examination and claim considerable success in doing so. I have been told by an official of an underwriters' association that the agents representing the 'Non-medical' companies are by no means a unit in approving of the system and that they are not finding it working out as satisfactorily as they had expected. However, on this point I would hesitate to express any opinion. The representatives of these companies will be able to furnish authentic information and possibly will have some facts to give us at this meeting."

Further evidence of the expansion of the institution is seen in the fact that nineteen new branches were opened in England last year, as well as a large number of sub-branches.

Lloyds Bank, Limited, is an institution with world-wide connections. In Canada it is represented through the Imperial, Commerce, Montréal, Provinciale, and Royal banks and the Dominion Express Company. Since 1865 fifty private and other banking houses have been absorbed into the Lloyds organization.

Industrial Insurance

Mr. Buchanan gave a thorough account of how Industrial Insurance was started and how it operates at present. Regarding the actuarial basis in Canada, he said:—

"In Canada the companies are allowed to employ in valuation any of the standard tables of mortality used in the construction of their tables, with interest at a rate not exceeding 3½ per cent. The Dominion Act provides that Whole Life Industrial Policies and Endowment Industrial policies maturing at age 80 or any higher age shall be valued upon the following basis, namely: Policies issued in any calendar year shall be valued at the end of such calendar year as if then just issued, and at the end of the succeeding calendar years as if in force one, two, three, or more entire years, as the case may be. In the case of policies on other plans, a deduction from the full level net premium reserve is allowed during the first four years on a basis similar to that for Ordinary insurance."

TOWN OF PEMBROKE, ONT.

DEBENTURES FOR SALE

Sealed tenders will be received by the undersigned up to 3 p.m., Wednesday, May 25th, 1921, for the following debentures:—

- \$31,369.90 of Local Improvement 10-year 6%.
- \$11,606.31 for Waterworks purposes 20-year 6%.
- \$37,348.29 for Waterworks purposes 30-year 6%.

All to be repayable in equal annual instalments of principal and interest.

Highest or any tender not necessarily accepted.

S. L. BIGGS,

Pembroke, Ont.

Clerk-Treasurer. 558

## CORPORATION FINANCE

Price Brothers' Report Shows High Earnings for Four Months—Mattagami Made Satisfactory Showing—Granby Consolidated had Deficit—Surplus Has been Reduced to Low Figure

**Grand Trunk Railway.**—Revenue returns for the month of March, as reported by the head office in London, show an increase in net of £68,400 over the same month of 1920, and an increase of £42,800 over the previous month. For the first three months of the year, the increase in net was £306,500, there having been a deficit for that period last year of £205,100. The statement for March and for the first three months shows the following result:—

	1921.	Increase.
For March.		
Gross receipts .....	£1,278,700	£ 95,900
Expenses .....	1,155,800	27,500
Net .....	£ 122,900	£ 68,400
For Three Months.		
Gross receipts .....	£3,772,200	£593,200
Expenses .....	3,680,800	286,700
Net .....	£ 91,400	£306,500

**Granby Consolidated Mining and Smelting Co.**—The report of the company for 1920 shows a deficit of \$687,011, as compared with \$984,409 for the year ended June 30, 1919. Gross receipts were \$6,684,123, and operating costs \$6,323,813, which compare with \$6,561,099 and \$6,660,054 in 1919. But interest, taxes, etc., amounted to \$1,047,321, as against \$885,452 previously.

No dividends were paid in the period according to the report, while in 1919 \$1,312,537 was disbursed, and the deficit was carried to surplus, reducing that account from \$1,124,409 to \$497,298.

The balance sheet shows many changes, which is only natural in view of the circumstances. Principal comparisons are as follows:—

	1920.	1919.
Total assets .....	\$24,906,360	\$25,081,361
Property .....	18,312,336	18,061,627
Investments .....	671,634	579,056
Copper on hand, etc. ....	2,764,176	2,346,044
Metals in process .....	363,974	829,591
Victory bonds .....	20,884	538,138
Bonded debt .....	3,991,400	1,709,800
Bank loans .....	4,071,019	5,983,901

The report states that to meet conditions, reductions and economies have been effected in every possible direction, and through increased efficiency in operation, production costs during the last half of the year were materially reduced. Wages have been cut, and there has also been a downward trend in costs. These have not been sufficient to offset the decline in copper prices and management has been confronted with the serious alternative already adopted by other companies, the majority of which have entirely ceased production. It is hoped, however, that the natural law of supply and demand will materially improve recent conditions, and permit uninterrupted operation of properties.

**Mattagami Pulp and Paper Co.**—The first report of the company has been issued, being for the seven months ended December 31, 1920, and shows net profits resulting from the company's operations of \$1,091,779, from which must be deducted interest on bonds, debentures and bank loans amounting to \$187,423, leaving net profits, after interest charges, of \$901,355, from which has been written off to depreciation and other reserves \$369,934, leaving net earnings after interest and depreciation of \$534,421. From this surplus there was deducted losses arising from the operation of the company's plant during its construction period and for depreciation of inventories, etc., amounting to \$346,353, leaving a

balance carried forward to profit and loss account, as at December 31, 1920, of \$188,068.

Commenting upon the report, Duncan Chisholm, president, said: "Due to the necessity of carrying on construction during the year, and the handicap of high labor and material costs, your company was unable to participate fully in the extremely profitable markets prevailing during the summer months. The operations for the year, however, have resulted in a substantial profit, and by utilizing same your directors have been able to place your company in a most efficient operating position, with inventories, logging operations, etc., written into the balance sheet at most conservative figures, both as regards quantities and unit costs.

"In December, the demand for your company's product showed considerable falling off, and a dullness has prevailed during recent months in the market for all grades of pulp. This market condition, your directors believe, is only temporary, but as your directors are of the opinion that it is not advisable to store large quantities of pulp for which there is no market immediately available, the operation of the plant has been suspended until the market revives. This period of suspension has been taken advantage of to make certain repairs and adjustments, and the plant is now ready to operate at high efficiency immediately on there being a demand for pulp."

Current assets are given in the report as \$2,001,076, and current liabilities \$1,484,306. Total assets are \$9,706,247.

**Price Brothers and Co., Ltd.**—Covering a period of four months from November 1, 1920, to February 28, 1921, the report of the reorganized Price Brothers Co. is a good one, showing profits amounting to \$1,135,450, as against \$2,055,782 in the full year ended February 28, 1920. After deducting interest and sinking fund requirements of \$141,992, there remained \$993,458 in the form of net earnings available on the capital stock outstanding of \$42,683,200, or at the rate of 2.32 per cent. For a full year earnings at this rate would indicate practically 7 per cent. earned. After deduction of  $\frac{1}{2}$  of 1 per cent. dividends, or \$341,465, there remained a surplus of \$651,992 to be carried forward into the current year. When the company was reorganized last November, the old capital stock was distributed at the rate of five shares in the present company for each one share of the old held. On the old capital of \$8,534,200 earnings in the four months recently ended were at the rate of 11.6 per cent. or equivalent to 34.8 per cent. for a full year.

The balance sheet section of the report indicates a healthy financial position. The liquid position of the company, while not as good in 1920, is still strong. Total current assets are given as \$7,595,144, as compared with \$7,179,918 in 1920, the principal change being in inventory, which is up at \$4,308,255 from \$3,934,755. Current liabilities are higher at \$3,780,183, compared with \$3,088,842. Bank loans showed a decrease of about \$500,000, but bills and accounts payable increased from \$983,614 to \$2,309,275. From these figures it will be seen that the net working capital is \$3,814,961, as against \$4,091,076 in the previous showing.

The other important changes in the balance sheet are as follows:—

	1921.	1920.
Fixed assets .....	\$45,497,018	\$17,201,439
Total assets .....	53,386,709	24,675,568
Capital stock .....	42,683,200	8,534,200
Bonded debt .....	4,978,016	5,172,098
Reserves .....	1,092,936	2,871,654

In their report to shareholders, directors view the showing with satisfaction, but point out that during the period under report high prices ruled in newsprint and allied commodities and that as good results in the near future cannot be looked for. On account of the period of depression directors have decided to postpone the projected erection of a new pulp and paper mill at Saguenay until such time as the price of commodities and labor are more stable.

# THE STERLING BANK OF CANADA

## Annual Report Year Ending April 30, 1921

### GENERAL STATEMENT

#### LIABILITIES

Notes of the Bank in circulation		\$1,210,409.00
Deposits not bearing interest	\$3,613,555.79

	<b>\$23,624,144.15</b>

G. T. SOMERS, President.  
Toronto, April 30th, 1921.

A. H. WALKER,  
General Manager.

### AUDITOR'S REPORT

This statement has been duly vouched by comparing all entries with the books at the Chief Office and certified Returns from the Branches and in my opinion is properly drawn up so as to exhibit a correct view of the condition of the Bank.

Cash and Securities have been checked at the Chief Office at 30th April, 1921, as well as at another time during the year, as required by section 56 of the Bank Act.

I have obtained all the Information and explanations required, and am of the opinion that the transactions of the Bank, which have come under my notice, have been within the powers of the Bank.

J. J. ROBSON, L.L.B.,  
Auditor 569

# Proposal for Exchange of Bonds

## To the Bondholders of Toronto Paper Manufacturing Company, Limited

**T**HE HOWARD SMITH PAPER MILLS, LIMITED, has decided to extend until June 2nd, 1921, the offer of exchange made by circular letter dated March 2nd, 1921, applying to holders of 6% Bonds due 1942 of the Toronto Paper Manufacturing Company, Limited.

The Company offers to the holders of such 6% Bonds a like amount in the 7% Twenty-Year First Refunding Mortgage Bonds of Howard Smith Paper Mills, Limited.

Of the presently authorized amount of \$3,500,000 of this issue there is held in escrow \$2,070,000 for the following purposes, viz:

To retire the 6% First Mortgage Bonds due 1942 (Toronto Paper Manufacturing Company, Limited)	\$690,000
To retire the 6% First Mortgage Bonds due 1934 (Howard Smith Paper Mills, Limited)	800,000
To cover unpaid balance of price of timber limits	580,000
	<b>\$2,070,000</b>

Upon the retirement of all such Bonds, by exchange or otherwise, and upon payment of the balance due on timber limits, the presently authorized issue of Bonds will be secured by a first mortgage and charge on the entire assets of the Company.

This exchange will have the following advantages for the holders of the Underlying Securities:

1. The holder will receive an extra one per cent. on his investment.
2. The holder will receive in place of a Bond which is now secured by the properties of one Company only, a Bond which is secured by the properties of both Companies.
3. The entire consolidated net earnings of the Howard Smith Paper Mills, Limited, will be available for interest charges and Sinking Fund as against the earnings of only one Company, and the principal and interest on the new Bonds will be payable both in Montreal and New York.

Since the issue of these Underlying Securities the activities of the Company have so broadened that it must now have available for its purposes financial machinery which can be adapted to the changed conditions in the financial markets and to new conditions as they arise. The expansion of the business of the Company calls for a consolidation of its properties, to which end it is necessary that the portion of the property located at Cornwall and vested in the Toronto Paper Mfg. Co., Limited, should be acquired by the parent Company which already owned the entire Capital Stock of the Toronto Company.

The Directors of the Company feel that with the plan as herein outlined carried out, the Company will be in a much stronger position and capable of competing advantageously in the markets of the world.

You are requested to deposit your Bonds with the Montreal Trust Company, 11 Place d'Armes, Montreal, for exchange, as soon as possible.

A substantial amount of these Bonds have already been deposited with the Montreal Trust Company for exchange.

Arrangements have been made with the Montreal Trust Company to issue Interim Certificates entitling the holder to Bonds of the present issue of an amount equal to Underlying Bonds deposited for exchange, and Definitive Bonds will be delivered against the surrender of such Interim Certificates as soon as the same are ready for delivery.

HOWARD SMITH PAPER MILLS, LIMITED

## RECENT FIRES

Loss for Week Totals \$1,110,000, Compared with \$939,000  
Last Week—Old Fort Grounds, Toronto,

NEWFOUNDLAND'S TEMPORARY BORROWINGS  
HEAVY

Owes Bank of Montreal \$1,500,000 and Royal Bank \$300,000  
—Control of Codfish and Sugar Also Discussed  
in Legislature

FISH and government finance has occupied most of the attention of the session of the Newfoundland legislature, which commenced on March 30. In his opening speech the governor intimated that expenditures would have to come down, as most of the revenue was derived from *ad valorem* duties and would therefore show a reduction this year. He also referred to the marketing of codfish, the colony's staple product, which is now in the hands of the Codfish Exportation Board. Other matters which would come before the House, he said, were the exportation of pulpwood, the St. John's city charter, inland and coast transportation, and the exploration of oil areas.

The debate on the speech from the throne lasted until April 27, and was featured by an opposition resolution condemning the control of the export prices of codfish, which was defeated. The government was also criticized for not floating the loan of \$1,500,000, authorized last year, while it borrowed from the Bank of Montreal at 5 per cent. Hon. Mr. Coaker was criticized for occupying the position of minister of marine and fisheries and chairman of the advisory board, while he remained head of a large fish exporting company. The sum of \$500,000 had been appropriated to buy fish for export, and it was alleged that there had been discrimination in the purchases. The voting upon the speech from the throne showed the government to have 18 votes against the opposition's 13. Later in the session the government was also criticized for maintaining the price of sugar after the sharp decline had taken place elsewhere.

The legislation thus far introduced includes a bill to amend the Crown Lands Act, 1918, a bill respecting the Board of Pensions Commissioners, a bill respecting the High Commissioner for Newfoundland in the United Kingdom, a bill regarding the Bell Island Iron Ore Tax agreement, one about the exportation of timber for special purposes and one for the repeal of the Exportation of Salt Codfish Act.

## Temporary Loans

Regarding temporary financing, the prime minister stated that upon application to Mr. Jubien, manager of the Royal Bank in St. John's, for a loan of \$150,000, the latter had required that a council minute first be passed guaranteeing the repayment of this amount and also of the \$300,000 already owed on current account by December 31, 1921. The government's counter proposal to repay by December 31, 1922, was not acceptable to the bank.

In answer to Sir Michael Cashin as to the temporary loan after the close of last session, the prime minister replied that \$1,500,000 had been borrowed from the Bank of Montreal at 5 per cent. Of this amount \$1,250,000 was paid to the railway commission and \$250,000 placed to the surplus fund, which was borrowed from this fund and also paid to the railway commission.

On May 2 Hon. Mr. McDonnell referred to a proposal for the formation of a company with \$25,000,000 capital to develop resources on the west coast.

## Parliamentary Session To Close May 28

Legislation Has Been Colourless — Grand Trunk Negotiations Advanced—  
Business Profits Tax Comes to an End, But Sales Tax is Extended—Some  
New Financial Institutions Created—Two Bank Proposals Before Parliament

**S**CHEDULED to end May 28th, the present session of parliament, which commenced February 14, will not go on record as bringing any drastic changes. The intention of the government, it is believed, is to postpone a general election until after the 1922 session. Its position has been none too strong, and this, combined with the desire to interfere as little as possible with the return of business to normal conditions, has resulted in contentious measures being avoided. The extension of the sales tax, termination of the business profits tax, and other changes outlined by the finance minister in his budget speech, will, no doubt, go through with little change. The Grand Trunk acquisition bill carries the railway situation one step further. There is other railway legislation of considerable importance, and some new financial institutions have been created.

The Senate originated very little legislation this year. A bill to amend the Post Office Act empowers the department to establish a system providing for insurance against loss of mailable matter, and fix an insurance fee, or a scale of insurance fees, to be prepaid in respect of such mailable matter. Letters mailed without postage are in future to be forwarded and double the postage is to be collected, as is done now where the postage is short of the required amount.

The Lake of the Woods Control Board Act authorizes the creation of a board jointly by Ontario and the Dominion, to "secure at all times the most dependable flow and the most advantageous and beneficial use" of the waters of the Winnipeg River and of the English River, along the lines of the report of the International Joint Commission of June, 1917.

### Senate Bills

Private bills which originated in the Senate include the following:—

A bill respecting the Dominion Express Co., authorizing it to convey goods outside as well as within the Dominion of Canada, and empowering it to increase its capital from \$2,000,000 to \$5,000,000.

A bill declaring the works of the Maritime Coal, Railway and Power Co., Ltd., which was incorporated by special act of the Nova Scotia legislature in 1903, to be for the general advantage of Canada.

A bill to incorporate the Commonwealth Bank of Canada, with capital of \$10,000,000, head office in Toronto, and the following provisional directors: Charles Grant Anderson, lumber merchant, Toronto; Joseph C. Lamothe, attorney, Montreal; John Jacob Arnold, banker, Boston; William Long Baker, banker, Toronto; William Heslop Gibson, fruit grower, Newcastle, Ont.

A bill extending the time for the Great West Bank to commence business, to July 1, 1922.

A suggestion of Canada's new status in international affairs is found in the bill constituting this country's membership in the League of Nations, and authorizing the gov-

ernment to pass such orders in council as are necessary to put the arrangement into effect. Another bill puts into effect the trade agreement made with France in January. This agreement extends to French goods the most favorable rates of Canadian duty apart from those on goods from other parts of the empire, and France on the other hand continues, with certain exceptions, the rates on Canadian goods provided by the conventions of 1907 and 1909. This arrangement, which may be denounced by either party on four months' notice, is in anticipation of a new commercial convention with France.

The Appropriation Act, 1921, grants to the government the sum of \$69,937,203 for carrying on, meeting its expenses for the fiscal year 1921-22. Other measures directly affecting the public finances are acts to amend the Royal Canadian Mounted Police Act and the Judges Act, respectively; the former appropriates to the benefit of members of the force all fines and forfeitures made by them, while the latter provides for an additional judge of the Saskatchewan Court of King's Bench. There is also a minor amendment to the Inland Revenue Act.

Full regulations for the securing of patents and schedules of fees are contained in a new Patent Act. Amendments are also made to the Dominion Winding-up Act, providing that a liquidator shall prepare a statement of assets and liabilities within 60 days after his appointment, and shall mail to the Dominion Statistician a copy of such statement along with copies of the petition, winding up order, and dividend sheets. Amendments to the Bankruptcy Act provide that an interim receiver may dispose of perishable goods, etc., and specifies new conditions under which a bankrupt may voluntarily assign.

By an amendment to the Senate and House of Commons Act, ministers of the Crown are not to be or act as directors of incorporated companies, excepting those for religious, charitable or educational purposes, and if he does he will cease to be eligible as a member of the Senate or House of Commons.

After several years of discussion, a National Research Institute is now to be established. In 1917 a Research Council was established, and this council has now been constituted a body corporate, with power to hold lands, etc., and capable of suing and being sued. The institute itself is to be located in or near Ottawa, and has power to undertake researches for the development of Canada's natural resources, to determine standards of measurement, etc.

Although the work of the Canadian Wheat Board is to be discontinued, its powers are continued "so far as it may be necessary and convenient for winding up and concluding the unsettled business of the Wheat Board, or any business resulting therefrom."

### New Financial Institutions

Incorporation of several financial institutions by special act is included in the legislation of the session, the principal being as follows:—

The North American Trust Co., with capital of \$1,000,000, which may be increased to \$3,000,000, head office in Toronto, and the following provisional directors: G. H. Wood, financier; J. H. Gundy, financier; E. G. MacMillan, barrister; and G. S. O'Brien, barrister, all of Toronto.

The Excess Insurance Co., with capital of \$500,000, which may be increased to \$1,000,000, divided into shares of \$25 each, but exchangeable for shares of \$100 each, with the following provisional directors: R. F. Massie and N. W. Renwick, insurance managers; Mortimer Kelley, barrister; and Frank Young, accountant, all of Toronto.

The Fidelity Insurance Co. of Canada, with capital of \$1,000,000, head office in Toronto, and the following provisional directors: H. A. Clark and L. B. Campbell, barristers; A. J. E. Kirkpatrick and S. W. Band, insurance managers; and Frederick Lane, accountant, all of Toronto.

The Canadian Transit Co., with capital of \$5,000,000, head office in Windsor, with power to construct a bridge across the Detroit River, and the following provisional directors: W. J. Pulling, lumberman, Windsor; W. R. Campbell, manufacturer, Windsor, E. L. Winter, Windsor, C. S. King, Walkerville, and C. E. Fowler, consulting engineer, New York.

The Quebec Union Electric Telephone Co., with capital of \$1,000,000, and head office in Beauceville, Que., and the following provisional directors: C. Jolicœur, contractor; A. Doyon, secretary-treasurer; A. Martel, electrician, all of Beauceville; A. Huot, trader, and Henry Morin, clerk, both of St. Nicholas.

There is also an amendment to the charter of the Dominion Life Assurance Co., repealing the section regarding separate accounts and distribution of profits.

Another bill is to extend the time for the payment of debentures (series K. and L.) issued by the Montreal Harbor Commissioners.

The act of incorporation of Gilmour and Hughson, Ltd., is changed to allow the directors, upon the unanimous approval of the shareholders, to make distribution of its assets among the shareholders, provided that the rights of the creditors are not impaired.

#### Railway Legislation

Among the railway legislation, mention should first of all be made of the "Act respecting the Canadian Pacific Railway," authorizing it, upon vote of two-thirds of the shareholders, to issue bonds, debentures or other securities collateral to any consolidated debenture stock issue, and, upon redemption of same, to sell such debenture stock.

A. J. Gillis, of Dawson, R. B. Young, W. A. H. McBrien and N. J. Robinson, of Toronto, are the incorporators of the "Meyo Valley Railway, Ltd.," with capital of \$750,000 and head office in Dawson, with power to build a railway in the Mayo River Valley, and operate vessels, wharves, etc., in conjunction therewith.

The Manitoba and North Western Railway is authorized to build lines from Tuffnell to Prince Albert and from Theodore to Lanigan, and to issue securities not exceeding \$40,000 per mile of new road. An extension of two years is granted to the Essex Terminal Railway Co., for the commencement of its road from Ojibway to Pelton. The Quebec Central Railway Co., now leased to the Canadian Pacific, is allowed five years more for the completion of its road from Scotts to the St. Lawrence River at Quebec, the securities issued for this purpose not to exceed \$40,000 per mile. Similar extensions are granted to the Ottawa, Northern and Western Railway Co. for its line from Waltham to Chalk River, to the Western Dominion Railway Co. for a line from the international boundary to Calgary, with a branch from Pincher Creek to the British Columbia boundary, and to the Montreal, Ottawa and Georgian Bay Canal Co. for the construction and completion of its canals. The St. John and Quebec Railway Co. is allowed until 1923 for the completion of its line from Centreville to Andover.

#### NEW BOND BRANCH IN VICTORIA

Announcement is made of the opening of offices in Victoria, B.C., by the firm of Grant, Whyte and Co., Ltd., stock and bond brokers, of Vancouver, B.C. The firm operate direct wires to all principal exchanges in the east, and the same facilities will be extended to the Victoria office. The continued growth of their business in Vancouver has necessitated enlarging their offices there and they have now decided to extend their operations to this city. They are one of the largest of the bond houses in Vancouver, and specialize in high-class securities. The Victoria offices will be located on the ground floor of the Winch Building, on Fort St., and will take in part of the offices now occupied by R. V. Winch and Co., together with some of the adjoining offices.

#### TOTAL DISABILITY BENEFIT TO WOMEN

Last month the Sun Life of Canada, in making certain changes as regards its treatment of women applicants, introduced an innovation in allowing the total disability benefit to be accorded to female lives at same rates as to men. The company will now issue, in amounts not exceeding \$5,000, policies containing the total disability benefit to unmarried, self-supporting women whose applications show them to be first-class in every respect (excepting in all cases term plans and whole life non-participating policies, which are not issued to women). The premiums for this disability benefit are the same as are charged to male lives.

The general regulations governing the issue of life insurance policies to women by the company are, briefly, as follows:—

1. Single, self-supporting women.—With the exception of the term plans and the whole life non-participating plan, any plan of policy will be issued without extra premium. Applicant must be self-supporting by means of wages received at regular employment or by income from investments held in her own name.

2. Single women, not self-supporting.—In general the company will restrict these applicants to the 25-year endowment plan with profits, or to policies with higher premium. No extra premium required.

3. Married women.—Will only be accepted without extra premium on the 10, 15 and 20-year endowment plans with profits. Policies may be issued with an extra premium of \$5 per \$1,000 on participating plans with premiums less than the corresponding 20 pay life or with an extra premium of \$2.50 per \$1,000 where premiums are equal to or greater than 20 pay life but not less than the 20 year endowment. These extra premiums will cease at age 50, and may be replaced in either case by a lien of \$20 per \$1,000 for each year by which age at entry falls short of 50 except that in the case of endowment policies maturing at or before age 55 the lien will be arranged to run off five years before maturity of policy.

Full information must be given as to amount of insurance upon the life of applicant's husband. If he carries none, the reason should be given. No policy will be issued upon a woman's life in favor of her husband; the policy must be payable to her children or to her administrators, executors or assigns.

4. Total disability benefit for women.—Company will issue, in amounts not exceeding \$5,000, policies containing the total disability benefit to unmarried, self-supporting women as defined in section 1, whose application shows them to be first class in every respect. Premiums for this benefit will be the same as those required for male lives. The object of the assurance will be most carefully considered in each case and this privilege will not be granted in any case where the risk is considered doubtful on any ground.

The foregoing regulations do not apply to French-Canadian women, for whom separate regulations have been issued.

# The International Trade Situation in Canada\*

Small Volume of Exports to United States Has Been a Feature Since Confederation—Overseas Market Has Been Best and Government Fleet is Designed to Enlarge It—Situation as Regards Imports

By JOHN A. COOPER,

Canadian Government Representative in New York.

CANADA'S international trade history is that of a long struggle against what seemed to be the logic of the situation. The Canadian pioneer struggled bravely to transform a forest-clad land into a garden. It was a supreme struggle with nature and nature's intentions. So the Canadian trader who desired to do business with foreign countries had to overlook geographical considerations and take his wares long distances overseas. If he could have had unimpeded access to the United States market and had that market been able to absorb his surpluses, his task would have been easy. But politics, tariffs and similarity of products decreed that it must be otherwise.

In the first twenty years of Confederation, 1868 to 1887, Canada exported goods to the value of \$1,460,000,000, of which \$665,000,000 went to the United States and the remainder to the rest of the world. Of her total sales, only 45 per cent. went to the large neighboring market. The remainder, or 55 per cent., had to be sent overseas. In those days the distances to foreign markets were farther than to-day, because the ships that carried the goods were smaller and slower.

In the next twenty years, 1888 to 1907, the same tendency is evident. There had been talk of "reciprocity" with the United States, but the McKinley tariff of 1890 dealt that idea a staggering blow. In 1897 the Canadian people definitely made up their mind that their political and economic safety lay in developing the markets of the British Empire rather than the markets of the United States. In the twenty-year period, 1888 to 1907, Canada's exports were divided as follows:—

United Kingdom .....	\$1,551,809,000
United States .....	1,029,600,000
Other countries .....	268,304,000
<b>Total .....</b>	<b>\$2,849,713,000</b>

In this period the sales to the United States fell to 38 per cent. and those to the rest of the world grew to 62 per cent. Canada was definitely launched on a non-continental policy. The world, not the North American continent, was to be her chief market.

During the following eleven years, 1908 to 1918, a great war occurred and the shipments of munitions to Great Britain made the tendency even more marked. The unusual circumstances make the figures interesting, but prevent the drawing of any definite conclusions. They are:—

	1908-18 (inclusive)
United Kingdom .....	\$3,283,023,000
United States .....	1,861,883,000
Other countries .....	\$18,601,000
<b>Total .....</b>	<b>\$5,963,507,000</b>

During this period, only 31 per cent. of Canadian exports went to the United States.

## Effect on Shipping

One great effect of this policy of across-the-sea trading is found in the growth of Canadian shipping and in a comparatively wide knowledge of maritime problems. In 1902, about twenty thousand vessels entered and cleared at Canadian ports. The ownership of these was divided as follows:—

\*From the Annals of the American Academy of Political and Social Science, March, 1921.

	Ships	Tons
British .....	4,363	6,865,924
Canadian .....	11,413	1,937,227
Foreign .....	14,530	14,731,488

This proportion has been well maintained, as the returns of sea-going vessels entering and clearing Canadian ports in 1919-1919 given in the following table will show:—

	Ships	Tons
British .....	6,099	14,054,166
Canadian .....	11,115	3,758,528
Foreign .....	15,132	7,448,699

Since these figures were compiled the government has undertaken to build and maintain a Canadian merchant marine which will increase the percentage which her own tonnage bears to the total tonnage entering her ports. The policy adopted is quite different from the shipping policy of the United States, though the aim is akin. The Canadian Government Mercantile Marine, an incorporated company in which the government is the sole stockholder, has been projected with a definite plan for the creation of a fleet of seventy vessels. About forty of these are already in commission. Regular services have been established with England, the West Indies, Brazil and Australasia. At present all traffic is confined to freight, although some vessels on the West Indian route are being reconditioned to admit of the carrying of a limited number of passengers. The general policy is to use these boats as auxiliary to existing privately-owned lines and to develop such new routes as seem desirable in the interests of Canada's export trade.

## Canadian Imports

Naturally Canada's purchases abroad have been affected by the across-the-sea trading policy which necessarily forced her to adopt. When vessels go abroad they must have return cargoes. Canada attempted to secure these return cargoes by giving British manufacturers a preference in respect of customs duties. This was done in 1897. Ten years later a treaty was made with France, whereby French goods were given a tariff which was "intermediate" between the preferential tariff on British goods and the general tariff which applied to other countries. Under this French tariff certain favored nations were also entitled to these "intermediate" rates. Three years later, 1910, a similar arrangement was made whereby the intermediate tariff was extended in part to Belgium, the Netherlands and Italy. In 1913 a preferential arrangement was made with the British West Indies. This was further extended in 1920.

Between 1888 and 1907 Canada imported goods to the value of \$1,744,000,000 from the United States out of a total of \$3,160,000,000, or 55 per cent. In the eleven years, 1908 to 1919, Canada's purchases from the United States were valued at \$4,898,000,000 out of a total of \$6,959,000,000, or 70 per cent.

Of Canada's total imports in 1914, the United States supplied goods to the value of \$395,565,000, as compared with a total from all countries of \$618,457,000, or 64 per cent. Similarly, in 1920 (year ending March 31), the United States sold Canada \$801,605,000 out of the total Canadian imports of \$1,064,516,000, or 80 per cent. This figure will probably never be exceeded, as Europe is rapidly regaining that portion of Canadian trade which was lost during the Great War.

(Continued on page 28B)

## MANITOBA HAS NEW CORPORATIONS TAX

Based on Net Profits—Income Tax Bill Held Over, However  
—Municipal Legislation was Voluminous—Two New  
Insurance Companies Formed

LEGISLATION for increased aid to hospitals, for agriculture and good roads, and a resolution urging that the public lands in the west be transferred to the provincial governments were the main features of the Manitoba legislative session which opened February 15 and closed May 7.

One of the outstanding acts of the legislature was its decision to abolish the office of public utility commissioner, and transfer the duties to the provincial secretary's department. Feeling in the matter was brought to a head by the judgment of the commissioner, P. A. Macdonald, raising street car fares, which was condemned as an abuse of his power. The government was given a year in which to prepare legislation giving effect to the resolution, and covering the general situation created by abolition of the office.

Another measure of first-class importance, the provincial income tax bill, was withdrawn at the request of the city after its effectiveness as a revenue-raising scheme had been whittled away in committee. So many exemptions were approved by the law amendments committee that Attorney-General T. H. Johnson, the chairman, remarked: "This is more an exemption bill than an income tax bill." The tax on automobiles was increased, and pool and billiard rooms were brought under the amusements tax. The tax on unoccupied wild land was raised, and a tax of 2 per cent. on the net profit of corporations was imposed.

Several financial institutions were also incorporated by special act of the legislature. The principal are the following:—

Security Insurance Co. of Canada, with capital of \$500,000, in shares of \$50 each, head office in Winnipeg, and the following provisional directors: William Hilton, manager; G. P. Macleod and J. S. Macpherson, students; and E. W. Marshall, stenographer.

Northwestern General Insurance, with capital of \$1,000,000, in shares of \$100 each, head office in Winnipeg, and the following provisional directors: J. F. C. Menlove, president; H. R. S. McCabe, managing director; F. O. Maber, secretary; P. M. Brand, manager; and J. O. Oldham, agency director.

Some amendments are also made in the charter of the Continental Fire Insurance Co. An act was also passed with reference to powers in respect of unpaid calls, and power to forfeit shares and dividends of the Equitable Trust Co. The Bankers Trust Co., which has a Manitoba charter, was authorized to do business in Manitoba.

Legislation affecting individual municipalities was considerable. A by-law of Ste. Rose municipality, authorizing the issue of \$61,900 of debentures, was legalized. Four by-laws of West Kildonan, for the issues of debentures for \$3,196, \$10,638, \$6,414 and \$26,248, were declared valid.

## EDMONTON'S FINANCIAL POSITION STRENGTHENED

Tax Rate Five Mills Lower than Last Year—Crop Outlook  
is Good

Staff Special, Edmonton, May 25, 1921.

THE crop outlook in Alberta, both northern and southern, is extremely bright at the present time. Splendid rains have fallen in the south country, and, as far as the north is concerned, they usually have plenty of moisture; wheat is up several inches and the weather is ideal now for rapid growth. Business in Edmonton is brisk, and the many enquiries received locally regarding the oil development show a very widespread interest. Many interests have men right on

the ground keeping strict watch on developments, but with the present government restrictions it is pretty generally felt that it will be a year, or possibly two years, before much additional development will take place outside of what has already been started.

The city of Edmonton itself seems to have taken on a new lease of life. This year's administration, with Mayor Duggan and Commissioner C. J. Yorath at the helm, have the whole-hearted support of the citizens, and the city is making good progress. The total tax rate for the current year is 39.80 mills, compared to 45 mills for 1920—a reduction of 5.20 mills. The total tax levy is approximately \$400,000 less than last year. It is believed that Edmonton is the only city in western Canada which has been able to reduce its tax rate this year. The assessment of the city remains practically the same as last year, namely, \$79,500 000.

The tax collections for the first discount period of this year, ending May 17, total \$1,567,000, which is approximately \$1,000 better than last year, although the tax rate this year is so much less. This result is very encouraging seeing that tax

collections generally are lower this year than last year.

The four public utilities, namely, electric light and power, street railway, telephone and waterworks show a net profit for the first four months of this year of \$95,468, compared with \$25,298 for the same period last year. The electric light department shows a surplus of \$64,603, the telephone department \$21,394, the power-house and pumping station \$21,358, and the waterworks \$7,092. The street railway shows a deficit for the first four months of \$8,980, compared with \$21,811 for the same period last year. The street railway during the month of April showed a profit of \$3,406. The profit and loss on utilities is after deducting all fixed charges, including interest, sinking fund and depreciation.

The city at the present time owes its banks on current account only \$45,894. There are no further short-term notes falling due during the present year, and only \$207,427 during 1923, but, as an amount of \$708,978 has been paid into the sinking fund account up to December 31, 1920, to take care of short-term maturity notes, this payment is fully protected.

## To our Advertisers and Subscribers

AS has been pointed out in a series of full-page advertisements in *The Monetary Times* during the past few weeks, the last of which you will find on page 51 of this issue, the commercial printers and periodical publishers of Toronto are confronted with the possibility of a printers' strike on Wednesday next, June 1st.

We feel most strongly that in the face of falling markets in nearly all other industries, no logical justification exists for such unreasonable demands as the employees are making at this time.

Everything possible has been done by the employers to avert such an occurrence, but in the event of the men walking out, we trust the break will not be of long duration.

In justice to ourselves and you whom we serve we feel that we should resist these impossible demands.

Should the strike be brought about it will be impossible to get out this publication. Under the circumstances we crave your indulgence and cooperation until such time as the trouble has passed.

As we go to press with this issue, we are still hopeful that the great body of sane opinion among the local men will prevail, and that the union officials will be induced to change their present attitude so that Toronto printers may continue at work and thus obviate the necessity of a strike with its inevitable result of loss to the printers and publishers, and inconvenience and loss to the public.

### CONTROL OF LIFE INSURANCE AGENTS

THAT life insurance men in the Dominion are opposed to dual control of agency forces is illustrated by the stand taken by both the Life Officers' Association and the Life Underwriters' Association, on a bill which it is understood the Dominion superintendent is to have introduced at the present session of parliament. Copies of this bill are not yet available, but the government's intention is believed to be to have all agency appointments subject to the superintendent's approval.

This is of course different from the license systems operated in most of the provinces, where the agent deals directly with the department. Nevertheless the possibility of conflict is apparent, for a provincial license might be granted by a province to an agent who was not approved by the Dominion, or vice versa. The provincial governments are also opposed to any such inroad upon their right to control the business of life insurance, quite apart from the authority under which a company is doing business.

It is to be hoped, therefore, that no legislation of the kind will be passed hurriedly, and later found to be unworkable. There is nothing to be gained by publication of control, and any province should be capable of deciding who is and who is not fit to write life insurance; having then secured his license, the agent is in a position to work for any company.

The provinces have during the past few years made special efforts, and are planning to do more, towards improving insurance field work. Much of this effort would be wasted were the Dominion to take over the work. It has, moreover, been regarded as within the field of provincial jurisdiction, under the control of "property and civil rights," and the power to regulate contracts generally. Last year a Dominion bill was drafted to establish a system of Dominion licenses for agents. This was withdrawn when its objections were realized, and the opinion of insurance men may be equally effective on the present proposal.

### GREAT BRITAIN'S FINANCIAL OUTLOOK

LIKE that of Sir Henry Drayton, the budget speech of the British Chancellor of the Exchequer this year contained no surprises. The only changes proposed were that the surtax on imported cigars should be dropped and that a fixed duty of 15s. a gallon should be substituted for the existing charges on sparkling wines. No additional taxes are to be imposed. For the first time the Chancellor followed the continental custom of presenting the budget in two sections, viz., "Ordinary Expenditure and Revenue" and "Special and non-recurring Expenditure and Revenue." The figures under each heading are appended:—

ORDINARY BUDGET	
Estimated ordinary revenue .....	£ 1,058,150,000
Estimated ordinary expenditure .....	974,023,000*
Surplus .....	£ 84,127,000
SPECIAL BUDGET	
Sale of war assets .....	£ 158,500,000
Liquidation of war commitments ..	65,705,000
Surplus .....	£ 92,795,000
COMBINED BUDGET	
Revenue .....	£ 1,216,650,000
Expenditure .....	1,039,728,000
Surplus .....	£ 176,922,000

\*Including £345,000,000 for national debt services and £111,000,000 for war pensions.

Barelay's Bank Review for May points out that this position is scarcely as satisfactory as it seems, when account is taken of Mr. Chamberlain's explanation that, owing to the coal stoppage, there are large claims on the ordinary budget surplus; also, that against the surplus on the "Special" budget must be set liabilities at present unascertained.

tained, which arise out of the liquidation of war agreements, in particular for the control of railways, arrears of maintenance and deterioration. Making allowance for these items, he estimates that the amount available for debt reduction will be £103,500,000. Here it is interesting to notice that in the past year £259,500,000 was applied to debt reduction. Of this sum, £117,154,000 was applied to extinguishing foreign debt, with the result that, apart from a loan of £8,000,000 made by the Straits Settlements and Mauritius, practically the only British debt now payable outside the United States and Canada is £826,000 in Sweden, and this, the Chancellor states, will soon be arranged for.

#### SOME NOTABLE BUSINESS LOSSES

THE past few weeks have brought some unusually large failures. Andrew Motherwell Co., Ltd., millers and manufacturers of food products and feeds, Dundas, Ont., have assigned to Osler Wade, owing to heavy losses sustained by the drop in prices. The firm's assets are \$300,000, and their liabilities \$220,000. It is likely that a liquidator will be appointed. Gravanite Products, Ltd., King St. West, Toronto, have also assigned owing to business difficulties due to lack of capital. Assets are placed at \$70,000, and liabilities at \$50,000. A Toronto business, that of A. T. Widdowson, boots and shoes, 176 Main St., will be wound up, as the proprietor has left the country. The nominal assets are \$14,000.

On May 3 announcement was made of the assignment of the Nobility Chocolates Co., Ltd., St. Thomas, Ont., for the benefit of its creditors. The sudden drop in the prices of several lines of raw material in which the company was heavily stocked is given as the cause of the failure. At a meeting of the creditors about three weeks ago the surplus over the liabilities was given as about \$150,000, including the large four-story plant and equipment. The company was reorganized by George Fisk, of Toronto, in October last, following the purchase of the Nobility Chocolates, Ltd. The directors state that there is little likelihood of another reorganization taking place, but it is stated that another local firm is already negotiating for the purchase of the building.

By consent of all parties concerned, a receiver has been appointed for the Noble Foundation, Ltd., the largest farming corporation in Western Canada—the largest, possibly, in the world. By a court order issued by Mr. Justice Simmons, in Calgary, H. E. McDonald, of the inspectorate staff of the Merchants Bank, Calgary, is named as receiver. Several large creditors are interested in the affairs of the Foundation, among them being the Merchants Bank of Canada, the Bankers' Trust, an American institution. The amounts for which these parties claim are not disclosed. Another large creditor is Henry Carstons, Seattle, a private trustee for the debenture holders of the first issue of debentures sold in Seattle by the Noble Foundation. The latter's claim is said to be in the neighborhood of \$500,000. The total liabilities of the foundation are not disclosed, nor are the assets of the organization.

During past years, when the crops in the southern part of the province have been light, and total failures in some places, the Noble Foundation has always had some sort of crop, but it was not until 1920 that the company were successful in harvesting a really big yield from their extensive property. According to figures contained in a report made by S. C. Reat, U.S. consul in Calgary, the harvest taken in by the Noble Foundation in 1920 included 197,600 bushels of wheat, 74,245 bushels of rye, and 1,158 bushels of flax. In 1915 a world's record for oats was established, an average of 126 bushels an acre being taken from 1,075 acres. In 1916 another record was made in wheat growing, when an average of 54.23 bushels of wheat per acre was harvested on 1,000 acres.

#### THE 1921 SESSION OF PARLIAMENT

PARLIAMENT is this week completing a session which may be regarded in conservative circles as bringing little retraction of war-time inroads upon capital industry, and in more "progressive" quarters as containing little to further the material progress of the country. There is, however, a time for radical legislation and a time for a stand-pat policy; certainly the latter has been the wisest, for what progress has been made towards a more solid economic condition has been made by industry itself apart from government measures. It is moreover advisable that public expenditures should be reduced rather than increased, and the avoidance of new undertakings is one way in which this may be done. The certainty that the national railway system cannot pay its expenses for some time to come is a great disappointment in this respect, for it adds to the annual expenditures of the government.

There has, of course, been the usual amount of discussion on national issues, much of it taking place before the tariff commission and the parliamentary committees on railways and soldiers' civil re-establishment. This discussion has shown that there is no demand for radical changes. Even the free trade movement soon exhausted itself before the bar of public opinion, and the tariff is now on a more solid foundation, though there is a widespread feeling that any change should be in a downward direction. On the railway situation a great deal of light was thrown but no solution satisfactory to all parties was offered; it is evident now that the expensive process of acquisition of the Grand Trunk, amalgamation with the Canadian National, and the operation for a short time at least of the whole system must be proceeded with. Regarding the war veterans, it is felt that Canada has done more than most other countries, and the problem of employment and relief for returned soldiers has been absorbed in the larger one affecting the citizens as a whole.

That there is an undercurrent of faith in further economic progress is shown by the number of private bills relating to new banks, insurance and other companies. One of the proposed banks withdrew its application, however, while the other has not yet passed through the promotion stage. Several insurance companies and one trust company were incorporated, and some new railway construction should result from extensions of time granted to railway companies. The industrial progress of the country during the next few years will of necessity be slow, but the government can best assist it by little interference as possible and as low taxation as the national finances warrant.

#### APPLICATION FOR BANK CREDIT

A western manager of the Canadian Bank of Commerce relates the following account of an application for what might be called unlimited credit:—

"When I had charge of a branch in the city of Toronto, in a district where dealers in furs, old clothes, etc., predominate, I was approached by Abe Levensky, who addressed me as follows: 'Mester McKinney, can you make me perhaps a loan? I want to start some beesiness,' and in accordance with the usual custom I asked for a copy of a statement of his affairs. Levensky said, 'Vot you mean, statement?' I explained that the bank must have his financial statement so that we might judge as to his claims for credit. Levensky grasped the idea at once. 'Oh yes, I know, I will get mine friend Rubenstein to prepare it, he understands figures.' In the course of a day he returned to the bank with the statement of his affairs neatly prepared. I looked it over and said 'Why this looks good,' and Levensky with a most satisfied grin said, 'Vy yes, it's fine, it's fine.' When we had talked the matter over, due consideration having been given, I asked my prospective customer how much money he would need, the reply was without hesitation. With the usual movement of the hands he said, 'Vel, how much have you got?'"

## PERSONAL NOTES

SIDNEY H. PIPE, F.A.S., A.I.A., actuary of the Independent Order of Foresters, was elected president of the Canadian Fraternal Association at the annual meeting held at Montreal last week.

GEORGE D. PERRY, who has been general manager of the Great North Western Telegraph Company, for some time, has been appointed vice-president and general manager of Canadian National Telegraphs, with headquarters at Toronto.

W. E. BINNING, town treasurer of Listowel, Ont., and secretary-treasurer of the Board of Education for that municipality, has tendered his resignation on account of ill-health. Mr. Binning has been identified with the public offices of Listowel for nearly forty years, and for twenty years he has served as treasurer.

STEWART MACNAUGHTEN, F.S.A., F.I.A., A.C.A., manager and actuary of the Standard Life Assurance Company, Edinburgh, is visiting Canada for the first time and will visit important sections of the Dominion accompanied by W. H. Clark-Kennedy, manager for Canada, before leaving for home in the course of a few weeks.

W. B. ROBERTS has been appointed chief engineer of the General Accident Assurance Company of Canada, Toronto, in place of J. O. B. Latour, who has resigned. Mr. Roberts has had a wide and varied experience as an engineer. After a period of service as a marine engineer, he obtained an extra chief engineer's British Board of Trade certificate, thereafter becoming associated with the Manchester Steam Users' Association, remaining with this association for five years, 1½ years as surveyor and 3½ years as a resident and consultant engineer. Mr. Roberts then went into business in Liverpool as a consulting engineer. He was, prior to his service overseas, chief inspector for the General Accident in the western provinces, rejoining the company's service in 1919. Mr. Roberts had a distinguished career as an engineer in the Royal Navy during the war.

ROYAL BANK OF CANADA

*New Premises on Spring Garden Road, Halifax, N.S.*

## BANK BRANCH NOTES

The Royal Bank of Canada has leased the ground floor of the La Sauvegard Building, opposite the Court House, Montreal, and will open a new branch to be known as the St. Vincent and Notre Dame branch.

The Bank of Montreal has purchased the north-west corner of Guy St. and Sherbrooke St., Montreal, where a new branch will be opened.

At a cost of \$120,000 the Union Bank is to erect a two-story brick building for bank purposes at 500 Main St., Winnipeg.

The Bank of Nova Scotia is erecting a new building on Grafton St., Charlottetown.

T. G. McMaster, formerly manager of the Hamilton branch of the Bank of Nova Scotia, has been appointed superintendent of branches.

Leon Shearer, formerly accountant in the Union Bank at Lacombe, Alta., has been appointed manager of the branch at Waterhole, Alta.

The Sterling Bank announces the following: C. F. Perkin, formerly accountant at Cornwall, has been appointed acting manager at Lansing; L. G. Fox, who was acting manager at Lansing, and R. H. Sayers, manager at Wellandport, both departed for the west together. Mr. Fox has since arrived at Birnie, Manitoba branch, where he has been appointed acting manager and R. H. Sayers has taken over the managership of Eden, Manitoba, branch; R. M. Hammond, who was manager at Eden, Manitoba, has been transferred to Glenella in the same capacity; A. G. Duncan, who was temporarily acting as manager at Birnie, Manitoba, has been transferred to Winnipeg branch; the branch at Madawaska, Ont., was closed on March 31, J. H. Robinson, acting manager there, has been transferred to Whitney, Ont., in the same capacity; S. C. McCracken, who was temporarily in charge at Whitney, has now resumed his position at Zephyr as acting manager; W. S. Regan, manager at Glenella, Man., has been transferred to Winnipeg as acting accountant; E. H. Brown, formerly at Wadena, Sask., has been transferred as accountant to St. Catharines, Ont.; N. C. Bucknam, formerly accountant at Sudbury, Ont., has been appointed acting manager of Wellandport, Ont., branch; G. B. Clarke, acting manager of Shedden, Ont., has received the appointment of manager of that branch; S. G. Modeland, for some time attached to the head office staff, has been appointed acting manager of Lefroy, Ont.; H. W. Morden, acting manager of Richmond Hill, Ont., has been made manager there.

The Royal Bank announces the following: J. Lippe, who for the past eight years has been manager of the Joliette branch, has retired; F. W. Bain, manager of Toronto, Yonge and Richmond Streets branch, has left the bank, and is to become manager of the Atares Wharf and Warehouse Co., Havana, Cuba; L. M. McCarthy, formerly attached to the supervisor's department, Toronto, has opened his new offices under the firm name of Mara, McCarthy and Co., stockbrokers, in the Times Building, Bay St.; H. R. Extence, of the supervisor's department, Vancouver, left for Cuba on May 4; the branch at Bridgewater, N.S., has just moved into new premises.

La Societe Internationale d'Administration is the name of a new trust company in process of organization in Montreal. It was originally started by A. A. Charbonneau, who has since dropped out. The directorate will include G. L. Patenaude as president, E. L. Lafleur and T. Meunier. P. L. S. Browne will be manager. A Quebec charter is being secured, with authorized capital of \$299,000, of which \$100,000 is paid up, and some stock may be offered to the public later. Premises have been secured at 86 St. James Street.

# 50%

Statistics show that 50% of the people who died in Ontario in 1920 died without leaving any property.

This does not necessarily mean that none of these people had ever possessed any property. Doubtless many of them at one time had possessed property, but through lack of oversight or good judgment they lost all they had, and died penniless.

You can protect yourself against such a calamity by investing your property under the plan known as the "Voluntary Trust."

This plan is fully set forth in our booklet entitled "Voluntary Trusts and their Uses."

Write to-day for a copy

## DOMINION CONTROL OF WATER-POWERS

### Its Effect on the Ontario Radial Railway Enquiry and on the Rainy River Investigation

BY ANDREW T. DRUMMOND

IT is satisfactory to know that the Premier of Ontario has, in his usual frank way, admitted, in the Legislature, that the province cannot longer claim any control over its navigable waters. Previous governments had assumed that the waters on the Canadian side of the Niagara, St. Mary's and St. Lawrence Rivers were under the jurisdiction of Ontario, and from the sale of rights to power on the St. Mary's and Niagara Rivers, had realized considerable revenue. It was also overlooked by these former governments that, not only were these rivers international, and therefore necessarily under the jurisdiction of the Dominion, but that the large export of power by the three power companies at Niagara Falls constituted, in each case, a work or undertaking extending beyond the province to a foreign country, and thus, by the terms of the Confederation Act, placing these power companies under Dominion, and not provincial control. That these rivers are navigable, and important parts of the great St. Lawrence system, and with all obstructions in them overcome by canals, admits of no question. Only the absence, hitherto, of any interest taken by the Dominion Government in the development of water-powers, has prevented its right of control from long since arising.

#### Not Included in Natural Resources

A claim has been made on behalf of the province, that the water-powers form one of its natural resources, and are thus, essentially, its property. The natural resources of a country are, however, things permanently tangible and entirely within the country, and controlled solely by it. The waters of the Great Lakes are derived more from rivers and rainfalls in the United States than from those in Canada, and the area of the United States side of these lakes is greater than that of Canada, whilst the natural course of the currents in them is towards this country. The waters, which at some points are under American jurisdiction, become thus, at other points, within Canadian limits, whilst by both evaporation and rainfall over this great area, and the action of the winds, the question of ownership of the waters is made still more complicated. When they reach Niagara Falls, for instance, they have become so intermingled that they can only be regarded as international, but originating more, if anything, in the United States than Canada.

With regard to the general question of control over the waters and water-powers of the whole St. Lawrence system, it must be also remembered that at the Union of Upper and Lower Canada in 1841, all provincial property and rights came under the jurisdiction of the united Canada, and were thenceforward controlled by it; and that there is nothing in the Confederation Act of 1867 severing the two provinces, which, by implication or otherwise, returned to either any rights or control beyond those specifically named in the Act. No legislative action of recent years by the Province of Ontario can confer on the government of the province rights to the beds of the lakes and rivers of the St. Lawrence system, and this affects the title of perhaps all of the power companies.

The subject involves control by the Dominion not only of the water-powers at Niagara Falls, including the Chippawa developments, but those at Sault Ste. Marie, and on the Trent, Rideau, Ottawa, St. Lawrence, Richelieu and Saguenay Rivers, all of which are navigable. It does not, however, mean that Ontario and Quebec will lose the advantage of their water-powers, but that their development, the application of the power, and the revenues from them, will be under the authority of the Dominion and not of the provinces. It does, however, mean that whether the Ontario radial railway schemes of the Hydro-Electric Commission shall be carried out or not, will depend, not on the government and the municipalities of the province, but on the consent of the Dominion, which will control the power, and that consent is not likely to be given wherever new railways would be only competitive with the National Railway system.

In the Rainy River District questions have arisen between the Dominion, Ontario and Manitoba governments as to water-levels and water-powers in their relations to Rainy Lake, Rainy River and Lake of the Woods, which here form part of the international boundary line between the United States and Canada. Whilst the two lakes can be regarded as navigable, more information may be necessary as to Rainy River. The more important points presently, however, are that where lake and river waters constitute the boundary line, motives of policy require that the Dominion should control, and that where, as in this case, works have been constructed across the river in order to regulate the water and create power, the clause of the Confederation Act conferring rights on the Dominion should be effective over these works on the Canadian side and equally so if there are works on the Canadian side to receive current from, or transmit it to, the United States.

#### CANADA COMPANY ANNUAL MEETING

The annual meeting of the Canada Company was held on March 31, in London, Eng. Henry C. Weld, Esq., the Governor, presided; other directors present were Joseph C. Weld, Esq., Wm. C. Scott, Esq., and John A. Brodie, Esq.

The chairman submitted the directors' report and balance-sheet, which he thought all would agree were satisfactory. Though the report presented no features of special interest it showed that the company maintained a sound position. Notwithstanding the prevailing uncertainty in general finance, the company's land realization continued steady. The amount received on that account, £11,122, was about the same as in 1919, namely, £11,220, and was a substantial increase over the £9,437 in 1918. The reports of conversions of leases to freehold with receipts of purchase money since the close of the year showed the increased activity to be continued, with consequent improvement in total receipts. In the printed accounts it was shown that the pre-emption moneys falling due during the current and the following year were such as to justify confidence that the company's financial position would be well maintained. On the other hand the expenses had been somewhat increased by additions to municipal taxes paid in Canada, which amounted to £2,394, as against £1,889 in 1919, and by increased salaries to the staff, which he had no doubt shareholders would approve. A new burden had been imposed on the company by the corporation profits tax which should merit the attention of shareholders.

#### CAMPAIGN AGAINST DWELLING HOUSE FIRES

The Ontario Fire Prevention League, in affiliation with the Fire Marshal Department, recently inaugurated a province-wide publicity campaign for the purpose of conserving our homes as well as our lives from destruction by fire. The boys and girls of the province will be called upon to assist in this most desirable and patriotic movement. Through the principals and teachers of our schools, the league will distribute 250,000 copies of a "Home Inspection Blank" so that the pupils, with the help of their parents, may answer the questions. The primary object is to clean up attics, cellars, back yards and remove hazardous conditions. The underlying thought being to prevent fires by removing the cause and thus save our homes.

It is pointed out that the high cost of building material, the rapidly increasing population, and the enormous annual destruction of dwelling houses, in which there were 5,644 fires last year in Ontario, have combined to make the housing problem one of the most serious and acute proportions. Ontario is noted for its extravagance through unnecessary fire waste, which is nothing short of an economic crime, caused chiefly through our careless habits and indifference. Statistics show that 64 per cent., or practically two out of every three fires which occur, are in our homes; 80 per cent. of which are preventable.

### Money Is Worth More to You, Too

Lenders charge more interest on loans to-day. So why shouldn't you get more interest on your savings deposits?

You wouldn't refuse an increase in your wages, would you? Why, then, should your savings earn a less rate when you can get 4% for it?

The Union Trust Company will pay you interest at 4% per annum, compounded regularly. Come and open your account here. If you cannot conveniently call, open your account by registered mail. Deposits promptly acknowledged and withdrawals by mail accurately and safely dispatched.

## RETAIL STOCKS ARE NOW LIGHT

R. G. Dun and Co.'s *Review* of May 28 will report as follows on business in the Montreal district: The Empire Day celebration interfered somewhat with the regular course of business, and the week has been without special incident. Payments as a whole are graded as fair to good, except in far-western and lumbering sections. Notwithstanding variable weather conditions visiting retail buyers of dry goods report gratifying sales, and a fair sorting trade is still in progress. Orders for fall and winter furs, usually being placed at this time, are comparatively few in number and small in volume, and the numerous factories are but partially employed. It is reported, however, that retail stocks are light as a rule, and improvement is looked for as the season advances. The majority of grocery orders are moderate, but the aggregate shows a fair steady distribution. Sugar refiners are all on the same basis as to price, quoting standard at 10½ cents, and no variations are reported in other lines. Some scarcity is already becoming evident in certain lines of canned goods. Activity in general manufacturing circles is at a rather low ebb, and the iron market rules dull at the reduced quotations. In general hardware the movement is barely as active as last month. Four district failures are listed for the week with liabilities of \$218,000.

## IMPERIAL BANK OF CANADA

Two outstanding features of the annual statement of the Imperial Bank of Canada, which was presented to shareholders at the annual meeting in Toronto on May 25, are the strong cash position and the record increase in savings deposits. The ratio of quick assets to liabilities to the public is 30 per cent., and the ratio of liquid assets is 52 per cent., both showing a moderate improvement over the previous year.

Total deposits, amounting to \$99,125,011, stand at a record figure, notwithstanding a reduction in demand deposits as a result of withdrawals by the government. The decrease in this class of deposits, however, is more than counter-balanced by savings, which increased \$9,120,945, or 12.55 per cent., during the year to \$81,797,624.

Commercial loans, amounting to \$61,957,400, increased \$1,504,457 for the year, which is an interesting fact, in view of the conditions which have prevailed in business during the greater part of the fiscal year of the institution. In his report, Wm. Moffat, general manager, pointed out that a considerable percentage of this increase has been in advances to grain dealers, grain farmers and cattlemen. In call loans there was a decline of about \$2,000,000.

After careful scrutiny of the bank's assets, and after full provision had been made for losses and bad and doubtful debts, etc., profits stood at \$1,287,061, as compared with \$1,379,318 in the previous year. In addition to the regular dividend of 12 per cent., a bonus of one per cent., was accorded to shareholders, and after the usual contributions and charges, the amount to be carried forward, together with the total brought forward from the previous year, was \$1,171,839.

The history of the Imperial Bank is an interesting one, extending back forty-six years. Progress made during that period has been quite notable, and comparisons add impressiveness to the present statement. Total assets now at \$128,376,612 have increased 101 per cent., in ten years and 478 per cent., in twenty years. As against 1911 figures, total deposits at the close of April, 1921, showed an advance of over 113 per cent., and of nearly 139 per cent., in twenty years.

Last year there was a net increase in branches opened eleven. This is not a very large number but is in accord with the policy of the bank which is for consolidation at the present time rather than extension.

## EXCHANGE QUOTATIONS

Quotations of exchange on European countries and the United States as at May 26, 1921, with comparisons, are given below. The Canadian figures are supplied by the Imperial Bank of Canada, while New York quotations are given by the National City Co., Ltd., Toronto:—

## AMERICAN INTEREST IN CANADA

Manufacturers Erect Canadian Plants, Underwriters Recommend Canadian Securities, and Farmers Buy Canadian Lands—Movement of Population in Recent Years—Cheap Lands Are Main Attraction

By E. L. CHICANOT

TO know a good thing when they see it is a dominating attribute of the American people. Thus pithily is explained the interest the people of the United States have evinced in Canada, the resumption of which in the year past, after the stagnation of the war period, was a most significant feature in economic development. This interest in Canada and Canadian affairs is very gratifying to our country in more ways than one, for it may be regarded as a warm tribute to the wealth, existing and potential, of Canada, and a keen foresight into the development of the country at the hands of an intelligent, active people. And interest in Dominion affairs is not confined to one or a limited number of classes, as can be proven by any bureau circulating Canadian information, but from farmer to capitalist, from artisan to manufacturer, every class can see some profit to itself in the wide variety of wealth-giving sources the Dominion possesses to those who will open them to their own benefit and the national aggrandizement.

This interest in all that pertains to the Dominion has been strikingly evident since the termination of the war, the opening and progress of which of necessity confined attention to opportunities in the United States. As the rate of exchange has worked against British capital entering the Dominion, the reverse has been the case in the matter of American money, which has flowed across the border, where it has been worth so much more. The natural tendency of Canadians in this situation to buy at home, where their dollar is worth one hundred cents, has led many American manufacturers to establish branch factories here and has turned the eyes of a host of others to the field they may lose at least temporarily.

## Evidences of Interest

Throughout the summer months crowds wearing distinctively American clothes and conversing in unmistakable American accents, have thronged our cities and beauty spots. Dozens of conventions of international moment gathered in the larger centres and transacted business reported in many instances over the entire globe. Tourists came up by railroad and automobile in their thousands, left much wealth, and returning made the best kind of advertising agents. Capitalists, scientists, chemists, prospectors, and a host of others interested in our natural resources, have delved into every corner of the land and sown a seed which will be harvested for years to come. Throughout the summer hotels were filled to overflowing with Americans and all seemed to be satisfied with what they had come to see. Canada has indeed been popular with our cousins across the border and they possess possibly the keenest realization of the national status Canada has achieved since the war. Certainly they understand her potentialities to a greater degree of clearness than did the European delegates at the League of Nations. Canada has passed on to a sound status with a place among the nations of the world and Americans best appreciate the contrast to the boom days before the ambitions of a German Emperor called the manhood of the country across the sea to fight and make the best advertising agents the Dominion ever had in Europe.

Industrially the assault on Canada by American capital since the war has been a forceful one, which has the pleasing indication of increasing vehemence as time goes on. Though it is quite impossible to give really accurate figures of the monies from the United States which have been invested in Canada, the total sum has been variously estimated authoritatively at from \$1,200,000,000 to \$1,600,000,000. This money is stated to be flowing into Canada, to be invested in Canadian industries and securities, at the rate of about

\$200,000,000 per year. At the present time American capital invested in Canada is about one-half of British capital so invested, for the latter, due to conditions following the war in the British Isles, and the lamentable depreciation of the pound, has ceased its flow to Canada to a great extent.

## Movement Strong During War

There are more than five hundred branch factories of American firms in Canada at the present time, of which about three hundred have been established here since the war. The year just concluded saw the tide at its flood and inquiries from United States firms were far more numerous than in any previous year. One industrial commissioner of an Ontario city near the border dealt with more than one hundred inquiries from American firms who had the establishment of branch houses in the city under consideration.

The causes which bring these industrial concerns to Canada are not far to seek. Locating in Canada, they enjoy the privilege of preferential tariffs within the British Empire, which is a very considerable advantage. They are offered many inducements in locating, such as cheap sites, low water power rates, and the furnishing of electricity and gas on economic terms. Their Canadian market is easily and more cheaply reached than from the parent houses across the border, and Canadian labor, it will generally be conceded, is in a more healthy condition than in the United States and not troubled to such an extent by strikes and labor disputes. These advantages, and others readily seen, are bringing United States manufacturers in scores from across the border.

Another line of interest in Canada evinced from across the other side of the line has been that of brokerage firms in Canadian bonds and securities to be recommended to their clients as perfectly secure and safe investments for savings and capital not speculative. Just how the Canadian security field is regarded in the United States can best be illustrated from a published statement of the brokerage firm of Peabody, Houghteling and Company, of Chicago, which appeared recently: "Many years ago, looking to the future as well as to the immediate opportunity, we began to investigate Canadian industries as a field for the investment of American capital, to purchase with, on our faith, for distribution among our clients such issues of securities as we could unreservedly recommend. Our confidence in Canada has been amply rewarded by a long and steady growing list of customers who request Canadian securities for the investment of a substantial part of their savings." The statement goes on to prove that Canada possesses nationally all the tabulated qualities which are the most perfect insurance for safety against loss in bonds and securities.

## Emigration to Canada

But there is a greater, eminently more valuable factor in the United States contribution to Canada which brings not only its wealth to exploit the nation's trade and natural resources, but, giving itself in its entirety to Canada, denotes intelligent manhood and womanhood to develop the virgin soil and become the fathers and mothers of future generations of Canadian citizens. This is the emigration tide—of inestimable national worth. The American influx has from the days of Confederation had an important bearing on Canada's annual emigration figures, being second only to the British Isles in point of numbers and usually first in the average possession of wealth. The important proportions of this flow, held consistently, has in the progress of the years had a decided bearing on national development, and to-day the annual aggregate is noted widely as being an influential factor in Canadian economy and Dominion evolution.

Canada has always looked most kindly on the emigration of United States citizens and encouraged it in every way—by personal solicitation through agents, and by propaganda of every nature. Although from the standpoint of a British Dominion, the question of Canadian citizenship and the problem of national assimilation the Canadian authorities naturally favor first the peopling of Canada with citizens already British, familiar with the ideals of the Empire, the system of government and other matters which pertain directly to

## Banking Service for All

AS the majority of the first directorate of the Bank of Montreal, formed in 1817, were Scotchmen or bore Scotch names it was but natural that they should seek in Canada "to extend and to perpetuate for the farmer and the merchant the benefits and stimulus of a system the worth of which Scotland's prosperity could abundantly prove." One of the outstanding features of the system was the maintenance of numerous branches by banks of large capital.

The Bank of Montreal, in adopting this feature from the outset, laid

the foundations of a service by which branches have been established throughout the entire Dominion.

At each of these branches the full service of the complete organization is available.

Through this service the Bank of Montreal offers to all classes of the community, from the smallest savings depositor to the largest commercial organization, good and adequate banking facilities. Each customer whether his account be large or small is welcome as a client of the institution.

# BANK OF MONTREAL

ESTABLISHED OVER 100 YEARS

Capital Paid Up \$22,000,000. Rest \$22,000,000.

Total Assets \$560,150,812.85.

Canada as part of the British Empire, greater effort has been put forth to induce immigration from the United States than from the British Isles. There are many reasons for this. The same extent of advertising is not needed in the overcrowded labor markets of the British Isles, from which there is a continual unsolicited flow of emigration to alleviate the congestion, as in the United States, which is still in a position to accommodate certain classes of emigrants. In a country which offers such advantageous living conditions as the United States, a citizen, before contemplating emigration, must be clearly shown the greater advantages Canada has to offer him individually.

#### American Immigrant is Desirable

The United States emigrant is regarded second only to the Britisher as a national asset to Canada. As far as social conditions go, the international boundary is largely imaginary; in general the same ideals instigate both races, the every day run of existence in Canada approximates very closely that of the United States, and the emigrant from that country finds his niche much more rapidly, and becomes a valuable producing citizen in a much shorter space of time than the settler from the British Isles or Europe. Again, on the average, the emigrating American is wealthier than the newcomer from the British Isles, which is accounted for by the fact that the greater part of the emigration from across the line consists of farmers who have sold their relatively high priced holdings in their own country to come north with the money. It has been estimated that the British emigrant, previous to the recent enactment compelling the possession of \$250 on entrance to Canada, brought into the country with him the sum of about \$100, whilst various estimates have been made of the United States per capita amount up to \$1,150. This would seem to be overwhelmingly liberal, as the figures for the year 1919 given out by the Department of Immigration and Colonization place this at \$342, and estimate it for 1920 at \$372. It will be readily conceded that the classes of emigrants attracted to Canada from the United States have been those in a position to bring more money to their new home than those from any other country, which is an important factor in settlement, rapidity in producing worth, and general assimilation.

Indications are that emigration figures when fully compiled and published for the year 1920 will show a flow of nearly 50,000 people from the United States to Canada for the twelve months, bringing in its tide wealth in cash and effects to the extent of about eighteen million dollars. The total emigration for the first eleven months of the year was 42,807, and the accompany wealth \$17,519,003. These figures are interesting, not on account of their magnitude, for the toll is mediocre in comparison with the decade average, but because 1920 was the first post-bellum year in which there was any indication of the faintest kind of getting back to pre-war conditions in general, and that in this period the figures of American emigration tend to show a resumption of the gratifying regard in Canada which the war interrupted.

#### The Movement Across Border

In the year 1871, when the first census after Confederation was taken, Canada was found to have a population of 3,485,761 in the four provinces which then constituted the Dominion. Returns of that census showed that 24,162 of these people had been born in the United States. Unfortunately from that time, prior to the year 1892 the method of taking emigration figures from the United States was very faulty, no care being taken to ascertain whether those crossing the border intended staying in Canada or whether they were returning Canadians. It was, in fact, much the same system used now by United States emigration authorities in computing the entrance of Canadian citizens to their country. Hence no reliability can be placed on figures prior to 1892, since which time, however, they have been approximately correct and may be taken as authoritative. This accounts for what would appear to be a decided drop in emigration from across the border between 1890 and 1900. The following are

the figures of emigration from the United States to Canada from the year 1892:—

1897----	2,412	1905----	43,543	1913----	139,009
1898----	9,119	1906----	57,796	1914----	107,530
1899----	11,945	1907----	34,659	1915----	59,779
1900----	8,543	1908----	58,312	1916----	36,937
1901----	17,987	1909----	59,832	1917----	61,389
1902----	26,388	1910----	103,798	1918----	71,314
1903----	49,473	1911----	121,451	1919----	40,715
1904----	45,171	1912----	138,121	1920----	.....

These figures are interesting as illustrating the steady normal increase in the tide from across the international border and the consistency with which the flow has held. It will be seen that the yearly contribution rose in an even proportion almost up to the year of the outbreak of the war, when many of these ex-patriots flocked back to their former homes at the prospect of conscription and heavy war taxation. For the same reason the normal flow from the other side was interrupted with the industrial prosperity of the United States, at that period an added inducement to stay at home. This situation was even more seriously affected with the entry of the United States itself into the war. American emigration has not yet by any means got back to pre-war proportions, but readjustment in every economic line has been slow and the tendency would appear to be towards a rapid resumption of the pre-war tide.

#### Go Into Agriculture

In the past three decades the largest proportion of the United States emigration has found its way to the western provinces and for the most part on to the land. From 1897 to 1919 twenty-seven per cent. of American emigrants made entry for homesteads in western Canada, as against eighteen per cent. of British emigrants. And this, it must be borne in mind, does not take into account farmers and farm laborers who have purchased farms in the west or who have settled in other parts of the Dominion, so that it can readily be assumed that the major portion of those Americans coming to Canada went to follow Canada's first and most important industry. The following tables of the comparison of increase of settlers of previous American nationality in the years 1901 and 1911 shows the flow to the western provinces of the Dominion where these emigrating farmers had found it to their advantage to either take up free homestead land or purchase cheap holdings after having sold out their high-priced farms:—

	1911.	1901.
Canada -----	303,680	127,899
Alberta -----	81,257	11,119
British Columbia -----	37,548	17,164
Manitoba -----	16,326	6,922
New Brunswick -----	5,766	5,477
Nova Scotia -----	4,802	4,394
Ontario -----	55,674	14,175
Prince Edward Island -----	829	764
Quebec -----	29,812	28,405
Saskatchewan -----	69,628	2,758
Yukon -----	1,908	6,721

Generally the industrial centres are more apt to attract European emigrants, whilst the majority of American settlers go on the land. The immigrant from the United States is a good farmer in Canada, being well versed in the conditions he meets, as they are very similar to those he has left. In view of all this it is enormously gratifying to see the tendency towards a resumption of the swelling figures of pre-war emigration from the United States. Last year was the first to see the returning interest on the part of the farmer, and in addition to those who settled, thousands toured the farming areas and returned well pleased with what they saw, intending coming back this year to secure holdings. This year will see the fruition of their visits, and without doubt succeeding years will see an ever increasing flow as the values of American farm lands rise higher and their occupants discover they can grow better crops upon the cheaper lands of the great Canadian western expanse.

## The Saskatchewan Mortgage and Trust Corporation Limited

(Trustee under Bankruptcy Act)

offer you the benefit of their experience as

**EXECUTORS, ADMINISTRATORS, TRUSTEES,  
MANAGEMENT OF ESTATES, ETC.**

MONEY TO LOAN ON IMPROVED FARMS  
AND MODERN CITY PROPERTY

**REGINA - - - SASK**

## A BOND FOR \$100

\$100 or more invested in a "Canada Permanent" Bond for ONE YEAR will earn interest at FIVE PER CENT. per annum, payable half-yearly. A higher rate is paid on longer term investments. Interest begins the day the money is received, and the Bond will be made to become due on any date the investor desires.

The Bonds are issued in small sums and for short terms to enable those of moderate means to obtain a high grade security yielding a fair return and still have their funds available within a reasonable time. Small amounts should not be allowed to remain idle when they can be employed to such good advantage as by investing them in these Bonds.

The Corporation has been issuing these Bonds for nearly half a century. They are a first charge against its assets, which amount to over \$33,000,000.

## WHY BANK CREDITS MUST BE SHORT TERM

Obligations to Depositors Require That Assets Must be Liquid—Comparison With Mortgage Loans and Commercial Credits

BY A. B. BARKER

IN connection with bank advances, it is frequently asked, How much credit should the customer be entitled to on the showing of his statements of assets and liabilities and his profit and loss account? In this form the question cannot be answered, for the reason that it is not a practical question.

A bank is a dealer in credit, which it buys and sells, and the same principles of merchandising which obtain in ordinary business transactions must govern its dealings. No customer buying goods from a wholesaler asks what quantity will be sold to him on the strength of his statement. The transaction is the other way around, the buyer states the quantity he wants, and the dealer decides how much to sell, according to the customer's ability to pay for it within the time agreed, and this is precisely the attitude which the banker must take if his business is conducted on proper business lines. Before a wholesaler can sell the wares in which he deals, he must purchase them from others.

Generally these purchases are made on time, and when the wholesaler sells he must be assured that his customer will be able to pay for the goods purchased as promised, so that in turn he can pay those who originally supplied the goods. In other words, the wholesaler, in order to obtain the goods, entered into contracts by which payment was to be made at a certain time. When he sells he is a party to another contract by which his customer agrees to pay him for the goods, and he depends on the prompt fulfilment of this and similar contracts to carry out his obligations.

### Must Meet Depositors' Demands

The bank is in the same position. In order to make an advance to a customer a bank must obtain the funds from others, its depositors. That is, it buys credit from those who have it to sell, and sells it to those who want to buy, which in effect is what the customer does when he obtains a loan from the bank. The bank's contract with its depositors calls for payment on demand, and in order to be able to carry out this agreement the bank must make reasonably certain that the loans it makes will be paid as agreed. Bank deposits are payable on demand, but if all depositors were to ask for payment at once, it is obvious no bank could continue in business. Experience has shown, however, that only a certain percentage of such demands will be made from day to day in the ordinary course, and it has been found that by holding in cash a sum sufficient to take care of the ordinary daily withdrawals, together with a further cash reserve for emergencies, the balance can be advantageously used in supplying the legitimate requirements of the business community, and by so doing rendering an inestimable service to the country, as well as a profit to the institution.

This is the basis of modern banking, which, by receiving deposits, gives the credit so obtained a wider currency, and makes it available all over the country. A man in his own locality may be known to be quite good for his undertakings. A hundred miles away, however, no one may have heard of him, but, through the medium of the banking system, this unknown credit can be utilized and made effective for the business of the country.

### Essentially Short Term Loans

From the foregoing it will readily be seen that bank advances are not intended for transactions of a class likely to be long in completion. It is not intended, for instance, that a bank should make advances to a manufacturer to build a factory or purchase machinery, or that it should make advances to a farmer to purchase land. Funds for such purposes should be arranged by way of a long term loan or mortgage. The true purpose of bank advances is to supplement working capital, and to enable the dealer and trader

to keep his stock moving, and the manufacturer to turn the raw material into finished product and dispose of it. With many, of course, a loan is a loan, whether it is a mortgage loan or a bank advance, and the fact is ignored, that one comes from funds specifically supplied for the purpose, and the other from funds repayable on demand.

When a wholesaler sells to customers who do not pay as agreed, it naturally follows that his own obligations will not be met, and his business will be curtailed in consequence. He will be able to buy less and will therefore have less to sell.

With a bank the same thing is true. If it lends money, that is, sells credit, to those who do not pay promptly, its business will be curtailed to the extent of the funds so tied up, and it will have that much less to lend. A bank is organized to serve the whole community and obtains its charter on that understanding. The various members of the industrial community, farmers, traders, and manufacturers, all depend on borrowing to carry on their business activities. Their requirements, however, come at different seasons of the year, and when each class cleans up promptly at the end of the season the funds so released are available for the others in their turn. If for any reason one does not clean up and repay the advances, the next in turn must go on short allowance. An interesting illustration of this was reported recently from North Dakota, where some twenty banks have been given 60 days' extension by the local examiners. They are believed to be solvent, that is, their assets are considered more than ample to meet their obligations, but their loans have been made to farmers on their grain, and to cattle dealers on their cattle, and as prices are down these borrowers will not sell, and consequently the banks' advances are not paid. The friends and neighbors of these borrowers are depositors in the banks in question, and, owing to the circumstances referred to, are unable to draw their balances for sixty days, in order to give the banks an opportunity to collect their notes.

A bank must keep its advances liquid, just as a dealer must keep his business liquid. Any business is organized to make profits, and if the business is successful the debts incurred will be paid, and the owners receive their returns, out of the process of making profits. When the business does not succeed the debts incurred must be paid out of the assets of the business. When it makes advances, therefore, the bank must feel reasonably sure that the process of making profits will pay the advances, as it does not want to be in the position of having to obtain payment by realizing on the assets. One method of ensuring this is by making certain of a steady turnover of its funds, and to do this it must see that its customers have sufficient turnover in their business; that the process of making profits is functioning properly. The bank's prosperity depends upon the prosperity of its customers, and it succeeds as they succeed.

## IMMIGRATION RECOVERING

The following is a statement of immigration to Canada, during the fiscal year 1920-21, compared with that of 1919-20:—

	1920-21.		Totals.	Increase over 1919-20.
	British.	From U.S.A. countries.

WHOLESALE PRICES SEEK LOWER LEVELS

ADJUSTMENT OF FIRE INSURANCE LOSSES\*

The General Downward Movement Has Not Yet Halted, Although There Has Been a Slight Hesitation on the Part of Some Commodities

Incendiaries One of the Recent Problems to be Considered—Quickly Changing Values Also a Difficulty

By JAS. TAYLOR

E. A. Lilly Adjustment Agency, Edmonton

WHOLESALE prices continue to trend downward. In April, 1921, the index number for all commodities, according to the Department of Labor report, was 253.7, compared with 263.1 in the previous month, 353.1 for April, 1920, 279.6 for April 1919, 269.4 for 1918, 136.7 for 1914 and 136.3 for 1913.

All commodities did not move downward last month, however, mutton, poultry, fish and native fresh fruits and vegetables, among the foods, and silks, jutes, hides and tallow and crockery and glassware among other commodities, showing a tendency to become firmer. It is a notable fact, because it is the only instance, that hides and tallow are now at a lower level than in 1913. All other commodities are considerably above pre-war levels.

The following table gives the April details of index numbers, together with comparisons:—

It is to the benefit of all and to the welfare of the fire and automobile insurance business in general, that the local agent writing the business obtain a knowledge of the methods adopted by the adjuster in the settlement of the many varied types of losses experienced to-day. During the past three or four years the continual increasing costs of materials and labor removed a great deal of controversy over the values of property totally destroyed, as in this territory a very small portion of the insuring public kept their insurance to a standard of the cost of replacement. However, during the past twelve months, from my experience, the incessant advertising and pamphlets distributed about northern Alberta, advising the increasing of insurance to present values, is beginning to tell, and insurance is being accordingly increased. Now, since the first of the year, in the lumber market alone, there have been two reductions in prices, representing a cut of almost 33 1-3 per cent., with the result that the adjuster is now placed in the awkward position of finding the value of a building less than the insurance, and, for this reason, I ask that the agent forbear with the adjuster and give him an opportunity to settle such losses in an amicable manner and have patience.

Three Parties to Consider

In the adjustment of losses, the present day adjuster, to successfully conduct such work, has to consider three interested parties: first, the companies who employ him and who desire an adjustment made on an equitable basis, according to the conditions of their contract; secondly, the agent who naturally is anxious for an adjustment to be effected that will not reflect upon his future business; and, lastly, the assured, between whom and immediate wealth the adjuster is placed.

As you can see, it is no easy matter to effect an adjustment and accomplish all that is desired by these three interested parties, but I find by introducing practical business methods in determining the damage and loss caused by a fire and eliminating guesswork, a great deal of unnecessary controversy is avoided. With this in view, I have formed a connection, during the past few years, with reliable mechanics in every line of business, and the opinions and views of these men greatly assist the removing of any difference of opinion regarding the actual loss.

We are also confronted to-day with a large number of fires which are undoubtedly wilfully started, but I find it is a very difficult matter to obtain convictions in these cases, even when very strong evidence is produced. The Provincial Government of Alberta is now taking a very active interest in the investigation of such fires, and in the future this will materially assist in the reducing of this type of fire. With regard to our own city, Edmonton, during 1920, experienced one of the lowest loss records for a number of years, the total fire loss amounting to \$142,000, as in comparison with the city of Calgary, with a similar population, the loss there incurred was \$340,000. It must be borne in mind that the fire hazard in Edmonton is greater than in Calgary, due to the heating in the former city being entirely from coal, while in Calgary natural gas is used, thus eliminating a large number of fires brought about by carelessness in handling ashes, stoves, etc.

I believe our low loss record in Edmonton is brought about by the men of the fire department, they being heartily in co-operation with their present chief, making a force of men who are working to accomplish the same end, that is, to keep down the fires more for pride in their department than for the fact that it is the duty for which they are paid.

# IMPERIAL BANK OF CANADA

The Forty-sixth Annual General Meeting of the Imperial Bank of Canada was held in pursuance of the terms of the Charter at the Head Office in Toronto, on Wednesday, 25th May, 1921, at 12 noon.

## THE REPORT

The Directors have pleasure in presenting to the Shareholders the Forty-sixth Annual Report and Balance Sheet of the affairs of the Bank as on 30th April, 1921, together with Statement of Profit and Loss Account, showing the result of the operations for the year.

The balance at credit of Profit and Loss Account brought forward from last year was	....	\$1,062,278.04
Net profits for the year, after deducting charges of management, auditors' fees and interest due depositors, and after making provision for bad and doubtful debts, and for rebate on bills under discount, amounted to	.....	1,287,061.56
Making a total at credit of Profit and Loss Account	.....	<u>\$2,349,339.60</u>

This amount has been appropriated as follows:—

Dividends at the rate of 12% per annum	.....	\$ 840,000.00
Special bonus of 1% for the year	.....	70,000.00
Annual contribution to Officers' Pension and Guarantee Funds	.....	42,500.00
Special contribution to Pension Fund	.....	100,000.00
Dominion Government Taxes	.....	125,000.00
Balance of Account carried forward	.....	1,171,839.60
		<u>\$2,349,339.60</u>

During the year Branches of the Bank have been opened at the following points:—

IN ALBERTA—Big Valley, Dorenee, Edberg, Leslieville.

IN BRITISH COLUMBIA—Athalmer.

IN MANITOBA—Poplar Point, St. Vital.

IN ONTARIO—Toronto: College and Shaw Streets, Runnymede and Annette Streets; Chute a Blondeau, Connaught Station, Englehart, Gormley, Hilton, Kapuskasing, Kettleby, Monteith, Porquis Junction, Union, Virgil.

IN SASKATCHEWAN—Carlton, Carmichael, Primate, Tompkins.

The following branches have been closed:—

IN ALBERTA—Bear Lake, Cherhill, Greencourt, Griffin Creek, Gwynne, Westlock.

IN SASKATCHEWAN—Edgeley.

IN ONTARIO—Simpson Street, Fort William; Marshville, Verschoyle.

It is with deep regret that your Directors have to record the death during the year of Sir William Gage, who had been a valued member of the Board since 1910. The vacancy has been filled by the appointment of Mr. George C. Heintzman, of Toronto, who has been a shareholder for many years past.

The Head Office and Branches of the Bank, now numbering 218, have in accordance with the usual custom been carefully inspected during the year.

The auditors appointed by you have also made their examinations as required by law, and their report and certificate is appended to the Balance Sheet.

The Directors have pleasure in again testifying to the satisfactory manner in which the officers of the Bank have performed their respective duties.

All of which is respectfully submitted.

PELEG HOWLAND,  
President.

## LIABILITIES.

Notes of the Bank in circulation	.....	\$ 12,470,991.00

## AUDITORS' REPORT TO SHAREHOLDERS

We have compared the above Balance Sheet with the Books and Accounts at the Chief Office of Imperial Bank of Canada, and with the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on thirtieth April, 1921, we certify that in our opinion such Balance Sheet exhibits a true and correct view of the Bank's affairs according to the best of our information, the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us during the year and found to be in accord with the books of the Bank.

All information and explanations required have been given to us, and all transactions of the Bank which have come under our notice have in our opinion been within the powers of the Bank.

G. T. CLARKSON, F.C.A.,

R. J. DILWORTH, F.C.A.,

of Clarkson, Gordon & Dilworth.

The customary motions were made and carried unanimously.

Mr. G. T. Clarkson, F.C.A., Toronto, and Mr. R. J. Dilworth, F.C.A., Toronto, were appointed Auditors of the Bank for the ensuing year.

The Scrutineers appointed at the meeting reported the following shareholders duly elected Directors for the ensuing year:—Peleg Howland, Wm. Hamilton Merritt, M.D., Sir James Aikins, K.C., John Northway, J. F. Michie, Sir James Woods, E. Hay, Frank A. Rolph, R. S. Waldie, George C. Heintzman.

At a subsequent meeting of the Directors Mr. Peleg Howland was re-elected President and Dr. W. Hamilton Merritt Vice-president, for the ensuing year.

PELEG HOWLAND, President.  
W. MOFFAT, General Manager.

## THE PRESIDENT'S ADDRESS

In rising to move the adoption of the Report, the President said in part:—

In moving the adoption of the Report which you have just heard, I may say that I do so with much satisfaction, which is shared by my fellow-directors, and which I hope will be felt by yourselves. While the profits are less than they were for the previous year, they have been obtained with necessarily increased expense and under—particularly during the past four months—adverse business conditions, which have caused a shrinkage in the number of transactions from the multiplicity of which Banks draw a considerable portion of their profits, in addition to which, through the reduction in non-interest-bearing deposits and a very gratifying increase in our savings, our money has cost us more.

As you will see, we have been able to pay the usual dividend and a one per cent. bonus, provide the regular contributions to the Guarantee and Pension Funds, make the special contribution to the latter fund, authorized by you last year, and carry forward an increased Profit and Loss balance, it being our policy to continue to keep this large during these times.

We are hopeful of results for the current year, though it is only prudent to anticipate increased difficulties.

I have read with care the reports which our Branch Managers send in on or about the first of May. They are, generally speaking, optimistic of the future and indicate considerable progress towards a lower and sounder basis of business.

### AGRICULTURAL OUTLOOK PROMISING.

In the East, where most of the manufacturing industries are located, there is, of course, a much larger number of unemployed, though, strange as it may appear, farm labor is reported as more easily obtainable and at more reasonable rates in the West than it is in this Province. While seeding is late, the conditions in the West are more favorable than last year, and while I would gather that the total acreage of grain will not be greater, there will be a larger area sown to wheat and the crop will go in at a less cost and with better cultivation than last year. There will be cheaper feed and greater inducement to raise cattle and hogs, unless the adverse United States legislation cuts out our market. There is a good deal of wheat still in the farmers' hands, which was held for higher prices, and which it is to be regretted was not sold when harvested.

Industries are depressed and working part time, with a few exceptions. Gold mining, for instance, in Northern Ontario is favored by conditions, and there are indications of some revival in leather and boots and shoes. Industrial wages are still very high, though there have been reductions in some cases, and efforts are being made to bring about more, but they are being resisted by the workmen.

### WAGES AND FREIGHT RATES.

With high wages, heavy taxation and part-time working, goods cannot be produced cheaply in our factories, nor with high freight rates and other costs can they be distributed cheaply by either wholesaler or retailer.

The prices of farm and field products are low, in some cases down to pre-war levels. Of course, we have a great variety of natural products besides grain and live stock—fruits, roots, tobacco, furs, fish, wood and minerals, all help to our employment, but depend also to a degree on a foreign market, which largely regulates prices.

If the prices of all these things are out of balance, as they are to-day, with those of the goods which have to be purchased with the proceeds of them, how can our Merchants and Manufacturers hope for more than a moderate business? How long will these conditions last? I wish I knew; I fear the time will be long. That they will adjust themselves I have no doubt; in my opinion (and I give it for whatever it may be worth) in the process we will have short periods of revival followed again by slumps (humps and hollows of trade as it were) and probably not in all lines of business at the same time.

### INFLUENCE OF EUROPEAN CONDITIONS.

One of the greatest aids to a permanent improvement would be a fully employed peaceful Europe, British as well as Continental. Let us hope that this happy condition will come about soon, and that we will find there a ready market for our surplus products, giving in return a ready market for what of theirs we can profitably consume. Would that Governments would not retard this end by restrictions to the free and natural movements of trade, which they all seem now so prone to impose.

The problem of the unemployed with us is a serious one, the percentage being very large indeed and not likely to grow less in the immediate future; that means will be found, in this land teeming with food, to provide for the deserving who may be in want I am sure, but the numbers of those to be sustained should not be added to by undesirable immigration. None should be permitted to enter who are not capable of, and have not an immediate prospect of producing their own sustenance, and have not the means on hand to maintain themselves meanwhile.

The decision not to resume the Business Profits War Tax was very welcome. Business hampered in so many ways needs no brake just now, and on its volume a very large proportion of the revenue of the country depends. It seems, therefore, a pity that the tax on the incomes of businesses could not have been abolished. It is payable, irrespective of any return on invested capital, and has the same tendency to

undermine the integrity of the business community as the Profits Tax, and its collection is subject to the same objectionable inquisitorial methods.

I would venture, too, to urge the utmost care in public and private expenditure, particularly that of a capital nature. We will come out better in the long run if nothing of this kind is spent that will not help towards production and bring in a quick return.

#### CAUTIOUS OPTIMISM.

It is a time, I would say, for cautious optimism, if the term may be used.

Gradually matters will adjust themselves and when they do there will come to us an era of prosperity such as we have never seen and in the benefits from which this Bank must participate.

I am sure you will all share in the deep feeling of regret caused by the death of Sir William Gage. He was a notable citizen and a valuable director. His place has been filled by the appointment of Mr. George C. Heintzman, whose business ability, I am satisfied, will be of much benefit to the Bank. He has long been connected with the institution as a valued customer and as a shareholder.

I would like again to bear testimony to the zeal and devotion of the Management and Staff.

I beg to move the adoption of the Report.

## The General Manager's Address

The General Manager said in part:—

There is a striking contrast between trade conditions to-day and those of a year ago. When we met last spring business was still brisk, and superficially appeared destined to continue at a high level for some months, although now that we are able to look back, it is evident that the turn came last spring and not in September or October last, as on the surface appeared to be the case. In other words, manufacturers and merchants operated for several months on back orders. Notwithstanding this condition, we trust that the report which we are presenting to the shareholders will be considered satisfactory.

#### DEPOSITS.

When we consider that our Government deposits have been reduced approximately \$7,000,000 during the year, we feel well satisfied with the results in this department of the Bank's business—our total deposits as at April 30th, 1921, amounted to \$99,125,011, as compared to \$97,784,217 in April, 1920, an increase of \$1,340,794. Deposits of all Chartered Banks for the eleven months ended March 31st (the latest figures available) show a decrease of \$128,930,722.

#### LARGE GAIN IN SAVINGS DEPOSITS.

It will not be safe to count on an increase in deposits during the coming year, at least not in deposits payable on demand. Business is slowing up, and all Banks have been experiencing a steady decline in their demand deposits. On the other hand, notice or interest bearing deposits so far continue to show a satisfactory gain, notwithstanding the large number of wage-earners out of employment during the past winter. The net increase in savings deposits of this Bank for the year ended April 30th, 1921, amounted to \$9,120,945, or 12%.

There are two subdivisions in the financial statement of a Chartered Bank, which, in the main, reflect the relationship of the institution to the public: the one, savings deposits, which, in a measure, indicate the confidence of the public; the other, commercial loans, which represent the assistance given by the Bank to the business of the country. The increase in the former speaks for itself. We shall come to Commercial Loans later.

Circulation during the year showed a substantial increase, although not so large as recorded last year, due, no doubt, to a general decline in business during the latter part of the year and to the increase in the purchasing power of the dollar. The maximum figure reached during the year was \$14,819,910 on 3rd July, 1920, but, as pointed out on previous occasions, owing to the requirements of the Bank Act regarding deposits with the Gold Reserve or payment of interest on the excess circulation, this expanded note issue has been of less benefit to the Bank than the figures would indicate.

Our total obligations to the public stand at \$112,424,772, practically the same figures as a year ago.

#### STRONG CASH POSITION.

Turning to the other side of the balance sheet, you will note our assets total \$128,376,612, as compared with \$128,274,168 a year ago. As an indication of the growth of the Imperial Bank of Canada since its inception, we are including in the report a sheet confined to a comparative statement of Deposits, Loans, Assets, etc., which, I am sure, you will find interesting and regard as being most encouraging. It will show that our growth has been steady and satisfactory. Notwithstanding our continued strong reserves throughout the year, the balance sheet under review shows legal tender notes, specie, deposit in the Central Gold Reserve, Call Loans and balances due from other Banks totalling 30% of our liabilities to the public—a creditable showing—and if our second reserves, consisting of bonds, securities, etc., are added to the above figures, our reserves are shown to be 52%.

#### PROFITS SATISFACTORY.

The profits for the year, we consider, leave no room for criticism, and have been computed after a thorough examination of the assets of the Bank by our own officers and by the auditors appointed by the shareholders, and after making what we believe to be allowances for depreciation, possible loss and contingencies, I must confess that, with the curtailment of business and increase in cost of operations, I am afraid that the Banks are going to find it harder in the future to keep their earnings at the satisfactory figures shown during the inflated period of the past two or three years. In a business such as carried on by this Bank, especially in times like the present, when values of all commodities are falling, and when, no matter how careful we may be and how well secured our advances may appear to be, there are always possible shrinkages and losses to be met, I am sure you will agree that the year we are entering is likely to be at least difficult, but we are looking forward with confidence, knowing that we have taken every possible precaution to protect your interests. Our efforts will, for the present, be directed to consolidating and improving the business which we now possess rather than reaching out for new fields in Canada or elsewhere.

#### INCREASED LOANS TO FARMERS.

This department of the Bank's business shows a healthy expansion. A very considerable percentage of the increase has been in advances to grain-growers and dealers, mixed farmers and cattle men. In some districts in the West, where crops have been light, there have been "carryovers," but on the whole advances to agriculturists, although more troublesome, are, when carefully watched, amongst the safest loans in the Bank. It is true they require to be watched, as a number of farmers, like their neighbors in the towns and cities, are over-optimistic and attempt to handle more than their capital warrants, and in the spring base their borrowings on a twenty-five bushel yield per acre, only to find that their crop when threshed measures ten or less. These accounts, however, are in the minority, and, while a certain percentage fail to clean up yearly, they are, as a rule, on a well-secured basis, and are ultimately collected. Our Premiums Account is still growing, a considerable portion of the increase being due to the erection of a number of smaller buildings at points where it was necessary to properly house our growing business, the only exceptions being a very fine building at Windsor, which we consider a credit to the Bank and to the city in which it has been erected, and the building occupied by our Hastings and Abbott Streets office in Vancouver, which we heretofore occupied as tenants. While prices of building have been very much in excess of normal, we believe that we have received value for our expenditure.

Our Shareholders have increased during the year from 2,055 as on April 30th, 1920, to 2,115 as on date of this report, or an average holding of 33 shares. We are always pleased to welcome new shareholders as well as new customers, and we trust that during the coming year we may have the pleasure of recording a further addition. As I stated last year, the Bank belongs to its shareholders, and we trust that each will do what he can to build up the business of his own institution.

There has not been the same activity in the opening of new branches by the Canadian Banks during the past twelve months as during the two preceding years, due largely, I think, to the fear of business depression, but also on account of high operating expenses. While we, ourselves, have opened

eighteen offices and closed seven during the fiscal year ended April 30th, 1921, we opened only at points where we saw a reasonable prospect of developing successful branches or as a protection to established offices. For the present we wish to consolidate our position rather than extend.

Our staff now numbers 1,345, of whom 413 are young ladies. All are entitled to your thanks for their work and loyalty. We are most anxious to build up the "esprit de corps" of the staff, and believe we have succeeded.

I would like to stop here, as the President has fully covered the ground, but in view of existing conditions, possibly something more may be expected from me at this time.

**LIGHTENING THE PUBLIC DEBT.**

Through our huge war expenses Canada finds itself burdened with a debt, which for a country of less than nine million people would, in times past, have been considered unbearable. The Finance Minister's efforts are of necessity directed to the increase of revenue to meet this condition of affairs. I think most of us would like to see an effort made to lighten his burden by a drastic reduction in expenditure. There are probably only two ways in which this burden of debt can be lightened:

1. Increasing by immigration of desirable settlers the numbers carrying the burden.

2. Reduction of the burden by such Government economies as will enable us to reduce our debt to a more reasonable figure.

Both will require time to show results, but if the two factors work together the time required for Canada to get back to normal will be appreciably shortened. Immigrants with means, however, will not be attracted to a country burdened with debt, and debts cannot be paid by inflation of currency or by Government or Municipal borrowings and expenditure. Our position can only be better by either cutting down Government expenses or by increasing the number of tax payers or by a combination of both. Also, we must work and work hard in order to produce not only food and clothing for ourselves but also to be in a position to sell to other nations at a profit in order to provide necessities which cannot be grown or manufactured at home.

**COST OF LIVING.**

To accomplish this, the price of goods must be made attractive to the purchaser, or in other words, we must get the price of goods and the cost of living down to a more normal level. This may mean lower pay for all workers, still if the margin over the cost of living is the same or better, such a situation should be welcomed by all. Canada is slowly getting back to a pre-war basis, but Government expenditure is still too high, but as we all know the process of deflation is far from pleasant and all will have to be patient. If we are, it should not take many years to bring about a better state of affairs. Each one of us must make his of her sacrifice, if necessary, in order that the business of the country may once more reach a solid basis and that we may attain the economic position which will be ours if we do our part faithfully and well.

**THE BANKS AND INDUSTRY.**

There have been some criticisms directed against the methods pursued by the Canadian Banks in their handling of the financial affairs of the country during the past trying period, and some of them due largely to staff difficulties, particularly while the war was on, may have a basis of truth, but upon the whole I think few human institutions have more cause for self-congratulation than the Canadian Banks. I can, of course, only speak intimately regarding the Imperial Bank, but I have no doubt others can repeat the same story. If you consider the situation carefully you will see that a Bank's assistance starts at the beginning of every enterprise—farmers obtain advances to prepare their soil, to buy seed, to plant, reap, thresh, and market their grain. The Banks also held manufacturers to purchase raw material, convert it into saleable goods, and to market the finished product—so on all through all lines of business. The Banks of the Country may, therefore, be looked upon as essential partners in the development of the Dominion, and we hope to see the Imperial Bank doing its part in the future as it has in the past, knowing that our welfare depends upon the success of our customers, be they farmers, manufacturers, merchants or wage earners.

## INTERNATIONAL TRADE SITUATION IN CANADA

(Continued from page 7)

Canada had been five years in the war and her imports had been greatly restricted. When peace came at the end of 1918, people felt free to buy goods that they had long wanted or now required in order to develop their natural industries. Imports at once began to show a considerable expansion in certain lines of staples and luxuries, accompanied by a steady decline in purchases of raw materials for war products. The total figures do not indicate these changes, but an analysis does. Imports of textile products, for example, grew from \$154,000,000 in 1917-1918 to \$234,000,000 in 1919-1920. Metals and their products, non-metallic minerals and their products, showed a decline. Vegetable products made a decided increase from \$146,000,000 to \$237,000,000. The United States, being the one country with unlimited goods for export, got the benefit of this increased demand for manufactured goods.

The latest twelve-month returns available for Canada's purchases by countries show some remarkable changes in the post-war period:—

From the	1918	1920
United States .....	739,459,000	919,367,000
United Kingdom .....	70,569,000	217,228,000
Cuba .....	1,790,000	35,173,000
France .....	4,118,000	19,840,000
British East Indies .....	16,775,000	19,607,000
British West Indies .....	7,639,000	16,839,000
Belgium .....	7,472	3,343,000
Netherlands .....	689,912	3,462,000

If this tendency continues, as it is reasonable to assume it will, the United States will lose its predominant position in Canadian imports, and instead of supplying 80 per cent. of Canadian purchases, it will return to its normal position of about 60 per cent. The United Kingdom, France, Belgium, Holland and Italy are sure to regain much of their trade with Canada which was lost during the war.

During the war period Canada, for the first time in her history, piled up an excess of exports over imports. For the five years ending March 31, 1920, that favorable balance of trade amounted to \$1,718,586,000. During 1920, however, imports rose faster than exports, and Canada finished the year with a small unfavorable balance.

## Canada's Future Exports

Canada has become a great foreign trader. Its imports per capita are nearly three times as large as those of the United States, while its exports are nearly double per capita. The explanation of this would require much space to discuss. Its enormous natural resources are comparatively easy of access, though its territories are broad. It has the greatest railway mileage in the world for its population. As has been indicated, its shipping is proportionately large and its people have been accustomed through half a century to foreign trading. Because it has much to sell, because it has the machinery for selling those products in the world's markets, and because its people are frugal and thrifty, Canada will also be a great purchaser of foreign goods. The Canadians can not equal the British stock from which they sprang in maritime and commercial skill, but it is questionable if they are excelled in this respect by any other nation.

An analysis of what Canada exports will deepen conviction on this point. The variety of goods sent out to the world is distinctly impressive. A few figures of the exports for the twelve months ending September, 1920, may be quoted in evidence:—

Wheat .....	\$182,000,000
Paper .....	89,000,000
Iron and Steel .....	62,000,000
Flour .....	61,000,000
Lumber, etc. ....	124,000,000
Pulp .....	73,000,000
Animals, living ..	42,000,000
Fish .....	40,000,000

Bacon and Ham .....	42,000,000
Butter .....	18,000,000
Cheese .....	40,000,000
Coal .....	18,000,000
Furs .....	18,000,000
Textiles .....	19,000,000
Vegetables .....	16,000,000
Automobiles .....	18,000,000

Canada not only sells food from the land, food from the water, furs and timber from the forest, minerals from her mines, but she also exports manufactured goods in the form of flour, bacon, paper and textiles which have already achieved some reputation. Quite recently her export of manufactures passed the half billion mark. What she most requires is a more scientific organization of her selling machinery, and an accumulation of capital which will enable her to extend larger credits to foreign purchasers.

## Her Future Imports

In the future Canada's import trade will witness a growth proportionate to the growth of the country's industries. There are certain commodities which Canada can not produce, notably in the case of cotton and certain other raw materials, and for the supply of which Canada is wholly or in part dependent upon foreign countries. These commodities will continue to be imported in increasing volume because Canada's development as a manufacturing country will necessitate a larger importation of raw materials. Although Canada has vast resources of coal, iron and steel, these have not yet been fully developed; Canada therefore imports these commodities in large quantities; but the tendency in the future will be for these imports to decrease gradually. Canada is primarily an agricultural country, yet there is a steady increase in the importation of certain produce and foodstuffs which can not be grown in Canada. Climatic conditions and the severity of the winters also render certain kinds of production in Canada impossible for a period of a year, and therefore make the importation of particular foodstuffs necessary.

Canada buys beans from the United States to the value of \$700,000; corn from the same country costing \$10,000,000; rice from British Guiana and Japan to the value of \$2,000,000; sago and tapioca from the British East Indies; sweet biscuits from Great Britain; cereal foods in packages from the United States and macaroni and vermicelli from various countries.

With the greater prosperity of the people the demand for certain kinds of manufactures, not produced in Canada, which may be classed as "luxuries" or "non-essential" commodities is likely to increase.

Canada's total import trade for the twelve months ending September, 1920, was \$1,325,767,940. The value of Canada's export trade for the same period was \$1,208,919,000.

Canada has still much to learn about foreign trade. The proposed establishment of an Empire bank to stabilize exchange between the United Kingdom and the British Dominions would undoubtedly be helpful. The customs preference now being given by the United Kingdom on motor cars, musical instruments, wines and a few other produces from the overseas Dominions may be extended in the near future. Other preferential arrangements may develop. In markets which are not British, Canada must meet the competition of the world. This requires special machinery in the nature of exporting corporations, steamship facilities and banking arrangements.

Much of Canada's exports is now sold through New York exporting houses, but Canadian export companies are growing in number and strength. Two of the leading Canadian chartered banks have agencies in Cuba, British West Indies, Mexico and South America. The number of steamers engaged in foreign trade is increasing. As all these features expand Canada will probably maintain the record which she has already made as a reliable and energetic foreign trader.

The offices in Toronto of the Casualty Insurance Bureau, formerly of Lumsden Building, and of the Canadian Automobile Underwriters' Association, formerly at 8 Colborne St., are now at 26-28 Adelaide St. West.

## DIVIDENDS AND NOTICES

### THE CANADIAN BANK OF COMMERCE

#### Dividend No. 137

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches, on and after Wednesday, 1st June, 1921. The transfer books of the Bank will be closed from the 17th May to 31st May next, both days inclusive.

By Order of the Board,

JOHN AIRD,  
General Manager.

Toronto, 22nd April, 1921. 545

### IMPERIAL OIL, LIMITED

#### DIVIDEND

Notice is hereby given that a Dividend of seventy-five cents per share in Canadian funds has been declared by the Directors of Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any Share Warrant of the Company within three days after the Coupon Serial Number Eight of such Share Warrant has been presented and delivered to: The Royal Bank of Canada, Toronto, Ontario, or at the office of Imperial Oil Limited, 56 Church Street, Toronto, Ontario; such presentation and delivery to be made on or after the first day of June, 1921.

Payment to Shareholders of record and fully paid up at the close of business on the twenty-fifth day of May, 1921, (and whose shares are represented by Share Certificates), will be made on or after the first day of June, 1921.

The books of the Company for the transfer of shares will be closed from the close of business on the 25th day of May, 1921, to the close of business on the 1st day of June, 1921.

By Order of the Board.

T. C. MCCOBB,  
Secretary.

56 Church Street, Toronto, Ontario, 572  
May 25th, 1921.

### THE MERCHANTS BANK OF CANADA

#### ANNUAL MEETING

The Annual General Meeting of Shareholders for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the first day of June next. Chair will be taken at 12 o'clock, noon.

By Order of the Board.

D. C. MACAROW,  
General Manager.

Montreal, 26th April, 1921. 553

### SETTLEMENT OF MORTGAGE MONEY

The Ontario Courts on May 17, reserved judgment in the suit of the American Chiclc Co., of New York, against the Somerville Paper Box Co., of London, Ontario, for payment of \$53,098, said to be due on a mortgage. The American Chiclc Co. demanded payment in gold of the debt, which the Somerville Co. offered in Canadian currency. The only dispute in the manner in which the debt will be paid. At the present the export of gold is prohibited until July, 1922.

## DEBENTURES FOR SALE

### TOWN OF LA TUQUE

#### Province of Quebec

Public notice is hereby given that sealed tenders will be received by the municipal council of the town of La Tuque until the sixth of June, 1921, at 5 o'clock p.m., at the office of the undersigned, D.-E. Hardy, manager of the town of La Tuque, for the purchase of bonds of the said town amounting to \$300,000.00, \$50,000.00 of which are issued under by-law No. 109, and the remaining \$250,000.00 under by-law No. 110.

These bonds will be dated the 1st November, 1920, and will be redeemable in 5 years from their date for all those which according to the maturity table contained in the by-law, mature after that date;

They will bear interest at the rate of six per centum, payable semi-annually, the first of November and the first of May of every year.

The bonds issued under by-law No. 109, are in two series, 95 denominations of \$100, and 81 denominations of \$500; those issued under by-law No. 110, are made up of 110 denominations of \$100 and 478 denominations of \$500.

These bonds are payable at La Banque Nationale, at Quebec, Montreal and La Tuque;

Every tender must be accompanied by an accepted cheque payable to the order of the town of La Tuque, representing one per cent. of the amount of the loan;

The said tenders will be considered at a sitting of the council which will be held on the 6th of June, 1921, at 8 o'clock p.m.

D.-E. HARDY, 575  
Manager.

### TENDERS FOR BONDS

The City of St. Lambert requires tenders for sale of \$500,000.00 Bonds, each of \$1,000.00 denomination, issued according to By-Law 121, expiring May 1st, 1951, with interest coupons attached, bearing interest at 6 per cent., payable half-yearly, May first and November first, at the Bank of Hochelaga, St. Lambert or Montreal, or at the Canadian Bank of Commerce, Toronto.

Tenders will be taken into consideration at the regular meeting of City Council Monday, June 6th, 1921, at eight o'clock in the evening, at the City Hall.

Every tender must be under sealed envelope, and delivered at the City Hall up to 8 p.m. June 6th, date of meeting.

The Council shall not be obliged to accept any tender.

JAMES R. BEATTY,  
Secretary-Treasurer.

City Hall, St. Lambert, May 18th, 1921. 574

## Condensed Advertisements

"Positions Wanted," 3c. per word; all other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 65c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent. extra if charged.

**PARTNERSHIP.**—A large Toronto Investment House (private corporation), comprised of prominent financial men, will admit another partner on equal basis with present members. Must be experienced financially, of mature age, with pleasing personality, in a position to actively associate and assume vacancy on Board. Business with a net of \$60,000 in hand this year. Partnership under \$5,000 (reasonable terms) not considered. Replies confidential. Banker, Box 411. *Monetary Times*, Toronto.

## THE BRITISH COLUMBIA FIRE UNDERWRITERS' ASSOCIATION\*

Description of the Organization and Its Work—Some Recent Changes—How a Fire Insurance Rate is Made, and Why Premiums Are High in British Columbia Cities

By J. L. NOBLE

Secretary, B.C. Fire Underwriters' Association

**T**he British Columbia Fire Underwriters' Association, like all other organizations of a similar nature, has been established by the fire companies. Not for the purpose of increasing premium rates, thereby adding to the burdens of the insured, or as "evidencing a compact or trust" as is sometimes unjustly and senselessly declared; but for the purpose of estimating fair and equitable rates for fire insurance and to furnish municipalities, owners of property, insurance companies or agents, with information and advice as to measures to be adopted for the reduction of the fire hazard in this province, and lessening the cost of insurance thereon.

A great deal of time is occupied by the public, and sometimes by insurance agents, in unreasonable criticism of this enterprise and in the fighting of an imaginary "Trust" and "Combination." Were half the time employed in seeking the advice of rating bureaus and benefiting by their scientific knowledge in the construction of buildings and the installation of protective devices, the "burden of insurance taxation" would be reduced by a very gratifying percentage and a saving of the people's money.

### Work of the Association

The work and objects of the Association are very clearly defined in the Constitution and By-laws. The operations are quite broad in scope and diversified. The chief object in the fixing of equitable fire insurance rates to hazards and the promotion of the best interests of the public generally in all matters relating to fire insurance.

Rates are based on the experience of its members and various departments are maintained for the inspection of buildings, waterworks systems, fire departments and appliances, electrical and other fire hazards. Fire prevention has a prominent place in the functions of the bureau in the encouragement of improved building construction and protective features. By the operation of this organization, considerable reduction of expense in transacting the bureau of the companies is brought about through co-operation in survey and inspection work, also in quite a number of other ways, all tending to reduce the cost of fire insurance and to secure a reasonable profit for members. Another important duty which has recently been added in the making and revising of insurance plans, by maintaining a stamping department, policy wordings and covering documents are regulated, thereby obtaining uniform rates and forms. The Association endeavors to prevent rebating and other undesirable practices.

To properly carry on the work of the office, certain committees and departments are maintained. British Columbia is unique on the American Continent, because of the fact that business is reported to so many centres outside of the province, for a particular jurisdiction. In most of the Associations the control of the companies' business is at the place where the rating bureau has its office, but in British Columbia business is reported by certain agents to Winnipeg, Toronto, Montreal, London, Eng., New York, Hartford, Springfield, Chicago, San Francisco, and other centres.

### The Advisory Committees

It is necessary that all companies, who are members of the Board, have a voice in the affairs of that organization, and it has been found necessary to maintain what are known as Advisory Committees. The companies whose business is reported to Toronto and Montreal have representation there. Those whose business is reported to San Francisco have a similar committee at that place, and those whose business is

reported elsewhere have the liberty of being represented on the British Columbia wing. Out of a total of 116 active members, 68 have representation on the local committee.

You will readily appreciate that it is impossible for the Association, as a whole, to have a common meeting place, so that with the merging of the Vancouver Island and the Mainland Associations, head offices were desirous that a central committee should have power to deal with practically all matters affecting their interests, and each of the various Advisory Committees elect, to this committee, which is known as the Administration Committee, four representatives, making a committee of twelve, who act on behalf of all the companies. This committee acts in the same capacity as a board of directors in an insurance company, and their chief duties consist in formulating rules and assisting the Secretary to carry on the work of the Association.

In the office itself there are the following departments: Executive, Rating, Stamping or Examining, Engineering, Electrical and Plan. A printing office is maintained to facilitate the work, and a branch office at Victoria having jurisdiction over Vancouver Island.

### What Various Departments Do

We might now consider some of the phases of the work carried on in some of the various departments. The rating department could be considered as the most important one that is maintained. If the various companies were not members of a board, it would be necessary to have in their employ many persons, whose duty it would be to personally inspect every risk the company was offered before a rate could be determined, otherwise it would be necessary for the various agents to do this work for them. When you consider that it takes years of experience and continuous study to ascertain the hazards and intelligently determine a commensurate price which should be paid, it will be appreciated that it would be practically impossible to couple this duty with those the agents have at present.

In the study of any branch of insurance, and especially that of rate making, so many elements are found to demand attention, and so many factors force themselves into prominence, that it is difficult, in a short space of time, to really give a clear and concise statement as to how rates are actually made. It is at this point that difficulty is encountered in the clear exposition or extent of the intricate task of a rate maker and the full function of a rating bureau.

It is a small part of the fact to state that there are more than 150 features of construction in a single risk, which must be fully analyzed and measured, irrespective of over 75 features of city government and environment, more than 100 fire appliances, to say nothing of 2,000 and more possible hazards of occupancy, exposure and various means of heating and illuminating, each modified or increased by the use or non-use of automatic protective devices known to modern fire prevention.

### The Rate Maker

The rate maker must have good intelligence and special education along the lines of such items as building construction, chemistry, electricity, hydraulics, and other sciences, coupled with an experience in the field of a good many years, before he is considered a man capable of inspecting and rating the many different buildings and factories which are in existence to-day. In addition to all this, a knowledge of the history and inherent qualities of every piece of fabric entering the manufacturing channels of trade and commerce and the countless varieties of material used in modern construction, is essential.

Elaborate maps of various cities must be made. Test records kept of the capacity of water mains and hydrants and their various locations. Ordinances representing building and fire regulations must be studied. The efficiency or weakness of fire departments must be known, and numberless other items, each of greater or less importance, tabulated and persistently watched in order that the problem of measuring the fire hazard may be as nearly reduced to a science as the nature of the work will allow. In a word, the task of correctly measuring the fire hazard in order to fix a

(Continued on page 32)

INSURANCE LICENSES AND AGENCY NOTES

License has been issued to the Merchants Marine Insurance Co., Ltd., to transact in British Columbia the business of fire and automobile insurance. The head office for the province will be at Vancouver, and J. A. Young is the attorney for the company.

The American Equitable Assurance Co. of New York has been registered to transact in British Columbia the business of fire insurance. C. G. Hobson is attorney for the company, and the head office for the province is at Vancouver. This company has acquired the rights and property of the American Equitable Assurance Co. of New York, which was consolidated by agreement dated the 9th day of December, 1920, with the Manufacturers' Insurance Co. of America into a new corporation under the above name. The former company of the same name was previously licensed, but has now ceased to carry on business.

A new district has been created in Canada by the Metropolitan Life Insurance Co., New York, known as Vancouver South. This necessitated a new manager, and to this position M. J. Sweeney, deputy manager for Vancouver, B.C., has been promoted. The Vancouver District has lost James T. Fahay as manager, and L. D. Unger, deputy manager, Toronto East, Ont., has been appointed to fill that place.

Percy Halpenny has been appointed to the inspectorship of the Dominion Life for the Eastern Counties, with headquarters at Westboro, Ont. Other appointments announced by the company are: I. P. McNabb, M.A., has been promoted to the position of manager for Central Ontario, with headquarters in Peterborough. Robert MacInnes has been promoted to the position of manager for Northern Saskatchewan, with headquarters at Saskatoon. Fred. Graham, Moose Jaw, has been appointed branch manager of the new agency at Swift Current.

G. N. Clendening was recently appointed district manager of the National Life Assurance Co. at Niagara Falls, Ont. He is a prominent citizen, but has not hitherto been in the life insurance business.

Seitz and McEvenue, Ltd., insurance brokers, 26 Adelaide St. W., Toronto, have disposed of their business to Armour, Bell, Boswell and Cronyn, Ltd., whose offices are at 27 Wellington St. E., Toronto.

H. E. Bligh, a well-known fire insurance man in the west, has been appointed inspector of the Pacific Coast Fire Insurance Co., the Century Insurance Co., and the Vulcan Fire Insurance Co., with headquarters at Vancouver, B.C. Mr. Bligh formerly held a similar position with another company in Alberta.

A local branch of the Life Underwriters' Association of Canada has been formed at Owen Sound, Ont. S. J. N. Glazier, of the North American Life Assurance Co., has been chosen first president.

Counsel and Macphee, the well-known Winnipeg insurance firm, will represent the Motor Union Insurance Co., Ltd., in Manitoba. The activities of the company at the present will be confined to fire, automobile and liability insurance.

The Sun Life Assurance Co. of Canada announces the appointment of H. A. H. Baker as assistant manager for the Manitoba Division, with offices in the Lindsay Building, Winnipeg. Mr. Baker has had a successful executive experience, first with the Equitable Life Assurance Society, prior to their withdrawal of active operations in Canada, and more recently as joint manager for the city of Winnipeg, with the Sun Life of Canada. He now assumes more responsible duties in the larger field of operations by becoming assistant to D. J. Scott in the management of the company's interests in the province of Manitoba.

J. C. G. Armatage has taken over the management for the city of Winnipeg of the Confederation Life Association. In doing so he has accompanying him the field force of the Equitable Life, which withdrew from Canada in December, 1920. For the last few months he has been branch manager in the city of Winnipeg for the Sun Life.

### COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended May 13th:—

O'Brien Mine, 128,970; Coniagas Mine, 162,396; total, 291,366.

The following are the shipments of ore from Cobalt Station for the week ended May 20th:—

O'Brien Mine, 74,258. The total since January 1st is 2,807,296 pounds, or 1,403.6 tons.

On May 10 the Toronto courts dismissed the action of Robert L. Brock, trading under the name of the Globe Clothing Co., against the United States Fidelity and Guaranty Co., for compensation under a burglary policy. The lack of proper bookkeeping to show the exact amount of loss sustained and the fact that plaintiff had not told the insuring company of a previous robbery were the grounds upon which the dismissal of the action was based.

## THE BRITISH COLUMBIA FIRE UNDERWRITERS' ASSOCIATION

(Continued from page 28b)

just premium rate, is so great in its proportions as to tax the capacity of the ordinary intellect, and thus prevent a full appreciation of the technical training and endless work required in the solution of this all-embracing problem.

A rating officer, in carrying on his duties, which are almost of a public-spirited mission, has no room whatever in his work for selfish or personal interests to participate, while discrimination or favoritism, even if the motive existed, is something of a great rarity.

To those who are fully acquainted with all of the facts, they know that a rating bureau stands as a target between two opposing forces. The seller of insurance on one hand, desiring an adequate and just rate for his indemnity, and the purchaser on the other hand, demanding a lower charge for the protection. Despite contending factions, this office endeavors to work out their ever-pressing duty of carefully and intelligently measuring the hazard in order to determine the commensurate rate, and thus fulfil one of their chief objects, that of placing the cost of insurance on a just and equitable basis.

### How the Rate is Made

It might be interesting to follow the operations in the making of a rate, we will say in the City of Vancouver. Before the building itself is considered, the water works department in this office makes an exhaustive test and report upon the city's fire protective facilities. This report covers the city's entire water system, including the origin of supply, storage capacity, lay-out of the mains, number and proximity of hydrants, flow and pressure of water, size of the mains, spacing of the gate valves, and every other feature having the slightest influence whatever bearing on the subject. The status of the fire department naturally is of much importance. The qualifications and experience of the chief must be known, also what the personnel and discipline of his subordinates is, and the nature of their equipment; the apparatus of the department must be well known and tested.

The engineer must thoroughly inspect the police and telegraph alarm system of the city and learn the full measure of their reliability; also a general electrical inspection is necessary, the need of which arises from the fact that the wiring in many buildings, especially the older ones, is usually of an inferior and more hazardous nature, the science of electrical wiring having been in its infancy when the earlier types of buildings were erected. Another matter of utmost importance is that the bureau must keep thoroughly acquainted with municipal ordinances, and should know whether or not strict adherence to their provisions is required. In this is included all laws relating to construction, building of chimneys, heating plants and other features too numerous to mention. Topographical and climatic conditions of the city, you will realize, is another matter of importance. A city built on a level is easily seen to be more ideal in its topographical conditions, allowing of wider streets and alleys and more symmetrical structures, thus facilitating the probability of more correctly estimating and restricting the conflagration zone.

From all the data above mentioned, the key rate or basis rate is determined for the use of the entire city. The rate maker, being in possession of this key rate, proceeds to inspect the individual building, surveying the various features which enter into the actual rate itself. The time is too brief at the present to enter into any lengthy remarks as to the various schedules in use for different classes of construction and occupancy. For instance, there is a different schedule for determining the rate on buildings of fire resistive construction, one also for brick, and one for frame construction, others for the various special hazards and again others for long term business. It is necessary in rating a building to determine the hazard of the particular risk and also of those surrounding it. The aggregate hazards in or about group themselves under four general headings, namely:—

1. Construction
2. Occupancy,
3. Protection, and
4. Exposure.

any of which, if we were to explain in detail, would require a long talk in itself.

### Based on Physical Hazard

Those who have studied the schedules in any way will realize how extensive my remarks would have to be in order to thoroughly explain the matter. It is not sufficient that there be a schedule with certain charges included, but the rating officer must understand the processes and hazards involved, those carried on in the various risks. One day he may be called upon to rate a pulp mill, the next day a packing plant, and so on. Even after the building or plant has been thoroughly inspected, the owners might further augment the protection by installing automatic sprinkler equipment. This subject in itself is one which requires exhaustive study and special treatment.

Do not overlook the fact that rates are based on the physical hazard, and it is for this reason we find our rates high. When the public are prone to state that rates are high, they are justified in their statement, but at the same time they cannot, with any degree of fairness, lay the blame at the door of the insurance companies, because, after all, the insurance companies are not responsible for the lack of protection, or the utter carelessness which exists in many of our cities and communities, nor for the "jerry" built fire traps everywhere, conflagration breeders waiting for the right kind of a fire on the right kind of a night to wipe out even whole cities.

### Work of Engineering Department

In connection with the ratings, you will realize that the work of the engineering department is of considerable value. Their work is subdivided into branches also. They make the inspections of cities from which fire and water reports are published. They attend to the installation and examination of buildings and plants equipped with automatic sprinklers; electrical inspections; fuel oil installations and special risk inspections of large manufacturing industries. Four inspections are made each year of the sprinklered risks. The value involved in these risks alone in British Columbia is over twenty-five million dollars. After each of their inspections, reports are issued and mailed to the companies and the assured. They deal with, in detail, a list of deficiencies, together with recommendations, and this matter is taken up direct with the owners. They give advice to city officials with regard to public fire protection, and are endeavoring at all times to disseminate useful information.

The examining department is another important one; their duties consist in examining all insuring documents, such as daily reports, cover notes, endorsements and cancellations. This is the department which endeavors to see that the companies collect the proper premium, and that forms are acceptable. The form is just as important as the rate, because apart from the sense of security that a policy gives, it does not function properly unless correctly written, so you will see the necessity of carefully drawn wordings. It is not the proper service of our office to attempt to do the underwriting for head offices, but endeavor to see that no ambiguous phraseology is used, that no dual coverings exist, that proper segregations are made of items of insurance which are required under the tariff to be separately insured, to refuse objectionable clauses.

You will probably have realized by now that the functions of a rating bureau have some worth. It is not the intention to bore by any further lengthy remarks, but, however, there is one other department which I will touch on briefly, namely, the plan department.

In March, 1918, the Association added to its effectiveness by taking over the work of manufacturing insurance maps in this province. Since that time new maps have been made of Courtenay, Vancouver water-front, Ashcroft, White Rock and Nanaimo, and revisions of the following cities: Vancouver, Chilliwack, Kamloops, Kelowna, Marpole, Mission, Nelson, New Westminster, North Vancouver, Pentiction, Prince Rupert, Princeton, Rossland, Trail and Vernon. During the coming year new maps of Victoria will be made, also further revisions of maps in the City of Vancouver.

## PREFERENCES UNDER DOMINION WINDING-UP ACT

Civil Code of Quebec Cannot be Followed Where Winding Up is Under Dominion Act.

IN an appeal in the case of Welland Hotel vs. City of Montreal, to the Quebec Superior Court, contesting the distribution made to creditors by the liquidator of a company and claiming priority for certain claims, the appeal was dismissed, the Court holding that when a company in Quebec is being wound up under the Dominion Winding Up Act, the distribution of moneys must be made in accordance with that Act and not under the Civil Code of Quebec, and that where a liquidator has been duly authorized to carry on a company's business, whereby certain assets have been realized, the expenses of the employees, the fees of the liquidator and inspectors, the costs of the attorneys, the costs of the first seizure and the rent during the period of liquidation, all have preference under the Dominion Winding Up Act to any claims by the City Corporation for water rates and business tax.

The Superior Court dismissed the contestation of the City of Montreal for the following reasons: "The liquidator of the company had prepared a statement showing the distribution to creditors of the sum of \$10,278, realized by time. The City of Montreal contested this distribution. It alleges that it produced a claim of \$666, for water rates and business tax for the year 1917; that this claim is privileged, but was not placed in its proper class of creditors; that the claim of the contestant takes precedence of the fees of the liquidators and inspectors and all other expenses of the insolvent estate, other than those necessary for the inventory and the sale of the property, subject to the privileged claim of the contestant and for the distribution of the proceeds of the sale of the property.

"Considering that this is a matter of the liquidation of a joint stock company, and that such liquidation is governed by a Dominion statute, namely, the Winding-up Act, R.S.C. 1906, ch. 144; that ch. 144 contains, in the matter of the liquidation of companies with capital stock, special provisions which the Court shall apply before all other general laws and that it is only when this chapter is silent that recourse must be had to such general laws; that under the said ch. 144 the liquidator of such companies may under the authority of the Judge of a Court, carry on business during the liquidation of the company, if it is in the interest of the creditors to do so; that the liquidator has so carried on the business of the company up to November 22, 1907, the date on which he finally liquidated the assets of the company; that under R.S.C. 1906, ch. 144, sec. 92, "all costs, charges and expenses properly incurred in the winding-up of a company, including the remuneration of the liquidator, shall be payable out of the assets of the company in priority to all other claims"; that the contestant does not contest, in this case, the legitimacy and the quantum of the claims of the creditors as ranked in the statement, but only contests their ranking, claiming to have the right to rank before them and in preference to them; that all the claims so ranked are absolutely privileged under the said Act and are so even within the spirit of the common law, in view of the circumstances which surrounded their creation and that, therefore, the contestant's right to contest is ill founded both in fact and in law, the present statement of the liquidator, the costs, charges, expenses and debts constituting these claims having been contracted by the said liquidator in the general interests of the liquidation; consequently dismisses the contestation of the contestant with costs."

A special general meeting of the Toronto Stock Exchange will be held on June 1 to pass upon the application of J. K. Cronyn for leave to transfer his seat to Edward Cronyn, consequent upon the latter's election as a member, for which a ballot will be taken on the following day. The former has entered another line of business, after re-presenting the firm of Edward Cronyn and Co. on the floor for some years.

## SALE OF COMPANY PROPERTY

THE Saskatchewan Court of Appeal held in the case of National Trust Company vs. Gilbert, that as the sale price of certain lots is admittedly an asset of a company, the sale price does not cease to be an asset even if each director individually takes a portion for his own use, when he or they have not received authority from the company to do so, and, on an assignment being made by the company, the property in the money never having passed out of the company, the assignee is entitled to sue for its return.

The chief part of Mr. Justice Newland's decision follows: "The three defendants were the only members of the Saskatchewan Trading Company. They were also the directors of the company. The company owned two lots of land which it sold. The proceeds, after paying for the land, were divided by the three defendants amongst themselves. No dividend was declared, they simply divided amongst themselves certain assets of the company. They could not, in my opinion, make title to this property in that way, therefore the amount each one took out of the assets of the company would still be the property of the company, and each of the defendants would hold the amount he obtained in that way in trust for the company. The company has since become insolvent and has made an assignment for the benefit of creditors, and the assignee brings this action to recover the amount of the assets so disposed of.

"I think the assignee has the right to recover. The defendants, having no legal title to the assets of the company which they divided amongst themselves, have no right to retain the same, and must hand the same over to the assignee in order that it may pay the debts of the company. Having had the use of this money for some time, they should pay interest on the same at the legal rate."

## ASSESSMENT FOR SUCCESSION DUTY

By a decision handed down in the Supreme Court of British Columbia on May 12, in which judgment for the Crown was given in the case of the King against the United States Fidelity Co. and Lorenzo J. Quagliotti, Justice Gregory affirmed that succession duties must be paid on the amount of estate valuations sworn to for probate purposes, even though the estate has been over-valued, and it has been found impossible to realize upon it.

The Crown sued for payment of succession duty on the Victoria estate of the late Mrs. Patronilla Quagliotti, the action being tried here about two months ago. The estate, which included several old buildings in the city, as well as the Variety and Romano Theatres, was valued for probate in the sum of \$886,000, the duty on which came to \$44,287. The company gave a bond, in twice the amount of the duty, as surety for the executor, Lorenzo J. Quagliotti. The defendants pleaded that the estate had been much overvalued, and that it had never been possible to realize upon it. It was given in evidence that the estate had never realized enough, to pay for its upkeep; and that it had largely been sold for taxes. Evidence was submitted to show that a fair valuation would have been about half of that accepted for probate; and it was argued that duty should be reckoned on the amended valuation.

Justice Gregory agreed that the estate was overvalued, and thought that it was not worth more than \$500,000 in 1915, when the valuation was made. But he held that when the bond was executed both the defendants and the Crown believed it was to secure payment of the amount of duty on the actual valuation made for probate, which was accepted by all the parties; and he held that the company is responsible under the bond. Judgment for the plaintiff was given in the sum of \$14,287.50, with interest at 6 per cent. since May, 1915, the defendant company, upon paying the amount due, to stand in the place of the Crown as far as the amount of the duty is concerned.

# News of Industrial Development in Canada

**Another New Pulp Manufacturing Enterprise for Northern Ontario—Steel Corporation Confronted With Shut-Down Unless Employees Accept Wage Reduction—British Columbia Canneries Operate Only to Maintain Their Position in the Face of Wide Competition—Alberta Wool Growers Realized Favorably on 1920 Output**

CREATION of another industrial centre in Northern Ontario is indicated by a recent announcement concerning the establishment of T. S. Woollings Co., Ltd., a pulp manufacturing concern, on the Frederickhouse River, near Connaught Station. T. S. Woollings is president of the company, and the largest shareholder, and he states that the company will be entirely Canadian.

Seventy men have been at work clearing 150 acres of timber, and excavation is now under way, preparatory to the building of the rossing plant, saw mill and other buildings, which will represent an outlay of over a quarter of a million dollars. About 150 men will be employed at the plant when completed and about 3,000 men will be working for the company in the bush.

Although the Woollings Company has a large reserve of timber, it is the intention of the directors to purchase all pulp from the farmers. The yard limits will be large enough to contain 180,000 cords of pulpwood, and 200,000 ties. According to Mr. Woollings, electricity will be used at the plant, and the company will develop its own power to the extent of about 700 horse power. It is expected that the plant will be officially opened at the end of July of this year.

Connaught Station is a little village of about 400 inhabitants, but since the advent of this new company there has been a great deal of activity which will no doubt increase as developments take place. Another lumber enterprise, the St. Maurice Lumber Co., has a small rossing plant at the station, helping to give employment to a number of men.

## Mattagami Mill to Reopen

Owing to a slight improvement in the market for unbleached sulphite pulp, it is proposed to reopen the mills of the Mattagami Pulp and Paper Co., at Smooth Rock Falls, Ont. The plant has been closed for about a month, owing to dullness in the sulphite market, but some demand has been received, resulting in the decision to recommence operations. The plant is located on the Mattagami River west of Cochrane. The sulphite mill has a designed capacity of 45,000 tons per annum.

After being out on strike for two weeks, employees of the E. B. Eddy paper mills at Chaudiere have returned to work under the same conditions, and with the same rates of pay which prevailed prior to May first, on the understanding that if a reduction in wages is decided upon by the majority of the big mills in Canada and the United States, the reduction will go into effect in the local mills.

No change is announced from the Jonquieres and Kenogami, Que., paper mills, and there has been no report of any successful attempt being made to settle the labor troubles between the owners of the mills, Price Bros. and Co., and their employees. The company has written the union brotherhood stating that they would reduce wages 20 per cent., and hereafter wages will be reduced or increased in accordance with circumstances. They have received no reply.

## The Steel Industry

Interest in the steel industry in Canada is now being centered upon the attitude of the employees of the Dominion Steel Corporation in accepting a wage decrease of about ten per cent. The management of the company has told the men that it was doubtful whether under present conditions the plant could continue to operate at the partial rate it has been working since early winter. The only busi-

ness of a substantial nature in sight is a rail order from the Dominion government in anticipation of the needs of the railways, which the government was willing to place at the present time to relieve the unemployment situation. The amount of the order is fifty thousand tons, delivery of which would be required within the next four months.

In view of the falling market in steel, and the certainty of further reduction of rail quotations in the near future, this is the last chance for the company to obtain this large government order at the quotation the railway department has been offering. It is felt that further delay in closing with the department will mean that the order will not be placed at all this season.

Employees have been made familiar with the situation, and everything hinges upon their willingness to accept the wage reduction. Refusal to accede to the request of the management may result in the closing of the plant entirely, so that it is a case of "a half a loaf or none." About six months ago a wage reduction of 20 per cent., on existing rates was imposed, but it is pointed out that owing to the fall of the steel market since, rails could not be rolled with any margin whatever above cost, unless there was a general wage reduction in all departments.

## Curtailement of Salmon Pack

Reference was made in these columns recently to a reduced operation of the canneries in British Columbia. In the face of the present unfavorable market, cannerymen explain, many of the plants prefer to shut down altogether rather than run the risk of operating at a loss. The wartime demand, when the armies were calling for food, and the peoples of Europe were buying fish for want of the opportunity to get other foodstuffs, ceased with the war, and last year, when the plants were in full swing all season, the lower grades, the pinks and the chums, were left on the hands of the cannerymen or of the banks, and remain there yet. Close to three-quarters of a million cases are still in stock awaiting a favorable market.

Canneries that have decided to get under way as usual are doing so, it is claimed, not with any anticipation of profiting by the season's operations, but chiefly through a wish to maintain their position in the face of wide competition, and to be in readiness for a possible picking up of the market next year. Output will be restricted to the canning of sockeyes only, and the poorer grades of fish will be left undisturbed.

With the falling away of the European demand, cannerymen realize that the period is one of readjustment, but point out that they are hampered by the fact that wages and supplies are much slower to drop than should be expected. Fishermen, accustomed to the recent prosperous years, in the course of which they would clear \$1,000 for the work of a season lasting only two or three months, are fighting any reduction, while at the same time operators are finding that tin plate and boxes are as high priced as ever. The contracts for tin plate were in most cases made last fall, before there were any intimations of a falling market.

Total shipments of wool by Alberta producers in 1920 amounted to 1,465,844 pounds, and the average price per pound net f.o.b. shipping points was 28.83 cents, according to a report by N. T. Macleod, secretary of the Southern Alberta Wool Growers' Association. Canadian Co-Operative Wool Growers', Ltd., Toronto, handled the whole output. In view of the universally depressed wool market, it was thought that flock owners realized very well.

## INSURANCE LICENSES AND AGENCY NOTES

License has been issued to the Law Union and Rock Insurance Co., Ltd., to transact in British Columbia the business of automobile, burglary and plate-glass insurance, in addition to accident and sickness insurance for which it is already licensed.

The Canada National Fire Insurance Co. has been registered to transact in the province of Quebec, the business of fire insurance. H. M. Brown, 9 St. John St., Montreal, is the chief agent for the province.

W. W. King, manager in the prairie provinces for the Mutual Life of New York, has been offered and accepted the post of joint manager for the province of Ontario with head office in Toronto. A. E. Donovan, who, for a number of years was a member of the Ontario legislature representing Brockville, is the other manager for Ontario.

J. A. Campbell Colvil has been appointed special agent in Montreal for the Niagara Fire Insurance Co. Mr. Colvil has had considerable experience in marine insurance both in Scotland and Canada.

Wm. F. Sangster has been appointed branch manager for the province of British Columbia, of the General Accident Insurance Co. of Canada, with headquarters at Yorkshire Building, Vancouver. Mr. Sangster came to Canada twelve years ago from Glasgow. For some years he was inspector in Ontario for the London and Lancashire Guarantee and Accident, moving to Vancouver in 1918 to become manager of the insurance department of the Northern Securities, Ltd. This position he resigned to become resident inspector for the Queensland Insurance Co., prior to his present appointment.

Thomas H. McWhirter, provincial manager of the Merchants Casualty Accident and Life Insurance Co. for Alberta, has been promoted to the managership of the Eastern Canada division, with headquarters at Toronto. His territory will be from Winnipeg East. Mr. McWhirter's promotion is the result of his firm expanding its policy and taking in many new lines of insurance, of which Mr. McWhirter has had experience. H. R. Harris, who has been with the company for several years, will become field manager for Alberta, and the office managership will go to A. Cormack, another employee of long standing.

## The Mutual of Canada Day by Day

During the year 1920 the average payments in benefits of different kinds to beneficiaries and policyholders amounted to \$11,500 for every working day throughout the year, a total of \$3,492,830. Every year the payments have increased, the total made since the establishment of the company being over thirty-three millions. The funds on hand to guarantee future payments amount to forty-two millions—so that the company has either paid or holds in trust more than \$75,000,000. This total exceeds the premium income by eight millions. These figures show that the Mutual Life of Canada is making good on all contracts entered into in past years. It is not only "making good," it is "making better," for the profits alone actually paid during the years since establishment amount to eight millions of dollars, a record of economy and service of which any life office might justly be proud.

# News of Municipal Finance

General Increase in Tax Rates for 1921—A Few Reductions Are Reported, While Some Cities Have Maintained the Level of the Previous Year—Brantford Had Small Revenue Deficit—A Substantial Credit Balance for Montreal—Manitoba Has Taken Two Delinquents Under Its Wing

IN presenting their budgets for the current year very few municipalities have been able to show lower requirements, and, as usual, the burden must rest upon the taxpayers. Some cities have managed to keep 1921 tax rates down to the level of the previous year, while in a few isolated cases there have even been declines. But it might be well to mention here that in such instances increasing assessment valuation enters largely into consideration. A point in illustration is Brantford, which shows a decline of one mill in tax rate while expenditures increased by about \$115,000. This was made possible by an increase in assessment from twenty-one to twenty-five million dollars.

Perhaps one of the most important factors in regard to the increasing tax rate is the growing debt charges which most of our municipalities are facing. During the past two years municipal borrowings have been heavy. Capital expenditures, which were delayed during the war period, of necessity had to be undertaken, and with the rapid rise in debt, larger appropriations are necessary each year for interest, sinking fund and annual payments where the debentures are of the instalment type.

The following table, which has been compiled by *The Monetary Times*, although not very complete, is fairly representative of the situation throughout the country, and illustrates just how the expenditures of our municipalities stand this year in comparison with 1920:—

	1921. Mill rate.	1920. Mill rate.
Orillia, Ont. ....	46	47
Oshawa, Ont. ....	40	37.50
St. Thomas, Ont. ....	34	34
Peterboro, Ont. ....	36.30	35
Port Arthur, Ont. ....	41	37
Niagara Falls, Ont. ....	38.60	32.50
Gananoque, Ont. ....	47	42
Brantford, Ont. ....	39	40
Brockville, Ont. ....	37.50	37
London, Ont. ....	38.80	40
Sarnia, Ont. ....	39	36
Fort William, Ont. ....	39	36
Toronto, Ont. ....	33	30.50
New Westminster, B.C. ....	36	36
Galt, Ont. ....	38	39
Regina, Sask. ....	43	37
Saskatoon, Sask. ....	46.55	40.40
Moose Jaw, Sask. ....	46	41.60
Nanaimo, B.C. ....	48	43
Walkerville, Ont. ....	32	32
Melville, Sask. ....	57	53
Calgary, Alta. ....	48.50	45.75
Winnipeg, Man. ....	30	22.50
Oak Bay, B.C. ....	31.25	25
Saanich, B.C. ....	20	20
Edmonton, Alta. ....	39.90	45
Victoria, B.C. ....	29	26
Quebec, Que. ....	\$1.40	\$1.40
Sydney, N.S. ....	3.50	3.50
Glace Bay, N.S. ....	5.50	5.50

As interesting as the above figures are, they would be more so if the comparison was extended farther back. While it is not possible to go into detail here of the changes which have taken place in the various municipalities in recent years, one is sometimes able to get a rough idea from a simple illustration.

Administering Winnipeg civic government this year is costing 280 per cent. more than it cost in 1909, the first year in which the present business tax was imposed. The population of Winnipeg increased 60 per cent. In the same period

the general assessment increased 128 per cent. and the business tax collections expanded by 113 per cent. In 1909 there was a realty tax rate of 15 mills, which was based on outlays aggregating \$2,255,981, while the 1921 rate of 30 mills is based on outlays of \$8,582,669. The rateable assessment in 1909 was \$107,997,320, as compared with \$238,677,000 in 1921.

Per capita realty tax levy for Winnipeg's 33,721 ratepayers this year is estimated at \$213, exclusive of water district levies. The amount raised by realty taxation in 1909 represented \$13.23 for every person in the city at that time. The amount to be raised by realty taxation this year represents a per capita outlay of \$36.86 covering the general population.

**Montreal, Que.**—Revenue totalling \$34,721,199 passed into the treasury of the city during the year ending December 31, 1920, according to a statement of the civic finances which has just been prepared by the city controller. Expenditures during the year amounted to a total of \$33,991,245, leaving a credit balance of \$729,954 on hand January 1, 1921.

**Victoria, B.C.**—The sum of \$2,290,888 is the estimate for this year's outlays, which is about \$160,000 in excess of 1920. The city debt makes up nearly one-quarter of the total, or \$517,537, but the biggest single item is for education, which will cost the city approximately \$562,000, if all the money asked for that purpose is spent.

**Calgary, Alta.**—The city council has passed the minimum service tax. The tax will apply to all citizens who do not pay taxes of any other kind. Single people up to \$1,000 and married people up to \$2,000 income will pay \$5, and over that amount will pay \$10. Soldiers will be exempt up to \$1,000 and \$2,000, and their pensions will not be included in income. Married women will be taxed if they earn separate incomes.

**Manitoba.**—The provincial government has taken charge of the finances of Assiniboia and St. James municipalities. The government has guaranteed pressing liabilities of the municipalities, and will supervise all expenditures until they are on a more stable basis. All cheques issued by the municipalities must be approved by the government, and already the expenditures have been decreased by \$50,000 in St. James and by an appreciable extent in Assiniboia.

**Brantford, Ont.**—There was a deficit for 1920 of \$6,875, total revenue being \$1,099,497, and total expenditure, \$1,106,375. Civic utilities, however, had a surplus of \$8,222. The city owns three utilities, namely, waterworks, street railway and Hydro-Electric. Revenue from these last year amounted to \$460,443 and operating expenses, \$316,831. The sum of \$110,038 was appropriated for debt charges and \$25,352 for depreciation, leaving the surplus as above.

The gross debenture debt of the city at the end of 1920 was \$4,059,511, as compared with \$4,098,234 at the end of 1919. The net general debenture debt at the end of last year was \$3,124,107, as against \$3,202,905 previously, and is summarized as follows: General debenture debt, less sinking fund, \$2,057,782; city's share of local improvements, less sinking fund, \$309,183; ratepayers' share of local improvements, less sinking fund, \$757,139. The sinking fund totals \$935,401, as compared with \$895,328 at the end of 1919. Previously it was shown that the amount required for interest was \$196,859, but the 1920 statement gives the figure as \$197,639.

At the beginning of 1920 the balance sheet showed a surplus of assets over liabilities of \$480,358. By the end of the year this had been increased to \$559,285. Under current assets it is shown that the balance of 1920 taxes unpaid was \$13,139, but this has since been realized upon. Tax arrears are comparatively small at \$21,467.

**"FOREIGN INVESTMENT"**

Canadian investors would do well to study the opportunities now available in Foreign Government and Municipal bonds.

Now that the Reparation question has been accepted by the German Government, we anticipate further activity and increased prices.

The market already shows an upward move and investors would do well to give immediate consideration.

# Government and Municipal Bond Market

Four Provincial Issues Were the Centre of Attraction This Week—Manitoba Made One Loan in Canada and Another in the United States—Victory Bonds Were Mostly Stronger—Hamilton Citizens Are Subscribing for Their Own Debentures—Two Quebec Municipalities Are in the Market for Funds

LAST week was an interesting one in the bond market, four provincial issues being the centre of attraction. As was anticipated, and hoped, the Manitoba issue of \$2,000,000 was purchased for United States disposal, but the province also sold another large block, with which the Canadian market will now have to contend. It was hoped that the Manitoba bonds would go to the United States market, for the reason that it would relieve the Canadian situation somewhat, so that the additional issue has come at a rather unfortunate time.

It is not hard to see how interest rates have stiffened lately, as a result of the numerous and large blocks of securities which have been sold by our provinces and municipalities, and with Toronto's \$5,000,000 and others yet to come, rates will no doubt harden still further, for there are still some large amounts of recent issues that have not been digested. Victory bonds were mostly stronger, as the following table will show:—

	Control price.	Close Jan. 26.	Close Mar. 2.	Close May 18.	Close May 25.
1922 .....	98	98¾	98¼	98.50	99.20
1927 .....	97	98	97½	98.00	98.00
1937 .....	98	99¾	99¾	99.00	99.15
1923 .....	98	98%	98	98.10	98.25
1933 .....	96½	98	98%	97.35	97.00
1924 .....	97	96¾	96¾	97.60	96.50
1934 .....	93	95¼	95¾	94.95	95.00

The \$2,000,000 issue of Manitoba is now being sold in the United States to yield investors a little over 7.20 per cent. In April Manitoba bonds were selling in the United States to yield 7% per cent. The Canadian issue is being offered at 98.29, to yield 6.15 per cent.

Edmonton's securities, on which Messrs. Wood, Gundy and Co. hold an option, are being offered at a price of 99, to yield 7.10 per cent. The Dominion Securities Corporation, holding an option on \$1,000,000 of Alberta 6's, and these are being advertised to yield 6.25 per cent., which is the same rate as the issue which was made in April.

Reference was made in these columns last week concerning Newfoundland's \$4,500,000 loan. On account of the good demand for these bonds in New York, the issue was increased to \$6,000,000. It is understood that a small block was disposed of in Canada to yield the investors 6.10 per cent.

## Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Renfrew, Ont. ....	\$ 42,404	Var.	Various	May 31
Toronto, Ont. ....	5,000,000	6	Serials	June 1
Alameda, Sask. ....	6,500	8	10-instal.	June 1
Lac du Bonnet R.M., Man. ....	10,000	..	.....	June 1
Wallace R.M., Man. ....	11,120	6	Serials	June 3
Saskatoon, Sask. ....	204,000	5 & 6	Various	June 6
St. Lambert, Que. ....	500,000	6	30-years	June 6
La Tuque, Que. ....	300,000	6	5-years	June 6
Westbourne R.M., Man. ....	60,000	6	30-instal.	June 7
Vermilion, Alta. ....	10,000	7	20-instal.	June 11

Wallace R.M., Man.—Offers will be received until 6 p.m., June 3, 1921, for \$11,120.11 6 per cent. bridge debentures,

which mature from May 1, 1929 to May 1, 1937. W. Whiteford, secretary-treasurer.

St. Lambert, Que.—Tenders will be received up till 8 p.m. June 6, 1921, for the purchase of \$500,000 6 per cent. bonds, maturing May 1, 1951. Securities are in denominations of \$1,000. (See advertisement elsewhere in this issue.)

Lac du Bonnet R.M., Man.—An issue of \$10,000 good roads debentures, being the first part of a total issue of \$50,000, is being offered for sale, and tenders will be received until June 1, 1921. The debentures are in small denominations. W. D. Halliday, secretary-treasurer.

La Tuque, Que.—Tenders will be received until June 6, 1921, 5 p.m., for the purchase of \$300,000 6 per cent. debentures, dated November 1, 1920, and maturing five years from that date. Interest is payable semi-annually, May and November, and the securities are in denominations of \$100 and \$500. (See advertisement elsewhere in this issue.)

## Debenture Notes

York Township, Ont.—The council has passed a by-law to provide for the issue of debentures to the amount of \$80,000 for school purposes.

Regina, Sask.—As soon as ratepayers have approved of the issue of \$213,054 debentures, for various local improvements, tenders will be called. Voting takes place on June 14 next.

Edmonton, Alta.—On June 15 next, ratepayers will be asked to vote on the following by-laws, which have been approved by the council: \$275,000 7 per cent. 20-year debentures, for equipment for power plant; \$168,828 7 per cent. 20-year debentures, for extension to civic telephone system; \$38,000 7 per cent. 20-year debentures, for street pavement construction already completed; \$28,000 7 per cent. 8-year debentures, for boulevard construction already completed.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from May 7 to 14, 1921:—

Schools.—8 per cent.—Kilmory, \$3,800 10-years annuity; Ernfold, \$3,000 10-years annuity; Schmidtsburg, \$1,000 8 instalments; Blackley, \$1,200 10-years annuity; Fortuna, \$5,700 15-years annuity; Westview, \$3,500 10-instalments.

Rural Telephones 8 per cent. 15-years annuity.—Manitou Lake, \$4,800; Darwin, \$600; South Maymont, \$700; Tableland, \$1,000.

Village of Earl Grey, \$2,000 8 per cent. 10-instalment, for sidewalks.

Nipawin R.M., \$3,000 8 per cent. 10-instalment, for Red Cross outpost.

City of Regina.—\$20,571 for sewer extensions; \$46,722 for water extensions; \$25,000 for comfort station; \$22,335 for sewage disposal works; \$8,225 for plank sidewalks; \$102,000 for electric light extensions. These are 6 per cent. sinking debentures, payable from 5 to 30-years.

## Bond Sales

Medicine Hat, Alta.—Emilius Jarvis and Co. have purchased through private sale a \$40,000 bond issue of the city. The bonds bear interest at 6 per cent., and are payable in New York. At the purchase price of 87.83 the cost basis is 7.15 per cent.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from May 7 to 14, 1921:—

School Districts.—Irvington, \$500 8 per cent. 5-years; to M. Gannon, of Star City. Halicz, \$1,500 8 per cent. 10-years; to C. A. Broads, of Wynyard.

Hillsborough R.T., \$800 8 per cent. 12-years; to Nay and James, Regina.

Hamilton, Ont.—During the past few days citizens have subscribed for \$60,000 worth of city debentures, ranging from five to twenty years, and bearing interest at the rate of 6½ per cent. City Treasurer W. H. Davis ever since assuming office strongly urged the absorption of local debentures by citizens. The latest parcel of debentures included a block of \$63,000 for improvements to the West Avenue School, and \$70,000 for extensions to the waterworks system. It is expected that the balance of the issue will soon be absorbed.

Owen Sound, Ont.—The National City Co., Ltd., have purchased \$74,714 6 per cent. 15-year local improvement debentures at a price of 96.61, which is on about a 6.37 per cent. basis. McLeod, Young, Weir and Co. was a close second with a bid of 96.59. The list of tenders is as follows:—

National City Co., Ltd.	96.61
McLeod, Young, Weir & Co.	96.59
Dyment, Anderson & Co.	96.07
C. H. Burgess & Co.	96.03
A. E. Ames & Co.	95.81
Dominion Securities Corp.	95.76
T. S. G. Pepler & Co.	95.72
Canadian Debentures Corp.	95.63
Brent, Noxon & Co.	95.41
R. C. Matthews & Co.	95.11
Wood Gundy & Co.	94.64
United Financial Corp., Ltd.	94.375

Manitoba.—Two issues were disposed of by the province this week. One was for \$2,000,000 payable in the United States, and the other was for \$2,530,000 payable in Canada only. Both bear 6 per cent. interest, and the former matures in 10 years and the latter in 20 years. The province called for alternative bids for \$2,000,000 6 per cent. 10-year bonds payable in America and 20-year bonds payable in Canada only, and the following offers were received:—

20-year Canadian bonds.

A. E. Ames & Co., United Financial Corp., Ltd., and R. C. Matthews & Co.	96.55
Dominion Securities Corp.	96.331
C. H. Burgess & Co., McLeod, Young, Weir & Co., Canadian Debentures Corp., Ltd., Macneill, Graham & Co., and Nesbitt, Thompson & Co.	95.813
Wood, Gundy & Co.	95.78
Harris, Forbes & Co., Inc., and National City Co., Ltd.	95.42
A. Jarvis & Co.	94.66
W. A. Mackenzie & Co., and R. A. Daly & Co.	94.27

10-year American bonds.

Wood, Gundy & Co., National City Co., and E. H. Rollins & Sons	99.29
Halsey, Stuart & Co., First National Co., and the Minnesota Loan & Trust Co.	99.178
W. A. Mackenzie & Co., and R. A. Daly & Co.	98.84
Harris, Forbes and Co., Inc.	98.764
A. E. Ames & Co., Blair & Co., Kissel, Kinnicutt & Co., and Illinois Trust & Savings Co.	98.70
Dominion Securities Corp.	98.441
A. Jarvis & Co., Continental Trust Co., and Wells-Dickey Co.	98.05
United Financial Corp., Ltd., and the Bankers Trust Co.	97.691

The highest bid for the 10-year issue was considered the best and the award was made accordingly, the province thereby paying, for the present at least, about 6.09 per cent. for its money, computing on the price paid in Canadian funds, which was 99.29.

Later, the province decided to make another issue, and arrangements were made with the syndicate which bid the

highest for the 20-year bonds, and \$2,580,000 6 per cent. securities of that maturity were taken up at the price of 96.55, which means that the province would pay about 6.31 per cent. for its money.

The \$2,000,000 block is for refunding treasury bills, and the other is for meeting part of capital expenditures passed at the last session of the legislature.

Lethbridge, Alta.—Wood, Gundy and Co., and the Dominion Securities Corporation, have been awarded \$2,400,000 6 per cent. 20-year bonds of the Lethbridge Northern Irrigation District at a price of 93.71, which is on about a 6.48 per cent. basis. The bonds are guaranteed by the province of Alberta, and are payable in Canada and New York.

Pembroke, Ont.—C. H. Burgess and Co. have been awarded \$80,324 6 per cent. 10, 20 and 30-year debentures, at a price of 95.662. Tenders were as follows:—

C. H. Burgess & Co.	95.662
Wood, Gundy & Co.	95.08
A. E. Ames & Co.	94.69
R. C. Matthews & Co.	93.61

CREDIT MEN'S TRUST ASSOCIATION

At the annual meeting of the Canadian Credit Men's Trust Association held in Winnipeg on May 19, new directors were elected as follows: J. M. Coutts, of Campbell Bros. and Wilson; D. J. Grant, Western Canada Flour Co.; F. W. Burrage, McClary Mfg. Co.; F. Burt, John W. Peck and Co.; H. W. Asleton, Thomas Ryan and Co.; F. W. Roach, St. John, N.B.; D. A. Clark, Clark Brothers and Co.; Thomas W. Leary, Toronto; J. L. Hiltos, Moose Jaw, Sask.; James Perry, Codville Co., and John M. Doyle, Vancouver, B.C.

In addition to the new directors the following will serve for another year: J. J. Corbett, Miller, Morse Co.; R. W. Pollock, Dominion Rubber Co.; C. E. Rowed, National Drug and Chemical Co., and T. E. Howald, of Gaults Ltd. Herbert Reade and Co. were appointed auditors for the ensuing year.

CHANGES IN STEAMSHIPS DIRECTORATE

At the annual meeting of the Canada Steamship Lines, Ltd., in Montreal this week, several important changes were made in the directorate. H. W. Cowan retired from the position of director of operations to become president of G. U. Price and Co., Ltd., the well-known English insurance corporation, and the vacancy thus caused was filled by the appointment of Dr. W. L. McDougald, president of the Century Coal Co., in which the Steamship Lines is interested. The vacancy caused by the retirement of Sir Henry Pellatt was filled by the appointment of Tancrede Bienvenue, vice-president and managing director of the Banque Provinciale.

F. S. Isard, formerly comptroller of the enterprise, takes over the general management from J. W. Norcross, who retains the president's office. During the year Roy M. Wolvin succeeded C. A. Barnard, K.C., retired, so that the board of the coming year consists of J. W. Norcross, F. S. Isard, W. E. Burke, H. H. Smith, D. B. Hanna, J. P. Steedman, Geo. H. Smithers, Hon. J. P. B. Casgrain, J. E. Dalrymple, Edmund Bristol, Frank Carrel, M. J. Haney, Roy M. Wolvin, Dr. W. L. McDougald, and Tancrede Bienvenue.

"Canada's Northern Oil Fields" is the title of a pamphlet just issued by the New York agency of the Union Bank; copies may be secured on request. It relates the discovery of oil at Fort Norman, describes the geology of the region and discusses the economic significance of the discovery. In conclusion, it is pointed out that while the Mackenzie fields are in their infancy, and while their development is no poor man's game, yet success is likely.

CORPORATION SECURITIES MARKET

Slight Reaction in Canadian Stock Prices—Ten Per Cent. Bonus Declared on Burt Common—Acadia Sugar Shareholders to Decide on New Bond Issue

**T**HE healthy optimism which started to make its appearance in the Canadian stock markets recently, was somewhat diminished this week, and many issues which had made advances suffered slight reaction. As far as can be seen home news was not any worse; in fact, there were some factors which should have acted favorably upon prices, but which only affected those issues which were directly involved.

Declaration of a ten per cent. cash bonus on Burt common was interpreted as being a singular case and not applicable to general conditions. The rise in Dominion Textile on the report of the approach of some attraction to shareholders was very limited in its effect. In reality, there is no reason why the good position of Dominion Textile or F. N. Burt should affect other companies, but when it is considered how adverse events of this nature are casting their influence upon the whole market, it is rather hard to find why sentiment does not improve on favorable reports.

When it was announced that the Mattagami plant would reopen, Riordon common made an effort to regain some of its recent losses, on the strength of the belief that the improved demand for sulphite would soon be felt by the Riordon Company, which had closed down its sulphite plant for lack of demand. A setback was encountered, however, when it was learned that subscriptions to the new financial scheme were not being received fast enough, and that unless shareholders got behind the company in its present difficulties, reorganization would be inevitable. This likewise cast its shadow over the paper section, although the weakness in pulp and paper securities can be attributed largely to the condition of the industry as a whole.

Influence to the Canadian stock prices from outside was distinctly unfavorable. Weakness of foreign exchange in New York suggested that the European complications had not yet been entirely settled. New York stocks showed a decided weakness on the announcement of dividend adjustments by several companies, and the trend of prices indicated almost an entire loss of the bullish enthusiasm which was previously present.

Trading was less active, apart from the intervening holiday, the turnover for the week in Montreal being 31,651 shares of listed stock, as compared with 76,902 in the previous week, while on the Toronto exchange the turnover was 10,320 shares, compared with 12,558. Bonds changed hands to the extent of \$1,469,610 in Montreal, as against \$1,401,920, while the figure in Toronto was \$816,450, compared with \$1,170,100 previously.

F. N. Burt Bonus

Announcement was made this week by F. N. Burt Co. of a 10 per cent. cash bonus on common, in addition to the regular quarterly dividend of 2½ per cent. These will be paid on July 2, and are payable in New York funds. This

will mean a distribution to shareholders of Burt common of 20 per cent. for the year, or, after allowing for the premium on New York funds, it will be equivalent to possibly 22½ per cent. to those residing in Canada. The dividend on Burt common was increased from 8 to 10 per cent. in September, 1920, making 8½ per cent. paid during 1920, compared with 7½ in 1919, and 6 in 1918. As the Burt preferred is convertible into common, provision is made that any shareholder who may wish to convert and does so before June 30 will receive the new bonus on common stock.

The regular quarterly dividend on preferred stock was declared at the annual meeting of the Canada Steamship Lines, Ltd., this week.

An extraordinary general meeting of the shareholders of the Acadia Sugar Refining Co. has been called for Halifax on May 29th next, to consider a proposed issue of \$2,000,000 6 per cent. 10-year second mortgage bonds. The directors in a note accompanying the formal notice say that after careful consideration they have come to the conclusion that it is imperatively required for hypothecation purposes.

Securities of the British Empire Steel Corporation were listed on the Montreal and Toronto exchanges on May 23. The securities listed were: \$19,950,000 first preferred, series B, \$57,350,000 second preferred cumulative 7 per cent., and \$24,000,000 common. Trading was not very active and prices were slightly weaker. The old shares of Dominion Iron and Scotia will continue to be quoted as long as there is trading in them.

The available stock of Howard Smith Paper Mills, Ltd., was increased for trading purposes last week by \$1,000,000 worth, or 10,000 shares, making a total of \$4,000,000, or 40,000 shares. This was the new stock issued at par in November last, but not considered as paid up, and therefore eligible to be exchanged for script until May 15. An extension of time to June 2 has been given bondholders of Toronto Paper Mfg. Co., to exchange their 6 per cent. securities for the new 7 per cent. bonds.

The Shale Brick Co. of Canada, Ltd., Toronto, Ont., which is incorporated under a Dominion charter, has been authorized to increase its capital from \$1,600,000 to \$2,000,000 by the issue of 4,000 preferred shares. Supplementary letters patent have also been issued to the company authorizing the change of name to the Cooksville Shale Brick Co., Ltd.

The Heart Stoker Co., Ltd., which was incorporated last March under a Canadian charter, with a capital of \$2,000,000 and head office at Edmonton, Alta., will shortly sell stock publicly through R. J. McGovern and Co., Ltd., of Vancouver and Edmonton. The company, which owns the patent rights for Canada, United States, Australia and Argentine, for a machine known as a grain stoker and shoker, does not plan to erect a plant or office buildings at the present time, but intends to have parts made and the machine assembled at the most convenient points.

F. H. Manley and Co., investment bankers and bond dealers, have moved to new offices at 200a Transportation Building, Montreal.

## THE WEEK IN PARLIAMENT

## Grand Trunk Directors Nominated—Extension of Trade Commissioners' Work Forecasted—Much Discussion on Research Institute

(Special to *The Monetary Times*)

Ottawa, May 26, 1921.

Thursday, May 19

In House of Commons:—(a) Budget debate continued by Hon. W. L. Mackenzie King, Hon. Dr. Tolmie, Hon. Chas. Murphy, and Messrs. Sutherland, Stevens, Rinfret, Lalor, Gould, Seguin, Lafortune, Campbell and MacNutt; (b) Fielding amendment to budget calling on Government to make substantial reduction in expenditure before resorting to new taxation defeated by vote of 83 to 103, and main motion agreed to on same division reversed.

In Senate:—(a) First and second readings of following bills: One to incorporate Ensign Insurance Co., and one to amend and consolidate Quebec Steamship Co. Acts; (b) Third readings of following bills: Court of International Justice bill, Conservation Act repeal bill abolishing Commission of Conservation, bill respecting Central Railway Co. of Canada, and bill respecting Great West Bank of Canada; (c) Second reading of bill incorporating Quebec Union Electric Telephone Co.

Friday, May 20

In House of Commons:—(a) First and Second readings of bills from Senate, one respecting certain patents of Auto-graphic Register Systems, Ltd., and one to incorporate Edmonton and Mackenzie River Railway Co.; (b) First and second reading of bill respecting Central Railway Co. of Canada; (c) Passing of Customs and Inland Revenue resolutions.

In Senate:—(a) First and second readings Calgary and Fernie Railway Co.; (b) Third reading of bill to incorporate Fort Smith Railway Co.

Saturday, May 21

In House of Commons:—(a) First reading of Penitentiaries Act Amendment bill to enable industrial work to be carried on in penitentiaries on a larger scale, providing for Government departments getting all articles needed by them from penitentiary when produced there; (b) First readings of Senate bills, one to repeal the Conservation Act and amendments and another giving another year for the Great West Bank of Canada to fulfil the statutory provisions as to capital subscribed, etc.; (c) First reading bill to amend Special War Revenue Act; (d) Second and third readings of Inspection and Sale Act amendment bill concerning hay and straw inspection; (e) First readings of bill to permit permanently manufacture, importation and sale of oleomargarine, and of bill for better grading of dairy produce.

In Senate:—(a) Third reading of Bankruptcy Act amendment bill.

Monday, May 23

In House of Commons:—(a) Third readings of following bills: One to incorporate Edmonton and Mackenzie River Railway Co., one respecting Great West Bank of Canada, and one respecting Central Railway Co. of Canada; (b) Concurrence in Senate amendments to bill incorporating Fort Smith Railway Co., and a bill to amend the Bankruptcy Act; (c) Third reading of bill making in each year first Monday of week containing November 11th, Armistice Day, a public holiday; (d) Air Board estimates passed; (e) First reading of bill regarding Department of Customs and Excise, changing name from Department of Customs and Inland Revenue, providing for certificates of Canadian Trade Commissioners or Consular agents on invoices from foreign countries, providing for valuation for duty for customs purposes in certain cases, providing for valuation for Customs purposes of foreign currencies in certain cases and providing for licensing of Customs Brokers; (f) Immigration Act amendment bill and Criminal Code Amendment bill read second time.

In Senate:—(a) First reading Hay and Straw Inspection bill; (b) Third reading Animal Contagious Diseases bill providing for extension of provisions for compensation for animals destroyed on account of disease; (c) North-West Territories bill increasing Council to six members read third time; (d) First reading Lake of the Woods bill.

Tuesday, May 24

In Senate first sitting:—(a) Second reading Lake of the Woods bill, establishing control of Lake of the Woods waters in order to protect Winnipeg and Manitoba power sources.

Wednesday, May 25

In House of Commons:—(a) Third readings Chinese Immigration Act amendment bill, abolishing certificates of identification for Chinese merchants who can establish their bona fides, and Copyright bill.

In Senate:—(a) Third reading Lake of Woods bill; (b) Opposition by Senate to Research Council bill.

## Budget Measures Passed

On Thursday last the budget passed by a government majority of twenty. Since that time most of the bills based upon the financial proposals contained in the bill have been passed with a few amendments. The bill proposing to change the name of the Customs and Inland Revenue Department to that of the "Customs and Excise" department was noteworthy because of the plan suggested in it for the certifying by Canadian Trade Commission or consular agents of invoices from foreign countries. As this plan would provide a means of paying for keeping Canadian trade agents abroad, it is likely that it would be a prelude to the much-heralded scheme of placing a large number of Canadian trade agents in the United States.

The following were nominated directors of the Grand Trunk Railway: Sir Joseph Flavelle, Bart., Toronto; Howard G. Kelley, president Grand Trunk Railway Co., Montreal; A. J. Mitchell, vice-president Canadian National Railways; E. L. Newcombe, deputy minister of justice; and J. N. Dupuis, merchant, Montreal. These will be elected in place of five of the present directors to resign, then the remaining directors will resign, and the new directors will remain in charge for a short time until the calling into effect of the Canadian National Railways Act placing it under the Canadian National Railway directorate.

Other bills that drew great attention were those relating to the National Research Council and the repeal of the Conservation Act. The government has decreed the abolition of the Conservation Commission, hitherto regarded as the watchdog on Canada's natural resources, on the ground of duplication of services already existing in the Department of the Interior. The Senate is taking strong ground against the construction of a National Research laboratory for scientific research in the interests of Canadian industry.

## THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

## DIVIDEND No. 137

Notice is hereby given that a Dividend of Two and One-Half Per Cent. (being at the rate of ten per cent. per annum) on the amount paid up on the Capital Stock of this Company, has been declared for the quarter year to the thirtieth day of June, 1921, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the second day of July, 1921, to Shareholders of record at the close of business on the sixteenth day of June, 1921.

By Order of the Board.

EDWARD SAUNDERS,  
Managing Director.

Toronto, 25th May, 1921.

576

# Corporation Finance

## Riordon Company's Position is Further Outlined in Another Appeal to Shareholders for Funds—Tuckett Tobacco Company Had Lower Profits—Labor Trouble and Power Shortage Impaired Earnings of Dome Mines—Profits of British Empire Steel Corporation

**British Empire Steel Corporation.**—Combined profit and loss account of the companies merged under the above name, for the year ended December 31, 1920, as filed with the New York Stock Exchange last week for listing purposes shows profit, after government war taxes, interest depreciation and all other expenses of \$6,235,127. The detailed account follows:—

Sales and other revenues .....	\$69,681,342
Cost of sales, etc. ....	58,865,096
Balance .....	\$10,816,246
Interest .....	1,701,405
Depreciation .....	2,366,714
Government taxes .....	513,000
Surplus .....	\$ 6,235,127

This statement carries the figures one year later than the statement issued in March, and the balance sheet shows total assets of \$173,740,308, compared with \$168,736,285 at the end of 1919.

**Dome Mines, Company, Limited.**—Labor trouble and power shortage were two of the important factors which operated to impair the earning power of the company in the year ended March 31 last. Net profits amounted to only \$302,479, as compared with \$951,984 in the previous period. During the year the total of 289,789 tons was hoisted. Of this, 273,700 tons was ore which was sent to the mill and treated, and 16,089 tons was waste which was dumped on the surface. The 273,700 tons milled yielded bullion worth \$1,946,403, the average yield per ton being \$7,111. Against this were operating and maintenance expenditures of \$1,239,508, compared with \$930,762 in the previous year. The satisfactory financial position in which this mine stands is seen in the fact that the net excess of current assets over current liabilities amounts to \$1,539,161, compared with a working capital of \$1,253,025 last year. Total assets have increased to \$7,229,977, as compared with \$5,909,318.

The issued capitalization was increased during the year by \$766,670, due to the purchase of the Dome Extension property, and \$233,300, now remaining in the treasury as against \$1,000,000 a year ago. The total authorized capitalization is \$5,000,000, the same as at the beginning of the year, and of this \$4,706,110 is issued.

Operating costs showed an increase of \$1.08 per ton milled over last year, and they also include an increased charge of 92.5 cents per ton milled for development, as against 52 cents last year. During the year an increase of about 50 cents per shift was granted to employees in an endeavor to attract more labor. An ample supply of labor for operations is now available. In regard to ore reserves, the report points out the futility of endeavoring to accurately estimate the tonnage and value of ore bodies in the Dome. The belief of the general manager is that the limited amount of development work which it is possible to accomplish has disclosed ore equivalent in value to that milled during the past year.

**Tuckett Tobacco Company, Limited.**—Although earnings did not match up to the previous year, the company's report for the year ended March 31, 1921, is satisfactory from many points of view. Profits for the year, after deduction of all expenses amounted to \$255,753, which compared with the higher showing in 1920 of \$333,131, and with \$264,114 in 1919. After payment of preferred dividends amounting to \$140,000, there remained net earnings amounting to \$115,753 as compared with \$193,131 a year ago and \$124,114 in 1919. These net earnings are equivalent to 4.63 per cent. earned on the common stock outstanding of \$2,500,000; as compared with

7.72 per cent. earned in 1920 and 4.96 per cent. in 1919. After deduction of common dividends, of which \$100,000 were paid as against \$50,000 in 1920 and nothing in 1919, surplus remaining was \$15,753 as against \$143,131 in 1920 and \$124,114 in 1919, this bringing the profit and loss credit up to \$620,931 against \$605,178 in 1920 and \$462,047 in 1919.

Turning to the balance sheet shows that in spite of the trade adjustment and business depression, the company has maintained a good liquid position. Net working capital, exclusive of sundry investments, amounted to \$2,047,615 at the end of the last fiscal year as compared with \$2,028,720 a year ago. The feature in this connection is the manner in which current liabilities have been scaled down. This year they amounted to only \$378,273, as compared with \$923,298 the previous year, most of the figures representing bills and accounts payable. Current assets amounting to \$2,425,888 compare with \$2,952,018 at the end of 1920.

Some of the principal changes in the accounts in the balance sheet are as follows:—

	1921.	1920.
Property .....	\$3,023,693	\$3,050,205
Investments .....	69,624	45,853
Inventories .....	1,855,959	2,330,675
Payables .....	318,273	863,298

Howard S. Ambrose, the president of the company, in his report to shareholders, points out that the strong liquid position shown by the company in previous years has been maintained, and the reduction in inventory has been offset by a reduction in bills and accounts payable. Referring to the decline of \$77,378 in profits for the year, he says this is accounted for by a cessation of export business and a reduction in price of manufactured tobacco during the latter part of the year.

**Riordon Company, Limited.**—In an endeavor to open the hearts of shareholders and to acquaint their minds more with the position in which their company is situated, the Royal Securities Corporation has issued a letter showing exactly where the Riordon Company stands, and what its prospects are for the future. The directors of this large pulp and paper enterprise and all of those who have investigated all of the details are firm in their belief that with sufficient working capital to help the company out of the pit into which it has fallen, the ambitions of those who were instrumental in bringing about the expansion of the corporation will surely be realized.

The two main points of the Royal Securities' document consist in the announcement that in addition to the \$5,000,000 offering to shareholders, a further flotation of \$3,000,000 of 8 per cent. 20-year first mortgage bonds must be attempted if the net liquid assets of the company are to be brought up to the \$5,500,000 total stipulated in the previous letter of May 6; and, secondly, in the valuation of the assets of the company at \$42,500,000, a somewhat more conservative figure than most shareholders entertained. Summarized, the assets of the company are:—

Pulp mills at Kipawa, Hawkesbury and Merritt- ton, 1912 appraisal, plus subsequent addi- tions at cost .....	\$22,000,000
Sawmills, land, buildings, machinery and equip- ment .....	2,000,000
12,000 miles of pine and pulpwood timber limits.	12,000,000
Investments, including Tiendoroza shares.....	1,000,000
Net current assets on completion of present financing .....	5,500,000
Total .....	\$42,500,000

## Let's Be Reasonable

**D**OES any reader of this page believe that *at this time* a re-adjustment of wages and hours in the printing industry involving an increase in labor costs of 36 per cent. is justified?

"Well," the reader asks, "What *are* present wages and hours?"

Toronto printers now have a minimum wage scale of \$35.20 per week for 48 hours. This is an increase of 10 per cent. over the scale called for in the agreement now expiring and was granted voluntarily by employers a year ago.

Their demands now are for a wage of \$44 per week for 44 hours.

This is an increase of \$8.80 per week for 4 hours less work.

It means an increase in labor costs of 36 per cent.

Toronto employing printers feel that they cannot grant these demands, and they believe that the general public will support them in their opposition to an increase of from 73 cents per hour to \$1.00 per hour to printers, pressmen, bookbinders and mailers, *at the present time* and in view of business conditions *as they now exist*.

It is understood that International Union officials at Indianapolis have issued orders to local unions that the 44-hour week must be the basis of all new agreements.

In this order, employing printers believe that these Indianapolis officials are out of line with the need which is apparent in every industry for lower cost of production.

This is not a time for saddling any industry with an additional 36 per cent. labor cost, and publishers and job printers feel that they are justified—in the interest of the public—in resisting this unreasonable demand from Indianapolis.

The issue will be decided between now and June 1st. If the Union demands of an increased wage of \$8.80 per week for 4 hours less service are not withdrawn, a strike seems inevitable.

Pressure, therefore, must be brought to bear upon the officials at Indianapolis. They must be shown by members of the local union (many of whom feel that they are being forced to make unreasonable demands) that the Canadian public which buys the product of the printing craft, either in the form of advertising or subscription, does not look with favor upon any ruling which would add so heavily to the cost of that product.

Publishers and job printers in Toronto want to be fair. This is indicated by their action in voluntarily raising wages a year ago.

They must, however, in justice to themselves and the public they serve, resist these impossible demands.

## Let's Be Reasonable

An expression of opinion of readers of this paper on the Union's proposals, involving an increase of 36 per cent. in the labor cost of printed matter is asked. Will you not write a letter to the editor (not for publication) telling him your view of the situation.

*This statement is published by and has received the endorsement of the Toronto publishers who are members of the*

**Canadian National Newspapers and Periodicals Association**  
including THE MONETARY TIMES OF CANADA.

As against these assets of \$42,500,000, on the completion of the present financing, there will be outstanding \$27,000,000 of bonds and mortgages on the combined Riordon and Gatineau companies, bearing an average rate of interest of about 7½ per cent., maturing principally in 1929, 1931, 1940, and 1942, and provision is made under reasonable restrictions in the mortgage, which matures in 1940, for the refunding of bonds and timber limit mortgages, with the exception of the Gatineau mortgages, which mature prior to that date. The surplus of assets over bonded liabilities are thus \$15,000,000, which would be available to back the \$10,000,000 of 8 per cent. first preferred shares. The annual interest charges on all bonds, the latter states, will amount to just under \$2,000,000 a year. Earnings should be sufficient to meet this. But in case they are not for the years 1921 and 1922 provision is being made to shoulder the deficit.

The letter refers to the query that has often been asked as to whether the company's holdings of timber lands, while valuable, are not excessive as compared to the manufacturing capacity and operations of the company, and remarks: "It is inevitable that some day a large pulp or paper mill, with a capacity of perhaps 400 tons per day, will be constructed and supplied from the immense quantities of pulpwood on these limits and the power obtained from the valuable waterpower at Chelsea, on the Gatineau River, of an estimated capacity of 40,000 horsepower, which is owned by the company. It is the opinion of experienced lumbermen that this reserve for the future development of the company need not be considered a material burden because of the fact that, year in and year out, profits to be derived from the pine lumber operations alone should be sufficient to substantially offset the interest charges on this portion of the company's properties. At the present rate of cutting, this pine lumber business should continue for 15 years, and it is obvious that long before that time, a pulp and paper development must follow at the right time on a very large scale. To supply the large and growing market for the products manufactured by the Riordon Company, many new and similar plants must be built in years to come, but we do not believe that such enterprises can be built up in the future with such advantageous facilities at any less cost than the foregoing valuation."

### THE BANK OF MONTREAL

The swinging back to more normal conditions is vividly reflected in the semi-annual report of the Bank of Montreal. All loans accounts with the exception of advances to municipalities, show large downward revisions since October last, while circulation and deposits likewise reveal a substantial falling off.

With regard to the last mentioned accounts, it is shown that deposits not bearing interest amount to \$105,754,451, and presumably, this figure includes balances due to the Dominion government, for such an account is not shown separately as in the previous statement. The following figures illustrate the transition in the bank's general business since the close of the last fiscal year:—

	Oct., 1920.	April, 1921.
Current loans in Canada	\$223,495,472	\$206,049,886
Current loans abroad	17,619,853	15,988,753
Call loans abroad	99,017,883	77,946,749
Interest bearing deposits	322,578,613	310,846,487
Dep. not bearing interest	111,739,215	105,754,451
Balance due Dominion gov.	17,657,119	.....
Total assets	560,150,812	507,199,946

In the face of these rather drastic readjustments, the bank has maintained its strong financial position, and the earning power of this old institution has not suffered impairment. The ratio of quick assets to liabilities to the public is almost twenty per cent., while the ratio of liquid assets is somewhat more than fifty-five per cent. Net profits for the half year amounted to \$1,910,077, as compared with \$1,802,585 in the same period last year.

### RECENT FIRES

Loss for Week Totals \$624,950, Compared with \$1,410,000 Last Week—Town of Bic, Que., Suffered Heaviest Loss

**Bic, Que.**—May 21—Four stores, two private residences and a garage. Loss, \$200,000, partly covered by insurance.

**Hamilton, Ont.**—May 22—Two houses at 31 and 33 Hawthorne Ave., owned by W. Webb and John Aldis. Cause, lightning. Loss, \$200.

**New Glasgow, N.S.**—May 22—Aberdeen Hospital. Loss, \$10,000.

**Ottawa, Ont.**—May 18—Stable and warehouse of J. Alph Langelier and Kennedy and Co., at 293 Sparks St. Loss, \$4,000.

**May 19**—Outbuildings adjacent to Wm. Freedman, Ltd., junk shop.

**May 21**—Residences at 166, 168 and 170 Cathcart St., belonging to Lapointe estate. Loss, \$750. Residence and barns belonging to Richard Payne, of South Hull. Loss, \$7,000.

**May 22**—Carpet factory, owned by Therien and Co., at 107 Chapel St. Loss, \$130,000; insurance, \$10,000 on building. **St. Lambert, Que.**—May 24—Pile of poles belonging to the Montreal and Southern Counties Railway Co. Cause, fire crackers.

**Sayabec, Que.**—May 20—Fifteen buildings, including the Dominion Hotel, the Provinciale Bank and several stores and houses. Cause, explosion. Loss, \$175,000.

**Sorel, Que.**—May 20—Barn belonging to A. Mandeville. Loss, \$10,000.

**Stratford, Ont.**—May 21—Plant of the Stratford Woodstock Co. Cause, spontaneous combustion. No insurance.

**Toronto, Ont.**—May 19—Scythe Waste Co. store sheds, 69-71 Florence St. Cause, spark from locomotive. Loss, \$3,000.

**Windsor, Ont.**—May 19—Auditorium building. Loss, \$35,000.

### ADDITIONAL INFORMATION CONCERNING FIRES

**Emerald, Ont.**—May 10—General store of Henry A. McGinn was destroyed, with a loss of \$5,000. There is a \$3,000 insurance in the London Guarantee and Accident Co.

**Manitoba.**—During the month of April there were 159 fires in the province, with a loss of \$223,412. There were 51 dwellings damaged, and 29 fires in farm buildings. Overheated and defective chimneys were responsible for 18 fires, careless smokers caused 15, and stoves and furnaces were responsible for 28. During the month there was one fatality.

**Vancouver, B.C.**—May 5—The shingle mill belonging to Joseph Chew Lumber Shingle Mfg. Co., Ltd. destroyed. The loss is \$40,000, with insurance of \$48,500 in the Ohio Millers, Old Colony Insurance Co., North River, Lloyds, Motor Union, British Crown, Mechanic Traders, Industrial and Richmond Insurance Co. of New York.

### CORPORATION AND GENERAL INVESTMENTS, LTD.

A new firm in the underwriting field, specializing in industrial bonds and stocks, is Corporation and General Investments, Ltd. It has a Dominion charter, with head office in Toronto, and capital of \$100,000. Branches are being opened in New York and in London. S. W. Tanfield is a director, and D. Crager is manager of the Toronto branch.
